Pearl Harbor - Homer N. Wallin 2001-09-01

Pearl Harbor will long stand out in mens minds as an example of the results of basic unpreparedness of a peace loving nation, of highly efficient treacherous surprise attack and of the resulting unification of America into a single tidal wave of purpose to victory. Therefore, all will be interested in this unique narrative by Admiral Wallin. The Navy has long needed a succinct account of the salvage operations at Pearl Harbor that miraculously resurrected what appeared to be a forever shattered fleet. Admiral Wallin agreed to undertake the job. He was exactly the right man for it _ in talent, in perception, and in experience. He had served intimately with Admiral Nimitz and with Admiral Halsey in the South Pacific, has commanded three different Navy Yards, and was a highly successful Chief of the Bureau of Ships. On 7 December 1941 the then Captain Wallin was serving at Pearl Harbor. He witnessed the events of that shattering and unifying "Day of Infamy." His mind began to race at high speeds at once on the problems and means of getting the broken fleet back into service for its giant task. Unless the United States regained control of the sea, even greater disaster loomed. Without victory at sea, tyranny soon would surely rule all Asia and Europe. In a matter of time it would surely rule the Americas. Captain Wallin salvaged most of the broken Pearl Harbor fleet that went on to figure prominently in the United States Navys victory. So the account he masterfully tells covers what he masterfully accomplished. The United States owes him an unpayable debt for this high service among many others in his long career.

City - Douglas W. Rae 2008-10-01

How did neighborhood groceries, parish halls, factories, and even saloons contribute more to urban vitality than did the fiscal might of postwar urban renewal? With a novelist's eye for telling detail, Douglas Rae depicts the features that contributed most to city life in the early "urbanist" decades of the twentieth century. Rae's subject is New Haven, Connecticut, but the lessons he draws apply to many American cities. *City: Urbanism and Its End* begins with a richly textured portrait of New Haven in the early twentieth century, a period of centralized manufacturing, civic vitality, and mixed-use neighborhoods. As social and economic conditions changed, the city confronted its end of urbanism first during the Depression, and then very aggressively during the mayoral reign of Richard C. Lee (1954-70), when New Haven led the nation in urban renewal spending. But government spending has repeatedly failed to restore urban vitality. Rae argues that strategies for the urban future should focus on nurturing the unplanned civic engagements that make mixed-use city life so appealing and so civilized. Cities need not reach their old peaks of population, or look like thriving suburbs, to be once again splendid places for human beings to live and

work.

Assistive Technology Assessment Handbook - Stefano Federici 2017-11-23

Assistive Technology Assessment Handbook, Second Edition, proposes an international ideal model for the assistive technology assessment process, outlining how this model can be applied in practice to re-conceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability. The model provides reference guidelines for evidence-based practice, guiding both public and private centers that wish to compare, evaluate, and improve their ability to match a person with the correct technology model. This second edition also offers a contribution to the Global Cooperation on Assistive Technology (GATE) initiative, whose activities are strongly focused on the assistive products service delivery model. Organized into three parts, the handbook: gives readers a toolkit for performing assessments; describes the roles of the assessment team members, among them the new profession of psychotechnologist; and reviews technologies for rehabilitation and independent living, including brain-computer interfaces, exoskeletons, and technologies for music therapy. Edited by Stefano Federici and Marcia J. Scherer, this cross-cultural handbook includes contributions from leading experts across five continents, offering a framework for future practice and research.

Health Promotion Evaluation Practices in the Americas - Louise Potvin 2008-10-26

More and more, health promotion is a crucial component of public health, to the extent that public health interventions are called on to prove their effectiveness and appraised for scientific validity, a practice many in the field consider self-defeating. *Health Promotion Evaluation Practices in the Americas* cogently demonstrates that scientific rigor and the goals of health promotion are less in conflict than commonly thought, synthesizing multiple traditions from countries throughout North, Central, and South America (and across the developed-to-developing-world continuum) for a volume that is both diverse in scope and unified in purpose. The book's examples—representing robust theoretical and practical literatures as well as initiatives from Rio de Janeiro to American Indian communities—explain why health promotion evaluation projects require different guidelines from mainstream evaluative work. The editors identify core humanitarian principles associated with health promotion (participation, empowerment, equity, sustainability, intersectoral action, multistrategy, and contextualism), while chapters highlight challenges that must be mastered to keep these principles and scientific objectives in sync, including: (1) Building health promotion values into evaluation research projects. (2) Expanding the use of evaluation in health promotion. (3) Developing meaningful evaluation questions. (4) Distinguishing between community-based participation research and evaluation-based participation. (5) Evaluating specifically for equity. (6) Designing initiatives to foster lasting social change. The applied knowledge in *Health Promotion Evaluation Practices in the Americas: Values and Research* can bring the goals of intervention into sharper focus for practitioners, evaluators, and decision-makers and facilitate communication on all sides—necessary steps to progress from study findings to real-world action.

[Malign Velocities](#) - Benjamin Noys 2014-10-31

We are told our lives are too fast, subject to the accelerating demand that we innovate more, work more, enjoy more, produce more, and consume more. That's one familiar story. Another, stranger, story is told here: of those who think we haven't gone fast enough. Instead of rejecting the increasing tempo of capitalist production they argue that we should embrace and accelerate it. Rejecting this conclusion, /Malign Velocities/ tracks this 'accelerationism' as the symptom of the misery and pain of labour under capitalism. Retracing a series of historical moments of accelerationism - the Italian Futurism; communist accelerationism after the Russian Revolution; the 'cyberpunk phuturism' of the '90s and

'00s; the unconscious fantasies of our integration with machines; the apocalyptic accelerationism of the post-2008 moment of crisis; and the terminal moment of negative accelerationism - suggests the pleasures and pains of speed signal the need to disengage, negate, and develop a new politics that truly challenges the supposed pleasures of speed.
