

Alter This Radical Ideas For Transforming S Into Art

Right here, we have countless book **Alter This Radical Ideas For Transforming s Into Art** and collections to check out. We additionally meet the expense of variant types and furthermore type of the books to browse. The suitable book, fiction, history, novel, scientific research, as skillfully as various extra sorts of books are readily to hand here.

As this Alter This Radical Ideas For Transforming s Into Art , it ends in the works subconscious one of the favored books Alter This Radical Ideas For Transforming s Into Art collections that we have. This is why you remain in the best website to look the unbelievable books to have.

Practically Radical - William C. Taylor 2012-07-31

A manifesto for change in an era when change is the name of the game. In *Practically Radical*, William C. Taylor offers radical ideas and practical advice to help you fix what's wrong with your organization, launch new initiatives with the best chance to succeed, and rethink the logic of leadership itself. Exploring how twenty-five for-profit companies and nonprofit organizations—including IBM, Zappos, Swatch, the Girl Scouts, and Interpol—made remarkable strides in tough circumstances, *Practically Radical* raises (and answers) the make-or-break questions facing today's leaders in every field: Do you see opportunities the competition doesn't see? The most successful organizations embrace one-of-a-kind ideas in a world filled with "me-too" thinking. Do you have new ideas about where to look for new ideas? Routine practices in one field can be revolutionary when they migrate to another. Are you the most of anything? In business today, the middle of the road is the road to ruin. Are you getting the best contributions from the most people? Change is not a game best played by loners.

Alter This! - Alena Hennessy 2007

Presents step-by-step instructions and techniques for creating altered books as works of art, providing examples of the works of several well-known artists in this genre.

Transformative Change in Western Thought - Ingo Gildenhard 2017-07-05

This groundbreaking volume maps the shifting place and function of marvelous transformations from antiquity to the present day. Shape-shifting, taking animal bodies, miracles, transubstantiation, alchemy, and mutation recur and echo throughout ancient and modern writing and thinking and continue in science fiction today as tales of gene-splicing and hybridisation. The idea of metamorphosis lies in uneasy coexistence with orderly world views and it is often cast out, or attributed to enemies. Augustine and the church fathers consider shape-shifting ungodly; Enlightenment thinkers suppress alchemy as unscientific; genetically-modified wheat and stem-cell research are stigmatised as unnatural. Yet the very possibility of radical transformation inspires hope just as it frightens. A provocative, theorising, trans-historical history, this book ranges across classics, literature, history, philosophy, theology and anthropology. From Homer and Ovid to Proust and H. P. Lovecraft and through figures from Proteus to Kafka's Fly and to Spiderman, four historical surveys are combined with nine case studies to show the malleable, yet persistent, presence of transformation throughout Western cultural history.

No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005 - Patrick J. McGuinn 2006

His book provides the essential political context for understanding NCLB, the controversies surrounding its implementation, and forthcoming debates over its reauthorization. Using education as a case study of national policymaking, McGuinn also shows how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare. He places the evolution of the federal role in schools within the context of broader institutional, ideological, and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act, chronicles the concerns raised by the 1983 report *A Nation at Risk*, and shows how education became a major campaign issue for both parties in the 1990s. McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict.

Transforming Government Organizations - Ronald R. Sims 2016-04-01

In 2010 IAP released *Change (Transformation) in Government Organizations*, edited by Ronald R. Sims. This well-received volume described how organizational change methods can be used effectively to make government organizations more effective and efficient and better equipped to serve a demanding citizenry. The 2010 book brought together contributions by managers, practitioners, academics, and consultants in the study of international, federal, state, and local government efforts to respond to increased calls for change (transformation) in public sector organizations. Since the release of the 2010 volume, calls for government transformation have continued and intensified, and a number of fresh ideas and examples have been generated from the field. The time is now ripe for a follow-up volume laying out innovative, successful ideas for transforming government. *Transforming Government Organizations: Fresh Ideas and Examples from the Field* is that follow-up volume. A collection of fresh contributions such as those included in this book will add to the growing knowledge base of what does—and what does not—work when transformation efforts are attempted in government organizations. The contributors to this new volume are experts with extensive experience as change agents in government and other organizations. They provide analyses and discussions of specific cases and issues as well as practical tools, ideas, and lessons learned intended to guide those responsible for similar efforts in the years to come. The audience for the book are government managers, scholars, and others interested in undertaking or learning about such efforts.

Transformation and Tradition in the Sciences - Everett Mendelsohn 2002

A collection of essays on the development of science and the history of ideas.

Reinventing Revolution - Edward J. McCaughan 2019-05-20

Based on in-depth interviews with seventy-four intellectuals of the lefts in Cuba and Mexico, *Reinventing Revolution* explores the rapidly changing thinking of progressives on the big-and enduring-questions of democracy, economic alternatives, and national sovereignty. Offering a unique world-systems perspective on the sociology of intellectuals and

Psychological Revolution: The Collected Works of J. Krishnamurti, Vol. 13 - Jiddu Krishnamurti

The Routledge Handbook of Digital Sport Management - Michael L. Naraine 2022-12-01

The *Routledge Handbook of Digital Sport Management* provides students, researchers, and practitioners with a contemporary roadmap of the impact of digital technologies in sport management, at all levels and in all sectors, in a global context. Divided into three sections addressing digital transformations, digital tools, and emerging digital issues, this book explores the impact of digital technology in the core functional areas of sport management, such as sponsorship, event management, and human resources. It introduces essential digital innovations such as esports, social media, VR, wearables, analytics, and artificial intelligence, and examines the debates and issues that are likely to shape and transform sport business over the next decade. The only book to survey the full sweep of digital sport management, this book is an essential reference for all serious students of sport business and management, any researcher working in the nexus of sport business and digital, and all managers, policy-makers or associated professionals working in the sport industry.

Change and Transformation - Thomas P. Power 2013-08-21

The integrative theme of this collection of essays is change and transformation explored in the context of

diverse expressions within the context of Anglican Church history. It addresses some central themes-- notably the sacraments, liturgy, biblical interpretation, theological education, the relationship of church and state, governance and authority, and Christian education. The volume traces Anglican Church history chronologically. It includes a comparative study of penance in the thought of John Wyclif and Thomas Cranmer. The book also treats the dispersal of authority evident in the development of the Book of Common Prayer and the King James Bible, consensus in eucharistic theology in the seventeenth century, and developments in biblical interpretation in the early eighteenth century. This book also discusses a vision for the Christian education of children, change in theological education in the 1830s, the metanarrative of continuity developed by High Church historians in the late nineteenth century, increasing self-government in the Church at the outset of the twentieth century, and models of governance at the outset of the twenty-first. While this collection highlights aspects of change and transformation as an integrative theme, it is not its premise that change was normative or pervasive, perpetual or constant, within Anglicanism. Nevertheless, these essays raise some new lines of inquiry, make some suggestive interpretations, or propose revision of accepted views.

Organizational Transformation - Paul C. Nutt 1998

Global Warming and Climate Change - Maria Taylor 2014-12-15

1988: coming to grips with a terrifying global experiment The Toronto conference statement made it clear that climate change would affect everyone. It called greenhouse gas atmospheric pollution an 'uncontrolled, globally pervasive experiment whose ultimate consequences could be second only to nuclear war'. World governments were urged to swiftly develop emission reduction targets (The changing atmosphere: implications for global security, 1988). Relevant to both Australian and overseas audiences, here is the untold story of how Australia buried its knowledge on climate change science and response options during the 1990s — going from clarity to confusion and doubt after arguably leading the world in citizen understanding and a political will to act in the late 1980s. 'What happened and why' is a fascinating exploration drawing on the public record of how a society revised its good understanding on a critical issue affecting every citizen. It happened through political and media communication, regardless of international scientific assessments that have remained consistent in ascribing causes and risks since 1990. How could this happen? The author examines the major influences, with lessons for the present, on how the story was reframed. Key have been values and beliefs, including economic beliefs, that trumped the science, the ability of changing political leaders and the mass media to set the story for the public, as well as the role of scientists' own communication over time and the use and misuse of uncertainty.

Teaching Transformation - A. Keating 2007-06-11

Drawing on indigenous belief systems and recent work in critical 'race' studies and multicultural-feminist theory, Keating provides detailed step-by-step suggestions, based on her own teaching experiences, designed to anticipate and change students' resistance to social-justice issues. It offers a holistic approach to theory and practice.

Political Transformations and Political Entrepreneurs - A. Meydani 2009-11-23

This book presents a theoretical framework based on the empirical context of the Israeli political system to evaluate under what conditions and in what ways can fundamental institutional changes occur in a democratic political system.

Epiphany Z - Thomas Frey 2016-09-20

A trend expert predicts what's next for fields like education and government while sharing how readers can shape their own futures. Epiphany Z is a dynamic approach to envisioning, comprehending, and ultimately thriving in the radically different futures emerging around us at the speed of light. Distilling decades of research, experience, and proven success in correctly identifying and accurately extrapolating today's trends and innovations into tomorrow's realities, futurist Thomas Frey gives you an advance ticket to the most explosive period of change in all of human history. Frey's unparalleled ability to detect emerging trends from the smallest of clues gives him an edge on other futurists. Now he's sharing the edge with you! · What are tomorrow's hottest industries? · What huge industries of today are doomed to extinction? · How will our lives be changed by advancements in robotics, in drone technology, and in manufacturing and

transportation? · How can education cope with the explosive new world of enhanced information, hyperactive business environments, and unimaginable cultural shifts? · Who will be the masters of tomorrow's universe—and who will be left behind? · Above all, how can you protect yourself from the most disruptive aspects of the changes sweeping your way—as well as become one of the masters of these changes? Those changes are taking place now. Thomas Frey shows where they will be taking all of us tomorrow and offers a roadmap for the future.

American Countercultures: An Encyclopedia of Nonconformists, Alternative Lifestyles, and Radical Ideas in U.S. History - Gina Misiroglu 2015-03-26

Counterculture, while commonly used to describe youth-oriented movements during the 1960s, refers to any attempt to challenge or change conventional values and practices or the dominant lifestyles of the day. This fascinating three-volume set explores these movements in America from colonial times to the present in colorful detail. "American Countercultures" is the first reference work to examine the impact of countercultural movements on American social history. It highlights the writings, recordings, and visual works produced by these movements to educate, inspire, and incite action in all eras of the nation's history. A-Z entries provide a wealth of information on personalities, places, events, concepts, beliefs, groups, and practices. The set includes numerous illustrations, a topic finder, primary source documents, a bibliography and a filmography, and an index.

Parliamentary Selection - Mark A. Kishlansky 1986-09-26

Parliamentary Selection examines how members of Parliament were chosen from 1558-1702.

Transformational Politics - Stephen Brim Woolpert 1998-01-01

Argues that traditional political science is failing to identify and address fundamental political phenomena of our time and proposes an alternative value-based political science.

Lost in Transformation - A. Mitchell 2011-01-20

Peace interventions can promote violence, whilst conflict may be a crucial means for constraining and preventing it. This book explores these statements, re-thinking the relationships between peace, conflict and violence. From this perspective it reinterprets several phenomena that challenge the 'peace process' in Northern Ireland.

The New Public Management in Action - Ewan Ferlie 1996

This book analyses changes which have occurred in the organization and management of the UK public services over the last 15 years, looking particularly at the restructured NHS. The authors present an up-to-date analysis around three main themes: the transfer of private sector models to the public sector, the management of change in the public sector, and management reorganization and role change. In doing so they examine to what extent a New Public Management has emerged, and ask whether this is a parochial UK development or of wider international significance. This is a topical and important issue in management training, professional, and policy circles. Important analytic themes include: an analysis of the nature of the change process in the UK public services, characterization of quasi markets, the changing role of local Boards, and possible adaptation by professional groupings. The book also addresses the important and controversial question of accountability, and contributes to the development of a general theory of the New Public Management.

And the Leader is..... - Gareth Chick 2019-05-29

Gareth Chick's second book, And the Leader Is... is a comprehensive and practical guide in how to lead effectively with heightened Corporate Emotional Intelligence (CEI). Drawing on his 40 year experience of every aspect of the Corporate World, from CEO to Coach; from manager to trainer, Gareth Chick covers the fundamental management and leadership competencies of coaching, high performance teams, authentic leadership and transformational change. In his first book Corporate Emotional Intelligence, Gareth provided a compelling analysis of Corporate Psychology; giving us a profound new understanding of how working in the Corporate World causes thoroughly decent human beings to behave in unnatural and inhuman ways. The book concluded by outlining the 4 Pillars of Corporate Emotional Intelligence (CEI), equipping us with strategies to raise our personal leadership effectiveness. And the Leader Is... completes Gareth's personal corporate life mission to give hard pressed modern leaders and managers the practical competencies to be more effective, more fulfilled and more sustainable. While each of his two books stands

on its own merits, the combination of the two forms arguably the most important work on corporate leadership since Dr Edwards Demings' writings of the late 20th Century. It is fitting therefore that the Foreword is written by Tony Barnes, the last surviving member of the Deming team that revolutionised Japanese business and manufacturing practices in the 1950s and 1960s. "A bible of common sense; a book that cuts to the core of achieving great business results whilst caring for the people you lead." Fionnuala Meehan, VP EMEA Global Marketing Solutions and Head of Ireland, Google "It's like no other book I've ever experienced. It's intensely personal - the insights, the examples, the honesty. This is much more than a book. It's a deep journey." Alison Platt, Non Executive Director, Tesco Plc "I have read many great books on coaching, leadership and teams. However, this is even greater, with all of these areas more expertly placed in one book". Becky Ivers, People Director - Expansion, Heathrow Airport "I was transported into 'And the Leader is....Tina'. Easy to read 'brain food' providing simple strategies to unlock human potential. This book is becoming my own personal coach." Tina Jennings, HR Director, Global Consumer Brands, Walgreens Boots Alliance

Postsocialism - C.M. Hann 2003-09

Social scientist did not predict the collapse of the socialist system in 1989-91. Their attempts to explain postsocialism have not been comprehensive. This book examines why, for the first time from an anthropological standpoint.

Organization Transformation Theorists and Practitioners - Beverly R. Fletcher 1990

Fletcher takes an 'inside out' look at Organization Transformation (OT). OT is a new area of theory and practice that effectively helps organizations make large scale changes. Within the past decade rapidly changing environmental conditions have made previously successful organizations ineffective. Economic, cultural, social, and political trends have created a critical need for OT. Fletcher's book profiles fourteen theorists and practitioners of OT and analyzes emerging themes. This study has implications for organizational behaviorists as well as business, government, human service, and educational organizations needing assistance with their own transformations.

Transforming Music Education - Estelle Ruth Jorgensen 2003

Examines the reasons why music education should be transformed and suggests alternative educational models and strategies__

Seven Radical Ideas for the Future of Higher Education - Claire Macken 2021-08-07

This book focuses on the disruption of the tertiary higher education system as a result of societal changes occasioned by the Fourth Industrial Revolution and hastened by COVID-19. It takes the view that higher education is on an inevitable trajectory of disruption as a result of globalisation, technological disruption, and disaggregation of the formal education sector but that it must not lose sight of its central role in equipping current and future students for the new economy. The book takes a student-centric - and big-picture approach - examining some of the biggest challenges facing massified higher education systems. The authors consider ways to achieve modern, responsive and efficient higher education systems globally that are economically sound for governments and affordable for individuals.

My Revision Notes: Pearson Edexcel A Level Political Ideas: Second Edition - Angela Mogridge 2021-09-24

Coverage of key up-to-date content is combined with study and exam tips and effective revision strategies to create a guide you can rely on to build both knowledge and memory. With My Revision Notes you can: - Consolidate your knowledge with clear, concise and relevant content coverage, based on what examiners are looking for - Extend your understanding with our regular 'Now test yourself,' tasks and answers - Improve your technique through our increased exam support, including exam-style practice questions, expert tips and examples of typical mistakes to avoid - Identify key connections between topics and subjects with our 'Making links' focus and further ideas for follow-up and revision activities - Plan and manage a successful revision programme with our topic-by-topic planner, new skills checklist and exam breakdown features, user-friendly definitions and online questions and answers

Ideas for Action - Cynthia Kaufman 2003

Ideas for Action explores a wide range of leftist political traditions - including Marxism, anarchism, anti-imperialism, poststructuralism, feminism, critical race theory, and environmentalism. Kaufman creates a coherent analysis of complex issues by incorporating elements of her own activist experiences, but doesn't

pretend to offer "the final word." Instead, she encourages both intellectual inquiry and practical application of political ideas, offering readers a gateway to orienting their own critical understandings and to making theory useable.

Great Expectations, Slow Transformation - Manuela Moschella 2014-07-01

In the aftermath of the financial crisis, why has the reform process been incremental yet the conditions for more rapid and abrupt transformations appeared to be available? Is there anything specific about financial policy that prevents more radical reforms? Drawing from Comparative Politics and Historical Institutionalism in particular, as well as International Political Economy, this book answers these questions by examining the particular institutional frictions that characterise global financial governance and influence the activity of change agents and veto players involved in the process of global regulatory change. The chapters in this volume collectively demonstrate that the process of change in financial rule-making as well as in the institutions governing finance does not fit with the punctuated model of policy change. The book also shows, however, that incremental changes can lead to fundamental shifts in the basic principles that inform global financial governance.

The Changing Character of War - Hew Strachan 2011-05-13

Over the last decade (and indeed ever since the Cold War), the rise of insurgents and non-state actors in war, and their readiness to use terror and other irregular methods of fighting, have led commentators to speak of 'new wars'. They have assumed that the 'old wars' were waged solely between states, and were accordingly fought between comparable and 'symmetrical' armed forces. Much of this commentary has lacked context or sophistication. It has been bounded by norms and theories more than the messiness of reality. Fed by the impact of the 9/11 attacks, it has privileged some wars and certain trends over others. Most obviously it has been historically unaware. But it has also failed to consider many of the other dimensions which help us to define what war is - legal, ethical, religious, and social. The Changing Character of War, the fruit of a five-year interdisciplinary programme at Oxford of the same name, draws together all these themes, in order to distinguish between what is really changing about war and what only seems to be changing. Self-evidently, as the product of its own times, the character of each war is always changing. But if war's character is in flux, its underlying nature contains its own internal consistency. Each war is an adversarial business, capable of generating its own dynamic, and therefore of spiralling in directions that are never totally predictable. War is both utilitarian, the tool of policy, and dysfunctional. This book brings together scholars with world-wide reputations, drawn from a clutch of different disciplines, but united by a common intellectual goal: that of understanding a problem of extraordinary importance for our times. This book is a project of the Oxford Leverhulme Programme on the Changing Character of War.

Radical Transformations in Minority Religions - Beth Singler 2021-11-22

All religions undergo continuous change, but minority religions tend to be less anchored in their ways than mainstream, traditional religions. This volume examines radical transformations undergone by a variety of minority religions, including the Children of God/ Family International; Gnosticism; Jediism; various manifestations of Paganism; LGBT Muslim groups; the Plymouth Brethren; Santa Muerte; and Satanism. As with other books in the Routledge/Inform series, the contributors approach the subject from a wide range of perspectives: professional scholars include legal experts and sociologists specialising in new religious movements, but there are also chapters from those who have experienced a personal involvement. The volume is divided into four thematic parts that focus on different impetuses for radical change: interactions with society, technology and institutions, efforts at legitimation, and new revelations. This book will be a useful source of information for social scientists, historians, theologians and other scholars with an interest in social change, minority religions and 'cults'. It will also be of interest to a wider readership including lawyers, journalists, theologians and members of the general public.

The Radical Imagination - Doctor Alex Khasnabish 2014-06-12

The idea of the imagination is as evocative as it is elusive. Not only does the imagination allow us to project ourselves beyond our own immediate space and time, it also allows us to envision the future, as individuals and as collectives. The radical imagination, then, is that spark of difference, desire and discontent that can be fanned into the flames of social change. Yet what precisely is the imagination and what might make it

'radical'? How can it be fostered and cultivated? How can it be studied and what are the possibilities and risks of doing so? This book seeks to answer these questions at a crucial time. As we enter into a new cycle of struggles marked by a worldwide crisis of social reproduction, scholar-activists Max Haiven and Alex Khasnabish explore the processes and possibilities for cultivating the radical imagination in dark times. A lively and crucial intervention in radical politics, social research and social change, and the collective visions and cultures that inspire them.

Intelligence Beyond Thought - Dada 2006

Autobiography of a Hindu spiritual leader from India.

Collaborative Networks and Digital Transformation - Luis M. Camarinha-Matos 2019-09-12

This book constitutes the refereed proceedings of the 20th IFIP WG 5.5 Working Conference on Virtual Enterprises, PRO-VE 2019, held in Turin, Italy, in September 2019. The 56 revised full papers were carefully reviewed and selected from 141 submissions. They provide a comprehensive overview of major challenges and recent advances in various domains related to the digital transformation and collaborative networks and their applications with a strong focus on the following areas related to the main theme of the conference: collaborative models, platforms and systems for digital revolution; manufacturing ecosystem and collaboration in Industry 4.0; big data analytics and intelligence; risk, performance, and uncertainty in collaborative networked systems; semantic data/service discovery, retrieval, and composition in a collaborative networked world; trust and sustainability analysis in collaborative networks; value creation and social impact of collaborative networks on the digital revolution; technology development platforms supporting collaborative systems; collective intelligence and collaboration in advanced/emerging applications; and collaborative manufacturing and factories of the future, e-health and care, food and agribusiness, and crisis/disaster management.

The Great Mindshift - Maja Göpel 2016-09-12

This book describes the path ahead. It combines system transformation research with political economy and change leadership insights when discussing the need for a great mindshift in how human wellbeing, economic prosperity and healthy ecosystems are understood if the Great Transformations ahead are to lead to more sustainability. It shows that history is made by purposefully acting humans and introduces transformative literacy as a key skill in leading the radical incremental change

Pathways of Human Development - Jay A. Mancini 2009-08-20

Pathways of Human Development uses theoretical perspectives from developmental, social, and behavioral sciences to examine the many ways that individuals, families, and communities intersect and interface. Focusing on the impact of change on human development, including its antecedents, processes, and consequences, the chapters examine a range of topics such as health and adaptation; social anxiety disorder; protective factors and risk behaviors; parent-child relationships; adolescent sexuality; intergenerational relationships; family stress and adaptation; and community resilience. By extending human development theorizing across these pivotal life-changing issues, this volume offers a comprehensive map of the trajectories of development among individuals, families, and communities.

Tempered Radicals - Debra Meyerson 2003

This text explores the experiences of tempered radicals. These are people who want to become valued and successful members of their organisations without selling out on who they are and what they believe in.

Baptism as an Event of Taking Responsibility - Pontien Ndagijimana Batibuka 2022-11-07

For those whose context is rich with cultural and communal rites of passage, how does the church ensure that baptism is not just another ritual, but is understood to be a deliberate participation of a Christian in an

event that brings decisive change into the new life that Christ brings? In this in-depth study, Dr. Pontien Ndagijimana Batibuka explores afresh Paul's teaching on baptism demonstrating that it encompasses both divine intervention and human action, rather than simply being about an action of Christ. Readers are invited to re-examine Romans 5:12-6:23 through a socio-religious lens rather than the christological reading that has historically prevailed. Through Dr. Batibuka's skilful exploration of the stages of initiation in antiquity he argues the importance of Christians actively taking responsibility for their baptism, while further shedding light on the interaction of both the divine and human roles. Baptism is more than a ritual done to a passive candidate, it is an event in which the believer personally decides for, and pledges allegiance to, Jesus Christ.

Transformational Entrepreneurship - Vanessa Ratten 2018-08-06

To achieve progress in society and business practices, more entrepreneurship is needed to encourage action and enhance social capital in society, and transformational entrepreneurship may be the key.

Transformational entrepreneurship offers a way of integrating sustainability practices whilst focusing on sustainable future trends. This book discusses how transformational entrepreneurship uses novel business practices to reduce inequality in the marketplace and how it transforms society through creative solutions that enable change. The book provides useful insight into better understanding this emerging concept.

The British Labour Party in Opposition and Power 1979-2019 - Patrick Diamond 2021-01-18

This book provides a novel account of the Labour Party's years in opposition and power since 1979, examining how New Labour fought to reinvent post-war social democracy, reshaping its core political ideas. It charts Labour's sporadic recovery from political disaster in the 1980s, successfully making the arduous journey from opposition to power with the rise (and ultimately fall) of the governments of Tony Blair and Gordon Brown. Forty years on from the 1979 debacle, Labour has found itself on the edge of oblivion once again. Defeated in 2010, it entered a further cycle of degeneration and decline. Like social democratic parties across Europe, Labour failed to identify a fresh ideological rationale in the aftermath of the great financial crisis. Drawing on a wealth of sources including interviews and unpublished papers, the book focuses on decisive points of transformational change in the party's development raising a perennial concern of present-day debate - namely whether Labour is a party capable of transforming the ideological weather, shaping a new paradigm in British politics, or whether it is a party that should be content to govern within parameters established by its Conservative opponents. This text will be of interest to the general reader as well as scholars and students of British politics, British political party history, and the history of the British Labour Party since 1918.

Canadian Multiculturalism and the Far Right - Bàrbara Molas 2022-08-19

Canadian Multiculturalism and the Far Right examines a neglected aspect of the history of 20th century Canadian multiculturalism and the far right to illuminate the ideological foundations of the concept of 'third force'. Focusing on the particular thought of ultra-conservative Ukrainian Canadian Walter J. Bossy during his time in Montreal (1931-1970s), this book demonstrates that the idea that Canada was composed of three equally important groups emerged from a context defined by reactionary ideas on ethnic diversity and integration. Two broad questions shape this research: first, what the meaning originally attached to the idea of a 'third force' was, and what the intentions behind the conceptualization of a trichotomic Canada were; and second, whether Bossy's understanding of the 'third force' precedes, or is related in any way to, postwar debates on liberal multiculturalism at the core of which was the existence of a 'third force'. This book will be of interest to students and researchers of multiculturalism, radical-right ideology and the far right, and Canadian history and politics.
