Stephen Mettling 2019-11-20

Features of Georgia Real Estate License Exam Prep (GA-RELEP): National Principles & Law Key Point Review (60 pages) Real Estate Math Key Formula Review & Practice (17 pages) Georgia-Specific Laws and Practices (37 pages) National Practice Tests (500 questions) Georgia Practice Tests (125 questions) Georgia Sample Exam (100 questions) We know the real estate licensing exam can be tough, and very nerve-racking to prepare for. That's why we created the Georgia Real Estate License Exam Prep (GA-RELEP) the way we did. Since we have been managing real estate schools and developing curriculum for forty years, we know how all this works - or fails to work. GA-RELEP is comprehensive in that it contains both key content review and testing practice. And the text review is Georgia-specific - not just simplistic national content, but terse, relevant and accurate Georgia laws and regulations presented as a well-organized set of state 'key point reviews' ideal for pre-test memorization. But let's not dismiss the importance of the national content either. GA-RELEP's national key point reviews are a succinct compression of tested national principles and practices that comprise the national portion of state license exams from coast to coast. Our content is drawn from our own national textbook, Principles of Real Estate Practice - one of the most widely used principles textbooks in the country. Finally, our national content, as well as our question selection, is further tailored to the state testing outline

promulgated by AMP/PSI for Georgia. Thus the breadth and depth of the law reviews and test questions reflect the topic emphasis of your state's testing service and your Georgia license exam. A word about the test questions... GA-RELEP's testing practice section consists of ten national practice tests, three state practice tests, and one state exam sample test. The practice tests are roughly 50 questions in length and the sample test is 100 questions. The test questions are designed to cover the content covered by the law reviews - which reinforces your learning of the total body of information tested by your state exam. The questions are direct, to the point, and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. You may also note that each question's answer is accompanied by a brief explanation, or "rationale" to further reinforce your understanding. In the end, as you know, it's all up to you. Unlike other publications, we are not going to tell you that using this book will guarantee that you pass your state exam. It still takes hard work and study to pass. But we have done our best here to get you ready. Following that, the most we can do is wish you the best of success in taking and passing your Georgia real estate exam. So good luck!! We also publish the Georgia real estate principles textbook, Principles of Real Estate Practice in Georgia.

Real Estate Principles: A Value Approach - Wayne Archer 2017-02-22

Real Estate Principles: A Value Approach demonstrates how value is central to virtually all real estate decision-making. Students using Ling and Archer should finish the course with a value-oriented framework and a set of valuation and decision making tools that can be applied in a variety of real-world situations. The key to making sound investment decision is to

understand how property values are created, maintained, increased or destroyed. Since the launch of Real Estate Principles: A Value Approach, significant and lasting changes have come upon the world of real estate. This is very true in real estate finance and capital sources where most of the traditional lenders have been transformed or displaced, giving way to a radically different set of players in mortgage finance. There has been change with profound and far-reaching implications in a world where it is understandable that property values can go down as well as up. This realization will color every aspect of real estate investment, finance and transactions for the foreseeable future.

**Real Estate Principles** - David C. Ling 2020  
"The study and practice of real estate draws on a

multitude of disciplines including architecture, urban and regional planning, building construction, urban economics, law, and finance. This diversity of perspectives presents a challenge to the instructor of a real estate principles course. Depending on their backgrounds and training and on the interests of the students, some instructors may choose to emphasize the legal concepts that define and limit the potential value of real estate. Other instructors may focus more on licensing and brokerage issues (popular topics with many students) or on the investment decision-making process. **Economic Logic Fourth Edition** - Mark Skousen 2013-10-29

"Eureka! Skousen has done the impossible. Students love it! I will never use another textbook again."—Harry Veryser, University of Detroit-Mercy They said it couldn't be done.

Austrian economics is so different, they said, that it couldn't be integrated into standard "neo-classical" textbooks. Consequently, college students learn nothing about the great Austrian economists (Mises, Hayek, Schumpeter).

Professor Mark Skousen's Economic Logic aims to change that. Based on his popular course taught at Columbia University, Skousen starts his "micro" section with Carl Menger's "theory of the good" and the profit-and-loss income statement to explain the dynamics of the market process, entrepreneurship, and the advantages of saving. Then he uses a powerful Hayekian four-stage model of the economy to introduce "macro," including a new Austrian measure of spending at all stages of production (Gross Domestic Expenditures). Economic Logic also offers chapters on: The international gold standard, the defects of central banking, and the Mises/Hayek theory of the business cycle. A full critique of the Keynesian Aggregate Supply and Demand (AS-AD) model, and a revolutionary Austrian alternative. Entrepreneurship, the financial markets, environmental economics, monetary policy and inflation, federal spending and taxes, and government regulation. Leaders of all schools, including Austrian, Keynesians, Marxist, Chicago, and Public Choice.
