*Entrepreneurship and Small Business* - Michael Schaper 2007-04-09

The second edition of this popular text has been thoroughly updated to reflect contemporary developments in small business and entrepreneurship and its applications to Australasian organisations.

Entrepreneurship and small business management are two very close and often overlapping disciplines. If entrepreneurship specifically refers to the dynamic process of creating a new business venture, small business management generally addresses various issues in organising and operating a small business. In practice however, a large part of the textbooks contents from both disciplines tend to cover similar issues such as small business start-up (starting from scratch, buying an existing business or operating a franchise), developing a business plan, selecting a legal form of organisation, marketing research and organising and financing the new venture. Features New! Four end-of-book cases profiling Australasian entrepreneurs. Each case represents a different region covering Australia, New Zealand, Malaysia and Singapore. The companies profiled are within industries of interest to students including branded fitness programs, automatic video production and specialist healthcare. Each case is accompanied by comprehensive teaching notes. New! Accompanying local video cases and activities for instructors. The videos are closely tied to each end-of-book case, providing visual support to assist students' understanding. Comprehensive text website including Instructor's Resource Guide and Power Point slides The geographic markets for the book are both Australasia (Australia and New Zealand) and South East Asia (Indonesia, Hong Kong, Malaysia and Singapore). As an increasing amount of goods, capital and people move between these two regions, this text will provide the reader with a better regional understanding of this environment. The 'What would you do?' feature presents a scenario in which an entrepreneur/small business manager needs to respond to a problem or situation. The 'Entrepreneur profile' in every chapter profiles Australian, New Zealand and Asia-Pacific entrepreneurs and small business leaders. The end-of-chapter case study profiles an entrepreneurial approach and/or small business management issue in the Pacific Rim.

*Winning Opportunities* - Raphael H. Cohen 2012-04

This book finally gives innovators an alternative to the painful writing of business plans. Not only an alternative but also a more effective, faster and easier way to convince investors and decision-makers: the

Opportunity Case is a more user-friendly way of analyzing and presenting a project, which has been quickly adopted by many multinational corporations, public sector organizations as well as start-ups. It also addresses a central problem in existing businesses: many people have good ideas but very few of these innovations are actually implemented. The content of this book proposes the first practical process that has been demonstrated to boost innovation by up to 56%. "Winning Opportunities" presents the IpOp Model that outlines in a very concrete and down-to-earth way, the core process of innovation that successful entrepreneurs and intrapreneurs use, even unconsciously. The model acts as a simple hands-on guide for innovators who want to increase their chances of success. This structured and user-friendly roadmap helps innovators turn an idea into a tangible opportunity, outline measurable deliverables, learn how to address all the key issues critical to the success of their project, and identify early in the process whether an opportunity is worth pursuing. To illustrate its concepts, a large number of real-life examples are included as inspiration to the reader. Nespresso's strategy is used throughout the book to demonstrate each key step of the IpOp Model. It is the first time in print one can read about the strategy that shaped the fascinating success story of Nespresso, a \$3 billion business with double-digit annual growth. Both Nespresso and the IpOp Model were developed in Switzerland, which was recently ranked No. 1 in innovation worldwide. Besides helping start-up initiators, the IpOp Model, as best practice for innovation, improves and complements the existing selection of innovation processes used by large organizations (staged gate, six sigma, etc.). Since learning is easier when emotions are included in the process, each chapter is preceded by a joke illustrating its serious content. The author, Prof. Raphael H Cohen took advantage of his 30+ years' experience as serial entrepreneur, active CEO and business angel to write this book to encapsulate some of the key messages he has been teaching in top business schools and corporate environments since 2001. He is a keynote speaker and an expert in both professional agility and "weapons of mass innovation." Besides his responsibility as academic director of MBA

programs, he provides executive education, mentoring, consulting and management services for senior executives, bankers, directors and entrepreneurs. He serves on the board of directors of several companies, including a Swiss bank, and is a regular contributor to several business publications. He obtained his Ph.D. in Economics in 1982
