Through a series of international and interdisciplinary case studies from five continents, this topical collection is the first to focus on protest camps as unique organisational forms that transcend particular social movements' contexts. The Lexicon of Proto-Oceanic - Malcolm Ross
2007-03-01

This is the second in a series of five volumes on the lexicon of Proto Oceanic, the ancestor of the Oceanic branch of the Austronesian language

family. Each volume deals with a particular domain of culture and/or environment and consists of a collection of essays each of which presents and comments on lexical reconstructions of a particular semantic field within that domain. Volume 2 examines how Proto Oceanic speakers described their geophysical environment. An introductory chapter discusses linguistic and archaeological evidence that locates the Proto Oceanic language community in the Bismarck Archipelago in the late 2nd millennium BC. The next three chapters investigate terms used to denote inland, coastal, reef and open sea environments, and meteorological phenomena. A further chapter examines the lexicon for features of the heavens and navigational techniques associated with the stars. How Proto Oceanic speakers talked about their environment is also described in three further chapters which treat property terms for describing inanimate objects, locational and

directional terms, and terms related to the expression of time.

The Dilemmas of Lone Motherhood - Randy Albelda 2013-09-13

In today's society, women - having entered the workplace in growing numbers worldwide - are increasingly expected to earn wages whilst still being primarily responsible for raising children. While all parents confront the tensions of this double burden, for lone mothers, the situation can be especially acute as there is no other adult to share responsibilities and no access to a male wage. The revealing essays in this volume address a range of the dilemmas lone mothers routinely face, whilst also distinguishing important situational differences, and considering other social perspectives. It asks: * How can governments help without undermining their ability to enter the workforce? * Should the state indefinitely support lone mothers? * How

should we measure the success of a policy? * What roles do ethnicity, race, religion, class and sexual orientation play? The impressive range of contributors to this volume speak from numerous contrasting perspectives. Here they study a variety of international settings such as Sri Lanka, the US, Germany, England and Norway, and in so doing, they allow the reader to draw powerful conclusions by comparing such issues and potential resolutions in varying countries and contexts. This book was previously published as a special issue of Feminist Economics.

The Cerebral Circulation - Marilyn J. Cipolla
2010

This presentation describes structural and functional properties of the cerebral circulation that are unique to the brain, an organ with high metabolic demands, and the need for tight water and ion homeostasis. Autoregulation is pronounced in the brain, with myogenic, metabolic, and neurogenic mechanisms contributing to maintain relatively constant blood flow during both increases and decreases in pressure. In addition, unlike peripheral organs where the majority of vascular resistance resides in small arteries and arterioles, large extracranial and intracranial arteries contribute significantly to vascular resistance in the brain. The prominent role of large arteries in cerebrovascular resistance helps maintain blood flow and protect downstream vessels during changes in perfusion pressure. The cerebral endothelium is also unique in that its barrier

properties are in some way more like epithelium than endothelium in the periphery. The cerebral endothelium, known as the blood-brain barrier, has specialized tight junctions that do not allow ions to pass freely and has very low hydraulic conductivity and transcellular transport. This special configuration modifies Starling's forces in the brain such that ions retained in the vascular lumen oppose water movement due to hydrostatic pressure. Tight water regulation is necessary in the brain because it has limited capacity for expansion within the skull.

Increased intracranial pressure due to vasogenic edema can cause severe neurologic complications and death. This chapter will review these special features of the cerebral circulation and how they contribute to the physiology of the brain. This volume is a printed version of a work that appears in the Colloquium Digital Library of Life Sciences. Colloquium titles cover all of cell and molecular biology and biomedicine, including the neurosciences, from

the advanced undergraduate and graduate level up to the post-graduate and practicing researcher level. They offer concise, original presentations of important research and development topics, published quickly, in digital and print formats. For more information, visit www.morganclaypool.com

Indigenous Rights in Scandinavia - Christina Allard 2016-05-23

This book contributes to the international debate on Indigenous Peoples Law, containing both in-depth research of Scandinavian historical and legal contexts with respect to the Sami and demonstrating current stances in Sami Law research. In addition to chapters by well-known Scandinavian experts, the collection also comments on the legal situation in Norway, Sweden and Finland in relation to other jurisdictions and indigenous peoples, in particular with experiences and developments in Canada and New Zealand. The book displays the current research frontier among the

Scandinavian countries, what the present-day issues are and how the nation states have responded so far to claims of Sami rights. The study sheds light on the contrasts between the three countries on the one hand, and between Scandinavia, Canada and New Zealand on the other, showing that although there are obvious differences, for instance related to colonisation and present legal solutions, there are also shared experiences among the indigenous peoples and the States. Filling a gap in an under-researched area of Sami rights, this book will be a valuable resource for academics, researchers and policy-makers with an interest in Indigenous Peoples Law and comparative research.

På vei: Arbeidsbok - Elisabeth Ellingsen 2012

Pilgrimage, Landscape, and Identity - Marion Grau 2021-07-30

Pilgrimage, Landscape, and Identity: Reconstructing Sacred Geographies in Norway explores the ritual geography of a pilgrimage system that arose around medieval saints in Norway, a country now being transformed by petroleum riches, neoliberalism, migration and global warming. What it means to be Norwegian and Christian in this changing context is constantly being renegotiated. The

contemporary revival of pilgrimage to the burial site of St. Olav at Nidaros Cathedral in Trondheim is one site where this negotiation takes place. St. Olav played a major role in the unification of regions of Norway into a nation united by Christian law and faith, though most contemporary pilgrims have only a passing interest in the historical background of the pilgrimage. The pilgrimage network comprises a wide variety of participants: individuals, casual groups, guided group pilgrimages, activist pilgrims raising awareness for causes such as climate change and hospice services, as well as increasing numbers of local and foreign pilgrims of various ages, government officials, pilgrimage activists, and pilgrimage priests supplied by the Church of Norway (Lutheran). Part of the study focuses on the Olavsfest, a cultural and music festival that engages the heritage of St. Olav and the Church of Norway through theater, music, lectures, and discussions, and theological and interreligious conversations. This festival offers

an opportunity for creative and critical engagement with a difficult historical figure and his contested, violent heritage and constitutes one of the ways in which this pilgrimage network represents a critical Protestant tradition engaging a legacy through ritual creativity. This study maps how pilgrims, hosts, church officials, and government officials participate in reshaping narratives of landscape, sacrality, and pilgrimage as a symbol of life journey, nation, identity, Christianity, and Protestant reflections on the durability of medieval Catholic saints.

In 2014 the Nordic Institute of Studies in Innovation, Research and Education (NIFU) evaluated the agreement. In the report

the evaluators give a description and a mapping of Nordic student mobility in a European context, as well an evaluation how appropriate and effective the agreement is. It is concluded that the agreement and Nordic cooperation is largely taken for granted and that the agreement has both a practical and symbolic value for Nordic cooperation.
