**Gifts** - Richard Hyland 2009-06-05

Gifts: A Study in Comparative Law is the first broad-based study of the

law governing the giving and revocation of gifts ever attempted. Gift-giving is everywhere governed by social and customary norms before it encounters the law and the giving of gifts takes place largely outside of the marketplace. As a result of these two characteristics, the law of gifts provides an optimal lens through which to examine how different legal systems engage with social practice. The law of gifts is well-developed both in the civil and the common laws. Richard Hyland's study provides an excellent view of the ways in which different civil and common law jurisdictions confront common issues. The legal systems discussed include principally, in the common law, those of Great Britain, the United States, and India, and, in the civil law, the private law systems of Belgium and France, Germany, Italy, and Spain. Professor Hyland also serves a critique of the dominant method in the field, which is a form of functionalism based on what is called the praesumptio similitudinis, namely the axiom that, once legal doctrine is stripped away, developed legal systems tend to reach similar practical results. His study demonstrates, to the contrary, that legal systems actually differ, not only in their approach and conceptual structure, but just as much in the results.

**The Italian Home for Children** - Christopher F. Small 2005

As it ravaged the world, the influenza epidemic of 1918 devastated

Boston's congested North End and left hundreds of orphans in its wake. Touched by this crisis, a Roman Catholic priest and a group of Italian Americans founded the first home for Italian children in Massachusetts. Franciscan Sisters devoted 24 hours a day to providing the children with a safe, loving, and spiritual environment. In addition, the home provided educational support for its residents. Over time, the changing needs of children mandated that the agency change the nature of its services from custodial care to treatment. In 1974, in response to the changing political and social climate, the agency became the Italian Home for Children. Today, it is a nonprofit, nonsectarian residential treatment facility with a capacity for 61 children of all races, nationalities, and religions. The images in *The Italian Home for Children* document milestones in the organization's history: the devastating influenza epidemic, the Missionary Franciscan Sisters of the Immaculate Conception, Christmas plays, a visit from Joe DiMaggio, trips to Canobie Lake Park in the summer, the Tony Martin benefit performance at Boston Garden, and the home as it is today--a refuge for children in the most severe crises.

The Acquisition of Verb Placement - J. Meisel 2012-12-06

other aspects of developing grammars. And this is, indeed, what the contributions to this volume do. Parameterization of functional categories may, however, be understood in different ways, even if one shares the dual assumptions that substantive elements (verbs, nouns, etc. ) are present in all grammars and that X-bar principles are part of the grammatical knowledge available to the child prior to language-specific learning processes. From these assumptions it follows that the child should, from early on, be able to construct projections on the basis of these elements. The role of functional categories, however, may still be interpreted differently. One possibility, first suggested by Radford (1986, 1990) and by Guilfoyle and Noonan (1988), is that children must discover which functional categories (FC) need to be implemented in the grammar of the language they are acquiring. Another possibility, first explored by Hyams (1986), is that a specific category is present in developing grammars but that parameter values are set in a way deviating from the target adult grammar, corresponding, however, to options realized in other adult systems. A third option would be that these categories might be specified differently in developing as opposed to mature grammars. All three are explored in the papers collected in this volume. Before outlining the various hypotheses in more detail, however, I would like briefly to sketch the grammatical context in which the following debate is situated. 2.

Education of Gifted Children - Lulu M. Stedman 1924

"During the last few years the results of tests and measurement in the public schools have brought into relief a great variety of educational problems which had previously been overlooked or the importance of which had been insufficiently appreciated. Among these is the problem of the gifted child. Although experimental studies in the education of defectives have been made from time to time for almost a century, it was not until the results of intelligence tests began to come in, a decade ago, that the need of special educational provision for children of exceptional ability began to be recognized. One reason for the general neglect of this field of pedagogy has been the widespread belief that the apparently gifted child is merely precocious, and usually pathologically so. However, recent experimental studies have shown conclusively that this belief has little or no foundation in fact. All the scientific evidence at hand points to the conclusion that gifted children are superior to unselected children in physical and non-intellectual mental traits as well as in intelligence, and that they carry this advantage into adult life. We are coming to recognize that from their ranks, and from nowhere else, our geniuses in every line are recruited. Instead of working upon the "wonder child" as an individual to be pitied because of his supposed abnormality, and to be shielded from intellectual stimulation for fear of injury to his delicate nervous structure, we are beginning to see the problem in an entirely different light. The education of the gifted child has adopted a positive rather than a negative aim. We wish to know what educational methods will enable us to make the most of the superior raw material afforded by our gifted group; it is no longer a question of how best to defend a special type of pathologically tainted individuals from an imminent and unhappy fate. At the present time there are in progress scores if not hundreds of experiments in the training of gifted children. Unfortunately, few of these have been under way any considerable length of time and fewer still have been adequately reported. We are learning a great deal about the mental and physical traits of such children, but we still know very little as to the most effective methods of training them. The editor

believes that Miss Stedman's rather detailed account of the methods she has found most useful in her five years of experience with such children is an important educational contribution. It should be of interest not only to teachers of similar classes, but to educators generally and to parents; for it is by no means improbable that the educational methods best adapted to gifted children will be found to have wide applicability in the training of all children. Normal pedagogy has certainly benefited from the pedagogy of defectives; it has far more to learn from the pedagogy of the gifted"--Introduction. **The Children's Train** - Viola Ardone 2021-01-12

"The innocence of childhood collides with the stark aftermath of war in this wrenching and ultimately redemptive tale of family, seemingly impossible choices, and the winding paths to destiny, which sometimes take us to places far beyond our imaginings." - Lisa Wingate, #1 New York Times Bestselling Author of Before We Were Yours and The Book of Lost Friends "Ardone's beautifully crafted story explores the meaning of identity and belonging...recommended to fans of Elena Ferrante's Neapolitan novels." - The Library Journal "[The Children's Train] leaves you with a great sense of the importance of family and the tough decisions that must be faced as a result of that love." - Shelf Awareness Based on true events, a heartbreaking story of love, family, hope, and survival set in post-World War II Italy—written with the heart of Orphan Train and Before We Were Yours—about poor children from the south sent to live with families in the north to survive deprivation and the harsh winters. Though Mussolini and the fascists have been defeated, the war has devastated Italy, especially the south. Seven-year-old Amerigo lives with his mother Antonietta in Naples, surviving on odd jobs and his wits like the rest of the poor in his neighborhood. But one day, Amerigo learns that a train will take him away from the rubble-strewn streets of the city to spend the winter with a family in the north, where he will be safe and have warm clothes and food to eat. Together with thousands of other southern children, Amerigo will cross the entire peninsula to a new life. Through his curious, innocent eyes, we see a nation rising from the ashes of war, reborn. As he comes to enjoy his new surroundings and the possibilities for a better future, Amerigo will make the heartbreaking

choice to leave his mother and become a member of his adoptive family. Amerigo's journey is a moving story of memory, indelible bonds, artistry, and self-exploration, and a soaring examination of what family can truly mean. Ultimately Amerigo comes to understand that sometimes we must give up everything, even a mother's love, to find our destiny. Translated from the Italian by Clarissa Botsford
