

Morocco At A Glance Cidb

Eventually, you will categorically discover a supplementary experience and feat by spending more cash. yet when? pull off you give a positive response that you require to get those all needs past having significantly cash? Why dont you try to get something basic in the beginning? Thats something that will lead you to comprehend even more on the globe, experience, some places, with history, amusement, and a lot more?

It is your unquestionably own time to proceed reviewing habit. in the course of guides you could enjoy now is **Morocco At A Glance Cidb** below.

Agra - Syad Muhammad Latif 1981

Dead Ends of Transition - Michael

Dauderstädt 2006

After war, many countries, such as Bosnia, Kosovo, Afghanistan, or Iraq, the transition to a democratic market economy extremely difficult. This failure to thrive, Dead Ends of Transition demonstrates, is often the result of national reliance on foreign aid. Rentier states, the contributors to this study argue, have few incentives to respond to the needs of their societies. Taking a closer look at the policies of rentier economies, this book further identifies new ways in which these countries and their international partners could work together to ease the critical transition to democracy.

The Economic Impact of the 2014 Ebola

Epidemic - The World Bank 2014-11-26

Beyond the terrible toll in human lives and suffering, the Ebola epidemic currently afflicting West Africa is already having a measurable economic impact. This report provides a systematic analysis of the channels of economic impact and the likely magnitude of that impact for Guinea, Liberia, and Sierra Leone, as well as West Africa as a whole.

Management - Richard L. Daft 2015-01-01

MANAGEMENT, 12E includes several innovative pedagogical features to help students understand their management capabilities and learn what it's like to manage in an organization today. Each of the 19 chapters begins with an opening questionnaire that engages the reader's interest, directly connects to the topic of the chapter, and enables students to see how they respond to situations and challenges that real-

life managers typically face. A New Manager Self-Test in each chapter provides students with further insight into how they would function in the real world of management. The Remember This bullet-point summaries at the end of each major chapter section give students a snapshot of the key points and concepts covered in that section. The end-of-chapter questions have been carefully revised to encourage critical thinking and application of chapter concepts, and Small Group Breakout exercises give students the opportunity to apply concepts while building teamwork skills. Ethical dilemmas, all-new end-of-chapter cases, and a fully updated set of On the Job video cases help students sharpen their diagnostic skills for management problem solving. The chapter sequence in MANAGEMENT is organized around the management functions of planning, organizing, leading, and controlling. These four functions effectively encompass management research and the characteristics of the manager's job.

Can Africa Claim the 21st Century? - Alan H.

Gelb 2000-01-01

Africa in the 21st Century offers a comprehensive review of development prospects in each of the major development sectors.

The Calling of Education - Edward Shils

2008-04-15

Throughout his long and prolific career, Edward Shils brought an extraordinary knowledge of academic institutions to discussions about higher education. The Calling of Education features Shils's most illuminating and incisive

writing on this topic from the last twenty-five years of his life. The first essay, "The Academic Ethic," articulates the unique ethical demands of the academic profession and directs special attention to the integration of teaching and research. Other pieces, including Shils's renowned Jefferson lectures, focus on perennial issues in higher learning: the meaning of academic freedom, the connection between universities and the state, and the criteria for appointing individuals to academic positions. Edward Shils understood the university as a great symphonic conductor comprehends the value of each instrument and section, both separately and in cooperation. The *Calling of Education* offers Shils's insightful perspective on problems that are no less pressing than when he first confronted them. Edward Shils (1910-1995) was distinguished service professor in the Committee on Social Thought and the department of sociology at the University of Chicago. Among his many books published by the University of Chicago Press are *Portraits: A Gallery of Intellectuals* and the three-volume *Selected Papers of Edward Shils*.

Labour Migration in Malaysia and Spain - Blanca Garcés-Mascareñas 2012

De overheid wordt in de regulering van arbeidsmigratie geconfronteerd met een dubbele paradox. Ten eerste: terwijl markten een op en grenzenbeleid vereisen om aan de behoefte van arbeidsmigranten en de marktvraag tegemoet te komen, leggen de grenzen die inherent zijn aan burgerschap een zekere afsluiting van de buitenwereld op. Ten tweede: terwijl de exclusiviteit die burgerschap met zich meebrengt een gesloten lidmaatschap vergt, ondermijnen burgerschap- en mensenrechten de mogelijkheid van de staat om buitenlanders uit te sluiten zodra zij zich in het land bevinden.

Megacities - Steef Buijs 2010

World cities are reaching previously inconceivable sizes and populations. For the last fifteen years, The Megacities Foundation has encouraged public debate on this development, uniting practitioners from the fields of architecture, economics, geography, sociology and urban planning. This book offers a compilation of the Foundation's best lectures, defining megacities and their processes and systems.

Earthquake Resistant Concrete Structures - Andreas Kappos 2014-04-21

This book introduces practising engineers and post-graduate students to modern approaches to seismic design, with a particular focus on reinforced concrete structures, earthquake resistant design of new buildings and assessment, repair and strengthening of existing buildings.

Territorial Cohesion - Eduardo Medeiros 2018-12-14

This book offers a comprehensive overview of several urban related aspects that are of central importance to successful territorial cohesion processes. In essence, it sheds new light on issues concerning urban polycentrism, functional urban regions, integrated sustainable urban development, and the EU Urban Agenda; and on how they can help to achieve territorial cohesion policy goals. As an elusive and fairly recent concept, territorial cohesion has to date only been vaguely debated in the available literature, which for the most part focuses on its historical origins and its relevance for EU policymaking. Instead, this book synthesizes, for the first time, a range of perspectives that place urban elements and policies at the core of territorial cohesion analysis. As such, and given the fact that territorial cohesion is a holistic concept, the book will appeal to a broad readership from both the academic and policymaking arenas.

Dialect, Culture, and Society in Eastern Arabia - Clive Holes 2005

A three-volume study of the Arabic dialects spoken in Bahrain by its older generation in the mid 1970s, and the socio-cultural factors that produced them.

Future Directions of Municipal Solid Waste Management in Africa - Mohee, Romeela 2015-04-03

Transformation and rapid population growth in Africa indicates that urbanisation is one of the key determinants of the future of social dynamics and development of the continent. Linked to these changes are increased production levels of Municipal Solid Waste. This book provides recommendations and solutions that derive from current situations, experiences and observations in Africa. The study is an essential tool for urban planners, environmental engineering students and lecturers,

environmental consultants and policy-makers; it is also a resource for municipal authorities, as it outlines future directions of Municipal Solid Waste management. These need to be considered by the municipal authorities of most African countries.

International Trade and Foreign Direct Investment - Union européenne. Commission européenne 2013

"In a world of increasing globalization, where political, economic and technological barriers are rapidly disappearing, the ability of the European Union and its Member States to participate in global activity is an important indicator of their performance and competitiveness. In order to remain competitive, modern day business relationships extend well beyond the traditional foreign exchange of goods and services. International trade may be complemented or substituted by producing (and often selling) goods and services in countries other than where an enterprise was first established: this approach is known as foreign direct investment (FDI). The aim of this pocketbook is to give an overview of the external dimension of the EU economy by presenting, in a compact way, the available data on trade in goods, trade in services, and foreign direct investments."--Editor.

Energy and Sun - Ludger Eltrop 2013

Solar energy is in focus worldwide. So is the role of cities and public governments for creating a more sustainable urban future. This volume highlights the role of solar energy and other solar related energy technologies for a low carbon and sustainable energy system, particularly for cities and city regions in the South. The articles refer to solar energy generation technologies, smart city planning concepts, as well as 'passive' solar building design approaches. Thus, the volume takes a broad and applied approach by analysing projects and different solutions for a more efficient and solar oriented building design and technology implementation.

The Political Economy of the Resource Curse - Andrew Rosser 2006

This paper presents a critical survey of the literature on the "resource curse", focusing on three main questions: (i) are natural resources bad for development?; (ii) what causes the

resource curse?; and, (iii) how can the resource curse be overcome? In respect of these questions, three observations are made. First, while the literature provides considerable evidence that natural resource abundance is associated with various negative development outcomes, this evidence is by no means conclusive. Second, existing explanations for the resource curse do not adequately account for the role of social forces or external political and economic environments in shaping development outcomes in resource abundant countries, nor for the fact that, while most resource abundant countries have performed poorly in developmental terms, a few have done quite well. Finally, recommendations for overcoming the resource curse have not generally taken into account the issue of political feasibility.

Blueprint for Black Power - Amos N. Wilson 1998

African life into the coming millennia is imperiled by White and Asian power. True power must rest in the ownership of the real estate wherever African people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of African Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).

[The Edifice Complex](#) - Deyan Sudjic 2011-04-07
The Edifice Complex explores the intimate and inextricable relationship between power, money and architecture in the twentieth century. How and why have presidents, prime ministers, mayors, millionaires and bishops come to share such a fascination with grand designs? From Blair to Mitterrand, from Hitler to Stalin to Saddam Hussein, architecture has become an end in itself, as well as a means to an end. This is a book of genuine timeliness, throwing new light on the motivations of the rich and powerful around the world - and on the ways they seek to

affect us.

Bridge Engineering - W.F. Chen 2003-02-27

With chapters culled from the acclaimed Bridge Engineering Handbook, *Bridge Engineering: Substructure Design* focuses on the various components comprising and affecting bridge substructures. These include bearings, piers and columns, towers, abutments and retaining structures, footings and foundations, and bridge hydraulics. For each component, the [Characterization of Lignocellulosic Materials](#) -

Thomas Q. Hu, PhD 2008-03-31

Lignocellulosic materials are a natural, abundant and renewable resource essential to the functioning of industrial societies and critical to the development of a sustainable global economy. As wood and paper products, they have played an important role in the evolution of civilization. Improvement of the quality and manufacturing efficiency of such products has often been hampered by the lack of understanding of the complex structures and chemical compositions of the materials. Due to increasing economic and environmental issues concerning the use of petrochemicals, lignocellulosic materials will be relied upon as feedstock for the production of chemicals, fuels and biocompatible materials. Significant progress has been made to use lignocellulosic materials for the production of fuel ethanol and as a reinforcing component in polymer composites. Effective and economical methods for such uses, however, remain underdeveloped, partly due to the difficulties encountered in the characterization of the structures of native lignocelluloses and lignocelluloses-based materials. Improved methods for the characterization of lignocellulosic materials are needed. *Characterization of Lignocellulosic Materials* covers recent advances in the characterization of wood, pulp fibres and papers. It also describes the analyses of native and modified lignocellulosic fibres and materials using a range of advanced techniques such as time-of-flight secondary ion mass spectrometry, 2D heteronuclear single quantum correlation NMR, and Raman microscopy. The book provides a survey of state-of-the-art characterization methods for lignocellulosic materials, for both academic and industrial researchers who work in the fields of wood and

paper, lignocelluloses-based composites and polymer blends, and bio-based fuels and materials.

Earthquake Engineering Handbook - Charles Scawthorn 2002-09-27

Earthquakes are nearly unique among natural phenomena - they affect virtually everything within a region, from massive buildings and bridges, down to the furnishings within a home. Successful earthquake engineering therefore requires a broad background in subjects, ranging from the geologic causes and effects of earthquakes to understanding the imp

Architecture of Deals - Duc V. Trang 2019

E-Learning Paradigms and Applications - Mirjana Ivanović 2013-12-05

Teaching and learning paradigms have attracted increased attention especially in the last decade. Immense developments of different ICT technologies and services have paved the way for alternative but effective approaches in educational processes. Many concepts of the agent technology, such as intelligence, autonomy and cooperation, have had a direct positive impact on many of the requests imposed on modern e-learning systems and educational processes. This book presents the state-of-the-art of e-learning and tutoring systems and discusses their capabilities and benefits that stem from integrating software agents. We hope that the presented work will be of a great use to our colleagues and researchers interested in the e-learning and agent technology.

Romantic Edinburgh - John Geddie 1900

Development and Finance in Islam - AbulHasan Muhammad Sadeq 1991

[Modernity, Nation and Urban-Architectural Form](#) - Shireen Jahn Kassim 2018-07-20

This book explores how Malaysia, as a multicultural modern nation, has approached issues of nationalism and regionalism in terms of physical expression of the built environment. Ever since the nation's post-Colonial era, architects and policy makers have grappled with the theoretical and practical outcomes of creating public architecture that effectively responds to traditions, nationhood and modernity. The authors compile and analyse

prevailing ideas and strategies, present case studies in architectural language and form, and introduce the reader to tensions arising between a nationalist agenda and local 'regionalist' architectural language. These dichotomies represent the very nature of multicultural societies and issues with identity; a challenge that various nations across the globe face in a changing environment. This topical and pertinent volume will appeal to students and scholars of urban planning, architecture and the modern city.

Harper's Book of Facts - Charlton Thomas Lewis 1895

Construction 2004 - National Research Council (U.S.). Transportation Research Board 2004

Beyond the Resource Curse - Brenda Shaffer 2011-12-30

When countries discover that they possess large deposits of oil and natural gas, the news is usually welcome. Yet, paradoxically, if they rely on their wealth of natural resources, they often set down a path of poor economic performance and governance challenges. Only a few resource-rich countries have managed to develop their economies fully and provide a better and sustainable standard of living for large segments of their populations. This phenomenon, known as the resource curse, is a core challenge for energy-exporting states. *Beyond the Resource Curse* focuses on this relationship between natural wealth and economic security, discussing the particular pitfalls and consistent perils facing oil- and gas-exporting states. The contributors to this volume look beyond the standard fields of research related to the resource curse. They also shed new light on the specific developmental problems of resource-rich exporting states around the globe, including Azerbaijan, Bahrain, Cambodia, East Timor, Iran, Norway, Russia, Trinidad and Tobago, the United Arab Emirates, and Venezuela. Policy makers and academics think of energy security solely in terms of the interests of energy importers. *Beyond the Resource Curse* shows that the constant volatility in energy markets creates energy security challenges for exporters as well.

Moving Towards Low Carbon Mobility - Moshe

Givoni 2013-01-01

For a thorough and thoughtful perspective on what it will take to de-carbonize cities of the future, this book is a must-read. Technology alone, we are told, will not create the post-carbon city. As important is coming to grips with a complex web of cultural, institutional, financial, and social factors that powerfully shape mobility choices, now and in the future. A balanced, holistic approach that reveals how the many elements of contemporary transport systems work together offers the best hope for achieving more sustainable, less carbon-intensive mobility futures. Robert Certero, University of California, Berkeley, US This is not just another book about transport and climate change. It sensibly places transport within the much broader concept of mobility and explores all aspects of travel behaviour, of people and goods, and the infrastructure needs to serve these, leading to a balanced set of policy proposals. This volume, compiled by an internationally eminent team of researchers, is essential reading for all those wanting a balanced and objective analysis of this critical topic. Roger Vickerman, University of Kent, UK A unique assemblage of papers by top international experts that together cover every aspect of the transport-mobility-environment relationship today's central issue for transport planners worldwide. Sir Peter Hall, University College London (UCL), UK The transport sector has been singularly unsuccessful in becoming low carbon and less resource intensive. This book takes an innovative and holistic social, cultural and behavioural perspective, as well as covering the more conventional economic and technological dimensions, to provide a more complete understanding of the mobility and transport system and its progress towards high carbon mobility. The book uses this platform to explore the means to achieve low carbon mobility through outlining alternative pathways, through an investigation of theories of change, and through alternative visions of the low carbon transport city. The book's core message is that the complexity of the mobility and transport system should not encourage inaction, but strong and immediate action. In addition to implementing a wide range of policy measures,

the book argues for a fundamental change in thinking when it comes to transport policy, governance and analysis approaches, before low carbon mobility becomes a reality. Bringing together the latest thinking on transport, mobility and the environment, this book will appeal to researchers and students interested in sustainability issues and sustainable transport and transport related areas in particular, including policy makers as well as a more general professional audience.

A Handbook to Agra and the Taj, Sikandra, Fatehpur-Sikri and the Neighbourhood - Ernest Binfield Havell 1904

Elementary Estimating For Building Works (Penerbit USM) - Mastura Jaafar 2015-07-01
Accurately forecasting the building works is vital to the survival of any business or organization. Building consists of many elements that need to be properly priced. Building estimation is useful for owner and consultant to determine the project scope; while for contractor it is normally used for bidding or tendering process. This book provides a simple guideline in doing elementary estimation of building works. It consists of 12 chapters giving example calculations of various building elements covering from excavation and earthwork until rainwater disposal system. Besides students in the construction environment, this book is also relevant for practitioners in the construction related industries such as building contractors, subcontractors, consultants or clients and also individual who are looking for knowledge related to building costing. Globalization era in higher education system and a great demand on construction related programmes in Malaysia has contributed to the publication of this book. Thus, this book is purposely written in English for the benefit of local and international students. Universiti Sains Malaysia, Penerbit Universiti Sains Malaysia

Shaping a New Africa - Abdullah A. Mohamoud 2007

Shaping a New Africa contributes to the ongoing debate on shaping a new Africa, which was initiated in the Netherlands in 2002 for the purpose of gaining more profound and realistic knowledge of the dynamics of shaping contemporary Africa. This has been

accomplished by highlighting and stimulating discussion on the other side of Africa-a viable Africa rich in natural resources with ample capacity on the ground, striving to find African solutions to African problems; a vibrant Africa where significant progress has been made, new initiatives are being promoted and issues, struggles and challenges are addressed and discussed, and where attempts are undertaken to find solutions from within the continent itself. With contributions from academics of the African Centre for the Constructive Resolution of Disputes (ACCORD): Vasu Gounden, Karanja Mbugua and Venashri Pillay; Mohamed Chérif DIARRA, staff member of the Council for the Development of Social Sciences Research in Africa (CODESRIA) and Bolade M. Eyinla (University of Ilorin, Nigeria). Edited by Abdullah A. Mohamoud (SAHAN).

Cities of Opportunities - Jason Pomeroy 2020-01-30

Culture refers to not only the arts but also other manifestations of human intellectual achievement regarded collectively. It similarly refers to the customs, institutions, and achievements of a social group, a people, or a nation. Innovation refers to the action or process of change, alteration, or revolution; a new method of idea creation or product that may bring about change. It is easy to assume that innovation may be juxtaposed to the preservation of culture and time-tested rituals. Yet as human settlements grew; and as streets and squares evolved through the diverse exchanges of people trading, celebrating, rallying and socially interacting, it should come as little surprise that cities and its places would become, and continue to be, centres of culture and innovation that can be inextricably linked. Culture and Innovation in cities can potentially take on different complexions if viewed through the lens of academics and practitioners drawn from different geographies, disciplines, or fields of expertise when addressing particular urban challenges. It is through this complexity of views that this book seeks to provide a broad perspective on culture and innovation in the context of global cities today; and a rich cornucopia of insights from thought leaders within their respective fields to shape the cities of tomorrow.

Colloquial Arabic of the Gulf - Clive Holes
2015-08-27

This new edition of Colloquial Arabic of the Gulf has been revised and updated to make learning this variety of Arabic easier and more enjoyable than ever before. Specially written by an expert for self-study and classroom use, the course offers you a step-by-step approach to spoken Arabic of the Gulf, together with an introduction to reading signs, business cards, advertisements and other realia. No prior knowledge of the language is required. Each unit presents numerous grammatical points that are reinforced with a wide range of exercises for regular practice. A full answer key can be found at the back as well as useful vocabulary summaries throughout. Features new to this edition include: a 'Cultural Point' section in each unit on important aspects of Gulf culture, society and history, with photographs and realia a 'Reading Arabic' section in each unit, plus a special appendix on the Arabic script comprehensive glossaries, both English-Arabic and Arabic-English, containing all the words in the book extra notes on the dialects of Oman. By the end of this rewarding course you will be able to communicate confidently and effectively in Arabic in a broad range of situations. Audio material to accompany the course is available to download free in MP3 format from www.routledge.com/cw/colloquials. Recorded by native speakers, the audio material features the dialogues and texts from the book and will help develop your listening and pronunciation skills. .

Construction Digitalisation - Douglas Aghimien 2021-07-26

This book explores construction digitalisation, particularly in developing countries. The book conceptualises a digitalisation capability maturity model that will enable construction organisations to self-assess and benchmark their digital capabilities in their quest for digital transformation. Digitalisation offers a significant solution to the age-long problems of the construction industry. Research shows that when construction organisations transform from a traditional service delivery approach to a more digitalised approach, significant improvement in project delivery and better competitive advantage for these organisations will be attained. The attainment of these benefits is

evident in developed countries where the digitalisation of construction activities continues apace. Unfortunately, the story is not the same for construction organisations in developing economies. While some organisations might be willing to be digitally transformed, most have no clue how to go about it. To this end, this book provides guidelines for construction organisations seeking to transform their entities digitally. Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities. Also, regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members. Furthermore, the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries.

Bassie - Basetsana Kumalo 2020-03-17

A must-read for all fans of the inspirational former Miss South Africa and businesswoman Basetsana Kumalo and her family.

Quaternary Vegetation Dynamics - Jürgen Runge 2021-11-29

This book celebrates the relaunch of the African Pollen Database, presents state-of-the-art of modern and ancient pollen data from sub-Saharan Africa, and promotes Open Access science. Pollen grains are powerful tools for the study of past vegetation dynamics because they preserve well within sedimentary deposits and have a huge diversity in ornamentation that allows different taxa to be determined. The reconstruction of past vegetation from the examination of ancient pollen records thus can be used to characterize the nature of past landscapes (e.g. abundance of forests vs. grasslands), provide insights into changes in biodiversity, and gain empirical evidence of vegetation response to climatic change and human activity. In this, the 35th Volume of "Palaeoecology of Africa", we bring together new data and extensive synthetic reviews to provide novel insights into the relationships between human evolution, human activity, climate change and vegetation dynamics during the Quaternary, the last 2.6 million years. Current and ongoing climate and land-use change is exerting pressure

on modern vegetation formations and threatening the livelihoods and wellbeing of many peoples in Africa. In this book the focus is on the Quaternary because it is during this geological period that the modern vegetation formations developed into their current configurations against a backdrop of high magnitude global climate change (glacial-interglacial cycles), human evolution, and a growing human land-use footprint. In this book the latest information is presented and collated from around the African continent to parameterize past vegetation states, identify the drivers of vegetation change, and assess the vegetation resilience to change. To achieve this research from two broad themes are covered: (i) the present is the key to the past (i.e. studies which improve our understanding of modern environments so that we can better interpret evidence from the past), and (ii) the past is the key to the future (i.e. studies which unlock information on how and why vegetation changed in the past so one can better anticipate trajectories of future change). This Open Access book will provide a strong foundation for future research exploring past ecological, environmental and climatic change within Africa and the surrounding islands. The book is organized regionally (covering western, eastern, central, and southern Africa) and it contains specialized articles focused on particular topics (such as modern pollen-vegetation relationships and fire as a driver of vegetation change), as well as regional and pan-African syntheses drawing together decades of research to assess key scientific questions (including the role of climate in driving vegetation change and the role of vegetation change in human evolution). These articles will be useful to students and

teachers from high school to the highest level of university who are interested in the origins and dynamics of vegetation in Africa. Furthermore, it is also meant to provide societally relevant information that can act as an inspiration for the development of sustainable management practices for the future.

Dialect, Culture, and Society in Eastern Arabia, Volume 1 Glossary - Clive Holes 2021-06-09

Dialect, Culture, and Society in Eastern Arabia, Volume I, Glossary is a comprehensive vocabulary of the 'uneducated' Bahraini Arabic dialects, drawn from a data-base of hundreds of hours of natural conversation gathered in the mid-1970s.

Natural Resources and Violent Conflict - Ian Bannon 2003-01-01

Research carried out by the World Bank on the root causes of conflict and civil war finds that a developing country's economic dependence on natural resources or other primary commodities is strongly associated with the risk level for violent conflict. This book brings together a collection of reports and case studies that explore what the international community in particular can do to reduce this risk.; The text explains the links between natural resources and conflict and examines the impact of resource dependence on economic performance, governance, secessionist movements and rebel financing. It then explores avenues for international action - from financial and resource reporting procedures and policy recommendations to commodity tracking systems and enforcement instruments, including sanctions, certification requirements, aid conditionality, legislative and judicial instruments.

Crime Fiction, 1749-1980 - Allen J. Hubin 1984
