Towards a History of
Consciousness - Vwadek P.
Marciniak 2006

Towards a History of
Consciousness: Space, Time,
and Death offers a cogent and
compelling discussion of the
neglected topic of the history
of consciousness. An analysis
of our postmodern ontology

reveals deep but neglected
roots. What are those roots and
how did they grow? Is there a
self without consciousness?
What is the relation of the self
to the individual? Does the
recognition of death contribute
to the growth of
consciousness? As a survey of
western history, this work
pushes the boundaries of the
understanding of
consciousness in intriguing and
sometimes provocative
directions. This integrative
study is intended for the
serious, curious student and
thinker.

(January - December)

Sedimentary Cover of the
Craton in Canada - D.F. Stott
1993

The early chapters of the
volume present data and
interpretations of the
geophysics of the craton and

summarise, with sequential maps, the tectonic evolution of the craton. The main body of the text and accompanying plates and figures present the stratigraphy, structural history, and economic geology of specific sedimentary basins and regions. The volume concludes with a summary chapter in which the currently popular theories of cratonal tectonics are discussed and the unresolved questions are identified.
