Henry I - C. Warren Hollister 2008-10-01

Henry I, son of William the Conqueror, ruled from 1100 to 1135, a time of fundamental change in the Anglo-Norman world. This long-awaited biography, written by one of the most distinguished medievalists of his generation, offers a major reassessment of Henry's character and reign. Challenging the dark and dated portrait of the king as brutal, greedy, and repressive, it argues instead that Henry's rule was based on reason and order. C. Warren Hollister points out that Henry laid the foundations for judicial and financial institutions usually attributed to his grandson, Henry II. Royal government was centralized and systematized, leading to firm, stable, and peaceful rule for his subjects in both England and Normandy. By mid-reign Henry I was the most powerful king in Western Europe, and with astute diplomacy, an intelligence network, and strategic marriages of his children (legitimate and illegitimate), he was able to undermine the various coalitions mounted against him. Henry strove throughout his reign to solidify the Anglo-Norman dynasty, and his marriage linked the Normans to the Old English line. Hollister vividly describes Henry's life and reign, places them against the political background of the time, and provides analytical studies of the king and his magnates, the royal administration, and relations between king and church. The resulting volume is one that will be welcomed by students and general readers alike.

The Landscape of Stalinism - Evgeny Dobrenko 2011-11-15

This wide-ranging cultural history explores the expression of Bolshevik Party ideology through the lens of landscape, or, more broadly, space. Portrayed in visual images and words, the landscape played a vital role in expressing and promoting ideology in the former Soviet Union during the Stalin years, especially in the 1930s. At the time, the iconoclasm of the immediate postrevolutionary years had given way to nation building and a conscious attempt to create a new Soviet culture. In painting, architecture, literature, cinema, and song, images of landscape were enlisted to help mold the masses into joyful, hardworking citizens of a state with a radiant, utopian future -- all under the fatherly guidance of Joseph Stalin. From backgrounds in history, art history, literary studies, and philosophy, the contributors show how Soviet space was sanctified, coded, and sold as an ideological product. They explore the ways in which producers of various art forms used space to express what Katerina Clark calls a cartography of power - an organization of the entire country into a hierarchy of spheres of relative sacredness, with Moscow at the center. The theme of center versus periphery figures prominently in many of the essays, and the periphery is shown often to be paradoxically central. Examining representations of space in objects as diverse as postage stamps, a hikers' magazine, advertisements, and the Soviet musical, the authors show how cultural producers attempted to naturalize ideological space, to make it an unquestioned part of the worldview. Whether focusing on the new or the centuries-old, whether exploring a built cityscape, a film documentary, or the painting Stalin and Voroshilov in the Kremlin, the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination. Not all features of Soviet space were entirely novel, and several of the essayists assert continuities with the prerevolutionary past. One example is the importance of the mother image in mass songs of the Stalin period; another is the "boundless longing" inspired in the Russian character by the burden of living amid vast empty spaces. But whether focusing on the new or the centuries-old, whether exploring a built cityscape, a film documentary, or the painting Stalin and Voroshilov in the Kremlin, the authors offer a consistently fascinating journey through the landscape of the Soviet ideological imagination.

The Psychology of Marxian Socialism - Henry de Man 2020-02-18

This classic work on the psychology of socialism carries for this edition a slightly refurbished title. By calling it The Psychology of Marxian Socialism, the work is sharply distinguished from an earlier work of the same title (written at a much earlier time) by Gustave LeBon. This book was written in the post-Bolshevik revolutionary era, at the height of the Weimar democracy in Germany; LeBon's represents a fin de siècle effort, reflecting earlier concerns in socialist theory. De Man's work derives its strength from a close and hard look at how socialism operated in one country. It is probably one of the greatest such efforts in the post-World War I period.

Quantum Physics for Poets - Leon M. Lederman 2011-09-27

The Times Literary Supplement called their previous book, *Symmetry and the Beautiful Universe*: [A] tour de force of physics made simple. Quantum theory is the bedrock of contemporary physics and the basis of understanding matter in its tiniest dimensions and the vast universe as a whole. But for many, the theory remains an impenetrable enigma. Nobel Prize laureate Leon M. Lederman and Fermi lab theoretical physicist Christopher T. Hill seek to remedy this situation by both drawing on their scientific expertise and their talent for communicating science to the general reader. In this lucid, informative book, designed for the curious, they make the seemingly daunting subject of quantum physics accessible, appealing, and exciting. Their story is partly historical, covering the many Eureka moments when great scientists—Max Planck, Albert Einstein, Niels Bohr, Werner Heisenberg, Erwin Schrödinger, and others—struggled to come to grips with the bizarre realities that quantum research revealed. Although their findings were indisputably proven in experiments, they were so strange and counterintuitive that Einstein refused to accept quantum theory, despite its great success. The authors explain the many strange and even eerie aspects of quantum reality at the subatomic level, from particles that can be many places simultaneously and sometimes act more like waves, to the effect that a human can have on their movements by just observing them! Finally, Drs. Lederman and Hill delve into quantum physics' latest and perhaps most breathtaking offshoots—field theory and string theory. The intricacies and ramifications of these two theories will give the reader much to ponder. In addition, the authors describe the diverse applications of quantum theory in its almost countless forms of modern technology throughout the world. Using eloquent analogies and illustrative examples, *Quantum Physics for Poets* render even the most profound reaches of quantum theory understandable and something for us all to savor. Leon M. Lederman, Nobel Laureate (Batavia, IL), is Resident Scholar at the Illinois Mathematics and Science Academy, Director Emeritus of Fermi National Accelerator Laboratory, Pritzker Professor of Science at the Illinois Institute of Technology, the author of the highly acclaimed *The God Particle*, the editor of *Portraits of Great American Scientists*, and a contributor to *Science Literacy for the Twenty-First Century*. Dr. Lederman and coauthor Christopher T. Hill are also the coauthors of *Symmetry and the Beautiful Universe*. Christopher T. Hill, PhD (Batavia, IL), is chairman of the Department of Theoretical Physics and a theoretical physicist (Scientist III) at Fermi National Accelerator Laboratory.

With this supple, informative and poignant portrait, they offer penetrating insight into the tirelessly prolific Kirby (1917-94), whose brawny and dynamic yet nuanced style dominated comics for more than 40 years. Their play (Kirby was known as the king) documents a creator who attained immortality even as his life ended amid a morass of corporate exploitation." - Andy Webster, The New York Times KING KIRBY is a play by the husband-and-wife team of New York Times bestselling comics writer Fred Van Lente and NYIT award-winning playwright Crystal Skillman about the life and times of Jack Kirby, the great comic book artist who created or co-created some of your favorite heroes on the page and screen, Captain America, the Avengers, Thor, Fantastic Four, the X-Men, Iron Man, Young Romance, the New Gods, Darkseid, The Demon... the list goes on and on. Upland Communities - Pier Paolo Viazzo 1989-02-16

This book follows the social, economic and demographic transformations of the Alpine area from the late Middle Ages. Its aim is to reassess the image of the upland community which emerges from the work of historians, geographers and social anthropologists. The book therefore deals at length with such problems as the causes and consequences of emigration and patterns of marriage and inheritance in favouring or hampering the adjustments of local populations to changing economic or ecological circumstances, and tackles the vexed question of the relative importance of cultural and environmental factors in shaping family forms and community structures. Although its foundation lies in a long period of anthropological fieldwork conducted in an Alpine community, Upland Communities relies on the methods and conceptual tools of historical demography. Combined with a long-term historical perspective, its broad comparative approach unveils an unexpected diversity in regional and spatial demographic patterns and questions a number of deep-rooted but ultimately misleading notions concerning mountain society and its alleged backwardness in the past.

(M)Other Tongues - Juliane Prade 2020-05-15

(M)Other Tongues: Literary Reflexions on a Difficult Distinction examines a key problem of literary criticism: the differentiation between languages is at the same time necessary and impossible. It is indispensable in order to read a text, yet literary texts are precisely those that question this distinction, articulating the link between languages and cultures, as well as the inherent strangeness of even one's own mother tongue. (M)Other Tongues explores texts from the 16th century to the 21st century, focusing on different aspects of one main feature of literary texts: formally, as well as semantically, they transcend the rules and conventions of the language they speak. Crossing cultural borders is commonly discussed in historical, social, linguistic, and psychoanalytical terms - whether it be as (post-)colonialism, exilic or diasporic identities, creoles, or the displaced other within the own. (M)Other Tongues argues that, rather than being mere evidence in the theoretical analysis of cultural transitions, literary texts are a unique medium to reflect such processes as they challenge and modify the notion of language itself. The book discusses texts written mainly in English, French, and German, but also in Spanish and the complex formerly known as Yugoslavian. (M)Other Tongues shows that such distinctions between languages are precise since they can be exemplified with an indefinite number of words and rules, and still remain uncertain because they cannot be abstracted from these examples. What separates the mother tongue from other tongues is indeed precise uncertainty.
