*The Discipline of Market Leaders* - Michael Treacy 2007-03-20

Why is it that Casio can sell a calculator more cheaply than Kellogg's can sell a box of corn flakes? Why can FedEx "absolutely, positively" deliver your package overnight but airlines have trouble keeping track of your bags? What does your company do better than anyone else? What unique value do you provide to your customers? How will you increase that value next year? As customers' demands for the highest quality products, best services, and lowest prices

increase daily, the rules for market leadership are changing. Once powerful companies that haven't gotten the message are faltering, while others, new and old, are thriving. In disarmingly simple and provocative terms, Treacy and Wiersema show what it takes to become a leader in your market, and stay there, in an ever more sophisticated and demanding world.

**Architects' Data** - Ernst Neufert 1991-01-15

This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is

used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

**The Twentieth-Century Heritage Thematic Framework FRENCH** - Susan Marsden  
2021-07-31

The Twentieth-Century Historic Thematic Framework is a tool for identifying and assessing the heritage of the twentieth-century. It is a way to organize and define history in order to help

identify heritage sites and place them in context. It is not a history of the twentieth century, nor is it a database of significant sites, but instead is an analysis of the century's development, emphasizing global forces, trends, and phenomena that shaped the built environment. Commissioned by the Getty Conservation Institute (GCI) working in collaboration with the ICOMOS Twentieth Century Heritage International Scientific Committee, it identifies the principal social, technological, political, and economic drivers that shaped the buildings, cities, industries and landscapes of the twentieth century globally. These have been distilled into ten succinct themes: 1. Rapid Urbanization and the Growth of Large Cities 2. Accelerated Scientific and Technological Development 3. Mechanized and Industrialized Agriculture 4. World Trade and Global Corporations 5. Transportation Systems and Mass Communication 6. Internationalization, New Nation-States, and Human Rights 7. Conserving

the Natural Environment, Buildings, and Landscapes 8. Popular Culture and Tourism 9. Religious, Educational, and Cultural Institutions 10. War and its Aftermath The Twentieth-Century Historic Thematic Framework is offered freely for use, trial, debate, and discussion to support the conservation of significant heritage places of the twentieth century. It is a tool that can be utilized and adapted by anyone involved in heritage conservation around the world. Our hope is that it will aid many forms of research, analysis, and survey work, and ultimately help sustain and conserve the heritage of the twentieth century.

Traffic and Mobility - Werner Brilon 2012-12-06

Anyone who reflects on the future of society cannot do so without at the same time thinking about the future of our transportation systems. The dilemma is obvious. On the one hand,

mobility must be maintained as it is crucial to economic development and because people are eager for individual mobility. On the other hand, traffic imposes heavy burdens on people and on the environment, on cities and communities and on our national economies. Finding a solution to that dilemma seems to be difficult, in fact we have not even developed a rough idea of how it could look like. This is why the North Rhine-Westphalia Science and Research Ministry came up with the plan to work out a well-founded scientific basis on which to solve the problems inherent in our transport system. A research network has been established and sponsored with government funds for a period of three years with a view to realising that objective. The "Traffic Simulation and Environmental Impact" research network is composed of researchers who have an excellent reputation as North Rhine-Westphalia traffic experts. Cutting across various disciplines of knowledge, the network aims to integrate transportation and natural

sciences, particularly physics and mathematics, in a move to profit by the synergy between technical know-how and innovative methodology. The present volume is intended as a progress report and a prologue to the forthcoming international colloquium which represents the highlight and at the same time the end of the three-year project funding period.

Twelve Years a Slave - Solomon Northup  
2021-01-01

"Having been born a freeman, and for more than

thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

**Broken Glass** - Alain Mabanckou 2018-10-09  
An irreverent, allusive, scatological, tragicomic masterpiece that centers on the patrons of a run-down bar as they try to document the details of their lives in a country that appears to have forgotten the importance of remembering. In Republic of the Congo, in the town of Trois-Cents, in a bar called Credit Gone West, a former schoolteacher known as Broken Glass drinks red wine and records the stories of the bar and its regulars for posterity: Stubborn Snail, the owner, who must battle church people, ex-alcoholics, tribal leaders, and thugs set on destroying him and his business; the Printer,

who had his respectable life in France ruined by a white woman, his wife; Robinette, who could outdrink and outpiss any man; and Broken Glass himself, whose own tale involves as much heartbreak, squalor, disappointment, and delusion. But Broken Glass fails spectacularly at staying out of trouble as one denizen after another wants to rewrite history in an attempt at making sure his portrayal will properly reflect their exciting and dynamic lives. Despondent over this apparent triumph of self-delusion over self-awareness, Broken Glass drowns his sorrows and riffs on the great books of Africa and the West. Brimming with life, death, and literary allusions, Broken Glass is Mabankou's finest novel--a mocking satire of the dangers of artistic integrity.

Is social media destroying democracy? Are Russian propaganda or "Fake news" entrepreneurs on Facebook undermining our sense of a shared reality? A conventional wisdom has emerged since the election of Donald Trump in 2016 that new technologies and their manipulation by foreign actors played a decisive role in his victory and are responsible for the sense of a "post-truth" moment in which disinformation and propaganda thrives. *Network Propaganda* challenges that received wisdom through the most comprehensive study yet published on media coverage of American presidential politics from the start of the election cycle in April 2015 to the one year anniversary of the Trump presidency. Analysing millions of news stories together with Twitter and Facebook shares, broadcast television and YouTube, the book

provides a comprehensive overview of the architecture of contemporary American political communications. Through data analysis and detailed qualitative case studies of coverage of immigration, Clinton scandals, and the Trump Russia investigation, the book finds that the right-wing media ecosystem operates fundamentally differently than the rest of the media environment. The authors argue that longstanding institutional, political, and cultural patterns in American politics interacted with technological change since the 1970s to create a propaganda feedback loop in American conservative media. This dynamic has marginalized centre-right media and politicians, radicalized the right wing ecosystem, and rendered it susceptible to propaganda efforts, foreign and domestic. For readers outside the United States, the book offers a new perspective and methods for diagnosing the sources of, and potential solutions for, the perceived global crisis of democratic politics.

*What Would Mary Ann Do?* - Dawn Wells

2014-09-08

So, what would Mary Ann do? As the sweet, polite, and thoughtful Mary Ann Summers from Kansas in the hit series *Gilligan’s Island*, Dawn Wells created an unforgettable and beloved character that still connects with people fifty years from the show’s debut in 1964. As the “good girl” among the group of castaways on a tiny island, she was often positioned against the glamorous and exotic Ginger Grant, played by Tina Louise, prompting many to ask: Are you a Ginger or a Mary Ann? This book not only helps readers answer that question for themselves but also sends the inspirational and heartwarming message that yes, good girls do finish first. Part

self-help, part memoir, and part humor—with a little classic TV nostalgia for good measure—What Would Mary Ann Do? contains twelve chapters on everything from how Mary Ann would respond to changes in today's culture to addressing issues confronting single women and mothers. Wells brings along her fellow characters from Gilligan's Island to illustrate certain principles, such as incorporating the miserly Thurston Howell III (Jim Backus) in a discussion on money. Anecdotal sidebars also describe fascinating facts and compelling memories from the show, as well as some trivia questions to challenge fans and followers. Illustrated with photographs from Wells's private collection, this book provides inspiring lessons from TV's favorite good girl.

**Magnificent Desolation** - Buzz Aldrin  
2009-08-17

Forty years ago, Buzz Aldrin became the second human - minutes after Neil Armstrong - to set foot on a celestial body other than the Earth. The event remains one of mankind's greatest achievements and was witnessed by the largest worldwide television audience in history. In the years since, millions more have had their earth-centric perspective changed forever by gazing at the iconic photograph of Aldrin standing on the surface of the Moon with the blackness of space behind him. He described what he saw as 'magnificent desolation'. The flight of Apollo 11 made Aldrin one of the most famous people on the planet, yet few people know the rest of the story. In Magnificent Desolation, Aldrin not only gives us a harrowing first-person account of the

lunar landing that came within seconds of failure, as well as the ultimate insider's view of life as one of the superstars of America's space program, he also opens up with remarkable candor about his more personal trials - and eventual triumphs - back on Earth. From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the Moon before the decade was out, Aldrin returned home to an Air Force career stripped of purpose or direction, other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour. The twin demons of depression and alcoholism emerged - the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him. As an adventure story, a searing memoir of self-destruction and self-renewal, and as a visionary rallying cry to once again set our course for Mars and beyond, *Magnificent Desolation* is the thoroughly human story of a genuine hero.
