72 Girls and Some Boys who Could be Models - Anne Daems 2007

In the winter of 2005, Belgian photographer Anne Daems lived in New York City for six months as a Resident of the International Studio and Curatorial Program. In this small book of street photography, Daems focuses her lens on young New Yorkers, captured unawares--on the sidewalks of Soho, in the subway, under scaffolding, in traffic, and through shop windows. These delicate surveillance snapshots raise questions about voyeurism, youth, conventional beauty and how we tend to classify strangers. They are accompanied by an interview between Daems and artist Dan Graham, whose work also deals with surveillance: DG: Well, your work is about people. You're interested in people, aren't you? AD: Mmmmm. GD: You're not interested in technique, like Gursky. AD: No, not at all. DG: Basically in normal people. But how normal are people? (both start laughing) AD: Well, the nicest people are a bit abnormal.

What Works in Girls' Education - Gene B Sperling 2015-09-29

Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

Smart Things - Mike Kuniavsky 2010-09-14

The world of smart shoes, appliances, and phones is already here, but the practice of user experience (UX) design for ubiquitous computing is still relatively new. Design companies like IDEO and frogdesign are regularly asked to design products that unify software interaction, device design and service design -- which are all the key components of ubiquitous computing UX -- and practicing designers need a way to tackle practical challenges of design. Theory is not enough for them -- luckily the industry is now mature enough to have tried and tested best practices and case studies from the field. Smart Things presents a problem-solving approach to addressing designers' needs and concentrates on process, rather than technological detail, to keep from being quickly outdated. It pays close attention to the capabilities and limitations of the medium in question and discusses the tradeoffs and challenges of design in a commercial environment. Divided into two sections, frameworks and techniques, the book discusses broad design methods and case studies that reflect key aspects of these approaches. The book then presents a set of techniques highly valuable to a practicing designer. It is intentionally not a comprehensive tutorial of user-centered design'as that is covered in many other books'but it is a handful of techniques useful when designing ubiquitous computing user experiences. In short, Smart Things gives its readers both the "why" of this kind of design and the "how," in well-defined chunks. Tackles design of products in the post-Web world where computers no longer have to be monolithic, expensive general-purpose devices Features broad

frameworks and processes, practical advice to help approach specifics, and techniques for the unique design challenges Presents case studies that describe, in detail, how others have solved problems, managed trade-offs, and met successes

Educational Research and Innovation Educating 21st Century Children Emotional Well-Being in the Digital Age - Oecd 2019-10-22

What is the nature of childhood today? On a number of measures, modern children's lives have clearly improved thanks to better public safety and support for their physical and mental health. New technologies help children to learn, socialise and unwind, and older, better-educated parents are increasingly playing an active role in their children's education. At the same time, we are more connected than ever before, and many children have access to tablets and smartphones before they learn to walk and talk. Twenty-first century children are more likely to be only children, increasingly pushed to do more by "helicopter parents" who hover over their children to protect them from potential harm. In addition to limitless online opportunities, the omnipresent nature of the digital world brings new risks, like cyber-bullying, that follow children from the schoolyard into their homes. This report examines modern childhood, looking specifically at the intersection between emotional well-being and new technologies. It explores how parenting and friendships have changed in the digital age. It examines children as digital citizens, and how best to take advantage of online opportunities while minimising the risks. The volume ends with a look at how to foster digital literacy and resilience, highlighting the role of partnerships, policy and protection.

How Stella Learned to Talk - Christina Hunger 2021-05-04

INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade.

Rejected Princesses - Jason Porath 2016-10-25

Blending the iconoclastic feminism of *The Notorious RBG* and the confident irreverence of *Go the F**ck to Sleep*, a brazen and empowering illustrated collection that celebrates inspirational badass women throughout history, based on the popular Tumblr blog. Well-behaved women seldom make history. Good thing these women are far from well behaved . . . Illustrated in a contemporary animation style, *Rejected Princesses* turns the ubiquitous "pretty pink princess" stereotype portrayed in movies, and on endless toys, books, and tutus on its head, paying homage instead to an awesome collection of strong, fierce, and yes, sometimes weird, women: warrior queens, soldiers, villains, spies, revolutionaries, and more who refused to behave and meekly accept their place. An entertaining mix of biography, imagery, and humor written in a fresh, young, and riotous voice, this thoroughly researched exploration salutes these awesome women drawn from both historical and fantastical realms, including real life, literature, mythology, and folklore. Each profile features an eye-catching image of both heroic and villainous women in command from across history and around the world, from a princess-cum-pirate in fifth century Denmark, to a rebel preacher in 1630s Boston, to a bloodthirsty Hungarian countess, and a former prostitute who commanded a fleet of more than 70,000 men on China's seas.

Transforming the Workforce for Children Birth Through Age 8 - National Research Council 2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Digital Feminist Activism - Kaitlynn Mendes 2019-01-10

From sites like Hollaback! and Everyday Sexism, which document instances of street harassment and misogyny, to social media-organized movements and communities like #MeToo and #BeenRapedNeverReported, feminists are using participatory digital media as activist tools to speak, network, and organize against sexism, misogyny, and rape culture. As the first book-length study to examine how girls, women, and some men negotiate rape culture through the use of digital platforms, including blogs, Twitter, Facebook, Tumblr, and mobile apps, the authors explore four primary questions: What experiences of harassment, misogyny, and rape culture are being responded to? How are participants using digital media technologies to document experiences of sexual violence, harassment, and sexism? Why are girls, women and some men choosing to mobilize digital media technologies in this way? And finally, what are the various experiences of using digital technologies to engage in activism? In order to capture these diverse experiences of doing digital feminist activism, the authors augment their analysis of this media (blog posts, tweets, and selfies) with in-depth interviews and close-observations of several online communities that operate globally. Ultimately, the book demonstrates the nuances within and between digital feminist activism and highlight that, although

it may be technologically easy for many groups to engage in digital feminist activism, there remain emotional, mental, or practical barriers which create different experiences, and legitimate some feminist voices, perspectives, and experiences over others.
