The 48 Laws Of Power - Robert Greene 2010-09-03

THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power.

(From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

Plastic Ocean - Charles Moore 2011-10-27

The researcher who discovered the Great Pacific Garbage Patch—and remains one of today's key advocates for plastic pollution awareness—inspires a fundamental rethinking of the modern Plastic Age. In 1997, environmentalist Charles Moore discovered the world's largest collection of floating trash—the Great Pacific Garbage Patch ("GPGP")—while sailing from Hawaii to California. Moore was shocked by the level of pollution that he saw. And in the last 20 years, it's only gotten worse—a 2018 study has found that the vast dump of plastic waste swirling in the Pacific Ocean is now bigger than France, Germany, and Spain combined—far larger than previously feared. In *Plastic Ocean*, Moore recounts his ominous findings and unveils the secret life of plastics. From milk jugs and abandoned fishing gear to polymer molecules small enough to penetrate human skin and be unknowingly inhaled, plastic is now suspected of contributing to a host of ailments, including infertility, autism, thyroid dysfunction, and certain cancers. An urgent call to action, *Plastic Ocean's* sobering revelations have been embraced by activists, concerned parents, and anyone alarmed by the deadly impact and implications of this man-made environmental catastrophe.

The Trouble with Passion - Erin Cech 2021-11-09

Probing the ominous side of career advice to "follow your passion," this data-driven study explains how the passion principle fails us and perpetuates inequality by class, gender, and race; and it suggests how we can reconfigure our relationships to paid work. "Follow your passion" is a popular mantra for career decision-making in the United States. Passion-seeking seems like a promising path for avoiding the potential drudgery of a life of paid work, but this "passion principle"—seductive as it is—does not universally translate. *The Trouble with Passion* reveals the significant downside of the passion principle: the concept helps culturally legitimize and reproduce an exploited, overworked white-collar labor force and broadly serves to reinforce class, race, and gender segregation and inequality. Grounding her investigation in the

paradoxical tensions between capitalism's demand for ideal workers and our cultural expectations for self-expression, sociologist Erin A. Cech draws on interviews that follow students from college into the workforce, surveys of US workers, and experimental data to explain why the passion principle is such an attractive, if deceptive, career decision-making mantra, particularly for the college educated. Passion-seeking presumes middle-class safety nets and springboards and penalizes first-generation and working-class young adults who seek passion without them. The ripple effects of this mantra undermine the promise of college as a tool for social and economic mobility. The passion principle also feeds into a culture of overwork, encouraging white-collar workers to tolerate precarious employment and gladly sacrifice time, money, and leisure for work they are passionate about. And potential employers covet, but won't compensate, passion among job applicants. This book asks, What does it take to center passion in career decisions? Who gets ahead and who gets left behind by passion-seeking? *The Trouble with Passion* calls for citizens, educators, college administrators, and industry leaders to reconsider how we think about good jobs and, by extension, good lives.

The Carbon Trap - Randy Dutton 2012-01-26

Environmentalists worry about too much carbon dioxide, but what's too little? What if global financiers manipulated the global warming crisis to gain control over humanity's resources, freedoms, and population? What if someone with the financial and technical abilities decided mankind was a virus and used carbon dioxide trapping technology to plunge population levels by crashing life-essential CO2 to new lows? These are questions Anna Picard must face in *The Carbon Trap*, the first book in *The Carbon Series*. At the height of the global warming crisis, the United Nations attempts to control all carbon emissions, and authorizes a series of programs it deems necessary to save humanity. A progressive US government enthusiastically endorses the UN Carbon Trapping program, and to help pay for it, will impose carbon taxes, draconian regulations, and... it will secretly sell Alaska. Anna Picard is an amoral fixer, an employee of Agenda 21 member and global financier Alexis Swanson had trained to help recruit his corporate army and neutralize his enemies. It is her job to unleash a global hacker network to help destroy the carbon based industries and funnel insider-trading profits to Swanson. One of her recruits is Dr. Sven Johansson, a brilliant geneticist and President of Snath Biotechnology, who designs life forms to trap CO2. But Sven has more ambitious plans. At a UN conference in the Maldives held to impose draconian carbon regulations, not everyone is happy, some industrial executives realize data has been falsified. To protect her scheme, Anna frames one of the execs for murder. Her plans are complicated when she falls in love with Dr. Pete Heyward, the son of the man she framed for murder. Pete is a US Marine amputee who sees past her malevolent deeds and tries to rejuvenate the morality of her youth. After a series of genetically modified carbon trapping life forms is unleashed upon the Earth, Anna must confront the evils she helped unleash, and prevent an even bigger disaster from unfolding that would destroy most life on Earth. This is a high-tech ecological thriller that takes the reader from the Maldives, to the French Riviera, and the heartland of Texas. It introduces cutting edge technologies and concepts, used for the first time in a novel, that reveal striking implications for society.

Unlocking Leadership Mindtraps - Jennifer Garvey Berger 2019-01-29

Author and consultant Jennifer Garvey Berger has worked with all types of leaders—from top executives at Google to nonprofit directors who are trying to make a dent in social change. She hears a version of the same plea from every client in nearly every sector around the world: "I know that complexity and uncertainty are testing my instincts, but I don't know which to trust. Is there some way to know what to do when I can't know what's next?" Her newest work is an answer to this plea. Using her background in adult development, complexity theories, and leadership consultancy, Garvey Berger discerns five pernicious and pervasive "mind traps" to frame the book. These are: the desire for simple stories, our sense that we are right, our desire to get along with others in our group, our fixation with control, and our constant quest to protect and defend our egos. In addition to understanding why these natural impulses steer us wrong in a fast-moving world, leaders will get powerful questions and approaches that help them escape these patterns.

Late Migrations - Margaret Renkl 2019-07-09

From the New York Times columnist, a portrait of a family and the cycles of joy and grief that mark the natural world: "Has the makings of an American classic." —Ann Patchett Growing up in Alabama, Margaret Renkl was a devoted reader, an explorer of riverbeds and red-dirt roads, and a fiercely loved daughter. Here, in brief essays, she traces a tender and honest portrait of her complicated parents—her exuberant, creative mother; her steady, supportive father—and of the bittersweet moments that accompany a child's transition to caregiver. And here, braided into the overall narrative, Renkl offers observations on the world surrounding her suburban Nashville home. Ringing with rapture and heartache, these essays convey the dignity of bluebirds and rat snakes, monarch butterflies and native bees. As these two threads haunt and harmonize with each other, Renkl suggests that there is astonishment to be found in common things: in what seems ordinary, in what we all share. For in both worlds—the natural one and our own—"the shadow side of love is always loss, and grief is only love's own twin." Gorgeously illustrated by the author's brother, Billy Renkl, *Late Migrations* is an assured and memorable debut. "Magnificent . . . Readers will savor each page and the many gems of wisdom they contain." —Publishers Weekly (starred review)

The Fly Trap - Fredrik Sjöberg 2015-06-02

A Nature Book of the Year (The Times (UK)) "The hoverflies are only props. No, not only, but to some extent. Here and there, my story is about something else." A mesmerizing memoir of extraordinary brilliance by an entomologist, *The Fly Trap* chronicles Fredrik Sjöberg's life collecting hoverflies on a remote island in Sweden. Warm and humorous, self-deprecating and contemplative, and a major best seller in its native country, *The Fly Trap* is a meditation on the unexpected beauty of small things and an exploration of the history of entomology itself. What drives the obsessive curiosity of collectors to catalog their finds? What is the importance of the hoverfly? As confounded by his unusual vocation as anyone, Sjöberg reflects on a range of ideas—the passage of time, art, lost loves—drawing on sources as disparate as D. H. Lawrence and the fascinating and nearly forgotten naturalist René Edmond Malaise. From the wilderness of Kamchatka to the loneliness of the Swedish isle he calls home, Sjöberg revels in the wonder of the natural world and leaves behind a trail of memorable images and stories.

They're Going to Love You - Meg Howrey 2022-11-15

A New York Times BEST BOOK OF THE MONTH • A gripping novel set in the world of professional ballet, New York City during the AIDS crisis, and present-day Los Angeles. • "Howrey, a former dancer with the Joffrey Ballet, brings an insider's view of the discipline to this buzzy novel, which is about a young choreographer grappling with painful family memories." —The New York Times "They're Going to Love You is my idea of a perfect book. It is about art, life, death, love, and family and it is beautifully and sharply written. I cried several times while reading it, and was sorry to let it go when I was done. I cannot recommend it enough." —Jami Attenberg, New York Times bestselling author of *The Middlesteins* and *All This Could Be Yours* Throughout her childhood, Carlisle Martin got to see her father, Robert, for only a few precious weeks a year when she visited the brownstone apartment in Greenwich Village he shared with his partner, James. Brilliant but troubled, James gave Carlisle an education in all that he held dear in life—literature, music, and, most of all, dance. Seduced by the heady pull of mentorship and hoping to follow in the footsteps of her mother—a former Balanchine ballerina—Carlisle's aspiration to become a professional ballet dancer bloomed. But above all else, she longed to be asked to stay at the house on Bank Street, to be a part of Robert and James's sophisticated world, even as the AIDS crisis brings devastation to their community. Instead, a passionate love affair created a rift between the family, with shattering consequences that reverberated for decades to come. Nineteen years later, when Carlisle receives a phone call that unravels the events of that fateful summer, she sees with new eyes how her younger self has informed the woman she's become. *They're Going to Love You* is a gripping and gorgeously written novel of heartbreaking intensity. With psychological precision and a masterfully revealed secret at its heart, it asks what it takes to be an artist in America, and the price of forgiveness, of ambition, and of love.

Work Won't Love You Back - Sarah Jaffe 2021-01-26

A deeply-reported examination of why "doing what you love" is a recipe for exploitation, creating a new tyranny of work in which we cheerily acquiesce to doing jobs that take over our lives. You're told that if you "do what you love, you'll never work a day in your life." Whether it's working for "exposure" and "experience," or enduring poor treatment in the name of "being part of the family," all employees are pushed to make sacrifices for the privilege of being able to do what we love. In *Work Won't Love You Back*, Sarah Jaffe, a preeminent voice on labor, inequality, and social movements, examines this "labor of love" myth—the idea that certain work is not really work, and therefore should be done out of passion instead of pay. Told through the lives and experiences of workers in various industries—from the unpaid intern, to the overworked teacher, to the nonprofit worker and even the professional athlete—Jaffe reveals how all of us have been tricked into buying into a new tyranny of work. As Jaffe argues, understanding the trap of the labor of love will empower us to work less and demand what our work is worth. And once freed from those binds, we can finally figure out what actually gives us joy, pleasure, and satisfaction.

So Good They Can't Ignore You - Cal Newport 2012-09-18

In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

The Passion Economy - Adam Davidson 2020-01-07

The brilliant creator of NPR's Planet Money podcast and award-winning New Yorker staff writer explains our current economy: laying out its internal logic and revealing the transformative hope it offers for millions of people to thrive as they never have before. Contrary to what you may have heard, the middle class is not dying and robots are not stealing our jobs. In fact, writes Adam Davidson—one of our leading public voices on economic issues—the twenty-first-century economic paradigm offers new ways of making money, fresh paths toward professional fulfillment, and unprecedented opportunities for curious, ambitious

individuals to combine the things they love with their careers. Drawing on the stories of average people doing exactly this—an accountant overturning his industry, a sweatshop owner's daughter fighting for better working conditions, an Amish craftsman meeting the technological needs of Amish farmers—as well as the latest academic research, Davidson shows us how the twentieth-century economy of scale has given way in this century to an economy of passion. He makes clear, too, that though the adjustment has brought measures of dislocation, confusion, and even panic, these are most often the result of a lack of understanding. The Passion Economy delineates the ground rules of the new economy, and armed with these, we begin to see how we can succeed in it according to its own terms—intimacy, insight, attention, automation, and, of course, passion. An indispensable road map and a refreshingly optimistic take on our economic future.

The Surrendered Wife - Laura Doyle 2001-02-28

A New York Times bestseller, this controversial guide to improving your marriage has transformed thousands of relationships, bringing women romance, harmony, and the intimacy they crave. Like millions of women, Laura Doyle wanted her marriage to be better. But when she tried to get her husband to be more romantic, helpful, and ambitious, he withdrew—and she was lonely and exhausted from controlling everything. Desperate to be in love with her man again, she decided to stop telling him what to do and how to do it. When Doyle surrendered control, something magical happened. The union she had always dreamed of appeared. The man who had wooed her was back. The underlying principle of *The Surrendered Wife* is simple: The control women wield at work and with children must be left at the front door of any marriage. Laura Doyle's model for matrimony shows women how they can both express their needs and have them met while also respecting their husband's choices. When they do, they revitalize intimacy. Compassionate and practical, *The Surrendered Wife* is a step-by-step guide that teaches women how to:

- Give up unnecessary control and responsibility
- Resist the temptation to criticize, belittle, or dismiss their husbands
- Trust their husbands in every aspect of marriage—from sexual to financial
- And more.

The *Surrendered Wife* will show you how to transform a lonely marriage into a passionate union.

The Passion Paradox - Brad Stulberg 2019-03-19

The coauthors of the bestselling *Peak Performance* dive into the fascinating science behind passion, showing how it can lead to a rich and meaningful life while also illuminating the ways in which it is a double-edged sword. Here's how to cultivate a passion that will take you to great heights—while minimizing the risk of an equally great fall. Common advice is to find and follow your passion. A life of passion is a good life, or so we are told. But it's not that simple. Rarely is passion something that you just stumble upon, and the same drive that fuels breakthroughs—whether they're athletic, scientific, entrepreneurial, or artistic—can be every bit as destructive as it is productive. Yes, passion can be a wonderful gift, but only if you know how to channel it. If you're not careful, passion can become an awful curse, leading to endless seeking, suffering, and burnout. Brad Stulberg and Steve Magness once again team up, this time to demystify passion, showing readers how they can find and cultivate their passion, sustainably harness its power, and avoid its dangers. They ultimately argue that passion and balance—that other virtue touted by our culture—are incompatible, and that to find your passion, you must lose balance. And that's not always a bad thing. They show readers how to develop the right kind of passion, the kind that lets you achieve great things without ruining your life. Swift, compact, and powerful, this thought-provoking book combines captivating stories of extraordinarily passionate individuals with the latest science on the biological and psychological factors that give rise to—and every bit as important, sustain—passion.

The Donut Trap - Julie Tieu 2021-11-09

Julie Tieu sparkles in this debut romantic comedy, which is charmingly reminiscent of the TV show *Kim's Convenience* and *Frankly in Love* by David Yoon, about a young woman who feels caught in the life her parents have made for her until she falls in love and finds a way out of the donut trap. Jasmine Tran has landed herself behind bars—maple bars that is. With no boyfriend or job prospects, Jasmine returns home to work at her parents' donut shop. Jasmine quickly loses herself in a cyclical routine of donuts, Netflix, and sleep. She wants to break free from her daily grind, but when a hike in rent threatens the survival of their shop, her parents rely on her more than ever. Help comes in the form of an old college crush, Alex Lai. Not only is he successful and easy on the eyes, to her parents' delight, he's also Chinese. He's everything she should wish for, until a disastrous dinner reveals Alex isn't as perfect as she thinks. Worse, he doesn't think she's perfect either. With both sets of parents against their relationship, a family legacy about to shut down, and the reappearance of an old high school flame, Jasmine must scheme to find a solution that satisfies her family's expectations and can get her out of the donut trap once and for all.
