Why does a director choose a particular script? What must they do in order to keep actors fresh and truthful through take after take of a single scene? How do you stage a shootout—involving more than one hundred extras and three colliding taxis—in the heart of New York's diamond district? What does it take to keep the studio honchos happy? From the first rehearsal to the final screening, *Making Movies* is a master's take, delivered with clarity, candor, and a wealth of anecdote. For in this book, Sidney Lumet, one of our most consistently acclaimed directors, gives us both a professional memoir and a definitive guide to the art, craft, and business of the motion picture. Learn Better - Ulrich Boser
2017-03-07

For centuries, experts have argued that learning was about memorizing information: You're supposed to study facts, dates, and details, burn them into your memory, and then apply that knowledge at opportune times. But this approach to learning isn't nearly enough for the world that we live in today, and in *Learn Better* journalist and education researcher Ulrich Boser demonstrates that how we learn can matter just as much as what we learn. In this brilliantly researched book, Boser maps out the new science of learning, showing how simple techniques like comprehension check-ins and making material personally relatable can help people gain expertise in dramatically better ways. He covers six key steps to help you "learn how to learn," all illuminated with fascinating stories like how Jackson Pollock developed his unique painting style and why

an ancient Japanese counting device allows kids to do math at superhuman speeds. Boser's witty, engaging writing makes this book feel like a guilty pleasure, not homework. *Learn Better* will revolutionize the way students and society alike approach learning and makes the case that being smart is not an innate ability—learning is a skill everyone can master. With Boser as your guide, you will be able to fully capitalize on your brain's remarkable ability to gain new skills and open up a whole new world of possibilities.

streaming services and video-on-demand to social media and everything else besides. This has changed the way media scholars think about the production and reception of media. Missing from these conversations, though, is the maker: in particular, the maker who has the power to produce media in their pocket. How might one craft a personal media-making practice that is thoughtful and considerate of the tools and materials at one's disposal? This is the core question of this original new book. Exploring a number of media-making tools and processes like drones and vlogging, as well as thinking through time, editing, sound and the stream, Binns looks out over the current media landscape in order to understand his own media practice. The result is a personal journey through media theory, history and technology, furnished with practical exercises for teachers, students, professionals and enthusiasts: a unique combination of theory

and practice written in a highly personal and personable style that is engaging and refreshing. This book will enable readers to understand how a personal creative practice might unlock deeper thinking about media and its place in the world. The primary readership will be among academics, researchers and students in the creative arts, as well as practitioners of creative arts including sound designers, cinematographers and social media content producers. Designed for classroom use, this will be of particular importance for undergraduate students of film production, and may also be of interest to students at MA level, particularly on the growing number of courses that specifically offer a blend of theory and practice. The highly accessible writing style may also mean that it can be taken up for high school courses on film and production. It will also be of interest to academics delivering these courses, and to researchers and scholars of new media and digital cinema.
