Property Rights Dynamics - Donatella Porrini
2012-07-26

Issues such as the patentability of scientific ideas, the market for organs and open source software are hotly debated and yet poorly understood. In particular, there is a great need for sound economic theorizing on such issues. There is also a need for a clear and concise exposition of the state-of-the-art of the economics of property rights. This book fulfils these various needs.

Intercultural Constitutionalism - Salvatore

Bonfiglio 2018-10-03

This book argues that the effective protection of fundamental rights in a contemporary, multicultural society requires not only tolerance and respect for others, but also an ethics of reciprocity and a pursuit of dialogue between different cultures of human rights. Nowadays, all cultures tend to claim an equitable arrangement that can be articulated in the terms of fundamental rights and in the multicultural organization of the State. Starting from the premise that every culture is and always was intercultural, this book elaborates a new, and more fundamentally, pluralist view of the relationship between rights and cultural identity. No culture is pure; from the perspective of an irreducible cultural contamination, this book argues, it is possible to formulate constitutional idea of diversity that is properly intercultural. This concept of intercultural constitutionalism is not, then, based on abstract principles, but nor is it bound to any particular cultural norm.

Rather, intercultural constitutionalism allows the interpretation of rights, rules and legal principles, which are established in different contexts.

The Legal Order - Santi Romano 2017-07-14 First published in 1917 (Part 1) and 1918 (Part 2), with a second edition in 1946, this is the first English translation of Santi Romano's classic work, *L'ordinamento giuridico* (The Legal Order). The main focus of *The Legal Order* is the notion of institution, which Romano considers to be both the core and distinguishing feature of law. After criticising accounts of the nature of law centred on notions of rule, coercion or authority, he offers a compelling conception, not merely of law as an institution, but of the institution as 'the first, original and essential manifestation of law'. Romano advances a

definition of a legal institution as any group who share rules within a bounded context: for example, a family, a firm, a factory, a prison, an association, a church, an illegal organisation, a state, the community of states, and so on. Therefore, this understanding of legal institutionalism at the same time provides a ground-breaking theory of legal pluralism whereby 'there are as many legal orders as institutions'. The acme of a jurisprudential current long overlooked in the Anglophone environment (Romano's work is highly regarded in France, Germany, Spain and South America, as well as in Italy), *The Legal Order* not only proposes what Carl Schmitt described as a 'very significant theory'. More importantly, it offers precious insights for a thorough rethinking of the relationship between law and society in today's world.

Fostering Accessible Technology through Regulation - Delia Ferri 2018-04-19

Technology has attracted an increasing level of attention within studies of disability and disability rights. Many researchers and advocates have maintained skepticism towards technology out of the fear that technology becomes another way to 'fix' impairments. These skeptical views, however, contrast with a more positive approach towards the role that technology can play in eliminating barriers to social participation. Legal scholarship has started to focus on accessibility and accessible technology and in conjunction with the recently adopted United Nations Convention on the Rights of Persons with Disabilities has put a great emphasis on accessibility, highlighting the role that accessible technology plays in the promotion and protection of the rights of people with disabilities. Against this background, this book gathers together different contributions that focus on enhancing the production,

marketing and use of accessible technology. Building upon previous academic studies and in light of the UNCRPD, accessible technology is considered a tool to increase autonomy and participation. Overall, this book attempts to show, through a multifaceted and interdisciplinary analysis, that different regulatory approaches might enhance accessible technology and its availability. This title was previously published as a special issue of the International Review of Law, Computers & Technology.

Family Law and Society in Europe from the Middle Ages to the Contemporary Era - Maria Gigliola di Renzo Villata 2016-08-04

This volume addresses the study of family law and society in Europe, from medieval to contemporary ages. It examines the topic from a legal and social point of view. Furthermore, it investigates those aspects of the new family legal history that have not commonly been examined in depth by legal historians. The

volume provides a new 'global' interpretative key of the development of family law in Europe. It presents essays about family and the Christian influence, family and criminal law, family and civil liability, filiation (legitimate, natural and adopted children), and family and children labour law. In addition, it explores specific topics related to marriage, such as the matrimonial property regime from a European comparative perspective, and impediments to marriage, such as bigamy. The book also addresses topics including family, society and European juridical science.

Neuroscience and Law - Antonio D'Aloia
2020-06-01

There have been extraordinary developments in the field of neuroscience in recent years, sparking a number of discussions within the legal field. This book studies the various interactions between neuroscience and the world of law, and explores how neuroscientific findings could affect some fundamental legal categories and how the law should be implemented in such cases. The book is divided into three main parts. Starting with a general overview of the convergence of neuroscience and law, the first part outlines the importance of their continuous interaction, the challenges that neuroscience poses for the concepts of free will and responsibility, and the peculiar characteristics of a "new" cognitive liberty. In turn, the second part addresses the phenomenon of cognitive and moral enhancement, as well as the uses of neurotechnology and their impacts on health, self-determination and the concept of

being human. The third and last part investigates the use of neuroscientific findings in both criminal and civil cases, and seeks to determine whether they can provide valuable evidence and facilitate the assessment of personal responsibility, helping to resolve cases. The book is the result of an interdisciplinary dialogue involving jurists, philosophers, neuroscientists, forensic medicine specialists, and scholars in the humanities; further, it is intended for a broad readership interested in understanding the impacts of scientific and technological developments on people's lives and on our social systems.

Gifts - Richard Hyland 2009-06-05

Gifts: A Study in Comparative Law is the first broad-based study of the law governing the giving and revocation of gifts ever attempted. Gift-giving is everywhere governed by social and customary norms before it encounters the law and the giving of gifts takes place largely outside of the marketplace. As a result of these two

characteristics, the law of gifts provides an optimal lens through which to examine how different legal systems engage with social practice. The law of gifts is well-developed both in the civil and the common laws. Richard Hyland's study provides an excellent view of the ways in which different civil and common law jurisdictions confront common issues. The legal systems discussed include principally, in the common law, those of Great Britain, the United States, and India, and, in the civil law, the private law systems of Belgium and France, Germany, Italy, and Spain. Professor Hyland also serves a critique of the dominant method in the field, which is a form of functionalism based on what is called the *praesumptio similitudinis*, namely the axiom that, once legal doctrine is stripped away, developed legal systems tend to reach similar practical results. His study demonstrates, to the contrary, that legal systems actually differ, not only in their approach and conceptual structure, but just as much in the

results.

Risk Perception, Culture, and Legal Change - Matteo Ferrari 2016-03-23

This study explores the reasons behind the different responses of the legal systems of Europe, Japan and the USA in coping with BSE, one of the major food safety crises in recent years. Making reference to the most recent advances on risk perception that cognitive and social sciences, such as legal anthropology and sociology of law, have experimented with, *Risk Perception, Culture, and Legal Change* examines the role that culture plays in moulding the process of legal change. Attention is focused on the regulative frameworks implemented to guarantee the safety of the food chain against the BSE menace and on the liability responses sketched to compensate the victims of mad cow

disease, showing how both these elements have been influenced by the cultural context within which they are situated.

Non-Contractual Liability Arising out of Damage Caused to Another - Christian von Bar
2009-08-17

"Non-contractual liability arising out of damage caused to another" is one of the three main non-contractual obligations dealt with in the DCFR. The law of non-contractual liability arising out of damage caused to another (in the Common Law known as tort law or the law of torts, but in most other jurisdictions referred to as the law of delict) is the area of law which determines whether one who has suffered a damage can on that account demand reparation (in money or in kind) from another with whom there may be no other legal connection than the causation of damage itself. Besides determining the scope and extent of responsibility for dangers of one's own or another's creation, this field of law serves to protect fundamental rights in the

private law domain, that is to say horizontally between citizens inter se. Based on pan-European comparative research which annotates the work, this volume presents model rules on liability. Explanatory comments and illustrations amplify the policy decisions involved. During the drafting process, comparative material from over 25 different EU jurisdictions has been taken into account. The work therefore is not only a presentation of a future model for European rules to come but provides also a fairly detailed indication of the present legal situation in the Member States.

Equity and Law - María José Falcón y Tella
2008-10-02

(ICT) Frameworks in Telehealth - Mamta Mittal
2022-08-22

This book aims to explore technology solutions and systems to help people in remote areas in order to improve medical care. Access to health care services is critical to good health, but residents of remote areas face a variety of access barriers. The obstacles faced by health care providers and patients in rural areas are very different from those in urban areas. This could be caused by economic factors, cultural and social differences, educational deficiencies, lack of recognition by legislators, and the sheer isolation of living in inland areas, all of which conspire to create health care disparities and hinder people living in inland areas in their struggle to lead normal, healthy lives. Based on available analyses, further progress is needed to promote appropriateness of care, address geographic imbalances in health care use, and prevent the spread of risk factors including chronic diseases and regular health problems.

To eradicate these problems, it is essential to develop a telemedicine system with ICT integration that will help patients in inland areas by using contemporary technologies: it would thus be possible for patients to meet their goals using these systems even without the presence of a physician since authenticated prescriptions are generated by doctors and can be transmitted to patients electronically. The volume will contain a number of ideas from researchers who are already working to find solutions and will give insights into exploring innovative methods and new systems developed.

Diritto civile - Cesare Massimo Bianca 2017

L'amministrazione di sostegno - Emilio Vito Napoli 2010-06-28

Il volume si occupa dell'istituto dell'amministrazione di sostegno, nuova disciplina introdotta nel codice civile con la

legge n. 6 del 2004, che ha istituito una nuova figura (quella dell'amministratore di sostegno, appunto) accanto agli altri istituti a tutela delle persone incapaci (interdizione, inabilitazione, incapacità naturale). Secondo quanto previsto dalla legge di riforma, infatti, tutti i soggetti che, a causa di una infermità o di una menomazione fisica o psichica si trovino nell'impossibilità (anche parziale o temporanea) di provvedere ai propri interessi, possono ora essere assistiti da un amministratore di sostegno, appositamente nominato dal giudice. Sono affrontati, tenendo conto della recente normativa e della giurisprudenza formatasi in materia, tutti gli aspetti caratterizzanti questo rivoluzionario istituto, a partire dal procedimento di nomina ad amministratore, per giungere agli effetti, alla responsabilità, fino alle possibili interferenze con altri istituti di diritto privato. STRUTTURA Parte I: L'amministrazione di sostegno. Parte II: Procedimento per la nomina dell'amministratore di sostegno Parte III: Effetti

dell'amministrazione Parte IV: Cessazione dell'amministrazione Parte V: Vigilanza sull'amministratore Parte VI: Responsabilità dell'amministratore di sostegno Parte VII: Possibili interferenze tra la carica di amministratore e gli altri istituti a tutela degli incapaci (interdizione, inabilitazione) Parte VIII: Interventi alternativi all'amministrazione di sostegno Parte IX: "Grandi questioni" Il volume ricalca la struttura tipica del Trattato teorico pratico di diritto privato diretto da Guido Alpa e Salvatore Patti; come è proprio di volumi del Trattato, anche questo si chiude con una parte dedicata interamente alle "Grandi questioni". All'interno è possibile trovare una selezione di casi che rappresentano una summa delle questioni di maggiore interesse, selezionate dall'autore, accompagnate da una soluzione data tenendo conto della normativa in materia e dalla più recente giurisprudenza. **Standard Contract Terms in Europe** - Hugh Collins 2008-01-01

Ever since the Directive on Unfair Terms in Consumer Contracts of 1993, the European project has been working intensively towards harmonization of contract law across all EU Member States. To date, virtually none of the many problems that have arisen have been resolved. The SECOLA Annual Conference convened in Prague in 2005 to consider the specific topic of unfair terms and to imagine ways in which the obstacles raised by this provocative issue might be overcome. In this book, which presents revised versions of the papers presented at that conference, fourteen outstanding European scholars examine basic questions about the differing conceptions of contract law in the national legal systems of the Member States, divergent legal techniques such as interpretation of contract and divergent approaches to legal reasoning, and contrasting views about the nature of the problems presented by unfair terms in contracts. Among the contentious matters discussed are the

following: the tension between party autonomy and social justice; control over freedom of contract in the name of substantive fairness and efficiency; interpretation of contract terms the intrusion of competition law into contract law; the disputed meanings of good faith and legitimate expectations; the requirement of 'plain intelligible language'; and characterization problems. Above all the essays ask: Can harmonization of European contract law be achieved? And if so, how? The answers offered not only clarify the stage we have arrived at in this ongoing initiative, but also identify the essential conflicts that must be understood if we are to secure meaningful regulation of contract terms at a transnational level. For these reasons the book is enormously valuable to all parties interested in this crucial component of European integration.

Brokering Europe - Antoine Vauchez 2015-02-26

Since the 1960s, the nature and the future of the European Union have been defined in legal terms. Yet, we are still in need of an explanation as to how this entanglement between law and EU polity-building emerged and how it was maintained over time. While most of the literature offers a disembodied account of European legal integration, *Brokering Europe* reveals the multifaceted roles Euro-lawyers have played in EU polity, notably beyond the litigation arena. In particular, the book points at select

transnational groups of multipositioned legal entrepreneurs which have been in a situation to elevate the role of law in all sorts of EU venues. In doing so, it draws from a new set of intellectual resources (field theory) and empirical strategies only very recently mobilized for the study of the EU. Grounded on an extensive historical investigation, *Brokering Europe* provides a revised narrative of the 'constitutionalization of Europe'.

The Collectio Avellana and Its Revivals - Rita Lizzi Testa 2019-01-31

The *Collectio Avellana* (CA) has an extraordinary richness and variety of content. Imperial rescripts, reports of urban prefects, letters of bishops, and exchanges of letters between popes and emperors, some of which only this compilation preserves, constitute an exceptional documentary collection for researchers of various sectors of antiquity. This volume is the first publication to reconstruct the history of this compilation through the fascinating questions

that it poses to the scholar. There are essays on its general structure, and on some of the most singular texts preserved therein. Other papers offer a comparison between this compilation and the other canonical collections compiled in Italy between the fourth and sixth centuries, as well as between the CA and other contemporary literary products. Adopting a new approach, some contributions also ascertain who could physically have access to the materials that were collected in the CA, and where the compiler could find them. All these fresh studies have led to new hypotheses regarding the period in which the collection, or at least some of its parts, took shape and the personality of its author.
