Behavioral Management Accounting - Ahmed Riahi-Belkaoui 2002

Producers and users of management accounting information are confronted with crucial behavioral phenomena--factors that can affect the communication of this information and its use. Riahi-Belkaoui shows how producers and users together can improve the efficiency of management accounting itself. He explains the judgment process in management accounting, identifies and explains the major behavioral phenomena, and then provides ways to use them for the firm's benefit.

The Role of Management

Accounting Systems in Strategic Sensemaking -

Marcus Heidmann 2008-03-13
Marcus Heidmann explores the role of management accounting systems (MAS) in strategic sensemaking. Based on cognitive theories, the author defines strategic sensemaking as a learning process with observation, interpretation, and communication as the relevant process steps on the individual level. He illustrates the impact of MAS on these cognitive processes by an exploratory multiple-case study design.

Value Creation in Management Accounting -

CJ McNair-Connolly
2013-05-31
Value creation is at the heart of

an economic enterprise, defining its capability to serve customers and generate profits and growth. This fact has led to an ever-increasing set of tools and techniques that start with customers, focusing on serving their preferences from the very inception of a product until its disposal. And this data is required to implement a value creation approach that has its roots in the Management Accounting System (MAS). The resulting model is called the Value-based Cost Management System (VCMS). If you or any manager want to take the lessons you learned in product development, process management, and marketing, this book will help you extend this knowledge to your MAS. This book makes this transformation both logical and easy to implement, with a focus on the new types of information that can be garnered when the MAS is modified to fit the value creation approach. The authors of the book will provide, upon request, a simplified automated data collection template that will ease the implementation

process.

Personal Transferable Skills in Accounting Education -

Kim Watty 2014-07-16

The development of generic skills (often referred to as 'soft

skills') in accounting education has been a focus of discussion and debate for several decades. During this time employers and professional bodies have urged accounting educators to consider and develop curricula which provide for the development and assessment of these skills. In addition, there has been criticism of the quality of accounting graduates and their ability to operate effectively in a global economy. Embedding generic skills in the accounting curriculum has been acknowledged as an appropriate means of addressing the need to provide 'knowledge professionals' to meet the needs of a global business environment. Personal Transferable Skills in Accounting Education illustrates how generic skills are being embedded and evaluated in the accounting curriculum by academics from a range of perspectives. Each chapter provides an account of how the challenge of incorporating generic skills in the accounting curriculum within particular educational

environments has been addressed. The challenges involved in generic skills development in higher education have not been limited to the accounting discipline. This book provides examples which potentially inform a wide range of discipline areas. Academics will benefit from reading the experiences of incorporating generic skills in the accounting curriculum from across the globe. This book was originally published as a themed issue of Accounting Education: an international journal.

Managerial Accounting -

Management Accounting - Peter Schuster (Accounting teacher) 2021

This textbook presents concepts and applications of Management Accounting, one of the main approaches used by management to support future organisational performance. It covers methods and instruments of management and cost accounting, cost management, and management control and is based on the German textbook "Interne Unternehmensrechnung" by Ralf Ewert and Alfred Wagenhofer (Springer). The authors describe the managerial uses of accounting information, both for decision-making and decision-influencing, and provide a broad perspective on the subject combining the academic foundations of the

field with recent cutting-edge research results. Moreover, traditions of German accounting theory and practice that are little known outside of the German-speaking countries are reflected in the book. With its unique approach based on information economics, the textbook offers a comprehensive and innovative presentation to a global audience

South African Accounting Education Stocktake - Jaco Fouchè 2020-04-07

This book is intended to take stock of the current state of accounting education with a specific emphasis on the South African situation. It provides a critical overview of the current published research and identified gaps. Through this, it aims to equip accounting academics with information and tools to motivate them to research the field of accounting education to improve teaching and learning. It also aids in the identification of suitable research topics in this regard and highlights potential pitfalls in researching

accounting education. The book, therefore, focuses on accounting educators as specialists in their respective disciplines. Different authors with a keen interest in a specific area relating to accounting education research wrote each chapter in this book. It forms a planned collective work, assembled by appropriately qualified and experienced scholars in the accounting education field which generates a new conceptual synthesis that advances scholarship of accounting education research, since no such synthesis currently exists for accounting education research in South Africa.

*Principles of Accounting
Volume 2 - Managerial
Accounting* - Mitchell Franklin
2019-02-14

A less-expensive grayscale paperback version is available. Search for ISBN 9781680922936. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course

that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization. *Teaching Ethics Across the Management Curriculum* - Kemi Ogunyemi 2014-12-17 The chief executive officer (CEO) of a corporation and his or her executive team are

responsible for the management of the business and its continued operating and financial success. The CEO and executive team are almost always highly compensated and the relative total compensation has mushroomed over time. Most of the compensation now is designed to be performance-based, but leading to charges that executives have incentives to manipulate corporate earnings and stock price in the short-term for their own self interests. The compensation at some companies became so egregious that compensation again became a major public policy issue subject to federal regulation. Executive Compensation focuses on the major topics related to executive compensation—present, past, and future. First, is understanding what executive compensation is, including composition and objectives of pay contracts. Second, how do specific compensation agreements affect corporate behavior and performance? Third, what are the major

components, including how and what are accounted for and disclosed? How is compensation, especially executive compensation, accounted for—that is, what are the calculations and journal entries required? Fourth, what does historical analysis tell us about the topic, especially how contractual decisions have been made and what has worked. Finally, what is in store for the future—both expected compensation agreements and what the compensation incentives suggest for future corporate decisions on operations and accounting manipulation.
