*Mark Twain's Book of Animals* - Mark Twain  
2011-07

"For those unaware—as I was until I read this book—that Mark Twain was one of America's early animal advocates, Shelley Fisher Fishkin's collection of his writings on animals will come as a revelation. Many of these pieces are as fresh and lively as when they were first written, and it's wonderful to have them gathered in one place." —Peter Singer, author of *Animal Liberation* and *The Life You Can Save* "A truly exhilarating work. Mark Twain's animal-friendly views would not be out of place today, and indeed, in certain respects, Twain is still ahead of us: claiming, correctly, that there are certain degraded practices that only humans inflict on one another and upon other animals. Fishkin has done a splendid job: I cannot remember reading something so consistently excellent."—Jeffrey Moussaieff Masson, author of *When Elephants Weep* and *The Face on Your Plate* "Shelley Fisher Fishkin has given us the lifelong arc of the great man's antic, hilarious, and subtly profound explorations of the animal world, and she's guided us through it with her own trademark wit and acumen. Dogged if she hasn't." —Ron Powers, author of *Dangerous Water: A Biography of the Boy Who Became Mark Twain* and *Mark Twain: A Life*

**Disposition** - Emmelyn Butterfield-Rosen  
2021-11-09

How artists at the turn of the twentieth century broke with traditional ways of posing the bodies of human figures to reflect modern understandings of human consciousness. With this book, Emmelyn Butterfield-Rosen brings a new formal and conceptual rubric to the study of turn-of-the-century modernism, transforming our understanding of the era's canonical works. Butterfield-Rosen analyzes a hitherto unexamined formal phenomenon in European art: how artists departed from conventions for posing the human figure that had long been standard. In the decades around 1900, artists working in different countries and across different media began to present human figures in strictly frontal, lateral, and dorsal postures. The effect, both archaic and modern, broke with the centuries-old tradition of rendering bodies in torsion, with poses designed to simulate the human being's physical volume and capacity for autonomous thought and movement. This formal departure destabilized prevailing visual codes for signifying the existence of the inner life of the human subject. Exploring major works by Georges Seurat, Gustav Klimt, and the dancer and choreographer Vaslav Nijinsky—replete with new archival discoveries—*Modern Art and the Remaking of Human Disposition* combines intensive formal analysis with inquiries into the history of psychology and evolutionary biology. In doing so, it shows how modern understandings of human consciousness and the relation of mind to body were materialized in art through a new vocabulary of postures and poses.

### **Roman Children's Sarcophagi** - Janet

Huskinson 1996

This book is the first major study of the themes which were used in the decoration of sarcophagi made for children in Rome and Ostia from the late first to early fourth century AD. It provides a selective catalogue of examples of each type, followed by discussion of how these fit into the general pattern. This allows certain themes to be identified which are virtually exclusive to children's sarcophagi. The second part of the book discusses the choice of subjects and how these reflect the standing of children in Roman society: to what extent, for instance, was childhood shown as a differentiated stage in life, or was it dominated by aspirations of the adult world? How is the death of a child treated in art? There are separate sections on the role of workshops and customers in the development of child specific imagery, and on material from the early Christian era, providing some interesting distinctions resulting from differing attitudes towards children and beliefs about life and death.

### Racist Love - Leslie Bow 2022-03-04

In *Racist Love* Leslie Bow traces the ways in which Asian Americans become objects of anxiety and desire. Conceptualizing these feelings as "racist love," she explores how race is abstracted and then projected onto Asianized objects. Bow shows how anthropomorphic objects and images such as cartoon animals in

children's books, home décor and cute tchotchkes, contemporary visual art, and artificially intelligent robots function as repositories of seemingly positive feelings and attachment to Asianness. At the same time, Bow demonstrates that these Asianized proxies reveal how fetishistic attraction and pleasure serve as a source of anti-Asian bias and violence. By outlining how attraction to popular representations of Asianness cloaks racial resentment and fears of globalization, Bow provides a new means of understanding the ambivalence surrounding Asians in the United States while offering a theory of the psychological, affective, and symbolic dynamics of racist love in contemporary America.

### Our Transgenic Future - Lisa Jean Moore

2022-07-05

"Genetic modification, especially in regards to the creation of transgenic animals, has long been a source of controversy, fear, and fascination. *Our Transgenic Future* explores the creation, the ethical ramifications, and the symbolic resonances of one particular transgenic invention: a goat that creates spider silk. Lisa Jean Moore's new work draws from years of ethnographic research as well as her personal experiences with genetic engineering in the form of reproduction through artificial insemination. Her book provides an in depth look at the birth of the spider goat, chronicling its creation chapter by chapter. However, the

animal is constantly connected to a variety of larger themes, including humanity's reciprocal interaction with nature, the figure of the "mad scientist," and the experience of aging and obsolescence"--

The Way of the Hare - Marianne Taylor  
2017-06-15

To the people of rural Britain, hares are deeply beloved, perhaps above all other animals. They thrive in abundance in imagery but can be maddeningly elusive in reality. In our stories - ancient and modern - they are magical, uncanny and illogical beings which commune with the moon, vanish at will, and lose their minds when spring arrives. Yet despite the breadth and depth of its legends, the brown hare of the lowlands is a relative newcomer to our islands, and our 'real' ancient hare is the mountain hare of the most unforgiving high mountainsides. Hares of myth have godly powers, but real, earthbound hares walk a dangerous line - they are small animals with many predators but have no burrow or tunnel to shelter them from danger. They survive by a combination of two skills honed to unimaginable extremes - hiding in plain sight, and running faster than anything and anyone. The need to excel as hiders and runners ultimately directs every aspect of hare biology and behaviour, as well as inspiring our own wild ideas about hare-kind. This book explores hares as they are and as we imagine them, and the long and often bloody history of our association with these enigmatic animals. Elegant studies of molecular biology and biomechanical physics help us understand how hares are put together, while centuries of game estate records reveal how humans have commodified and exploited them. But it is ultimately the moments spent in the company of wild hares that allow us to bring together myth and reality to celebrate the magic of the living animal.

**The Messianic Reduction** - Peter Fenves 2011  
The Messianic Reduction is the first study of Benjamin's early philosophy that takes into consideration the full range of his work, with particular emphasis on its complex relation to phenomenology, Kant and neo-Kantianism, and certain developments in mathematics.

*When Children Became People* - Odd Magne Bakke

Bakke paints a fascinating picture of children's first real emergence as people against a backdrop of the ancient world. Using theological and social history research, Bakke compares Greco-Roman and Christian attitudes toward abortion and child prostitution, pedagogy and moral upbringing, and the involvement of children in liturgy and church life. He also assesses Christian attitudes toward children in the church's developing doctrinal commitments. Today, growing numbers of children are impoverished, exploited, abandoned, orphaned, or killed. Bakke's insightful work begins to untangle the roots of their complex plight.

**Classrooms that Work** - Patricia Marr Cunningham 1994

Offers a blueprint for classrooms that accelerate literacy learning of children who find learning to read and write difficult.

*The Essence of Strategic Giving* - Peter Frumkin  
2010-09-15

In the face of global financial problems and stressed government budgets, the ability of private philanthropy to step in and help solve public problems—and support vital private institutions as well—has perhaps never been more important. But how can donors be sure their contributions will be effective? And how can fundraisers make their case for support in a way that is compelling and productive? With *The Essence of Strategic Giving*, Peter Frumkin distills the lessons of his comprehensive, award-winning study, *Strategic Giving*, into a concise, practical guide for everyone involved in private philanthropy, from donors to managers of nonprofits to fund-raisers. He defines five critical challenges that all donors must address if their philanthropy is to amount to more than indiscriminate charity, including being aware of the time frame that guides a gift, specifying the intended impact being pursued, and recognizing how a donation fits with a donor's own identity and style. Acknowledging and understanding these fundamental, strategic aspects of giving, Frumkin argues, will help ensure philanthropy that more effectively achieves its aims—and at the same time builds a lasting relationship between donors and the institutions they

support. As the next generation of donors wrestle with the challenge of effectively distributing what Andrew Carnegie called "surplus wealth," Frumkin's road map will be an indispensable resource for years to come.

Philosophy in Children's Literature - Peter R. Costello 2012

"This book seeks to join the ongoing, interdisciplinary approach to children's literature by means of sustained readings of individual texts by means of important works in the history of philosophy. Its inclusion of authors from both various departments--philosophy, literature, religion, and education--and various countries is an attempt to show how traditional boundaries between disciplines might become more permeable and how philosophy offers important insights to this interdisciplinary, critical conversation"--provided by publisher.

**Strategic Giving** - Peter Frumkin 2008-09-15

The philanthropic landscape is changing dramatically as a new generation of wealthy donors seeks to leave its mark on the public sphere. Peter Frumkin reveals in *Strategic Giving* why these donors could benefit from having a comprehensive plan to guide their giving. And with this thoughtful and timely book, he provides the much-needed framework to

understand and develop this kind of philanthropic strategy. After listening for years to scores of individual and institutional funders discuss the challenges of giving wisely, Frumkin argues here that contemporary philanthropy requires a thorough rethinking of its underlying logic. Philanthropy should be seen, he contends, as both a powerful way to meet public needs and a meaningful way to express private beliefs and commitments. He demonstrates that finding a way to simultaneously fulfill both of these functions is crucial to the survival of philanthropy and its potential to support pluralism in society. And he goes on to identify the five essential elements donors must consider when developing a philanthropic strategy—the vehicle through which giving will flow, the way impact will be achieved, the level of engagement and profile sought, the time frame for giving, and the underlying purpose of the gift.

Frumkin's point is that donors must understand strategic giving as the integration of these five critical dimensions to giving. Essential reading for donors, researchers, and anyone involved with the world of philanthropy, *Strategic Giving* provides a new basis for understanding philanthropic effectiveness and a promising new way for philanthropy to achieve the legitimacy that has at times eluded it.

Unlock the Zodiac - Sasha Fenton 2019-07

Some people believe they are absolutely typical of their sun sign, while others see little of themselves in the descriptions given in most astrology books. Written for beginners as well as astrology students, this informative volume explains why one sun sign can include many different personalities. There are many possible astrological reasons for the diversification within each sign, but this book demonstrates two main factors that are easy for a complete beginner in astrology to understand and to use: decans and dwads. The system presented here is simple and effective and does not require learning the complexities of chart interpretation. Each sign of the zodiac can be divided into three sections called decans, and each decan can be divided into four dwads. These divisions can lead to many variations in personalities of people born under a specific sign, including those between twins. Determine your decan and dwad on the easy-to-use tables provided, then see what their interpretations say about your life. Find out how to progress your sun sign to check out trends and events for any year of your life. After you've evaluated yourself, you can enjoy doing the same for your family and friends. Although perfect for beginners, the simplicity of this approach makes it a handy tool for working astrologers and includes information on gender, elements, and qualities and how they relate to the sun sign.

**The Essential Child** - Susan A. Gelman  
2005-04-21

Essentialism is the idea that certain categories, such as "dog," "man," or "intelligence," have an underlying reality or true nature that gives objects their identity. Where does this idea come from? In this book, Susan Gelman argues that essentialism is an early cognitive bias. Young children's concepts reflect a deep commitment to essentialism, and this commitment leads children to look beyond the obvious in many converging ways: when learning words, generalizing knowledge to new category members, reasoning about the insides of things, contemplating the role of nature versus nurture, and constructing causal explanations. Gelman argues against the standard view of children as concrete or focused on the obvious, instead claiming that children have an early, powerful tendency to search for hidden, non-obvious

features of things. She also attacks claims that children build up their knowledge of the world based on simple, associative learning strategies, arguing that children's concepts are embedded in rich folk theories. Parents don't explicitly teach children to essentialize; instead, during the preschool years, children spontaneously construct concepts and beliefs that reflect an essentialist bias. Essentialist accounts have been offered, in one form or another, for thousands of years, extending back at least to Aristotle and Plato. Yet this book is the first to address the issues surrounding essentialism from a psychological perspective. Gelman synthesizes over 15 years of empirical research on essentialism into a unified framework and explores the broader lessons that the research imparts concerning, among other things, human concepts, children's thinking, and the ways in which language influences thought. This volume will appeal to developmental, cognitive, and social psychologists, as well as to scholars in cognitive science and philosophy.

Pirate's Perfect Pet - Beth Ferry 2016

Pirates, pets and puns run amok as a swaggering but softhearted captain swashbuckler embarks on a daring quest to find a perfect animal sidekick.

*Talking Animals in Children's Fiction* - Catherine Elick 2015-03-11

Talking-animal tales have conveyed anticruelty messages since the 18th-century beginnings of children's literature. Yet only in the modern period have animal characters become true subjects rather than objects of human neglect or benevolence. Modern fantasies reflect the shift from animal welfare to animal rights in 20th-century public discourse. This revolution in literary animal-human relations began with Lewis Carroll's *Alice's Adventures in Wonderland* and continued with the work of Kenneth Grahame, Hugh Lofting, P.L. Travers and E. B. White. Beginning with the ideas of literary theorist Mikhail Mikhailovich Bakhtin, this book examines ways in which animal characters gain an aura of authority through using language and then participate in reversals of power. The author provides a close reading of 10 acclaimed British and American children's fantasies or series published before 1975.

Authors whose work has received little scholarly

attention are also covered, including Robert Lawson, George Selden and Robert C. O'Brien.

**Schools that Work** - Richard L. Allington 2007  
At a time when so many pivotal education issues are closely tied to the performance of schools and NCLB policy, *Schools That Work* provides critical insight into elementary schools and how these must change if they are to meet the increased demands of education for the 21st century. In response to the increased pressure on teachers to develop high levels of reading and writing proficiency for ALL students, renowned authors Dick Allington and Pat Cunningham continue their commitment to foster expert teaching in every classroom. The Third Edition of *Schools That Work* builds from this emphasis on developing the expertise of classroom teachers to a dynamic analysis of systematic school reform that encompasses virtually all areas of elementary school organization and planning. With its goal of turning readers into educated, informed decision-makers, Allington and Cunningham provide a clear and concise introduction that offers a strong focus on the basic theories of school reform and includes an organizational framework to accomplish this goal. Often praised as the most accessible, readable and practical book, while grounded in proven practices and current research, *Schools That Work* describes the critical features of school organization plans at the elementary level (e.g., professional roles, organization of time, curriculum, student assessment, professional development, and parental involvement) that can support or impede developing more effective educational settings. Perfect for those who are preparing to be elementary principals, those serving on elementary school leadership teams and those preparing to be reading supervisors, reading coaches, reading specialists, and elementary education supervisors.

Nordic Literature - Steven P. Sondrup  
2017-12-15

*Nordic Literature: A comparative history* is a multi-volume comparative analysis of the literature of the Nordic region. Bringing together the literature of Finland, continental Scandinavia (Sweden, Norway, Denmark, and Sápmi), and the insular region (Iceland, Greenland, and the Faroe Islands), each volume of this three-volume project adopts a new frame

through which one can recognize and analyze significant clusters of literary practice. This first volume, *Spatial nodes*, devotes its attention to the changing literary figurations of space by Nordic writers from medieval to contemporary times. Organized around the depiction of various "scapes" and spatial practices at home and abroad, this approach to Nordic literature stretches existing notions of temporally linear, nationally centered literary history and allows questions of internal regional similarities and differences to emerge more strongly. The productive historical contingency of the "North" as a literary space becomes clear in this close analysis of its literary texts and practices.

**Cozy** - Jan Brett 2020-10-20

A New York Times Bestseller! A group of clever animals find an unusual but warm and furry home during Alaska's long winter in Jan Brett's newest snowy adventure. *Cozy* is the softest musk ox in Alaska, with the warmest fur you ever did feel. When a storm hits while he's separated from his family, he starts to feel lonely—but not for long. As the snow piles up, animals start to notice just how warm and cozy *Cozy* really is! One mama lemming has a bright idea . . . maybe the best place to spend the winter is under *Cozy's* fur! As more and more animals burrow in, *Cozy* adds to the house rules: quiet voices, gentle thumping, claws to yourself, no biting, and no pouncing. That seems easy enough . . . until the lemmings, snowshoe hare, snowy owl, arctic fox, and wolverine begin to bicker. Luckily, signs of spring soon appear, and that means *Cozy* can find his herd and his new friends can head to their summer homes. But not before promising to get cozy with *Cozy* next year! Jan Brett brings a new lovable character to life through this gorgeous tale of sharing, friendship, and living in harmony. Snuggle up with all of Jan Brett's snowy treasures: *The Mitten*, *The Hat*, *The Snowy Nap*, *The Three Snow Bears*, and *The Trouble With Trolls*.

*Journal of Zoöphily* - 1913

*Our Children and Other Animals* - Matthew Cole

2016-05-23

Focusing on the socialization of the human use of other animals as resources in contemporary Western society, this book explores the cultural reproduction of human-nonhuman animal relations in childhood. With close attention to the dominant practices through which children encounter animals and mainstream representations of animals in children's culture - whether in terms of the selective exposure of children to animals as pets or as food in the home or in school, or the representation of animals in mass media and social media - *Our Children and Other Animals* reveals the interconnectedness of studies of childhood, culture and human-animal relations. In doing so it establishes the importance of human-animal relations in sociology, by describing the sociological importance of animals in children's lives and children in animals' lives. Presenting a new typology of the various kinds of human-animal relationship, this conceptually innovative book constitutes a clear demonstration of the relevance of sociology to the interdisciplinary field of human-animal relations and will appeal to readers across the social sciences with interests in sociology, childhood studies, cultural and media studies and human-animal interaction.

Who Is This Child? - John Ortberg 2012-10-02

The child in Bethlehem would grow up to be a friend of sinners, not a friend of Rome. He would spend his life with the ordinary and the unimpressive. He would pay deep attention to lepers and cripples, to the blind and the beggar, to prostitutes and fishermen, to women and children. He would announce the availability of a kingdom different from Herod's. A kingdom where blessings—full value and worth with God—was now conferred on the poor in spirit and the meek and the persecuted. People would not understand all this meant. According to pastor and bestselling author John Ortberg in *Who Is This Child*, we still do not. But a revolution was starting, a slow, quiet, movement

that began at the bottom of society and would undermine the pretensions of the Herods. It was a movement that was largely underground, like a cave around Bethlehem, where a dangerous baby was born and hidden from a king. Strange reversal. Men who wore purple robes and glittering crowns and gaudy titles began to look ridiculous. And yet the figure of the child born in a manger only grew in stature. Adapted from John Ortberg's book, *Who Is This Man?*
