*The Youth Guide to Forests* - Food and Agriculture Organization of the United Nations  
2018-06-06

This fact-filled guide explores forests from the equator to the frozen poles, the depths of the rainforest to the mountain forests at high altitudes. It also demonstrates the many benefits that forests provide us with, discusses the

negative impacts that humans unfortunately have on forests and explains how good management can help protect and conserve forests and forest biodiversity. At the end of the guide, inspiring examples of youth-led initiatives and an easy-to-follow action plan will help young people develop their own forest conservation activities and projects.

**Misquoting Muhammad** - Jonathan A.C. Brown  
2014-08-07

AN INDEPENDENT BEST BOOKS ON RELIGION 2014 PICK Few things provoke controversy in the modern world like the religion brought by Prophet Muhammad. Modern media are replete with alarm over jihad, underage marriage and the threat of amputation or stoning under Shariah law. Sometimes rumor, sometimes based on fact and often misunderstood, the tenets of Islamic law and dogma were not set in the religion's founding moments. They were developed, like in other world religions, over centuries by the clerical class of Muslim scholars. Misquoting Muhammad takes the reader back in time through Islamic civilization and traces how and why such controversies developed, offering an inside view into how key and controversial aspects of Islam took shape. From the protests of the Arab Spring to Istanbul at the fall of the Ottoman Empire, and from the ochre red walls of

Delhi's great mosques to the trade routes of the Indian Ocean world, Misquoting Muhammad lays out how Muslim intellectuals have sought to balance reason and revelation, weigh science and religion, and negotiate the eternal truths of scripture amid shifting values.

*The Golden Age of Islam* - Maurice Lombard  
1975

*The House of Wisdom* - Jim Al-Khalili 2011-03-31  
A myth-shattering view of the Islamic world's myriad scientific innovations and the role they played in sparking the European Renaissance. Many of the innovations that we think of as hallmarks of Western science had their roots in the Arab world of the middle ages, a period when much of Western Christendom lay in intellectual darkness. Jim al- Khalili, a leading British-Iraqi physicist, resurrects this lost chapter of history, and given current East-West tensions, his book could not be timelier. With transporting detail, al-Khalili places readers in

the hothouses of the Arabic Enlightenment, shows how they led to Europe's cultural awakening, and poses the question: Why did the Islamic world enter its own dark age after such a dazzling flowering?

1001 Motivational Quotes for Success - 2011

*Contemporary Bioethics* - Mohammed Ali Al-Bar  
2015-05-27

This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the

book concentrates on the objectives of Islamic religious practice - the maqa' sid - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

**Reading Darwin in Arabic, 1860-1950** -

Marwa Elshakry 2014-01-06

In *Reading Darwin in Arabic*, Marwa Elshakry questions current ideas about Islam, science, and secularism by exploring the ways in which Darwin was read in Arabic from the late 1860s to the mid-twentieth century. Borrowing from translation and reading studies and weaving together the history of science with intellectual history, she explores Darwin's global appeal

from the perspective of several generations of Arabic readers and shows how Darwin's writings helped alter the social and epistemological landscape of the Arab learned classes. Providing a close textual, political, and institutional analysis of the tremendous interest in Darwin's ideas and other works on evolution, Elshakry shows how, in an age of massive regional and international political upheaval, these readings were suffused with the anxieties of empire and civilizational decline. The politics of evolution infiltrated Arabic discussions of pedagogy, progress, and the very sense of history. They also led to a literary and conceptual transformation of notions of science and religion themselves. Darwin thus became a vehicle for discussing scriptural exegesis, the conditions of belief, and cosmological views more broadly. The book also acquaints readers with Muslim and Christian intellectuals, bureaucrats, and theologians, and concludes by exploring Darwin's waning influence on public and

intellectual life in the Arab world after World War I. Reading Darwin in Arabic is an engaging and powerfully argued reconceptualization of the intellectual and political history of the Middle East.

Pathfinders - Jim Al-Khalili 2010-09-30

For over 700 years the international language of science was Arabic. In *Pathfinders*, Jim al-Khalili celebrates the forgotten pioneers who helped shape our understanding of the world. All scientists have stood on the shoulders of giants. But most historical accounts today suggest that the achievements of the ancient Greeks were not matched until the European Renaissance in the 16th century, a 1,000-year period dismissed as the Dark Ages. In the ninth-century, however, the Abbasid caliph of Baghdad, Abu Ja'far Abdullah al-Ma'mun, created the greatest centre of learning the world had ever seen, known as Bayt al-Hikma, the House of Wisdom. The scientists and philosophers he brought together sparked a period of extraordinary discovery, in

every field imaginable, launching a golden age of Arabic science. Few of these scientists, however, are now known in the western world. Abu Rayhan al-Biruni, a polymath who outshines everyone in history except Leonardo da Vinci? The Syrian astronomer Ibn al-Shatir, whose manuscripts would inspire Copernicus's heliocentric model of the solar system? Or the 13th-century Andalucian physician Ibn al-Nafees, who correctly described blood circulation 400 years before William Harvey? Iraqi Ibn al-Haytham who practised the modern scientific method 700 years before Bacon and Descartes, and founded the field of modern optics before Newton? Or even ninth-century zoologist al-Jahith, who developed a theory of natural selection a thousand years before Darwin? The West needs to see the Islamic world through new eyes and the Islamic world, in turn, to take pride in its extraordinarily rich heritage. Anyone who reads this book will understand why.

*Why I Am Not a Muslim* - Ibn Warraq 2010-09-30  
Those who practice the Muslim faith have resisted examinations of their religion. They are extremely guarded about their religion, and what they consider blasphemous acts by skeptical Muslims and non-Muslims alike has only served to pique the world's curiosity. This critical examination reveals an unflattering picture of the faith and its practitioners. Nevertheless, it is the truth, something that has either been deliberately concealed by modern scholars or buried in obscure journals accessible only to a select few.

*The Death and Life of Great American Cities* - Jane Jacobs 2016-07-20

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning...[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and

the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

*Contemplation:* - Malik Badri 2018-09-15

The human race is in crisis and very few of us - if any - are able to understand what is wrong with our lives and the world at large. How did this happen and how did humans become so 'disconnected' with humanity? Why are psychological disorders such as depression, anxiety, fear, and suicide on the increase, and

why are conventional Western therapies unable to stem the tide? To approach this we must first look inside ourselves - to explore our own purpose in life and extend that principle to the rest of humanity. Despite the advances of modern Western psychology and the development of therapies that do help many, one area that is largely unexplored is that of the 'human spirit' and spirituality since it is more convenient to consider the human mind as 'machine' that responds to external stimuli. In this powerful exploration into the human mind and its relationship with the human spirit, Malik Badri invites the reader to open the door to self-discovery, purpose and spirituality through the practice of contemplation, reflection and meditation - understanding the true meaning and experience of spirituality as well as one's own place in Creation. Whilst central to worship in Islam, this will also be of great interest to, and help any reader wishing to explore the notion of spirituality whether as part of worship or simply

as part of self development and inner healing.

Picture-Book Professors - Melissa Terras

2018-10-31

How is academia portrayed in children's

literature? This Element ambitiously surveys

fictional professors in texts marketed towards

children, who are overwhelmingly white and

male, tending to be elderly scientists. Professors

fall into three stereotypes: the vehicle to explain

scientific facts, the baffled genius, and the evil

madman. By the late twentieth century, the

stereotype of the male, mad, muddlehead, called

Professor SomethingDumb, is formed in

humorous yet pejorative fashion. This Element

provides a publishing history of the role of

academics in children's literature, questioning

the book culture which promotes the

enforcement of stereotypes regarding

intellectual expertise in children's media. This

title is also available, with additional material, as

Open Access.

*Through the Language Glass* - Guy Deutscher

2010-08-31

A masterpiece of linguistics scholarship, at once

erudite and entertaining, confronts the thorny

question of how—and whether—culture shapes

language and language, culture Linguistics has

long shied away from claiming any link between

a language and the culture of its speakers: too

much simplistic (even bigoted) chatter about the romance of Italian and the goose-stepping orderliness of German has made serious thinkers wary of the entire subject. But now, acclaimed linguist Guy Deutscher has dared to reopen the issue. Can culture influence language—and vice versa? Can different languages lead their speakers to different thoughts? Could our experience of the world depend on whether our language has a word for "blue"? Challenging the consensus that the fundamentals of language are hard-wired in our genes and thus universal, Deutscher argues that the answer to all these questions is—yes. In thrilling fashion, he takes us from Homer to Darwin, from Yale to the Amazon, from how to name the rainbow to why Russian water—a "she"—becomes a "he" once you dip a tea bag into her, demonstrating that language does in fact reflect culture in ways that are anything but trivial. Audacious, delightful, and field-changing, *Through the Language Glass* is a classic of intellectual discovery.

On Revolution - Hannah Arendt 1963

**You Be You** - Jamie Ivey 2020-10-01

Have you ever felt held back from the abundant life God promises you? Do you ever look at the satisfaction and success in other people's lives, and wonder where yours is? In *You Be You*, beloved podcast host and author Jamie Ivey reveals that the abundant life you want is closer than you think. It's not over there in someone else's life. No. It's right here, right now, in your life as it already is—you just have to know how to take hold of it. And in this book, Jamie shows you how to: Throw out false definitions of success Give up the idea that you must have someone else's skills, talents, family, or resources to succeed Use the beautiful level of influence that God has given you Start leaving your deepest mark on the world by living your story Are you ready to finally bloom where you're planted? To finally free yourself to flourish? To live a life that could only be done by

Him and through you? Then jump into You Be You, and you'll find yourself satisfied and succeeding in ways you never expected.

Lost History - Michael Hamilton Morgan 2008

A compelling study of the little known contributions of Islam's cultural, artistic, and scientific accomplishments to Western civilization looks not only at the historic achievements of the Muslim world and the role of inspired leaders who encouraged intellectual inquiry, championed tolerance, and sponsored artistic and literary endeavors, but also at the ancient envy that fuels today's conflicts. Reprint.

**Handbook for Academic Authors** - Beth Luey 2010

This fifth edition has been revised to reflect the impact of digital technology on authorship and publishing.

**The Psychology of Fake News** - Rainer Greifeneder 2020-08-13

This volume examines the phenomenon of fake news by bringing together leading experts from

different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle

misinformation in an age of “alternative facts”, this is a fascinating and vital reading for students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.

**Arabia and the Arabs** - Robert G. Hoyland  
2002-09-11

Long before Muhammed preached the religion of Islam, the inhabitants of his native Arabia had played an important role in world history as both merchants and warriors Arabia and the Arabs provides the only up-to-date, one-volume survey of the region and its peoples, from prehistory to the coming of Islam Using a wide range of sources - inscriptions, poetry, histories, and archaeological evidence - Robert Hoyland explores the main cultural areas of Arabia, from ancient Sheba in the south, to the deserts and oases of the north. He then examines the major themes of \*the economy \*society \*religion \*art, architecture and artefacts \*language and

literature \*Arabhood and Arabisation The volume is illustrated with more than 50 photographs, drawings and maps.

**The Hidden Debt to Islamic Civilisation** - S. E. Al Djazairi 2018-07-25

Many non Muslim scholars and world leading figures, Prince Charles most particularly, have recognised both the decisive impact of Islamic science on modern civilisation and its general neglect in historical and other narratives. This book aims to correct such a neglect and to show the strong Islamic impact on sciences, the arts, architecture, industry, trade and finance as well as literature. The books shows the places, and chronicles the times, of impact. This is the only work in any language that has looked at this issue in such a detailed manner. It relies on the use of hundreds of sources of references both old and recent.

**The Theory of the State** - Johann Caspar Bluntschli 1885

**The Biology of Emotions** - Jean Didier Vincent  
1990-01

**A Brief History of Islam in Europe** - Maurits  
Berger 2014

This book presents an overall presentation and discussion of developments ever since Islam appeared on the European stage thirteen centuries ago. The events and stories presented increase the understanding of present debates on, and notions of, Islam and Muslims in Europe. This book shows that in the course of thirteen centuries the Muslim as well as Islam have undergone many metamorphoses. The Muslim has entered the European stage as a conqueror, antichrist, scholar, benign ruler, corsair, tradesman and fellow citizen. The image of Islam has meandered accordingly, as a religion that was feared as an enemy or embraced as a partner against heretical Christians, despised as an abomination or admired as a civilization, and studied for missionary, academic, colonial or

security purpose.

**Hereditary Genius** - Francis Galton 1870

*The House of Wisdom* - Jonathan Lyons  
2010-04-04

Traces the scientific and philosophical achievements of medieval Arab scholars, exploring such topics as the advances of a group of minds from the royal library of Baghdad and the invaluable contributions they made to Western culture and the Renaissance era.

[The Great Caliphs](#) - Amira K. Bennison  
2014-05-14

This endlessly informative history brings the classical Islamic world to life. In this accessibly written history, Amira K. Bennison contradicts the common assumption that Islam somehow interrupted the smooth flow of Western civilization from its Graeco-Roman origins to its more recent European and American manifestations. Instead, she places Islamic civilization in the longer trajectory of

Mediterranean civilizations and sees the 'Abbasid Empire (750-1258 CE) as the inheritor and interpreter of Graeco-Roman traditions. At its zenith the 'Abbasid caliphate stretched over the entire Middle East and part of North Africa, and influenced Islamic regimes as far west as Spain. Bennison's examination of the politics, society, and culture of the 'Abbasid period presents a picture of a society that nurtured many of the "civilized" values that Western civilization claims to represent, albeit in different premodern forms: from urban planning and international trade networks to religious pluralism and academic research. Bennison's argument counters the common Western view of Muslim culture as alien and offers a new perspective on the relationship between Western and Islamic cultures.

Strengthening Forensic Science in the United States - National Research Council 2009-07-29  
Scores of talented and dedicated people serve the forensic science community, performing

vitaly important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to

advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

*The Muslim 100* - Muhammad Mojlum Khan

2009-09-01

"It is rare to see a publication which includes personalities from both Shia and Sunni schools of thought and which is so much needed in today's turbulent world. This book, I believe will . . . enrich our understanding of not only the historical but the contemporary history of the Muslim."—Ahmed J. Versi, chief editor of *The Muslim News* (London) Who have been the Muslim world's most influential people? What were their ideas, thoughts, and achievements? In one hundred short and engaging profiles of these extraordinary people, fourteen hundred years of the vast and rich history of the Muslim world is unfolded. For anyone interested in getting an intimate view of Islam through its kings and scholars, generals and sportsmen, architects and scientists, and many others—this is the book for you. Among those profiled are the Prophet Muhammad, the Caliph Umar, Imam Husain, Abu Hanifa, Harun al-Rashid, al-Khwarizmi, al-Ghazali, Saladin, Rumi, Ibn

Battuta, Sinan, Ataturk, Iqbal, Jinnah, Ayatollah Khomeini, Malcolm X, and Muhammad Ali.

Interpersonal Relationships in Education: From Theory to Practice - David Zandvliet 2014-08-07

This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types.

Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver,

Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

*The Black Jacobins* - C.L.R. James 1989-10-23  
A classic and impassioned account of the Haitian Revolution—the first revolution in the Third

World and the model for the liberation movements from Africa to Cuba. "One of the seminal texts about the history of slavery and abolition. . . . Provocative and empowering." -The New York Times Book Review This powerful, intensely dramatic book is the definitive account of the Haitian Revolution of 1794-1803, a revolution that began in the wake of the Bastille. It is the story of the French colony of San Domingo, a place where the brutality of master toward slave was legendary. And it is the story of a barely literate slave named Toussaint L'Ouverture, who led the black people of San Domingo in a successful struggle against successive invasions by overwhelming French, Spanish, and English forces and in the process helped form the first independent nation in the Caribbean.

*A Book of Remarkable Criminals* - Henry Brodribb Irving 1918

**Islam Through Western Eyes** - Jonathan Lyons

2014-01-01

Despite the West's growing involvement in Muslim societies, conflicts, and cultures, its inability to understand or analyze the Islamic world threatens any prospect for East-West rapprochement. Impelled by one thousand years of anti-Muslim ideas and images, the West has failed to engage in any meaningful or productive way with the world of Islam. Formulated in the medieval halls of the Roman Curia and courts of the European Crusaders and perfected in the newsrooms of Fox News and CNN, this anti-Islamic discourse determines what can and cannot be said about Muslims and their religion, trapping the West in a dangerous, dead-end politics that it cannot afford. In *Islam Through Western Eyes*, Jonathan Lyons unpacks Western habits of thinking and writing about Islam, conducting a careful analysis of the West's grand totalizing narrative across one thousand years of history. He observes the discourse's corrosive effects on the social sciences, including

sociology, politics, philosophy, theology, international relations, security studies, and human rights scholarship. He follows its influence on research, speeches, political strategy, and government policy, preventing the West from responding effectively to its most significant twenty-first-century challenges: the rise of Islamic power, the emergence of religious violence, and the growing tension between established social values and multicultural rights among Muslim immigrant populations. Through the intellectual "archaeology" of Michel Foucault, Lyons reveals the workings of this discourse and its underlying impact on our social, intellectual, and political lives. He then addresses issues of deep concern to Western readers—Islam and modernity, Islam and violence, and Islam and women—and proposes new ways of thinking about the Western relationship to the Islamic world.

**Gender Dysphoria** - Michelle Serena  
2015-08-04

Gender Dysphoria: Understanding the Symptoms and Treating Gender Dysphoria Researcher and author, Michelle Serena tackles the controversial subject of transgenderism and gender dysphoria in her new eBook, Gender Dysphoria. With all the recent information in the news on transgender people this book comes at the right time. I Am Cait, the new show about the life of Caitlyn Jenner as she transitions into her new world separate from "Bruce Jenner" is a startling reminder that this dysphoria is not only real, but that individuals who are going through this condition have options and have a bright life in front of them when they find self-acceptance and a community of supportive friends. Gender Dysphoria is not a comprehensive book, nor a substitution for medical advice. It is a guide for family and friends who are curious about the subject and need to get a handle on what is going on with someone they love who is transgender. It is also a helpful book for school-aged people who may have to report on

transgender studies or even to better understand their fellow students. The book helps the reader determine what is transgenderism, the possible biological reasons for it, treatments that are possible, and the various attributes of the condition. Readers will find useful information on the topic, and hopefully receive the type of understanding that will enable the transgender peoples in their life to have a point of departure for positive discussion. The eBook discusses male-to-female transgenders, female-to-male, and the hormonal and surgical options that many of them will undertake to find some relief from their condition. It also goes into the risks associated with the various treatment options, and for this reason is also a good resource for family members who have been asked to provide emotional support to the transgender person who is considering hormone therapy and possible Sexual Reassignment Surgery (SRS). **Aladdin's Lamp** - John Freely 2010-03-09

Aladdin's Lamp is the fascinating story of how ancient Greek philosophy and science began in the sixth century B.C. and, during the next millennium, spread across the Greco-Roman world, producing the remarkable discoveries and theories of Thales, Pythagoras, Hippocrates, Plato, Aristotle, Euclid, Archimedes, Galen, Ptolemy, and many others. John Freely explains how, as the Dark Ages shrouded Europe, scholars in medieval Baghdad translated the works of these Greek thinkers into Arabic, spreading their ideas throughout the Islamic world from Central Asia to Spain, with many

Muslim scientists, most notably Avicenna, Alhazen, and Averroës, adding their own interpretations to the philosophy and science they had inherited. Freely goes on to show how, beginning in the twelfth century, these texts by Islamic scholars were then translated from Arabic into Latin, sparking the emergence of modern science at the dawn of the Renaissance, which climaxed in the Scientific Revolution of the seventeenth century.

*Reasons and Persons* - Derek Parfit 1986-01-23

This book challenges, with several powerful arguments, some of our deepest beliefs about rationality, morality, and personal identity. The author claims that we have a false view of our own nature; that it is often rational to act against our own best interests; that most of us have moral views that are directly self-defeating; and that, when we consider future generations the conclusions will often be disturbing. He concludes that moral non-religious moral philosophy is a young subject, with a promising

but unpredictable future.

**1001 Inventions** - Salim T. S. Al-Hassani 2012  
"Imagine it is the seventh century. As most of Europe continues its descent into a long period of intellectually dormancy, a quiet yet powerful academic revolution is erupting in another corner of the world. Over the next centuries, the geniuses of Muslim society will thrust the boundaries of knowledge forward to such a degree that their innovations still shape civilizations to this day. The staggering achievements of these men and women influenced the development of modern mathematics, science, engineering, and medicine. 1001 Inventions: The Enduring Legacy of Muslim Civilization sheds new light on this golden era that was once lost to so many, and celebrates the heritage that we all share"--P. [4] of cover.

**The New Jim Crow** - Michelle Alexander  
2020-01-07  
Named one of the most important nonfiction

books of the 21st century by Entertainment Weekly, Slate, Chronicle of Higher Education, Literary Hub, Book Riot, and Zora A tenth-anniversary edition of the iconic bestseller—"one of the most influential books of the past 20 years," according to the Chronicle of Higher Education—with a new preface by the author "It is in no small part thanks to Alexander's account that civil rights organizations such as Black Lives Matter have focused so much of their energy on the criminal justice system." —Adam Shatz, London Review of Books Seldom does a book have the impact of Michelle Alexander's *The New Jim Crow*. Since it was first published in 2010, it has been cited in judicial decisions and has been adopted in campus-wide and community-wide reads; it helped inspire the creation of the Marshall Project and the new \$100 million Art for Justice Fund; it has been the winner of numerous prizes, including the prestigious NAACP Image Award; and it has spent nearly 250 weeks on the New York Times

bestseller list. Most important of all, it has spawned a whole generation of criminal justice reform activists and organizations motivated by Michelle Alexander's unforgettable argument that "we have not ended racial caste in America; we have merely redesigned it." As the Birmingham News proclaimed, it is "undoubtedly the most important book published in this century about the U.S." Now, ten years after it was first published, The New Press is proud to issue a tenth-anniversary edition with a new preface by Michelle Alexander that discusses the impact the book has had and the state of the criminal justice reform movement today.

*The Future of Ideas* - Lawrence Lessig

2002-10-22

The Internet revolution has come. Some say it has gone. In *The Future of Ideas*, Lawrence

Lessig explains how the revolution has produced a counterrevolution of potentially devastating power and effect. Creativity once flourished because the Net protected a commons on which widest range of innovators could experiment. But now, manipulating the law for their own purposes, corporations have established themselves as virtual gatekeepers of the Net while Congress, in the pockets of media magnates, has rewritten copyright and patent laws to stifle creativity and progress. Lessig weaves the history of technology and its relevant laws to make a lucid and accessible case to protect the sanctity of intellectual freedom. He shows how the door to a future of ideas is being shut just as technology is creating extraordinary possibilities that have implications for all of us. Vital, eloquent, judicious and forthright, *The Future of Ideas* is a call to arms that we can ill afford to ignore.
