Dismantling the Racism Machine - Karen Gaffney 2017-11-13
While scholars have been developing valuable research on race and racism for decades, this work does not often reach the beginning college student or the general public, who rarely learn a basic history of race and racism. If we are to dismantle systemic racism and create a more just society, people need a place to begin. This accessible, introductory, and interdisciplinary guide can be one such place. Grounded in critical race theory, this book uses the metaphor of the Racism Machine to highlight that race is a social construct and that racism is a system of oppression based on invented racial categories. It debunks the false ideology that race is biological. As a manual, this book presents clear instructions for understanding the history of race, including whiteness, starting in colonial America, where the elite created a hierarchy of racial categories to maintain their power through a divide-and-conquer strategy. As a toolbox, this book provides a variety of specific action steps that readers can take once they have developed a foundational understanding of the history of white supremacy, a history that includes how the Racism Machine has been recalibrated to perpetuate racism in a supposedly "post-racial" era.

Handbook of Reading Research, Volume V - Elizabeth Birr Moje 2020-06-18
In a time of pressures, challenges, and threats to public education, teacher preparation, and funding for educational research, the fifth volume of the Handbook of Reading Research takes a hard look at why we undertake reading research, how school structures, contexts and policies shape students' learning, and, most importantly, how we can realize greater impact from the research conducted. A comprehensive volume, with a "gaps and game changers" frame, this handbook not only synthesizes current reading research literature, but also informs promising directions for research, pushing readers to address problems and challenges in research design or method. Bringing the field authoritatively and comprehensively up-to-date since the publication of the Handbook of Reading Research, Volume IV, this volume presents multiple perspectives that will facilitate new research development, tackling topics including: Diverse student populations and sociocultural perspectives on reading development Digital innovation, literacies, and platforms Conceptions of teachers, reading, readers, and texts, and the role of affect, cognition, and social-emotional learning in the reading process New methods for researching reading instruction, with attention to equity, inclusion, and education policies Language development and reading comprehension Instructional practices to promote reading development and comprehension for diverse groups of readers Each volume of this handbook has come to define the field for the period of time it covers, and this volume is no exception, providing a definitive compilation of current reading research. This is a must-have resource

for all students, teachers, reading specialists, and researchers focused on and interested in reading and literacy research, and improving both instruction and programs to cultivate strong readers and teachers.

Handbook of Research on Inequities in Online Education During Global Crises - Kyei-Blankson, Lydia 2021-05-07

In response to the COVID-19 pandemic, many educational institutions implemented social distancing interventions such as initiating closure, developing plans for employees to work remotely, and transitioning teaching and learning from face-to-face classrooms to online environments. The abrupt switch to online teaching and learning, for the most part, has been a massive change for administration, faculty, and students at traditional brick-and-mortar universities and colleges as concerns regarding the pedagogical soundness of this mode of delivery remain among some stakeholders. Not only that, but the switch has also revealed the inequities in the system when it comes to the types of students universities serve. It is important as institutions move forward with online instruction that consideration be made about all students and what policies and strategies need to be put into place to help support and meet the needs of all constituents now or when unprecedented situations arise. The only way this can be done is by documenting the experiences through the eyes of faculty who were at the frontline of providing instruction and advising services to students. The Handbook of Research on Inequities in Online Education During Global Crises brings to light the struggles faculty and students faced as they were required to switch to online education during the global COVID-19 health crisis. This crisis has revealed inequities in the educational system as well as the specific effects of inequities when it comes to learning online, and the chapters in this book provide information to help institutions be better prepared for online education or remote learning in the future. While highlighting topics such as new educational trends, remote instruction, diversity in education, and teaching and learning in a pandemic, this book is ideal for in-service and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the inequalities within the educational systems and the new policies and strategies put in place with online education to combat these issues and support the needs of all diverse student populations.

College Students in the United States - Kristen A. Renn 2021-05-01
In this book, the authors bring together in one place essential information about college students in the US in the 21st century. Synthesizing existing research and theory, they present an introduction to studying student characteristics, college choice and enrollment patterns, institutional types and environments, student learning, persistence, and outcomes of college. Substantially revised and updated, this new edition addresses contemporary and anticipated student demographics and enrollment patterns, a wide variety of campus environments (such as residential, commuter, online, hybrid), and a range of outcomes including learning, development, and achievement. The book is organized around Alexander Astin's Inputs-Environment-Outputs (I-E-O) framework. Student demographics, college preparation, and enrollment patterns are the "inputs." Transition to college and campus environments are the substance of the "environment." The "outputs" are student development, learning, and retention/persistence/completion. The authors build on this foundation by providing relevant contemporary information and analysis of students, environments, and outcomes. They also provide strategies for readers to project forward in anticipation of higher education trends in a world where understanding "college students in the United States" is an ongoing project. By consolidating foundational and new research and theory on college students, their experiences, and college outcomes in the US, the book provides knowledge to inform policies, programs, curriculum and practice. As a starting point for those who seek a foundational

understanding of the diversity of students and institutions in the US, the book includes discussion points, learning activities, and further resources for exploring the topics in each chapter.

Handbook of Mental Health in African American Youth - Alfiee M. Breland-Noble 2016-01-22
This handbook fills major gaps in the child and adolescent mental health literature by focusing on the unique challenges and resiliencies of African American youth. It combines a cultural perspective on the needs of the population with best-practice approaches to interventions. Chapters provide expert insights into sociocultural factors that influence mental health, the prevalence of particular disorders among African American adolescents, ethnically salient assessment and diagnostic methods, and the evidence base for specific models. The information presented in this handbook helps bring the field closer to critical goals: increasing access to treatment, preventing misdiagnosis and over hospitalization, and reducing and ending disparities in research and care. Topics featured in this book include: The epidemiology of mental disorders in African American youth. Culturally relevant diagnosis and assessment of mental illness. Uses of dialectical behavioral therapy and interpersonal therapy. Community approaches to promoting positive mental health and psychosocial well-being. Culturally relevant psychopharmacology. Future directions for the field. The Handbook of Mental Health in African American Youth is a must-have resource for researchers, professors, and graduate students

as well as clinicians and related professionals in child and school psychology, public health, family studies, child and adolescent psychiatry, family medicine, and social work.

Routledge Handbook of the Sociology of Higher Education - James E. Côté 2016-06-03
This is the first handbook to cover the sociological approaches to higher education. It is timely because of global expansions of mass higher educational systems, especially as these systems come under scrutiny by a variety of stakeholders. Questions are being raised about the value of traditional pedagogies along with calls for efficiency, accountability and cost-reduction, but above all job training. Within this neoliberal context, each chapter examines different sociological aspects of, and debates about, educational institutions as status-conferring organizations, with myriad positional characteristics, experiences, and outcomes. Many current debates concern the legitimacy of the statuses conferred, including the continuing debate regarding the role of universities in legitimating social class reproduction as well as more recent concerns about standards in mass systems. This handbook puts these issues and debates in focus in ways that will be of interest to a variety of stakeholders, within academia as well as in policy circles.

Higher Education: Handbook of Theory and Research - Michael B. Paulsen 2017-02-09
Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Handbook of Research on Challenging Deficit Thinking for Exceptional Education Improvement - Williams, Richard D. 2022-01-14 Exceptional education, also known as special

education, is often grounded within exclusive and deficit mindsets and practices. Research has shown perpetual challenges with disproportionate identification of culturally and linguistically diverse students, especially Black and Indigenous students. Research has also shown perpetual use of inappropriate placement in more restrictive learning environments for marginalized students, often starting in Pre-K. Exceptional education practitioners often engage in practices that place disability before ability in instruction, behavior management, identification and use of related services, and educational setting placement decisions. These practices, among others, have resulted in a crippled system that situates students with exceptionalities in perceptions of deviance, ineptitude, and perpetuate systemic oppression. The Handbook of Research on Challenging Deficit Thinking for Exceptional Education Improvement unites current theory and practices to communicate the next steps to end the current harmful practices and experiences of exceptional students through critical analysis of current practices, mindsets, and policies. With the information this book provides, practitioners have the power to implement direct and explicit actions across levels to end the harm and liberate our most vulnerable populations. Covering topics such as accelerated learning, educator preparation programs, and intersectional perspectives, this book is a dynamic resource for teachers in exceptional education, general teachers, social workers, psychologists, educational leaders, organizational leaders, the criminal justice system, law enforcement agencies, government agencies, policymakers, curriculum designers, testing companies, current educational practitioners, administrators, post-grad students, professors, researchers, and academicians.

Handbook of Research on Teachers of Color and Indigenous Teachers - Conra D. Gist 2022-10-15
Teachers of Color and Indigenous Teachers are underrepresented in public schools across the United States of America, with Black, Indigenous, and People of Color making up roughly 37% of the adult population and 50% of children, but just 19% of the teaching force. Yet research over decades has indicated their positive impact on student learning and social and emotional development, particularly for Students of Color and Indigenous Students. A first of its kind, the Handbook of Research on Teachers of Color and Indigenous Teachers addresses key issues and obstacles to ethnoracial diversity across the life course of teachers' careers, such as recruitment and retention, professional development, and the role of minority-serving institutions. Including chapters from leading researchers and policy makers, the Handbook is designed to be an important resource to help bridge the gap between scholars, practitioners, and policy makers. In doing so, this research will serve as a launching pad for discussion and change at this critical moment in our country's history. The volume's goal is to drive conversations around the issue of ethnoracial teacher diversity and to provide concrete practices for policy makers and practitioners to enable them to make evidence-based decisions for supporting an ethnoracially diverse educator workforce, now and in the future.

Responding to Learner Diversity and Learning Difficulties - Dennis Conrad 2018-10-01
Caribbean Discourse in Inclusive Education Volume II "Responding to Learner Diversity and Learner Difficulties" shares selected critical reflections and recommendations on the way educational communities respond to student diversity and difficulties learning. These contexts include the Caribbean, the Diaspora, and beyond. Authors explore issues and strategies for realizing and sustaining the agenda of education for all within primarily, but not limited to, the Caribbean. While the authors are aware of the ongoing debate between the terms 'education for all' and 'inclusive education', we use these terms interchangeably. We hold the position that inclusive education is about commitment to removing barriers to optimum learning for all learners regardless of age, ability, ethnicity, gender, geography, race, religion, sexual orientation or other differences. 'Responding to Learner Diversity and Difficulties' extend the discourse to include stakeholders committed to sharing their experiences and strategies for overcoming barriers to inclusive education. This second volume presents research that examines how teachers can respond to students with disabilities and difficulties learning, teach challenging curriculum content in mathematics and literacy, build citizenship through student voice, improve teacher practice via co-teaching and critical reflection, promote inclusive practice through leadership and advocacy. It can be used as a core text or companion reader for students at the undergraduate and graduate levels, lecturers, practitioners, researchers and policy makers.
