[Children's Bugs Book a to Z](#) - Little Books 2018-03-25

ABOUT THE 'BUGS' & 'INSECTS' : The term 'bugs' is often used to refer to insects and creepy-crawlies of every shape and size, including ants, bees, butterflies, scorpions and spiders. However, to be a true insect, once fully grown, must have 6 legs and 3 body parts: the head, the thorax, and the abdomen. Most insects have wings, but not all insects can fly. Scientists think there are at least 5 million different types, or species, of insect. There are a lot of small, creepy-crawly creatures that look like insects, but aren't. Centipedes, millipedes, scorpions and spiders aren't insects - they have too many legs. Snails and earthworms aren't insects either - they have no legs. Although bugs are small, they can be found all across the world. **ABOUT THIS BOOK** : * Heaps of interesting fun facts, witty text and charming pictures to keep your kids learned for weeks. * This enchanting book introduces young readers to the world of bugs, and provides an informative look at some of children's favorite backyard bugs. * This is a best gift for children. * 61 Bugs A to Z * 50 Did you know's * Over 90 Beautiful pictures * Age: 4 ~ 99 * Library-quality * Full-color printing process * Cover: Full-color laminated covers, Glossy finish * Interior: 60# White paper * 50 Pages (25 Sheets) * 8.5 x 11 inches (21.59 x 27.94 cm)

Burt the Beetle Doesn't Bite! - Ashley Spires 2021-06-01

A hilarious story about one bug's quest for greatness (with some cool insect facts mixed in!). Meet Burt, a ten-lined june beetle. He's sure he has a superpower like other insects. No, he can't carry 50 times his weight, like ants, or spray paralyzing venom, like some termites. What june beetles seem to do best is chase porch lights and lie on their backs flailing their legs in the air ... hmm. Maybe Burt doesn't have any special skills after all ... But when some other bugs get into perilous trouble that even their superpowers can't get them out of, Burt realizes there is one helpful thing only he can do ... Why shouldn't every bug have its day (even the wannabe superhero kind)? Kids will be rooting for this one!

Bugs in My Hair! - David Shannon 2016-09-27

Is something bugging you? Bestselling award-winner David Shannon

shows the funny side of waging war against--oh no!--head lice. This book is guaranteed to make you laugh--and itch! From the opening picture of a happy, oversized louse appearing with his suitcases, you know these bugs are determined to stay, and Mom is about to go nuts! Nobody talks about them, but they are everywhere. (Some estimate 20 million children a year host them.) Oh the shame and humiliation of having bugs in your hair! But if you go to school, or have play dates, chances are good you might meet them someday. Maybe you already have! Lucky for you, the unwelcome bugs in this story are so funny you will be laughing aloud--even when Mom attacks them with battle-tested anti-lice weapons. Shannon peppers his hilarious scenes with fun, "nitpicking" facts about these "lousy" critters and pokes fun at common denial: "It's probably ash from that volcano in Pogo Pogo." Soon the party's over--Bye bye, Little Nasties! Once again Shannon has created a fresh, highly entertaining read-aloud classic that begs to be read again and again.

Wicked Bugs - Amy Stewart 2011-05-03

In this darkly comical look at the sinister side of our relationship with the natural world, Stewart has tracked down over one hundred of our worst entomological foes—creatures that infest, infect, and generally wreak havoc on human affairs. From the world's most painful hornet, to the flies that transmit deadly diseases, to millipedes that stop traffic, to the "bookworms" that devour libraries, to the Japanese beetles munching on your roses, *Wicked Bugs* delves into the extraordinary powers of six- and eight-legged creatures. With wit, style, and exacting research, Stewart has uncovered the most terrifying and titillating stories of bugs gone wild. It's an A to Z of insect enemies, interspersed with sections that explore bugs with kinky sex lives ("She's Just Not That Into You"), creatures lurking in the cupboard ("Fear No Weevil"), insects eating your tomatoes ("Gardener's Dirty Dozen"), and phobias that feed our (sometimes) irrational responses to bugs ("Have No Fear"). Intricate and strangely beautiful etchings and drawings by Briony Morrow-Cribbs capture diabolical bugs of all shapes and sizes in this mixture of history, science, murder, and intrigue that begins—but doesn't end—in your own backyard.
