**The Word Pretty** - Elisa Gabbert 2018  
Literary Nonfiction. Women's Studies. Memoir. Cultural Criticism. In THE WORD PRETTY Elisa Gabbert brings together humor and observational intelligence to create a roving and curious series of lyrical essays on writing, reading, and living. Combining elements of criticism, meditation, and

personal essay, this book reveals a poet's attention turned to subjects from translation to aphorism, from unreliable memory to beauty and the male gaze.

*The Fowl Twins* - Eoin Colfer  
2019-11-05

One week after their eleventh birthday, the Fowl twins-- scientist Myles, and Beckett, the force of nature--are left in the care of house security

(NANNI) for a single night. In that time they befriend a troll who has clawed his way through the earth's crust to the surface. Unfortunately for the troll, he is being chased by a nefarious nobleman and an interrogating nun, who both need the magical creature for their own gain, as well as a fairy-in-training who has been assigned to protect him. The boys and their new troll best friend escape and go on the run. Along the way they get shot at, kidnapped, buried, arrested, threatened, killed (temporarily), and discover that the strongest bond in the world is not the one forged by covalent electrons in adjacent atoms, but the one that exists between a pair of twins.

Lit Up - David Denby  
2016-02-02

An inspiring firsthand investigation into the crucial challenge of turning teenagers into lifelong readers. It's hardly a secret that millions of American kids, caught up in social media, television, movies, and games, don't read seriously--that is, they

associate serious reading with duty or work, not with pleasure. This indifference has become a grievous loss to our standing as a great nation--and a personal loss, too, for millions of teenagers who may turn into adults with limited understanding of themselves and others. Can this be changed? Can teenagers be turned on to literature? What kind of teachers can do it, and what books? To find out, Denby sat in on a tenth-grade English class in a New York public school for an entire academic year, and made frequent visits to an inner-city public school in New Haven and to a respected public school in Westchester county. He read all the stories, poems, plays, and novels that the kids were reading, and here combines a chronicle of what he observed with fresh and inspiring encounters with the books themselves, including *The Scarlet Letter*, *Brave New World*, 1984, *The Alchemist*, *Slaughterhouse Five*, *The Kite Runner*, *Long Way Gone* and many more. Denby's book is a dramatic

narrative that traces awkward and baffled beginnings but also exciting breakthroughs and the emergence of pleasure in reading. In a sea of bad news about education and the fate of the book, David Denby reaffirms the power of great teachers and the importance and inspiration of great literature.

**The Arctic Code** - Matthew J. Kirby 2015-04-28

Perfect for fans of the Percy Jackson and Seven Wonders series, *The Arctic Code* is the first book in an epic, fast-paced middle grade adventure trilogy by acclaimed author Matthew J. Kirby. It is the near future, and the earth has entered a new ice age. Eleanor Perry lives in Tucson, one of the most popular destinations for refugees of the Freeze. She is the daughter of a climatologist who is trying to find new ways to preserve human life on the planet. Dr. Perry believes that a series of oil deposits she has found in the Arctic may hold the key to our survival. That's when she disappears—but not before sending Eleanor a series

of cryptic messages that point to a significant and mysterious discovery. Now it's up to Eleanor to go find her. This search will launch Eleanor on a breathless race to unlock the mysteries of what has happened to our planet, solving the riddle of the cold that could be humanity's end—and uncovering a threat to the earth that may not be of this world.

*Stranded* - Bracken MacLeod 2016-10-04

In the spirit of John Carpenter's *The Thing* and Jacob's Ladder comes *Stranded* -- a terrifying, icebound thriller where nothing is quite what it seems by Bracken MacLeod. Badly battered by an apocalyptic storm, the crew of the Arctic Promise find themselves in increasingly dire circumstances as they sail blindly into unfamiliar waters and an ominously thickening fog. Without functioning navigation or communication equipment, they are lost and completely alone. One by one, the men fall prey to a mysterious illness. Deckhand

Noah Cabot is the only person unaffected by the strange force plaguing the ship and her crew, which does little to ease their growing distrust of him. Dismissing Noah's warnings of worsening conditions, the captain of the ship presses on until the sea freezes into ice and they can go no farther. When the men are ordered overboard in an attempt to break the ship free by hand, the fog clears, revealing a faint shape in the distance that may or may not be their destination. Noah leads the last of the able-bodied crew on a journey across the ice and into an uncertain future where they must fight for their lives against the elements, the ghosts of the past and, ultimately, themselves. **Four Thousand Weeks** -

Oliver Burkeman 2021-08-10  
AN INSTANT NEW YORK  
TIMES BESTSELLER

"Provocative and appealing . . . well worth your extremely limited time." —Barbara Spindel, The Wall Street Journal  
The average human lifespan is absurdly, insultingly brief. Assuming you live to be eighty, you have just over four thousand weeks. Nobody needs telling there isn't enough time. We're obsessed with our lengthening to-do lists, our overfilled inboxes, work-life balance, and the ceaseless battle against distraction; and we're deluged with advice on becoming more productive and efficient, and "life hacks" to optimize our days. But such techniques often end up making things worse. The sense of anxious hurry grows more intense, and still the most

meaningful parts of life seem to lie just beyond the horizon. Still, we rarely make the connection between our daily struggles with time and the ultimate time management problem: the challenge of how best to use our four thousand weeks. Drawing on the insights of both ancient and contemporary philosophers, psychologists, and spiritual teachers, Oliver Burkeman delivers an entertaining, humorous, practical, and ultimately profound guide to time and time management. Rejecting the futile modern fixation on “getting everything done,” *Four Thousand Weeks* introduces readers to tools for constructing a meaningful life by embracing finitude, showing how many of the unhelpful ways we’ve come to think about time aren’t inescapable, unchanging truths, but choices we’ve made as individuals and as a society—and that we could do things differently.

understanding of the navigational and physiological feats that enable birds to cross immense oceans, fly above the highest mountains, or remain in unbroken flight for months at a stretch has exploded. What we've learned of these key migrations—how billions of birds circumnavigate the globe, flying tens of thousands of miles between hemispheres on an annual basis—is nothing short of extraordinary. Bird migration entails almost unfathomable endurance, like a sparrow-sized sandpiper that will fly nonstop from Canada to Venezuela—the equivalent of running 126 consecutive marathons without food, water, or rest—avoiding dehydration by "drinking" moisture from its own muscles and organs, while orienting itself using the earth's magnetic field through a form of quantum entanglement that made Einstein queasy. Crossing the Pacific Ocean in nine days of nonstop flight, as some birds do, leaves little time for sleep, but migrants can put half their brains to sleep for a few

seconds at a time, alternating sides—and their reaction time actually improves. These and other revelations convey both the wonder of bird migration and its global sweep, from the mudflats of the Yellow Sea in China to the remote mountains of northeastern India to the dusty hills of southern Cyprus. This breathtaking work of nature writing from Pulitzer Prize finalist Scott Weidensaul also introduces readers to those scientists, researchers, and bird lovers trying to preserve global migratory patterns in the face of climate change and other environmental challenges. Drawing on his own extensive fieldwork, in *A World on the Wing* Weidensaul unveils with dazzling prose the miracle of nature taking place over our heads.

### **Nineteen Eighty-Four** -

George Orwell 2021-01-09

"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named

*Important Artifacts and Personal Property from the Collection of Lenore Doolan and Harold Morris, Including Books, Street Fashion, and Jewelry* - Leanne Shapton  
2009-02-03

A love story told in the form of an auction catalog. Auction catalogs can tell you a lot about a person -- their passions and vanities, peccadilloes and aesthetics; their flush years and lean. Think of the collections of Jacqueline

Kennedy Onassis, Truman Capote, the Duke and Duchess of Windsor. In Leanne Shapton's marvelously inventive and invented auction catalog, the 325 lots up for auction are what remain from the relationship between Lenore Doolan and Harold Morris (who aren't real people, but might as well be). Through photographs of the couple's personal effects -- the usual auction items (jewelry, fine art, and rare furniture) and the seemingly worthless (pajamas, Post-it notes, worn paperbacks) -- the story of a failed love affair vividly (and cleverly) emerges. From first meeting to final separation, the progress and rituals of intimacy are revealed through the couple's accumulated relics and memorabilia. And a love story, in all its tenderness and struggle, emerges from the evidence that has been left behind, laid out for us to appraise and appreciate. In an earlier work, *Was She Pretty?*, Shapton, a talented artist and illustrator, subtly explored the seemingly simple yet

of the relationship between capitalism, communism, and Arctic ecology since the dawn of the industrial age. Whales and walrus, caribou and fox, gold and oil: through the stories of these animals and resources, Bathsheba Demuth reveals how people have turned ecological wealth in a remote region into economic growth and state power for more than 150 years. The first-ever comprehensive history of Beringia, the Arctic land and waters stretching from Russia to Canada, *Floating Coast* breaks away from familiar narratives to provide a fresh and fascinating perspective on an overlooked landscape. The unforgiving territory along the Bering Strait had long been home to humans—the Inupiat and Yupik in Alaska, and the Yupik and Chukchi in Russia—before Americans and Europeans arrived with revolutionary ideas for progress. Rapidly, these frigid lands and waters became the site of an ongoing experiment: How, under conditions of extreme scarcity, would the

great modern ideologies of capitalism and communism control and manage the resources they craved? Drawing on her own experience living with and interviewing indigenous people in the region, as well as from archival sources, Demuth shows how the social, the political, and the environmental clashed in this liminal space. Through the lens of the natural world, she views human life and economics as fundamentally about cycles of energy, bringing a fresh and visionary spin to the writing of human history. *Floating Coast* is a profoundly resonant tale of the dynamic changes and unforeseen consequences that immense human needs and ambitions have brought, and will continue to bring, to a finite planet.
