The Longest Trail - Alvin M. Josephy, Jr. 2015-10-27

Alvin Josephy Jr.'s groundbreaking, popular books and essays advocated for a fair and true historical assessment of Native Americans, and set the course for modern Native American studies. This collection, which includes magazine articles, speeches, a white paper, and introductions and chapters of books, gives a generous and reasoned view of five hundred years of Indian history in North America from first settlements in the East to the long trek of the Nez Perce Indians in the Northwest. The essays deal with the origins of still unresolved troubles with treaties and territories to fishing and land rights, and who should own archeological finds, as well as the ideologies that underpin our Indian policy. Taken together the pieces give a revelatory introduction to American Indian history, a history that continues both to fascinate and inform.

Hunting & Gathering Survival Manual - Tim MacWelch 2020-10-06

A manual for the modern hunter-gatherer that will teach you everything you need to know about foraging, hunting, and cooking in the wild. From

finding wild edible plants to subsistence hunting, you'll learn how to live off the land while hunting like a caveman—and eating like a king. With high-quality design, intricate detail, and a durable flexicover, this manual is the perfect addition to any outdoor enthusiast's library. Whether you're using modern tools, old-fashioned snares, or your own two hands, this book will show you the amazing range of hands-on (literally!) methods for catching and cooking your prey. Use the detailed field guides to gather edible plants, nuts, and mushrooms, then turn them into gourmet meals with field-tested camp cooking tips. And prepare for any emergency, whether you're lost in the woods or surviving a natural disaster. This book demystifies it all, with simple hints and step-by-step illustrations to make you a self-sufficient survivor—in your backyard or in the wild.

Prehistoric Food Production in North America - Richard I. Ford 1985-01-01

As Richard I. Ford explains in his preface to this volume, the 1980s saw an “explosive expansion of our knowledge about the variety of cultivated

and domesticated plants and their history in aboriginal America.” This collection presents research on prehistoric food production from Ford, Patty Jo Watson, Frances B. King, C. Wesley Cowan, Paul E. Minnis, and others.

Survival Skills of the North American Indians - Peter Goodchild 1999

This comprehensive review of Native American life skills covers collecting and preparing plant foods and medicines; hunting animals; creating and transporting fire; and crafting tools, shelter, clothing, utensils, and other devices. Step-by-step instructions and 145 detailed diagrams enable the reader to duplicate native methods using materials available in local habitats. A new foreword, introduction, and index complement the practical information offered.

It will be of interest to scholars from a variety of backgrounds, including Indigenous Peoples with their specific cultural worldviews; nutritionists and other health professionals who work with Indigenous Peoples and other rural people; other biologists, ethnologists, and organizations that address understanding of the resources of the natural world; and academic audiences from a variety of disciplines.

The American Promise, Volume A - James L. Roark 2012-01-09

The American Promise is more teachable and memorable than any other

U.S. survey text. The balanced narrative braids together political and social history so that students can discern overarching trends as well as individual stories. The voices of hundreds of Americans - from Presidents to pipe fitters, and sharecroppers to suffragettes - animate the past and make concepts memorable. The past comes alive for students through dynamic special features and a stunning and distinctive visual program. Over 775 contemporaneous illustrations - more than any competing text - draw students into the text, and more than 180 full - color maps increase students' geographic literacy. A rich array of special features complements the narrative offering more points of departure for assignments and discussion. Longstanding favorites include *Documenting the American Promise*, *Historical Questions*, *The Promise of Technology*, and *Beyond American's Borders*, representing a key part of our effort to increase attention paid to the global context of American history.

Edible and Useful Plants of Texas and the Southwest - Delena Tull 1999
All around us there are wild plants good for food, medicine, clothing, and shelter, but most of us don't know how to identify or use them. Delena Tull amply supplies that knowledge in this book, one of the first focused specifically on plants that grow in Texas and surrounding regions of the South and Southwest. Extensively illustrated with black-and-white drawings and color photos, this book includes the following special features: Recipes for foods made from edible wild plants. Wild teas and spices. Wild plant dyes, with instructions for preparing the plants and dyeing wool, cotton, and other materials. Instructions for preparing fibers for use in making baskets, textiles, and paper. Information on wild plants used for making rubber, wax, oil, and soap. Information on medicinal uses of plants. An identification guide to hay fever plants and plants that cause rashes. Instructions for distinguishing edible from poisonous berries. Detailed information on poisonous plants, including poison ivy, oak, and sumac, as well as herbal treatments for their rashes.

In the Hands of the Great Spirit - Jake Page 2004-05-03

Presents a complete history of the American Indians, drawing on historical documents, archaeological artifacts, and oral legends to profile

early societies, clarify misconceptions, and describe recent revivals.

Build the Perfect Bug Out Survival Skills - Creek Stewart 2015-01-28

LEARN HOW TO SURVIVE! When it comes to surviving a disaster, having survival skills and know-how is as essential as having the necessary survival gear. Without the right knowledge, survival gear is useless. Build the Perfect Bug Out Survival Skills will teach you the essential wilderness survival skills you need to endure a bug out situation or prolonged off-grid scenario. You will learn how to meet the four core survival needs – shelter, fire, water and food – with a minimum amount of equipment. Detailed photos and step-by-step instructions will help you master each skill. FEATURING:

- Detailed instructions for survival skills that require little gear – an emphasis on primitive tools
- Step-by-step photos that clearly illustrate complex techniques like knot tying, shelter construction, fire building and setting snares and traps
- Advanced knowledge that could save you and your family during a real emergency

The Cambridge World History of Food - Kenneth F. Kiple 2000

A two-volume set which traces the history of food and nutrition from the beginning of human life on earth through the present.

The Archaeology of Food and Warfare - Amber M. VanDerwarker 2015-08-03

The archaeologies of food and warfare have independently developed over the past several decades. This volume aims to provide concrete linkages between these research topics through the examination of case studies worldwide. Topics considered within the book include: the impacts of warfare on the daily food quest, warfare and nutritional health, ritual foodways and violence, the provisioning of warriors and armies, status-based changes in diet during times of war, logistical constraints on military campaigns, and violent competition over subsistence resources. The diversity of perspectives included in this volume may be a product of new ways of conceptualizing violence—not simply as an isolated component of a society, nor as an attribute of a particular societal type—but instead as a transformative process that is lived and irrevocably alters social, economic, and political organization

and relationships. This book highlights this transformative process by presenting a cross-cultural perspective on the connection between war and food through the inclusion of case studies from several continents.

Edible and Useful Plants of the Southwest - Delena Tull 2013-09-15

A guide to useful Southwestern wild plants, including recipes, teas, spices, dyes, medicinal uses, poisonous plants, fibers, basketry, and industrial uses. All around us there are wild plants useful for food, medicine, and clothing, but most of us don't know how to identify or use them. Delena Tull amply supplies that knowledge in this book, which she has now expanded to more thoroughly address plants found in New Mexico and Arizona, as well as Texas. Extensively illustrated with black-and-white drawings and color photos, this book includes the following special features:

- Recipes for foods made from edible wild plants
- Wild teas and spices
- Wild plant dyes, with instructions for preparing the plants and dyeing wool, cotton, and other materials
- Instructions for preparing fibers for use in making baskets, textiles, and paper

- Information on wild plants used for making rubber, wax, oil, and soap
- Information on medicinal uses of plants
- Details on hay fever plants and plants that cause rashes
- Instructions for distinguishing edible from poisonous berries

Detailed information on poisonous plants, including poison ivy, oak, and sumac, as well as herbal treatments for their rashes

Tropical Fruits and Other Edible Plants of the World - Rolf Blancke
2016-07-15

Tropical fruits such as banana, mango, papaya, and pineapple are familiar and treasured staples of our diets, and consequently of great commercial importance, but there are many other interesting species that are little known to inhabitants of temperate regions. What delicacies are best known only by locals? The tropical regions are home to a vast variety of edible fruits, tubers, and spices. Of the more than two thousand species that are commonly used as food in the tropics, only about forty to fifty species are well known internationally. Illustrated with high-quality photographs taken on location in the plants' natural environment, this field guide describes more than three hundred species of tropical and subtropical species of fruits, tubers, and spices. In *Tropical Fruits and Other Edible Plants of the World*, Rolf Blancke includes all the common species and features many lesser known species, including mangosteen and maca, as well as many rare species such as engkala, sundrop, and the mango plum. Some of these rare species will always remain of little importance because they need an acquired taste to enjoy them, they have too little pulp and too many seeds, or they are difficult to package and ship. Blancke highlights some fruits—the araza (*Eugenia stipitata*) and the nutritious peach palm (*Bactris gasipaes*) from the Amazon lowlands, the Brunei olive (*Canarium odontophyllum*) from Indonesia, and the remarkably tasty soursop (*Annona muricata*) from Central America—that deserve much more attention and have the potential to become commercially important in the near future. *Tropical Fruits and Other Edible Plants of the World* also features tropical plants used to produce spices, and many tropical tubers, including cassava, yam, and oca. These tubers play a vital role in human nutrition and are often foundational to the foodways of their local cultures, but they sometimes require complex preparation and are often overlooked or poorly understood distant from their home context.

Cave Archaeology of the Eastern Woodlands - David H. Dye 2008

Patty Jo Watson's prolific career began in the early 1950s as an energetic

graduate student at the University of Chicago and culminated with her induction into the National Academy of Sciences and subsequent retirement from Washington University in 2003. During that time her groundbreaking research impacted multiple fields within the discipline of archaeology, but her astonishing research into the underground caves of the eastern United States recognizes her as one of the world's leading experts on cave archaeology. In honor of Dr. Watson and her monumental achievements in the field, twenty-two established scholars present in this volume new and insightful research into prehistoric and historic use of southeastern dark zones. *Cave Archaeology of the Eastern Woodlands*, edited by David H. Dye, explores how prehistoric and historic peoples utilized caves as a means to further their economic growth and represent cultural values within their societies. The essays range in topics from early gypsum mining to rare American Indian cave art, from historic saltpeter extraction to current archaeobotanical and paleofecal research. Dye and the contributors contend that studies of deep zone caves reveal multiple insights into the values, beliefs, and cultural lifeways of ancient and historic peoples. In addition to presenting new research in the field, contributors also place particular emphasis on Dr. Watson's influential cave research and how it has molded their own work. The essays convey a sense of wonder at the unique and sometimes harrowing world of caves, and readers will get a sense of why Native Americans regarded the Underworld or Beneathworld as a supernatural realm to be tread upon with great respect and caution. This volume of uniformly excellent essays will no doubt be a lantern that sheds light onto the importance of studying and understanding the all too secret world of underground caves. David H. Dye is professor of archaeology in the Department of Earth Sciences at the University of Memphis and a former student of Patty Jo Watson's. He is author of *Cycles of Violence: An Archaeology of Peace and War in Native Eastern North American*, coeditor, with Richard J. Chacon, of *The Taking and Displaying of Human Body Parts as Trophies by Amerindians*, and, with Cheryl Anne Cox, of *Towns and Temples Along the Mississippi*. *Aboriginal Relationships between Culture and Plant Life in the Upper*

The Emergence of Agriculture - Peter White 2020-10-25

This volume, the first in the One World Archaeology series, is a compendium of key papers by leaders in the field of the emergence of agriculture in different parts of the world. Each is supplemented by a review of developments in the field since its publication. Contributions cover the better known regions of early and independent agricultural development, such as Southwest Asia and the Americas, as well as lesser known locales, such as Africa and New Guinea. Other contributions examine the dispersal of agricultural practices into a region, such as India and Japan, and how introduced crops became incorporated into pre-existing forms of food production. This reader is intended for students of the archaeology of agriculture, and will also prove a valuable and handy resource for scholars and researchers in the area.

Edible Wild Plants of Sub-Saharan Africa - Charles R. Peters 1992

Edible Plants of the Eastern Woodlands - Dave Canterbury 2013-03-15

In a survival situation, exertion and caloric output have to be constantly weighed against the caloric gain. Edible plants are often the most accessible and intelligent food choice, provided you are aware of a plant's nutritional value. Knowing which plants are edible and their relative caloric value is key to determining what to eat. This simplified waterproof guide focuses on 23 common plants that are widespread in the eastern woodlands of the United States (though many are found in other locations as well) and how to harvest and prepare them. It also

includes information on the caloric values of different plant parts and dangerous plants to avoid. Developed in collaboration with noted survival expert and master woodsman Dave Canterbury, this is one of a 10-part series on survival skills. Made in the USA.

Cooking through History: A Worldwide Encyclopedia of Food with Menus and Recipes [2 volumes] - Melanie Byrd 2020-12-02

From the prehistoric era to the present, food culture has helped to define civilizations. This reference surveys food culture and cooking from antiquity to the modern era, providing background information along with menus and recipes. Food culture has been central to world civilizations since prehistory. While early societies were limited in terms of their resources and cooking technology, methods of food preparation have flourished throughout history, with food central to social gatherings, celebrations, religious functions, and other aspects of daily life. This book surveys the history of cooking from the ancient world through the modern era. The first volume looks at the history of cooking from antiquity through the Early Modern era, while the second focuses on the modern world. Each volume includes a chronology, historical introduction, and topical chapters on foodstuffs, food preparation, eating habits, and other subjects. Sections on particular civilizations follow, with each section offering a historical overview, recipes, menus, primary source documents, and suggestions for further reading. The work closes with a selected, general bibliography of resources suitable for student research. Timelines help users identify key events related to the history of cooking Topical essays cover important subjects across cultures Sections on particular civilizations, regions, or countries provide historical coverage of cooking methods and food culture Recipes, sample menus, and other documents give readers important information about cooking methods and food history within particular societies Suggestions for further reading direct users to additional sources of information

Native Americans Before 1492: Moundbuilding Realms of the Mississippian Woodlands - Lynda N. Shaffer 2016-09-16

The pre-Columbian culture of the Mississippi woodlands has received surprisingly little attention from historians. Studying this culture, which was in many respects highly advanced, opens an entirely new

perspective on what we are used to thinking of as "American" history. This essay by a distinguished historian and teacher is aimed at world history classes and other classes that cover the Americas before the arrival of the Europeans.
