**Rafael Megall** - Pierre Skira 2015-10-05

Rafael Megall's paintings embody Armenia's new spirit: in his work, the modernity of composition coexists with symbols, signs and images deriving from ancient Armenian culture. From his contemporary point of view, the artist dialogues with signs inspired by reliefs from the ancient armenian churches, therefore traditional figures of medieval bestiaries are woven together with universal themes, to attain a depiction that deals with the relationship between man and animal. Rafael Megall was born in 1983 in Yerevan. Since 2008 he has been member of the Union of Artists of the Republic of Armenia. Since 2010 he has been working between Armenia and USA.

**Who's in the Picture?** - Susie Brooks 2022-07-21

An engaging first search-and-find art book that helps young children enjoy and understand works of art.

**Florence** - Guido Zucconi 1995

This book looks at how the human brain got the capacity for language and how language then evolved. Its four parts are concerned with different views on the emergence of language, with what language is, how it evolved in the human brain, and finally how this process led to the properties of language. Part I considers the main approaches to the subject and how far language evolved culturally or genetically. Part II argues that language is a system of signs and considers how these elements first came together in the brain. Part III examines the evidence for brain mechanisms to allow the formation of signs. Part IV shows how the book's explanation of language origins and evolution is not only consistent with the complex properties of languages but provides the basis for a theory of syntax that offers insights into the learnability of language and to the nature of constructions that have defied decades of linguistic analysis, including including subject-verb inversion in questions, existential constructions, and long-distance dependencies. Denis Bouchard's outstandingly original account will interest linguists of all persuasions as well as cognitive scientists and others interested in the evolution of language.

**Firmin** - Sam Savage 2011-08-24

In the basement of a Boston bookstore, Firmin is born in a shredded copy Finnegans Wake, nurtured on a diet of Zane Grey, Lady Chatterley's Lover, and Jane Eyre (which tastes a lot like lettuce). While his twelve siblings gnaw these books obliviously, for Firmin the words, thoughts, deeds, and hopes—all the literature he consumes—soon consume him. Emboldened by reading, intoxicated by curiosity, foraging for food, Firmin ventures out of his bookstore sanctuary, carrying with him all the yearnings and failings of humanity itself. It's a lot to ask of a rat—especially when his home is on the verge of annihilation. A novel that is by turns hilarious, tragic, and hopeful, Firmin is a masterpiece of literary imagination. For here, a tender soul, a vagabond and philosopher, struggles with mortality and meaning—in a tale for anyone who has ever feasted on a book...and then had to turn the final page.

**Art of the Twentieth Century and Beyond** - Loredana Parmesani 2012

The new, updated edition of the Skira best-seller on twentieth-century art. This handy manual is for those who wish to understand what art was in the last century and what it represents today. The book, whose structure is essential and synthetic, aims to divulge the pleasure of art to those who have never delved beyond its surface, and above all to describe how it has become spectacle and performance in recent years. Following an analysis of the theories and poetics that tempestuously traversed the historical avant-gardes and the neo-avant-gardes of the twentieth century and contributed to their extraordinary vitality, the author focuses on and explains the principal artistic phenomena that, starting in 1980, marked the period defined as post-modern, which was characterised by performance and a system of economic-financial art. The last chapter describes the arrival of postmodern up to its possible decline, marked by the social events of 2007 that, by abandoning the special effects of immateriality, has headed in a direction that is more tangible, worldly and concrete.

**Funny Machines for George the Sheep** - 2014-05-08

This delightful introduction to the inventions of Leonardo da Vinci teaches young readers about the painstaking but rewarding art of design and discovery. George the sheep is happy living outside in his meadow except for one thing: when it rains, he shrinks to the size of a mouse; when the sun comes out he grows enormous. Befuddled, his owner Leon sets out to find a way to shelter George from the rain. A huge set of bat wings to dry his fur? A wheeled chariot to keep out the wet? Finally he alights on the perfect solution—a large umbrella. But when the wind plays havoc with this contraption Leon must put pencil to paper once again to come up with a solution. Through careful measuring, sketching, and a truly indefatigable spirit, Leon, like his fifteenth-century namesake, solves the kinds of problems that have challenged inventors throughout history. Cleverly invoking the mechanical genius of Leonardo da Vinci, this delightful children's book explores the art of invention through illustrations and an entertaining story.

**Στην υγειά μας. Studi in omaggio a Giorgio Bejor** - Claudia Lambrugo 2020-12-17

Il volume Στην υγειά μας è l'omaggio festoso e benaugurante che un gruppo folto di amici e colleghi dell'Università degli Studi di Milano e di altri Atenei italiani ha inteso offrire a Giorgio Bejor in segno di stima e affetto al momento del suo pensionamento. Vi sono raccolte riflessioni su temi tanto ampi quanto lo sono i più cari interessi del festeggiato: dai problemi di storia dell'arte ai grandi scavi in Italia e nel Mediterraneo; dai singoli personaggi e oggetti della cultura classica alla profonda passione di Giorgio Bejor per musica, cinema e teatro. La miscellanea, a prescindere dal contenuto rigorosamente scientifico, nasce dall'idea condivisa di un brindisi amicale: Στην υγειά μας, caro Giorgio!

**Discoveries and Opinions of Galileo** - Galileo 1957-04-01

Directing his polemics against the pedantry of his time, Galileo, as his

own popularizer, addressed his writings to contemporary laymen. His support of Copernican cosmology, against the Church's strong opposition, his development of a telescope, and his unorthodox opinions as a philosopher of science were the central concerns of his career and the subjects of four of his most important writings. Drake's introductory essay place them in their biographical and historical context.

**On Ugliness** - Umberto Eco 2011

Beauty and ugliness are two sides of the same coin; by ugliness we usually mean the opposite of beauty and we often define the first in order to understand the nature of the second. But the various depictions of ugliness over the centuries are richer and more unpredictable than is commonly thought. The striking images and anthological quotations in *On Ugliness* lead us on an extraordinary journey through the passions, terrors and nightmares of almost three thousand years, where acts of rejection go hand in hand with touching instances of empathy, and an aversion to deformity is accompanied by seductive violations of all classical canons. With his characteristic wit and erudition, Umberto Eco draws on examples in art and literature from ancient times to the present day. Abundantly illustrated with demons, madmen, vile enemies and disquieting presences, with freaks and the living dead, *On Ugliness* is conceived for a vast and diverse readership, and is an invaluable companion volume to *On Beauty*.

*Kuniyoshi* - Rossella Menegazzo 2018-10-04

Recognized as one of the most interesting and vibrant artists from the Edo period, Utagawa Kuniyoshi (1797-1861) is a major exponent of ukiyo-e in the early 1800s and trained under the master Utagawa Toyokuni. His fame is tied to the series of polychrome xylographs that illustrate the 108 heroes from the novel *Suikoden* (Brigands), which became a bestseller in China and Japan in the late 1700s, promoting the imagery of a band of brigands who defend the people suppressed by injustice and government corruption. Violent, powerful, armed people with muscular bodies covered in tattoos that today inspire manga, anime, tattoo artists and illustrators across the world. Kuniyoshi affirmed the genre of warrior prints, but he was also interested in portraits of female beauties, kabuki actors, landscapes, children and ghosts, another greatly admired genre in Japan. Nonetheless, his name is above all associated with illusion, with shadows and Arcimboldo-like composite figures, figures within figures and parodies of stories and battles with animals, objects, sweets, food. His images are fantastical, baroque, rich in colour, of great detail, with imposing characters and dynamic actions. A versatile and intriguing figure for the variety of subjects, from female beauties and monsters to animals and heroes, and for the impressive technique that gave life to a school carried forth for generations.

*The Complete Danteworlds* - Guy P. Raffa 2009-08-01

Dante Alighieri's *Divine Comedy* has, despite its enormous popularity and importance, often stymied readers with its multitudinous characters, references, and themes. But until the publication in 2007 of Guy Raffa's guide to the *Inferno*, students lacked a suitable resource to help them navigate Dante's underworld. With this new guide to the entire *Divine Comedy*, Raffa provides readers—experts in the Middle Ages and Renaissance, Dante neophytes, and everyone in between—with a map of the entire poem, from the lowest circle of Hell to the highest sphere of Paradise. Based on Raffa's original research and his many years of teaching the poem to undergraduates, *The Complete Danteworlds* charts a simultaneously geographical and textual journey, canto by canto, region by region, adhering closely to the path taken by Dante himself through Hell, Purgatory, and Paradise. This invaluable reference also features study questions, illustrations of the realms, and regional summaries. Interpreting Dante's poem and his sources, Raffa fashions detailed entries on each character encountered as well as on many significant historical, religious, and cultural allusions.

**Postproduction** - Nicolas Bourriaud 2005-01-01

The French writer Nicolas Bourriaud discusses how, since the early nineties, an ever increasing number of artworks have been created on the basis of preexisting works; more and more artists interpret, reproduce, re-exhibit, or use works made by others or available cultural products. This art of postproduction seems to respond to the proliferating chaos of global culture in the information age, which is characterized by an increase in the supply of works and the art worlds annexation of forms ignored or disdained until now. First published in 2002, this 2nd edition contains a new foreword where the author reflects on how the art of postproduction developed over the last couple of years. Nicolas Bourriaud is the co-director of the Palais de Tokyo in Paris. His previous books include *L'ère tertiaire* (Flammarion), *Ésthetique relationnelle* (Presses du réel), and *Formes de vie* (Denoël).

*Botticelli Past and Present* - Ana Debenedetti 2019-01-08

The recent exhibitions dedicated to Botticelli around the world show, more than ever, the significant and continued debate about the artist. *Botticelli Past and Present* engages with this debate. The book comprises four thematic parts, spanning four centuries of Botticelli's artistic fame and reception from the fifteenth century. Each part comprises a number of essays and includes a short introduction which positions them within the wider scholarly literature on Botticelli. The parts are organised chronologically beginning with discussion of the artist and his working practice in his own time, moving onto the progressive rediscovery of his work from the late eighteenth to the turn of the twentieth century, through to his enduring impact on contemporary art and design. Expertly written by researchers and eminent art historians and richly illustrated throughout, the broad range of essays in this book make a valuable contribution to Botticelli studies.

**Gaspare Tagliacozzi and Early Modern Surgery** - Paolo Savoia 2019-12-12

This book uses the work of Bolognese physician and anatomist Gaspare Tagliacozzi to explore the social and cultural history of early modern surgery. It discusses how Italian and European surgeons' attitudes to health and beauty – and how patients' gender – shaped views on the public appearance of the human body. In 1597, Gaspare Tagliacozzi published a two-volume book on reconstructive surgery of the mutilated parts of the face. Studying Tagliacozzi's surgery in context corrects widespread views about the birth of plastic surgery. Through a combination of cultural history, microhistory, historical epistemology, and gender history, this book describes the practice and practitioners considered to be at the periphery of the "Scientific Revolution." Historical themes covered include the writing of individual cases, hegemonic and subaltern forms of masculinity, concepts of the natural and the artificial, emotional communities and moral economies of pain, and the historical anthropology of the culture of beauty and the face and its disfigurements. The book is essential reading for upper-level students, postgraduates, and scholars working on the history of medicine and surgery, the history of the body, and gender and cultural history. It will also appeal to those interested in the history of beauty, urban studies and the Renaissance period more generally.

**Imagined States** - Luisa Del Giudice 2001-06

An international ensemble of folklore scholars looks at varied ways in which national and ethnic groups have traditionally and creatively used imagined states of existence—some idealizations, some demonizations—in the construction of identities for themselves and for others. Drawing on oral traditions, especially as represented in traditional ballads, broadsides, and tale collections, the contributors consider fertile landscapes of the mind where utopias overflow with bliss and abundance, stereotyped national and ethnic caricatures define the lives of "others," nostalgia glorifies home and occupation, and idealized and mythological animals serve as cultural icons and guideposts to harmonious social life.

**New Waves** - Marta Gnypp 2021-02  
Leading trailblazers in contemporary art reflect on the transformations in ideology and practice that shape today's art market In *New Waves*, Dutch art historian Marta Gnypp interviews a number of artists and curators about contemporary art's shifting landscape. recent years. "Rewriting the Canon" details the rediscovery and reevaluation of several postwar artists including painters Joan Semmel, Stanley Whitney and Claudette Johnson. In "Extending New Media," artists Cory Arcangel and Alex da Corte discuss the creative possibilities posed by new technology. "New Approaches to Truth and Morality" sees installation artist Jordon Wolfson and photographer Mohamed Bourouissa reflect on the ethics of art making. "New Classic Art" examines the practices of four artists--Claire Tabouret, Adriana Varejão, Daniel Richter and Jenny Saville--whose work provides a contemporary spin on the classical art tradition. Finally, Gnypp speaks to several curators, collectors and museum directors to discuss the evolving art market in the 21st century.
