Barragan - The Complete Works - Luis Barragan 2003-10

Mexican architect Luis Barragan (1902-88) was one of the twentieth century's most creative designers and one of its best-known architects. Self-taught, he achieved international renown for his remarkable personal artistic vision. Its intelligent analyses and superb illustrations demonstrate the complexity and scope of this genius, as both an architect and a landscape designer. *The Complete Works* collects over 300 illustrations including Barragan's drawings; photographs of his work; re-drawn plans, elevations, and scale models of important projects; texts by Alvaro Siza, Antonio Toca, and J. M. Buendia, as well as an essay by Barragan himself; and an unabridged transcription of his Pritzker Prize acceptance speech. INFLUENTIAL MODERN WRITERS" (JAMES WOOD, THE NEW YORK TIMES BOOK REVIEW) Composed in the last years of Roberto Bolaño's life, *2666* was greeted across Europe and Latin America as his highest achievement, surpassing even his previous work in its strangeness, beauty, and scope. A History of Reading in the West - Guglielmo Cavallo 2003

Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

Liquid Life - Zygmunt Bauman 2013-04-18

'Liquid life' is the kind of life commonly lived in our contemporary, liquid-modern society. Liquid life cannot stay on course, as liquid-modern society cannot keep its shape for long. Liquid life is a precarious life, lived under conditions of constant uncertainty. The most acute and stubborn worries that haunt this liquid life are the fears of being caught napping, of failing to catch up with fast moving events, of overlooking the 'use by' dates and being saddled with worthless possessions, of missing the moment calling for a change of tack and being left behind. Liquid life is also shot through by a contradiction: it ought to be a (possibly unending) series of new beginnings, yet

precisely for that reason it is full of worries about swift and painless endings, without which new beginnings would be unthinkable. Among the arts of liquid-modern living and the skills needed to practice them, getting rid of things takes precedence over their acquisition. This and other challenges of life in a liquid-modern society are traced and unravelled in the successive chapters of this new book by one of the most brilliant and original social thinkers of our time.

Architecture as Space - Bruno Zevi 1993

This classic work (first published in Italian in 1948, translated in 1957, and revised in 1974) examines the history of architecture in light of its essence as space, animating and illuminating architectural creations so that their beauty—or indifference—is exposed. Along with commercial and dwelling units, temples, palaces, and cathedrals, Zevi treats structures such as fountains, columns, and monuments, subjecting them all to aesthetic, cultural, and functional criteria and explaining them in easily understood terms. Beautifully illustrated with examples from the entire history of the art, this is one of the most stimulating and provocative books ever written on the history and purpose of architecture.

Eva Luna - Isabel Allende 2018-05-03

**The remarkable novel from the multi-million-bestselling author of *The House of the Spirits*

and *The Japanese Lover*** Meet the unforgettable Eva Luna: a lover, a writer, a revolutionary and above all, a storyteller. Eva Luna is the daughter of a professor's assistant and a snake-bitten gardener – born poor, orphaned at an early age and working as a servant. Eva is a naturally gifted and imaginative storyteller who meets people from all walks of life. Though she has no wealth, she trades her stories like currency with people who are kind to her. As she shares her stories, she introduces an eccentric cast of characters: the Lebanese émigré who takes her in, her Catholic godmother who believes in saints, a street urchin who grows up to be the leader of the guerrilla struggle, a celebrated trans cabaret star and a young refugee whose flight from postwar Europe will change Eva's life forever. As Eva tells her story, Isabel Allende brings to life a complex South American country – the rich, the poor, the sophisticated – in a novel that celebrates the power of imagination and storytelling. Praise for Isabel Allende's *Eva Luna*: 'Vibrant, colourful characters; the ordinary fused with the grotesque; a Latin American setting, tropical this time; vivid, elegant narrative. The narrator, Eva Luna, is herself a story-teller in the Allende tradition' *Guardian* 'An evident affection for words, compassion for the oppressed and the inarticulate, the daring ambition to draw cross-sections of whole societies . . . Allende's work glows' *New York Times* 'Sumptuous . . . a tale that spans forty years and moves from a surreal jungle to a modern-day urban capital where even the most apolitical are driven to risky anti-government activities' *Chicago Tribune* 'Allende rearranges reality with a blend of memories, mysticism and imagination' *The Philadelphia Inquirer* 'A remarkable novel, one in which a cascade of stories tumbled out before the reader, stories vivid and passionate and human' *Washington Post* 'Magnificent . . . Allende is a prodigious fabulist, weaving extraordinary tales' *Publishers Weekly*

One of the great masterpieces of modern Latin American fiction, *Terra Nostra* is concerned with nothing less than the history of Spain and of South America, with the Indian Gods and with Christianity, with the birth, the passion, and the death of civilizations. Fuentes skillfully blends a wide range of literary forms, stories within stories, Mexican and Spanish myth, and famous literary characters in this novel that is both a historical epic and an apocalyptic vision of modern times. *Terra Nostra* is that most ambitious and rare of creations—a total work of art.

Walkscapes - Francesco Careri 2017-12-20

Walkscapes deals with strolling as an architecture of landscape. Walking as an autonomous form of art, a primary act in the symbolic transformation of the territory, an aesthetic instrument of knowledge and a physical transformation of the 'negotiated' space, which is converted into an urban intervention. From primitive nomadism to Dada and Surrealism, from the Lettrist to the Situationist International, and from Minimalism to Land Art, this book narrates the perception of landscape through a history of the traversed city.

Lolita - Vladimir Nabokov 2010-08-24

Awe and exhilaration--along with heartbreak and mordant wit--abound in *Lolita*, Nabokov's most famous and controversial novel, which tells the story of the aging Humbert Humbert's obsessive, devouring, and doomed passion for the nymphet Dolores Haze. *Lolita* is also the story of a hypercivilized European colliding with the cheerful barbarism of postwar America. Most of all, it is a meditation on love--love as outrage and hallucination, madness and transformation.

The Image of the City - Kevin Lynch 1964-06-15

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

La estructura de la estructura - Alberto Campo Baeza 2021-06-01

Una vez más la botadura de un barco lleno de ideas, de ideas expresadas a través de las palabras de los textos que conforman un libro. Un libro lleno de ideas transmitidas a través de los escritos claros de un conjunto de profesores y de arquitectos invitados a las clases de la Escuela TS de Arquitectura de Madrid. Todos ellos, los profesores que colaboran con el autor y

los invitados, son extraordinariamente valiosos. Y todos ellos han elaborado unos textos certeros. Se ha querido respetar en el caso de los extranjeros la lengua original, para dar fe de universalidad. La estructura no sólo soporta, no sólo aguanta, sino que resuena, suena como un instrumento musical cuando es acordado por el aire. Y así será falsa la libertad del arquitecto que, olvidado de la estructura, concite sólo formas a las que, una vez definidas, añadiera o mandara añadir una estructura capaz de soportarlas. Y así, cuando se genera la Idea cuya necesaria materialización nos dará la Arquitectura, la estructura portante, el cómo aquello va a sostenerse, debe estar claro desde el primer momento. Este conjunto de textos tomó forma de publicación, con la seguridad de que este barco lleno de ideas, llegará a muy buen puerto.

The Story of Art - E. H. Gombrich 1950

An Apartment on Uranus - Paul B. Preciado
2020-01-28

A "dissident of the gender-sex binary system" reflects on gender transitioning and political and cultural transitions in technoscientific capitalism. Uranus, the frozen giant, is the coldest planet in the solar system as well as a deity in Greek mythology. It is also the inspiration for uranism, a concept coined by the writer Karl Heinrich Ulrich in 1864 to define the "third sex" and the rights of those who "love differently." Following Ulrich, Paul B. Preciado dreams of an apartment on Uranus where he might live beyond existing power, gender and racial strictures invented by modernity. "My trans condition is a new form of uranism," he writes. "I am not a man. I am not a woman. I am not heterosexual. I am not homosexual. I am not bisexual. I am a dissident of the gender-sex binary system. I am the multiplicity of the cosmos trapped in a binary political and epistemological system, shouting in front of you. I am a uranist confined inside the limits of technoscientific capitalism." This book recounts Preciado's transformation from Beatriz into Paul B., but it is not only an account of gender transitioning. Preciado also considers political, cultural, and sexual transition, reflecting on issues that range from the rise of neo-fascism in Europe to the technological appropriation of the

uterus, from the harassment of trans children to the role museums might play in the cultural revolution to come. An Apartment on Uranus is a bold, transgressive, and necessary book.

Wonderful Life: The Burgess Shale and the Nature of History - Stephen Jay Gould
1990-09-17

A study of the Burgess Shale, a sea bed 530 million years old, and attempts to tackle what the findings are and what it means
Twenty Thousand Leagues Under the Sea - Jules Verne 2020-09-28

The year 1866 was signalised by a remarkable incident, a mysterious and puzzling phenomenon, which doubtless no one has yet forgotten. Not to mention rumours which agitated the maritime population and excited the public mind, even in the interior of continents, seafaring men were particularly excited. Merchants, common sailors, captains of vessels, skippers, both of Europe and America, naval officers of all countries, and the Governments of several States on the two continents, were deeply interested in the matter. For some time past vessels had been met by "an enormous thing," a long object, spindle-shaped, occasionally phosphorescent, and infinitely larger and more rapid in its movements than a whale. The facts relating to this apparition (entered in various log-books) agreed in most respects as to the shape of the object or creature in question, the untiring rapidity of its movements, its surprising power of locomotion, and the peculiar life with which it seemed endowed. If it was a whale, it surpassed in size all those hitherto classified in science. Taking into consideration the mean of observations made at divers times—rejecting the timid estimate of those who assigned to this object a length of two hundred feet, equally with the exaggerated opinions which set it down as a mile in width and three in length—we might fairly conclude that this mysterious being surpassed greatly all dimensions admitted by the learned ones of the day, if it existed at all. And that it DID exist was an undeniable fact; and, with that tendency which disposes the human mind in favour of the marvellous, we can understand the excitement produced in the entire world by this supernatural apparition. As to classing it in the list of fables, the idea was out of the question.

On the 20th of July, 1866, the steamer Governor Higginson, of the Calcutta and Burnach Steam Navigation Company, had met this moving mass five miles off the east coast of Australia. Captain Baker thought at first that he was in the presence of an unknown sandbank; he even prepared to determine its exact position when two columns of water, projected by the mysterious object, shot with a hissing noise a hundred and fifty feet up into the air. Now, unless the sandbank had been submitted to the intermittent eruption of a geyser, the Governor Higginson had to do neither more nor less than with an aquatic mammal, unknown till then, which threw up from its blow-holes columns of water mixed with air and vapour. Similar facts were observed on the 23rd of July in the same year, in the Pacific Ocean, by the Columbus, of the West India and Pacific Steam Navigation Company. But this extraordinary creature could transport itself from one place to another with surprising velocity; as, in an interval of three days, the Governor Higginson and the Columbus had observed it at two different points of the chart, separated by a distance of more than seven hundred nautical leagues.

Sybil - Flora Rheta Schreiber 2013

'How are you today?' the doctor asked. 'I'm fine', was the reply. 'But Sybil isn't. She was so sick she couldn't come. So I came instead.' Sybil is the story of a woman with sixteen separate personalities, and was instrumental in influencing the definition and diagnosis of multiple personality disorder. Sybil's diagnosis has since been called into question - but, forty years after it was first published, her story remains a gripping and disturbing account of one woman's struggle for mental stability and happiness. 'Astonishing book . . . It forces you to look at yourself and the people around you in a new way.' Doris Lessing

Things We Lost in the Fire - Mariana Enriquez 2017-02-21

In these wildly imaginative, devilishly daring tales of the macabre, internationally bestselling author Mariana Enriquez brings contemporary Argentina to vibrant life as a place where

shocking inequality, violence, and corruption are the law of the land, while military dictatorship and legions of desaparecidos loom large in the collective memory. In these stories, reminiscent of Shirley Jackson and Julio Cortázar, three young friends distract themselves with drugs and pain in the midst a government-enforced blackout; a girl with nothing to lose steps into an abandoned house and never comes back out; to protest a viral form of domestic violence, a group of women set themselves on fire. But alongside the black magic and disturbing disappearances, these stories are fueled by compassion for the frightened and the lost, ultimately bringing these characters—mothers and daughters, husbands and wives—into a surprisingly familiar reality. Written in hypnotic prose that gives grace to the grotesque, *Things We Lost in the Fire* is a powerful exploration of what happens when our darkest desires are left to roam unchecked, and signals the arrival of an astonishing and necessary voice in contemporary fiction.

Profile of Man and Culture in Mexico - Samuel Ramos 2014-04-15

Profile of Man and Culture in Mexico, originally written in 1934, is addressed to the author's compatriots, but it speaks to people, wherever they are, who are interested in enriching their own lives and in elevating the cultural level of their countries. And it speaks with a peculiar timeliness to citizens of the United States who would understand their neighbors to the south. Samuel Ramos's avowed purpose is to assist in the spiritual reform of Mexico by developing a theory that might explain the real character of Mexican culture. His approach is not flattering to his fellow citizens. After an analysis of the historical forces that have molded the national psychology, Ramos concludes that the Mexican sense of inferiority is the basis for most of the Mexican's spiritual troubles and for the shortcomings of the Mexican culture. Ramos subscribes to neither of the two major opposing schools of thought as to what norms should direct the development of Mexican culture. He

agrees neither with the nationalists, who urge a deliberate search for originality and isolation from universal culture, nor with the "Europeanizers," who advocate abandonment of the life around them and a withdrawal into the modes of foreign cultures. Ramos thinks that Mexico's hope lies in a respect for the good in native elements and a careful selection of those foreign elements that are appropriate to Mexican life. Such a sensible choice of foreign elements will result not in imitation, but in assimilation. Combined with the nurturing of desirable native elements, it will result in an independent cultural unit, "a new branch grafted onto world culture." Ramos finds in Mexico no lack of intelligence or vitality: "It needs only to learn." And he believes that the future is Mexico's, that favorable destinies await a Mexico striving for the elevation of humanity, for the betterment of life, for the development of all the national capacities.
