Echoes of Exile - Ines Rotermund-Reynard
2014-12-12

Thousands of people were driven into exile by Germany's National Socialist regime from 1933 onward. For many German-speaking artists and writers Paris became a temporary capital. The archives of these exiles became "displaced objects" - scattered, stolen, confiscated, and often destroyed, but also frequently preserved. This book assesses previously unknown source material stored at the Moscow State Military Archive (RVGA) since the end of the war, and offers new insights into the activities of German-speaking exiles in the 1930s in Paris and Europe. Against the backdrop of current debates surrounding displaced cultural goods and their restitution, this work seeks to facilitate a transnational, interdisciplinary scientific dialogue.

European Elites and Ideas of Empire, 1917-1957 - Dina Gusejnova 2018-03-29

Who thought of Europe as a community before its economic integration in 1957? Dina Gusejnova illustrates how a supranational

European mentality was forged from depleted imperial identities. In the revolutions of 1917 to 1920, the power of the Hohenzollern, Habsburg and Romanoff dynasties over their subjects expired. Even though Germany lost its credit as a world power twice in that century, in the global cultural memory, the old Germanic families remained associated with the idea of Europe in areas reaching from Mexico to the Baltic region and India. Gusejnova's book sheds light on a group of German-speaking intellectuals of aristocratic origin who became pioneers of Europe's future regeneration. In the minds of transnational elites, the continent's future horizons retained the contours of phantom empires. This title is available as Open Access.

The Making of Modern Psychiatry - Ronald Chase 2018

The field of psychiatry changed dramatically in the latter half of the nineteenth century, largely by embracing science. The transformation was most evident in Germany, where many psychiatrists began to work concurrently in the clinic and the laboratory. Some researchers sought to discover brain correlates of mental illness, while others looked to experimental psychology for insights into mental dynamics. Featured here, are the lives and works of Emil Kraepelin - often considered the founder of modern scientific psychiatry, his teacher Bernhard Gudden, and his anatomist colleague Franz Nissl. The book describes scientific findings together with the methods used; it explains why diagnoses were then (and are still now) so difficult to make; it also explores mind-brain controversies. The Making of Modern Psychiatry will inform and delight mental health professionals as well as all persons curious about the origins of modern psychiatry. ``Ronald Chase has provided fascinating information about the 19th century scientists' thinking on behavioral disorders: how to identify them, how to treat them, how to understand them ... He is a terrific writer and has compiled very interesting stories that bring to life the thinking of the time and the condition of serious mental illnesses in their first stages of understanding ... The author weaves the work of the 20th to 21st centuries nicely into his story ... gives optimism for a brain-based understanding in the future." Carol

The Mad King - Greg King 1996

On August 25, 1995, the German Republic celebrated the 150th anniversary of the birth of the most scorned and most beloved monarch of modern times: Ludwig II. As a child, though physically beautiful, Ludwig was withdrawn and silent. Entering his teenage years, he determined that his desires were directed toward young men rather than the numerous girls presented as potential wives. Following a broken engagement to Princess Sophie of Austria, Ludwig never again considered marriage. After ascending the throne at the age of eighteen, Ludwig became devoted to his major passions: music and architecture.

Captivated by the music of Richard Wagner, the young king formed a bond with the composer and became his benefactor, enabling Wagner to create and produce his great operas. The royal love for architecture resulted in some of the world's most admired castles as well as the most extravagant. Berg, Hohenschwangau Castle, and Linderhof were jewels, but his crowning achievement, Neuschwanstein, rivaled any other on the continent, a monumental creation second only to the Hermitage. An intemperate ruler, Ludwig changed the course of European history almost against his will. He launched Bavaria into two wars, and, with Bismarck, created the German Second Reich. As Prussia's power grew, he watched the newly unified country come under the sway of the Hohenzollerns rather than his own Wittelsbachs. He assuaged his disappointment by lavishing more of his treasury on art and on funding a new opera house for Wagner's work. He would frequently watch a Ring performance as the sole member of the audience. His own government and family plotted against him, called him mad, and forcibly overthrew him. After a single day at a sanatorium and a prolonged visit with a doctor, he vanished. His body was found in a lonely lake outside Munich. Was it suicide? Or murder?

Moments of Valuation - Ariane Berthoin Antal 2015-01-29

The outcome of innovation processes are determined by complex, historically grown valuation practices. In this book, a wide range of innovations are taken into consideration, from small inventions like entertainment novelties to large societal changes through new technologies. The chapters observe the particular local or distributed sites in which their episodes of innovation take place, and they identify the initial dissonance among those judging a newly proposed alternative. The

emphasis of the inquiry, however, is on the practices of valuation that are at work when something succeeds in being "new". The authors represent a wide variety of sub-disciplines and national backgrounds in the social sciences. They share an interest in social valuation and a pragmatist approach. The differences between their empirical evidence reflect the wide variety of appearances that valuation takes in contemporary society. They are anthropologists, economic or cultural sociologists, organization researchers, historians or political scientists. A number of chapters deals with aesthetic valuation, as in the tasting of a new vintage, or in the socio-technical process that shaped successful synthesizer sounds. Other chapters discuss the judgment processes in organizations, like architect offices or consultancy firms, and processes of evaluation and valorization in larger fields of practice, like accounting or mathematics. The studies are both of interest in their various professional fields, and contribute to a more general understanding of the social and cultural conditions under which innovations fail and succeed.
