Futurism and the Technological Imagination - 2016-08-09

This volume, *Futurism and the Technological Imagination*, results from a conference of the International Society for the Study of European Ideas in Helsinki. It contains a number of re-written conference contributions as well as several specially commissioned essays that address various aspects of the Futurists' relationship to technology both on an ideological level and with regard to their artistic languages.

In the early twentieth century, many art movements vied with each other to overhaul the aesthetic and ideological foundations of arts and literature and to make them suitable vehicles of expression in the new Era of the Machine. Some of the most remarkable examples came from the Futurist movement, founded in 1909 by Filippo Tommaso Marinetti. By addressing the full spectrum of Futurist attitudes to science and the machine world, this collection of 14 essays offers a multifaceted account of the complex and often contradictory features of the Futurist technological imagination. The volume will appeal to anybody interested in the history of modern culture, art and literature.

Stand-Alone and Hybrid Wind Energy Systems - J K Kaldellis 2010-07-27

Wind power is fast becoming one of the leading renewable energy sources worldwide, not only from large scale wind farms but also from the increasing penetration of stand-alone and hybrid wind energy systems. These systems are

primarily of benefit in small-scale applications, especially where there is no connection to a central electricity network, and where there are limited conventional fuel resources but available renewable energy resources. By applying appropriate planning, systems selection and sizing, including the integration of energy storage devices to mitigate variable energy generation patterns, these systems can supply secure reliable and economic power to remote locations and distributed micro-grids. Stand-alone and hybrid wind energy systems is a synthesis of the most recent knowledge and experience on wind-based hybrid renewable energy systems, comprehensively covering the scientific, technical and socio-economic issues involved in the application of these systems. Part one presents an overview of the fundamental science and engineering of stand-alone and hybrid wind energy systems and energy storage technology, including design and performance optimisation methods and feasibility assessment

for these systems. Part two initially reviews the design, development, operation and optimisation of stand-alone and hybrid wind energy systems – including wind-diesel, wind-photovoltaic (PV), wind-hydrogen, and wind-hydropower energy systems – before moving on to examine applicable energy storage technology, including electro-chemical, flywheel (kinetic) and compressed air energy storage technologies. Finally, Part three assesses the integration of stand-alone and hybrid wind energy systems and energy technology into remote micro-grids and buildings, and their application for desalination systems. With its distinguished editor and international team of contributors, Stand-alone and hybrid wind energy systems is a standard reference for all renewable energy professionals, consultants, researchers and academics from post-graduate level up. Provides an overview of the fundamental science and engineering of stand-alone hybrid and wind energy systems, including design and performance optimisation

methods Reviews the development and operation of stand-alone and hybrid wind energy systems
Assesses the integration of stand-alone and hybrid wind energy systems and energy storage technology into remote micro-grids and buildings, and their application for desalination systems

The Italian Literature of the Axis War - Guido Bartolini 2021-05-13

This book investigates the representation of the Axis War – the wars of aggression that Fascist Italy fought in North Africa, Greece, the Soviet Union, and the Balkans, from 1940 to 1943 – in three decades of Italian literature. Building on an innovative and interdisciplinary methodology, which combines memory studies, historiography, thematic criticism, and narratology, this book explores the main topoi, themes, and masterplots of an extensive corpus of novels and

memoirs to assess the contribution of literature to the reshaping of Italian memory and identity after the end of Fascism. By exploring the influence that public memory exercises on literary depictions and, in return, the contribution of literary texts to the formation and dissemination of a discourse about the past, the book examines to what extent Italian literature helped readers form an ethical awareness of the crimes committed by members of their national community during World War II.

The Island - Victoria Hislop 2008-02-10

'A moving and absorbing holiday read that pulls at the heartstrings' Evening Standard The acclaimed million-copy number one bestseller and winner of Richard & Judy's Summer Read 2006. Victoria Hislop tells a dramatic tale of four generations, illicit love, violence and leprosy, from the thirties, through the war, to the present day. On the brink of a life-changing decision, Alexis Fielding longs to find out about her mother's past. But Sofia has never spoken of it. All she admits to is growing up in a small Cretan village before moving to London. When Alexis decides to visit Crete, however, Sofia gives her daughter a letter to take to an old friend, and promises that through her she will learn more. Arriving in Plaka, Alexis is astonished to see that it lies a stone's throw from the tiny, deserted island of Spinalonga - Greece's former leper

colony. Then she finds Fotini, and at last hears the story that Sofia has buried all her life: the tale of her great-grandmother Eleni and her daughters and a family rent by tragedy, war and passion. She discovers how intimately she is connected with the island, and how secrecy holds them all in its powerful grip... Praise for *The Island*. . . 'A vivid, moving and absorbing tale' Observer 'Victoria Hislop . . . brings dignity and tenderness to her novel about lives blighted by leprosy' Telegraph 'Wonderful descriptions, strong characters and an intimate portrait of island existence' *Woman & Home* 'War, tragedy and passion unfurl against a Mediterranean backdrop in this engrossing debut novel' *You* magazine 'Hislop's deep research, imagination and patent love of Crete creates a convincing portrait of times on the island' *Evening Standard* 'A page-turning tale that reminds us that love and life continue in even the most extraordinary of circumstances' *Sunday Express* 'A beautiful tale of enduring love and unthinking prejudice'

Greek Immigration and Settlement in Venice, 1498-1600 - Ersie Cornilia Burke

2016-05-31

People have always immigrated in search of better working and living conditions, to escape persecution, reconnect with family, or simply for the experience. This volume traces the history of Venice's Greek population during the formative years between 1498 and 1600 when thousands left their homelands for Venice. It describes how Greeks established new communal and social networks, and follows their transition from outsiders to insiders (though not quite Venetians) through an approach that offers a comparative perspective between the 'native' and the immigrant. It places Greeks within the context of multi-cultural, multi-ethnic, and multi-lingual Venice. Personal stories are interwoven throughout for a more intimate account of how people lived, worked, prayed, and formed new social networks. These accounts have been drawn from a variety of sources collected from

the Venetian state archives, the archives of the Venetian church, and documentation held by the Hellenic Institute of Venice. Notarial documents, petitions, government and church records, registries of marriages and deaths, and census data form part of the collected material discussed here. Above all, this study aims to reconstruct the lives of the largest ethnic and Christian minority in early modern Venice, and to trace the journey of all immigrants, from foreigner to local.
