Digital Transformation of the Design, Construction and Management Processes of the Built Environment - Bruno Daniotti 2019-01-01

This open access book focuses on the development of methods, interoperable and integrated ICT tools, and survey techniques for optimal management of the building process. The construction sector is facing an increasing demand for major innovations in terms of digital dematerialization and technologies such as the Internet of Things, big data, advanced manufacturing, robotics, 3D printing, blockchain technologies and artificial intelligence. The demand for simplification and transparency in information management and for the rationalization and optimization of very fragmented and splintered processes is a key driver for digitization. The book describes the contribution of the ABC Department of the Polytechnic University of Milan (Politecnico di Milano) to R&D activities regarding methods and ICT tools for the interoperable management of the different phases of the building process, including design, construction, and management. Informative case studies complement the theoretical discussion. The book will be of interest to all stakeholders in the building process - owners, designers, constructors, and faculty managers - as well as the research sector.

Internationalization of Luxury Fashion Firms - Andrea Runfola 2021-12-08

Internationalization is an essential component of the business model for luxury fashion companies. Hence,

regardless of their size, luxury firms have to develop in foreign markets to seek global demand, build a global image, and manage distribution and communications effectively. Filling a gap in current literature, this book examines the motives, processes, and forms assumed for the internationalization of luxury fashion companies and the relationship between internationalization and business models, with a focus on small and medium-sized enterprises (SMEs) and the specific challenges they face. The book proposes cases of Italian SMEs, being Italy a country that is globally recognized as a key player in the luxury fashion industry. Specifically, the authors link internationalization with business models and discuss the business model of luxury fashion SMEs, characterized by "genetic internationalization". Finally, the authors address the main theoretical and managerial implications emerging from their empirical research and discuss the applicability of this model to luxury companies in general. Offering a comprehensive and in-depth view of luxury fashion SMEs, this book is targeted to students, scholars and practitioners interested in luxury firms, internationalization, and business models.

The Art of Digital Marketing for Fashion and Luxury Brands - Wilson Ozuem 2021-07-17

This book explores omnichannel fashion and luxury retailing with a particular emphasis on the role of computer-mediated marketing environments in determining a consumer's purchase and post-purchase trajectories. The fashion industry has evolved rapidly over the last few years with the diffusion of fast

fashion and luxury democratization, not to mention the advent of ICT and the development of communication. Today, fashion companies face new challenges, such as how to manage brands and how to choose between marketplaces and digital marketplaces. While some companies focus on one channel selection, others embrace the omnichannel choice and look for a balance between the two environments. Whatever the strategy, it is essential to manage these touch-points in order to create interaction between consumers and brands, provide meaningful customer experiences, and to maximize customers' engagement. An insightful read for scholars in marketing, fashion and retail, this book investigates the triangulation between branding, marketplace, and marketpace and its impact on the organization.

Lean Thinking - James P. Womack 2013-09-26

Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

Fashion - Lars Svendsen 2006-10-30

Fashion is at once a familiar yet mysteriously elite world that we all experience, whether we're buying a new pair of jeans, reading Vogue, or watching the latest episode of Project Runway. Lars Svendsen dives into that world in Fashion, exploring the myths, ideas, and history that make up haute couture, the must-have trends over the centuries, and the very concept of fashion itself. Fashion opens with an exploration of all the possible meanings encompassed by the word "fashion," as Svendsen probes its elusive place in art, politics, and history. Ultimately, however, he focuses on the most common use of the term: clothing. With his trademark dry wit, he deftly dismantles many of the axioms of the industry and its supporters. For example, he points out that some of the latest fashions shown on runways aren't actually "fashionable" in any sense of the word, arguing that they're more akin to modern art works, and he argues against the increasingly prevalent idea that plastic surgery and body modification are part of a new wave of consumerism. Svendsen draws upon the writings of thinkers from Adam Smith to Roland Barthes to analyze fashion as both a historical phenomenon and a philosophy of aesthetics. He also traces the connections between the concepts of fashion and modernity and ultimately considers the importance of evolving fashions to such fields as art, politics, and philosophy. Whether critiquing a relentless media culture that promotes perfect bodies or parsing the never-ending debate over the merits of conformity versus individual style, Lars Svendsen offers an engaging and intriguing analysis of fashion and the motivations behind its constant pursuit of the new.

Story or Die - Lisa Cron 2021-03-02

"A practical, heartfelt manual for anyone who needs to change minds and actions. Lisa Cron shares the art of practical empathy with leaders who care enough to make a difference."—Seth Godin, author of *The Practice* A step-by-step guide to using the brain's hardwired need for story to achieve any goal, from the author of *Wired for Story* Whether you're pitching a product, saving the planet, or convincing your kids not to text and drive, story isn't just one way to persuade. It's the way. It's built into the architecture of the brain, and has been since early humans gathered around the camp fire, trying to figure out how to outsmart the lion next door. In *Story or Die*, story coach Lisa Cron sets out to decode the power of story, first by examining how the brain processes information, translates it into narrative, and then guards it as if your life depends on it. Armed with that insight, she focuses on how to find your real target audience and then pinpoint their hidden resistance. Finally, she takes you, step-by-step, through the creation of your own story, one that allows your audience to overcome their resistance and take up your call to action, not because you told them to, but because they want to. That is the power of story. Use it wisely.

This volume focuses on the new frontiers of fashion law, taking into account the various fields that have recently emerged as being of great interest for the entire fashion world: from sustainable fashion to wearable technologies, from new remedies to cultural appropriation to the regulation of model weight, from advertising law on the digital market to the impact of new technologies on product distribution. The purpose is to stimulate discussion on contemporary problems that have the potential to define new boundaries of fashion law, such as the impact of the heightened ethical sensitivity of consumers (who increasingly require effective solutions), that a comparative law perspective renders more interesting. The volume seeks to sketch out the new legal fields in which the fashion industry is getting involved, identifying the new boundaries of fashion law that existing literature has not dealt with in a comprehensive manner.

Decent Work and Economic Growth - Walter Leal Filho 2020-10-20

The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the

Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. The Encyclopedia encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 8, namely "Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all" and contains the description of a range of terms, to allow a better understanding and foster knowledge. The predominant economic model is promoting a lopsided economic growth that is further increasing the gap between the have and the have-nots. This SDG is not just proposing the attainment of more just and empowering economic models, but it also puts at the forefront the well-being of workers by striving to provide employment and better working conditions that respect the dignity of workers. Concretely, the defined targets are: Sustain per capita economic growth in accordance with national circumstances and, in particular, at least 7 per cent gross domestic product growth per annum in the least developed countries Achieve higher levels of economic productivity through diversification, technological upgrading and innovation, including through a focus on high-value added and labour-intensive sectors Promote development-oriented policies that support productive activities, decent job creation, entrepreneurship, creativity and innovation, and encourage the formalization and growth of micro-, small- and medium-sized enterprises, including through access to financial services Improve progressively, through 2030, global resource efficiency in consumption and production and endeavour to decouple economic growth from environmental degradation, in accordance with the 10-Year Framework of Programmes on Sustainable Consumption and Production, with developed countries taking the lead Achieve full and productive employment and decent work for all women and men, including for young people and persons with disabilities, and equal pay for work of equal value Substantially reduce the proportion of youth not in employment, education or training Take immediate and effective measures to eradicate forced labour, end modern slavery and human trafficking and secure the prohibition and elimination of the worst forms of child labour, including recruitment and use of child soldiers, and end child labour in all its forms Protect labour rights and promote safe and secure working environments for all workers, including migrant workers, in particular women migrants, and those in precarious employment Devise and implement policies to promote sustainable tourism that creates jobs and promotes local culture and products Strengthen the capacity of domestic financial institutions to encourage and expand access to banking, insurance and financial services for all Increase Aid for Trade support for developing countries, in particular least developed countries, including through the Enhanced Integrated Framework for Trade-related Technical Assistance to Least Developed Countries Develop and operationalize a global strategy for youth employment and implement the Global Jobs Pact of the International Labour Organization Editorial Board Rimjhim M Aggarwal, Rosa Maria Fernandez, Edurne A. [Catalogo dei libri in commercio](#) - 1999

Overtourism - Claudio Milano 2019-06-07

This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving

beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.
