Musical Aesthetics: The twentieth century - Edward A. Lippman 1986
Musical aesthetics in this century--like music itself--is distinguished by its concern with specifically musical forms and principles--with the interrelationships and transformation of motifs with the permutations of sets of tones with the characteristics of forms such as the fugue or sonata and with underlying or background structures that are not really audible themselves but that nevertheless are important determinants of the form and sense of the music. Thus music and musical thought in this century have been significantly determined by a reaction against the predominating qualities and values of the 19th century; musical hermeneutics symbolism and semiotics having replaced the traditional problem of emotional content. This volume is the third of three which are designed to present the main trends of Western musical thought in the area of philosophy and aesthetics. Each section of the work presenting the fundamental statements of a given aesthetic issue has its own brief introduction defining and interrelating the relevant ideas; the various sections seek to clarify the underlying historical continuities of thought. Each also concludes with its own bibliography.

Feldenkrais® - Moshe Feldenkrais 2003

Ludwig Van Beethoven - Carl Dahlhaus 1993

Many books have been written about Beethoven but it is rare to find one which seeks an alternative to the tendency of academia, on the one hand,

to fragmentation, and of popular biographical writing, on the other, to a superficial overview. In this volume, the late Carl Dahlhaus combines the interpretations of individual works with excursions into the musical aesthetics of the period around 1800, an age which was not only a 'classical' period in the history of the arts but also one in which aesthetics carved itself a place in the centre of philosophical attention. The theme of the book is the reconstruction of Beethoven's 'musical thinking' from the evidence in the works themselves and their context in the history of ideas. A table entitled 'Chronicle' places the references to biographical data in their historical context. The selective bibliography includes comments to assist readers to find their way in the labyrinth of the literature about Beethoven.
