King, The Science of Psychology (NASTA Reinforced High School Binding) - Laura King 2010-10-22

The Science of Psychology: An Appreciative View treats psychology as an integrated science - placing function before dysfunction. The narrative shows where the various subfields of the science interconnect. This second edition provides a flexible solution for an AP Psychology

course. From its readable and lively prose to the adaptive questioning diagnostic tool and personalized study plan on Connect Psychology, *The Science of Psychology* ensures an accurate and timely understanding of psychology as a science. Pedagogical and analytical thinking aides, intersections, and Psychological Inquiry encourage students' critical thinking and active engagement with the reading. Laura King's contemporary, engaging, and personal writing style draws students into the text and encourages them to read more actively and critically. *The Science of Psychology* adapts to students individually and provides a roadmap for success that gets students reading and studying more frequently, effectively, and efficiently. The adaptive questioning diagnostic in the Connect Psychology web-based assignment and assessment platforms ensures students understand key chapter concepts. Connect Psychology - turnkey course setups are available almost immediately, or the course can be

customized at virtually any level. This makes The Science of Psychology perfect for face-to-face, online, or hybrid course delivery.

Technology and Society - Deborah G. Johnson
2008-10-17

An anthology of writings by thinkers ranging from Freeman Dyson to Bruno Latour that focuses on the interconnections of technology, society, and values and how these may affect the future. Technological change does not happen in a vacuum; decisions about which technologies to develop, fund, market, and use engage ideas about values as well as calculations of costs and benefits. This anthology focuses on the interconnections of technology, society, and values. It offers writings by authorities as varied as Freeman Dyson, Laurence Lessig, Bruno Latour, and Judy Wajcman that will introduce readers to recent thinking about technology and

provide them with conceptual tools, a theoretical framework, and knowledge to help understand how technology shapes society and how society shapes technology. It offers readers a new perspective on such current issues as globalization, the balance between security and privacy, environmental justice, and poverty in the developing world. The careful ordering of the selections and the editors' introductions give *Technology and Society* a coherence and flow that is unusual in anthologies. The book is suitable for use in undergraduate courses in STS and other disciplines. The selections begin with predictions of the future that range from forecasts of technological utopia to cautionary tales. These are followed by writings that explore the complexity of sociotechnical systems, presenting a picture of how technology and society work in step, shaping and being shaped by one another. Finally, the book goes back to considerations of the future, discussing twenty-first-century challenges that include

nanotechnology, the role of citizens in technological decisions, and the technologies of human enhancement.

Environmental Justice - Kristin Shrader-Frechette 2002-09-26

Shrader-Frechette offers a rigorous philosophical discussion of environmental justice. Explaining fundamental ethical concepts such as equality, property rights, procedural justice, free informed consent, intergenerational equity, and just compensation--and then bringing them to bear on real-world social issues--she shows how many of these core concepts have been compromised for a large segment of the global population, among them Appalachians, African-Americans, workers in hazardous jobs, and indigenous people in developing nations. She argues that burdens like pollution and resource depletion need to be apportioned more equally, and that there are compelling ethical grounds for remedying our environmental problems. She also argues that those affected by

environmental problems must be included in the process of remedying those problems; that all citizens have a duty to engage in activism on behalf of Environmental Justice; and that in a democracy it is the people, not the government, that are ultimately responsible for fair use of the environment.

American Law and Legal Systems - James V Calvi 2015-07-22

American Law and Legal Systems examines the philosophy of law within a political, social, and economic framework with great clarity and insight. Readers are introduced to operative legal concepts, everyday law practices, substantive procedures, and the intricacies of the American legal system. Eliminating confusing legalese, the authors skillfully explain the basics, from how a lawsuit is filed to the final appeal. This new edition provides essential updates to forensic and scientific evidence, contract law, family law, and includes new text boxes and tables to help students understand,

remember, and apply central concepts.

Ethical and Social Issues in the Information Age - Joseph M. Kizza 2013-03-09

An introduction to the social and policy issues which have arisen as a result of IT. Whilst it

assumes a modest familiarity with computers, the book provides a guide to the issues suitable for undergraduates. In doing so, the author prompts students to consider questions such as:
* How do morality and the law relate to each other?
* What should be covered in a professional code of conduct for information technology professionals?
* What are the ethical issues relating to copying software?
* Is electronic monitoring of employees wrong?
* What are the moral codes of cyberspace?
Throughout, the book shows how in many ways the technological development is outpacing the ability of our legal systems, and how different paradigms applied to ethical questions often proffer conflicting conclusions. As a result, students will find this a thought-provoking and valuable survey of the new and difficult ethical questions posed by the Internet, artificial intelligence, and virtual reality.

New Realities in Foreign Affairs - Volker Stanzel
2019-07-08

Moderne Diplomatie wirkt heute in viele Bereiche des modernen Lebens hinein. Sie ist zugleich selbst neuen Einflüssen ausgesetzt. Faktoren, die unsere Gesellschaften verändern, verändern auch unser Regierungshandeln, auch in der Außenpolitik, seien es Digitalisierung, emotionalisierte Sensibilitäten unserer Öffentlichkeiten oder nicht-staatliche internationale Akteure. Derartige Entwicklungen müssen von der Diplomatie aufgenommen werden, damit sie weiter als Instrument einer Regierung funktionieren kann. Regierungen sollten Wege finden, zwischen den neuen Bedürfnissen der Gesellschaft und den Notwendigkeiten legitimen Regierungshandelns zu vermitteln. Das Ziel sollte sein, als souveräner Staat handeln zu können und zugleich das Potential der tiefgreifenden gesellschaftlichen Veränderungen zu nutzen. Mit Beiträgen von Volker Stanzel, Sascha Lohmann,
