The Economy of Collaboration - Francesco Ramella 2020-11-29

Over the past few decades, the world economy has undergone radical transformations, in part connected to the expansion of the 'digital economy', in part to the growing interconnection via the internet of the world of objects and physical processes. This 'great transformation' poses the dilemma on the capitalism's ability to reconcile economic and social value, keeping together economic well-being, social cohesion and political freedom. The Economy of Collaboration can offer a contribution in this direction but requires courageous policies to mediate the various interests at stake, as well as to rethink and make more sustainable its development, by increasing the benefits not only for businesses but also for workers and consumers. In short, to create shared value. This book refers to a mode of organizing the production, distribution and consumption of goods and services based on cooperative relations. The main reference is to activities linked to the digital economy, since they are the emerging forms of a definitely older phenomenon, but which is expanding on an ever-wider scale thanks to new technologies. These collaborative activities can be regulated differently, along a continuum that ranges from the pole of market exchanges to that of generalized reciprocity, with various intermediate mixed forms.

Estudios de sociología - 1965

Italian Sociology, 1945-2010 - Andrea Cossu 2017-07-13

This book provides a comprehensive profile of the development of sociology in Italy from the post-war period to the present day. The first English-language account of the history of Italian sociology, it focuses on the process of institutionalization of the discipline within the Italian university system and its changing relationships with extra-academic actors and institutions: political parties, unions, the Catholic Church, political and social movements, as well as local and national governments. Arranged chronologically across eight chapters, it presents all major steps in the development of the discipline in a theoretically-informed but accessible way. The authors explore the pioneering phase of the 1950s to the establishment of the first academic chairs in the 1960s, from the student revolts of 1968 to the creation of the first sociological association in the 1980s and up to the present day. It will appeal to social science and history scholars and students, as well as readers interested in the history of Contemporary Italy.

Elementi di sociologia economica - Enrica Amaturò 1979

Calculating the Human - L. Doria 2013-07-12

Why does contemporary calculation develop as calculation of the quality

of everything? How should we consider calculation of quality and the relationship between calculation and enhancement of life? These and related questions are addressed through phenomenological investigation and a critical analysis of the social science debate.

La scienza economica e la teoria dell'evoluzione - Guglielmo Salvadori 1901

Annual Report of the Librarian of Congress for the Fiscal Year Ended ... - Library of Congress 1901

Constructing Quality - Jens Beckert 2013-06-13

How can we engage in a market relationship when the quality of the goods we want to acquire is unknown, invisible, or uncertain? For market exchange to be possible, purchasers and suppliers of goods must be able to assess the quality of a product in relation to other products. Only by recognizing qualities and perceiving quality differences can purchasers make non-random choices, and price differences between goods be justified. "Quality" is not a natural given, but the outcome of a social process in which products become seen as possessing certain traits, and occupying a specific position in relation to other products in the product space. While we normally take the quality of goods for granted, quality at a closer look is the outcome of a highly complex process of construction involving producers, consumers, and market intermediaries engaged in judgment, evaluation, categorization, and measurement. The authors in this volume investigate the processes through which the quality of goods is established. They also investigate how product qualities are contested and how they change over time. The empirical cases discussed cover a broad range of markets in which quality is especially difficult to assess. The cases include: halal food, funeral markets, wine, labor, school choice, financial products, antiques, and counterfeit goods. The book contributes to the sociology of markets. At the same time it connects to the larger issue of the constitution of social order through cognitive processes of classification.

Changing Governance of Local Economies - Colin Crouch 2004-02-26

This book examines patterns of economic governance in three specific, contrasting, contexts: machinery-producing districts; declining steel cities; and clusters of high-technology activities. Building on the work of their previous book (*Local Production Systems in Europe: Rise or Demise?* OUP 2001), which charted the recent development of local clusters of specialized manufacturing among small and medium-sized enterprises (SMEs) in France, Germany, Italy, and the United Kingdom, the authors find patterns of economic governance far more complex and dynamic than usually described in a literature which insists on identifying simple national approaches. The machinery industries were often identified in the literature of the 1980s as prominent cases of industrial district formation, which were then considerably weakened by the crises of the mid-1990s. Did clustering help these industries and their associated districts to respond to challenge, or only weaken them further? The case studies focus on the Bologna and Modena area of Emilia-Romagna, Stuttgart in Baden-Württemberg, Birmingham and Coventry in the English west midlands, but generally in France where there are very few local concentrations. Even while some thought local production systems were in crisis, national governments and the European Commission continued to recommend their approach to areas experiencing economic decline. This was particularly the case for cities that had been dependent on a small number of large corporations in industries that would no longer be major employers. Political and business leaders in these areas were encouraged to diversify, in particular through SMEs. Could this be done in response to external pressure, given that successful local production systems depend on endogenous vitality? The authors ask these questions of former steel-producing cities St. Etienne, Duisburg, Piombino, and Sheffield. The idea that local production systems had had their day was challenged by clear evidence of clustering among SMEs in a number of flourishing high-tech industries in parts of the USA and western Europe. Why do scientists,

other specialists and firms actively embedded in global networks, both with geographical proximity? This question is addressed by examining the software firms at Grenoble, the mass media cluster in Cologne, the information technology sector around Pisa, and the Oxfordshire biotechnology region.

Borderscaping: Imaginations and Practices of Border Making -

Chiara Brambilla 2016-04-15

Using the borderscapes concept, this book offers an approach to border studies that expresses the multilevel complexity of borders, from the geopolitical to social practice and cultural production at and across the border. Accordingly, it encourages a productive understanding of the processual, de-territorialized and dispersed nature of borders and their ensuring regimes in the era of globalization and transnational flows as well as showcasing border research as an interdisciplinary field with its own academic standing. Contemporary bordering processes and practices are examined through the borderscapes lens to uncover important connections between borders as a 'challenge' to national (and EU) policies and borders as potential elements of political innovation through conceptual (re-)framings of social, political, economic and cultural spaces. The authors offer a nuanced and critical re-reading and understanding of the border not as an entity to be taken for granted, but as a place of investigation and as a resource in terms of the construction of novel (geo)political imaginations, social and spatial imaginaries and cultural images. In so doing, they suggest that rethinking borders means deconstructing the interweaving between political practices of inclusion-exclusion and the images created to support and communicate them on the cultural level by Western territorialist modernity. The result is a book that proposes a wandering through a constellation of bordering policies, discourses, practices and images to open new possibilities for thinking, mapping, acting and living borders under contemporary globalization.

Welfare Policy from Below - Arno Pilgram 2021-12-17

Available in paperback for the first time, *Welfare Policy from Below* is the most comprehensive study available of social exclusion in contemporary Europe. Invigorating and informative, the book puts forward a new form of 'social exclusion knowledge', based on an innovative conceptual and theoretical framework and a comparative empirical study of eight European cities. The case studies - encompassing research in Germany, Austria, the UK, Italy, Sweden, the Netherlands and Spain - focus on a range of problems associated with exclusion. Issues such as poverty, housing, work, migration, gender equality and the family are considered in the context of different European welfare regimes, providing insights into the experiences of ordinary people facing exclusionary challenges. The distinguished contributors argue that social security and welfare must provide the infrastructure for the coping strategies of those at risk of exclusion. Featuring a substantive new preface which includes contemporary discussions in European welfare policy, *Welfare Policy from Below* will be invaluable to policy-makers as well as academic researchers.

Borderscaping: Imaginations and Practices of Border Making - Dr

Chiara Brambilla 2015-12-28

Using the borderscapes concept, this book offers an approach to border studies that expresses the multilevel complexity of borders, from the geopolitical to social practice and cultural production at and across the border. Accordingly, it encourages a productive understanding of the processual, de-territorialized and dispersed nature of borders and their ensuring regimes in the era of globalization and transnational flows as well as showcasing border research as an interdisciplinary field with its own academic standing. Contemporary bordering processes and

practices are examined through the borderscapes lens to uncover important connections between borders as a 'challenge' to national (and EU) policies and borders as potential elements of political innovation through conceptual (re-)framings of social, political, economic and cultural spaces. The authors offer a nuanced and critical re-reading and understanding of the border not as an entity to be taken for granted, but as a place of investigation and as a resource in terms of the construction of novel (geo)political imaginations, social and spatial imaginaries and cultural images. In so doing, they suggest that rethinking borders means deconstructing the interweaving between political practices of inclusion-exclusion and the images created to support and communicate them on the cultural level by Western territorialist modernity. The result is a book that proposes a wandering through a constellation of bordering policies, discourses, practices and images to open new possibilities for thinking, mapping, acting and living borders under contemporary globalization.

Qué pudo y qué no pudo el Estado - Mariana Heredia 2022-10-24

En la Argentina, la pandemia de covid-19 agravó una situación ya de por sí dramática. ¿Cómo reaccionó el Estado frente a la emergencia?

¿Confirmó ese cliché arraigado de que tenemos un "Estado bobo que hace todo mal"? ¿No es hora ya de contar con un balance serio que evite las conclusiones rápidas o engañosas, y sobre todo que sirva para el futuro? Este libro evalúa exhaustivamente cómo funcionaron las políticas públicas en esos meses febriles y abre la oportunidad de preguntarnos qué aprendizajes pueden extraerse de una experiencia inédita. A partir de una investigación realizada en tiempo real en varias ciudades del país, representativas de la heterogeneidad federal, autoras y autores ponen la lupa en los dos principales programas lanzados por el gobierno: la Asistencia de Emergencia al Trabajo y la Producción (ATP), destinado a empresas y trabajadores registrados, y el Ingreso Familiar de Emergencia (IFE), para quienes no contaban con vínculos laborales formales o tenían fuentes de ingreso precarias. Analizando estas políticas desde todos los ángulos, muestran cómo se decidieron y diseñaron en tiempo récord bajo la épica de la urgencia, con qué infraestructura contaban para sortear el riesgo de "dar de más o dar de menos", qué

significaron para los empresarios y para los trabajadores formales, cómo vivieron el impacto los sectores medios muy críticos de los "planes" que por primera vez debían recurrir a la ayuda estatal, qué rol jugaron los intendentes y gobernadores, de qué modo las plataformas digitales de la AFIP y la Anses requirieron de "mediadores" (vecinos, militantes, sacerdotes, contadores) para facilitar los trámites. Así, revelan cómo mientras el ATP fue modificándose con versatilidad a medida que la economía se abría, el IFE mostró los límites del Estado para registrar y llegar a una población vulnerable que estaba por completo fuera de su radar. En la medida en que la economía no logre volver a crecer de manera sostenida y que el empleo formal no consiga integrar a gran parte de los argentinos, las políticas de asistencia estarán destinadas a perpetuarse. Este libro es una contribución imprescindible para reconocer lo que fuimos capaces de hacer y un llamado a conservar algo de inteligencia y pasión para aprender de lo ocurrido, proteger lo logrado y perfeccionarlo.

Three Latin American Sociologists - Joseph Alan Kahl 1988-01-01

This is the long overdue, second edition of Joseph A. Kahl's masterful *Modernization, Exploitation, and Dependency in Latin America*. In the book, Kahl describes, examines and introduces the life and work of three important figures in the development of comparative politics and political sociology: Gino Germani (Argentina), Pablo Gonzales Casanova (Mexico) and Fernando Henrique Cardoso (Brazil). As Peter B. Evans points out in his splendid introduction, subsequent developments in comparative scholarship, as exemplified in the fate of modernization and dependency

theory, have highlighted the influence of these three Latin Americans, first introduced to the North American community by this book. This is the text for students and practitioners of comparative political and social science, interested in issues of modernization, development, and dependency.

¿El 99% contra el 1%? - Mariana Heredia 2022-08-22

De un lado, un puñado de ricos y poderosos que siempre gana y se ríe del resto; del otro, una mayoría del 99% que sufre distintos grados de privación. ¿Cuánto ilumina y cuánto confunde esta definición aritmética de la desigualdad? ¿Cuánto ayuda a la hora de trazar diagnósticos e implementar políticas? ¿Bastaría con quitar sus privilegios a ese 1% y estaríamos en una sociedad equitativa? Documentar las ventajas de una minoría es un paso insoslayable para entender el problema. Pero la denuncia moral y la vehemencia retórica contra el 1% chocan una y otra vez con la impotencia práctica y, lo más importante, terminan echando un manto de silencio sobre los mecanismos sociales que permiten acumular riqueza y acceder a las posiciones más codiciadas, y que están naturalizados en vastos sectores medios y medios altos. Luego de años de investigar estos temas en la Argentina y América Latina, Mariana Heredia propone entender y discutir las desigualdades contemporáneas desmontando las etiquetas que impiden pensarlas. Así, muestra que los "ricos" de hoy poco tienen que ver con las familias tradicionales, la oligarquía o la burguesía nacional, y que constituyen un grupo heterogéneo no siempre blindado ante la inestabilidad. Atenta a los resortes que permiten reproducir el capital, acceder al bienestar y ejercer poder, analiza cómo las reformas desregulatorias de los años setenta y noventa achicaron los márgenes del Estado nacional como gran integrador social y mercantizaron bienes que eran públicos, como la salud, la educación, la seguridad. Y nos invita a poner en cuestión ciertos lugares comunes del debate: ¿qué expectativas depositar en la puja distributiva entre empleadores y trabajadores? ¿Y en las políticas de ingresos? ¿Puede la búsqueda de equidad descansar en la movilización constante y la capacidad de bloqueo de los sectores populares más golpeados? ¿Se trata de aumentar gravámenes o de afinar los

dispositivos para evitar la evasión? ¿Cuál es el poder relativo de la autoridad presidencial para delinear intervenciones públicas que minimicen las injusticias? La obsesión por los ricos, sea en clave de fascinación o de repudio, activa sensibilidades pero no sirve para entender las causas profundas de la desigualdad. Este libro es un aporte enormemente revelador para conocer los poderes y las impotencias de las élites políticas, económicas y sociales, y para imaginar cómo salir del callejón sin salida en el que estamos y avanzar hacia una sociedad más integrada.

The Political Economy of Trust - Henry Farrell 2009-08-24

Trust and cooperation are at the heart of the two most important approaches to comparative politics - rational choice and political culture. Yet we know little about trust's relationship to political institutions. This book sets out a rationalist theory of how institutions - and in particular informal institutions - can affect trust without reducing it to fully determine expectations. It then shows how this theory can be applied to comparative political economy, and in particular to explaining inter-firm cooperation in industrial districts, geographical areas of intense small firm collaboration. The book compares trust and cooperation in two prominent districts in the literature, one in Emilia Romagna, Italy, and the other in Baden-Württemberg, Germany. It also sets out and applies a theory of how national informal institutions may change as a result of changes in global markets, and shows how similar mechanisms may explain persistent distrust too among Sicilian Mafiosi.

Economic Sociology - Carlo Trigilia 2008-04-15

This book systematically reconstructs the origins and new advances in economic sociology. By presenting both classical and contemporary theory and research, the volume identifies and describes the continuity between past and present, and the move from economics to economic sociology. Most comprehensive and up-to-date overview available by an internationally renowned, award-winning economic sociologist. Systematically reconstructs the origins and new advances in economic sociology. Organizes the perspectives and methods of economic sociologists of the classical and contemporary eras, including coverage of

modernization, globalization, and the welfare state Provides insights into the social consequences of capitalism in the past and present for students of economic sociology.

Economic Sociology - Alejandro Portes 2010-04-19

The sociological study of economic activity has witnessed a significant resurgence. Recent texts have chronicled economic sociology's nineteenth-century origins while pointing to the importance of context and power in economic life, yet the field lacks a clear understanding of the role that concepts at different levels of abstraction play in its organization. Economic Sociology fills this critical gap by surveying the current state of the field while advancing a framework for further theoretical development. Alejandro Portes examines economic sociology's principal assumptions, key explanatory concepts, and selected research sites. He argues that economic activity is embedded in social and cultural relations, but also that power and the unintended consequences of rational purposive action must be factored in when seeking to explain or predict economic behavior. Drawing upon a wealth of examples, Portes identifies three strategic sites of research--the informal economy, ethnic enclaves, and transnational communities--and he eschews grand narratives in favor of mid-range theories that help us understand specific kinds of social action. The book shows how the meta-assumptions of economic sociology can be transformed, under certain conditions, into testable propositions, and puts forward a theoretical agenda aimed at moving the field out of its present impasse.

Confini e trasgressioni di confini nella sociologia economica, del lavoro e dell'organizzazione - Filippo Barbera 2003

Sociology of Economic Innovation - Francesco Ramella 2015-07-24

This book offers a sociological overview of the theories and research on economic innovation. Over the past few decades, the economics of innovation has given rise to a lively flow of studies, and innovation studies continues to develop as an interdisciplinary field of research. Sociology in general, and economic sociology in particular, have already made a significant contribution to innovation and continue to play a

crucial role in this emerging field. This book presents an integrated sociological approach to the study of economic innovation. It explores the key theories and sociological research on innovation, as well as other contributions to the field of Innovation Studies from economists, geographers, and psychologists. Ramella argues that in order to understand the processes of innovation, it is necessary to look at the actors of innovation, at the relations that exist between them and at the sectoral and territorial contexts in which they operate. For students, this book includes international case studies throughout, as well as further study questions at the end of each chapter.

La sociologia economica contemporanea - Marino Regini

2015-02-01T00:00:00+01:00

L'idea di fondo che ha caratterizzato i rapporti fra sociologia e economia è stata, fino a qualche decennio fa, che queste due discipline forniscono teorie e analisi che riguardano aspetti distinti del comportamento umano. In questa visione la sociologia economica, proprio perché tratta con categorie sociologiche attività economiche quali la produzione, il consumo, il lavoro, non può avere che un ruolo residuale rispetto all'economia. Ma questa idea ha perso efficacia e seguaci via via che la scienza economica, sempre più egemonizzata dal modello neoclassico dell'attore razionale che agisce in modo isolato dal contesto sociale e culturale, si è rivelata incapace di dar conto del ruolo delle istituzioni, del potere, della cultura. Come spiegare ad esempio il funzionamento del mercato del lavoro, o quello dei distretti industriali, mediante variabili puramente economiche, senza chiamare in causa la legislazione e le politiche statali, le reti di relazione sociale e la cultura? Senza cioè fare intervenire le istituzioni nella spiegazione dei comportamenti di mercato o imprenditoriali? La sociologia economica offre spiegazioni delle attività economiche diverse da quelle offerte dagli economisti tradizionali. In questo manuale, i migliori specialisti della disciplina fanno il punto su questi studi, dai mercati del lavoro ai sistemi di welfare, dall'economia informale al funzionamento delle associazioni di rappresentanza e delle relazioni industriali, dai comportamenti migratori a quelli di consumo.

Sociological Landscape - Dennis Erasga 2012-03-28

More than the usual academic textbook, the present volume presents sociology as terrain that one can virtually traverse and experience. Each version of the sociological imagination captured by the chapter essays takes the readers to the realm of the taken-for-granted (such as zoological collections, food, education, entrepreneurship, religious participation, etc.) and the extraordinary (the likes of organizational fraud, climate change, labour relations, multiple modernities, etc.) - altogether presumed to be problematic and yet possible. Using the sociological perspective as the frame of reference, the readers are invited to interrogate the realities and trends which their social worlds relentlessly create for them, allowing them in return, to discover their unique locations in their cultures' social map.

The Revival of Scholastic Philosophy in the Nineteenth Century - Joseph Louis Perrier 1909

Diccionario de sociología - Luciano Gallino 2001

Se trata del diccionario de sociología de mayor actualidad y riqueza disponible en nuestra lengua. El profesor Gallino, catedrático de la Universidad de Turín, ha llevado a cabo, en más de mil páginas, una obra admirable, verdadera summa conceptual de la sociología de nuestro tiempo. Cada entrada está dividida en cinco apartados: definición del concepto, variantes históricas de su significado, componentes y modalidades, factores o causas que lo influyen o modifican, y efectos o influencias en otros fenómenos. En el texto de cada artículo van indicándose las referencias cruzadas pertinentes. Un amplio índice analítico permite acudir al diccionario siguiendo diversos itinerarios de lectura, para utilizarlo así como un verdadero tratado. Nutridas

bibliografías completan cada entrada con referencias a textos extranjeros y en nuestra lengua.

Marshall's Evolutionary Economics - Tiziano Raffaelli 2003-08-29
Alfred Marshall was one of the most important economists ever to have lived. This excellent new book, from a Marshall expert respected the world over, attempts to show that Marshall anticipated some of the views that are now associated with the cognitive sciences. Examining Marshall's philosophy of the human mind, his overall approach to economics, his concern for socio-economic issues, and the fertility of his framework, this book breathes fresh life into the fascinating world of Marshallian economics.

Ibss: Sociology: 1999 - British Library of Political and Economic Science 2001-01-16

IBSS is the essential tool for librarians, university departments, research institutions and any public or private institution whose work requires access to up-to-date and comprehensive knowledge on the social sciences.
