Henry V's Navy - Ian Friel 2015-10-05

Without Henry V's Navy, the Battle of Agincourt would never have happened. Henry's fleet played a major - if often unrecognised - part in enabling the king to come within reach of final victory in the Hundred Years War against France. Henry's navy was multinational, and comprised his own royal fleet, English merchantmen and many foreign vessels from the Netherlands, the Baltic and Venice. It was one of the most successful fleets deployed by England before the time of Elizabeth I. The royal fleet was transformed in Henry's short reign from a few dilapidated craft into a powerful weapon of war, with over thirty fighting vessels, up-to-date technology and four of the biggest ships in Europe. With new insights derived from extensive research into documentary, pictorial and archaeological sources, *Henry V's Navy* is about the men, ships and operations of Henry's sea war. Ian Friel explores everything from shipboard food to how crews and their ships sailed and fought, and takes an in-depth look at the royal ships. He also tells the dramatic and bloody story of the naval conflict, which at times came close to humiliating defeat for the English.

Sailing with Noah - Jeffrey P. Bonner 2013-06-03

Written by the president of the nation's number-one zoo, *Sailing with Noah* is an intensely personal, behind-the-scenes look at modern zoos. Jeffrey P. Bonner, who was trained as an anthropologist and came to the zoo world quite by accident, shares some of the most compelling stories ever told about contemporary zoos. The

stories jump between zoos in different cities and between countries on different continents. Some are fun and funny. Others are sad, even tragic. Pete Hoskins, the director of the Philadelphia Zoo, is in bed, sound asleep, when his phone rings. . . . "There's been a fire in the World of Primates," he is told. "You've got to get over here." Whatever he has been dreaming, it is nothing like the nightmare he will find now that he is awake. . . . "They're all gone. They're all gone." All of the animals in the building—the gorillas, the lemurs, the orangutans, and the gibbons—all twenty-three of them are dead. Written in a lively, accessible style, *Sailing with Noah* explores the role of zoos in today's society and their future as institutions of education, conservation, and research. Along the way, Bonner relates a variety of true stories about animals and those who care for them (or abuse them), offering his perspective on heavily publicized incidents and describing less-well-known events with compassion and humor in turn. By bringing the stories of the animals' lives before us, Bonner gives them a voice. He strongly believes that zoos must act for living things, and he argues that conservation is a shared responsibility of all mankind. This book helps us to understand why biodiversity is important and what it means to be a steward of life on earth. From the day-to-day aspects of caring for some of the world's most exotic creatures to the role of zoos as field conservation organizations, saving wild things in wild places, this book takes the reader on an

incredible journey—a journey that begins within the zoo and continues around the globe. Everyone—from zoo visitors to animal lovers to professional conservationists, the young and old alike—will be fascinated by this extraordinary book.

Ships Monthly - 2005

[Encyclopedia of Contemporary British Culture](#) - Peter Childs 2013-05-13

Boasting more than 970 alphabetically-arranged entries, the Encyclopedia of Contemporary British Culture surveys British cultural practices and icons in the latter half of the twentieth century. It examines high and popular culture and encompasses both institutional and alternative aspects of British culture. It provides insight into the whole spectrum of British contemporary life. Topics covered include: architecture, pubs, film, internet and current takes on the monarchy. Cross-referencing and a thematic contents list enable readers to identify related articles. The entries range from short biographical synopses to longer overview essays on key issues. This Encyclopedia is essential reading for anyone interested in British culture. It also provides a cultural context for students of English, Modern History and Comparative European Studies.

Chasing Shadows - Sue Parker 2015-01-08

It is often said life is at its cruelest when a parent outlives his or her child. As unnatural as that may seem, many parents find themselves in that position. Whether caused by disease, illness, accident, crime, or suicide, parents can find themselves making funeral arrangements rather than planning a child's birthday party, graduation, or wedding. Author Sue Parker knows firsthand what that is like. In *Chasing Shadows: A Mother's Attempt to Process Her Grief*, Parker shares her experiences after the death of her youngest child. For much of 2012, Rowan said he wouldn't live to see 2013. After all, the Mayan calendar ended on December 22, 2012, so he reckoned everyone was going to die. Rather than dwell on the negativity, he grabbed every opportunity with enormous enthusiasm, including a quad bike ride that cost him his life on Boxing Day. Bereft, heartbroken, in a state of total shock, and struggling to survive, Parker felt she had two choices. She could follow him over a

cliff or try to make some sense of the tragic turn her family's lives had taken. Everyone's experiences are different, but in *Chasing Shadows: A Mother's Attempt to Process Her Grief*, those going through similar circumstances may find help in knowing what to do next...how to go forward. You'll discover the path forward is not always easy, and there will likely be times when you find yourself wondering, Why bother? Through her experience, Parker shows you can go on, and you should.

The Fo'C'Sle Door - Les Cribb 2013-05-01

Whitt ducked under the lintel and stepped down onto a brick floor. The door was a good six inches lower than the doors threshold but he had known it would be so and that realization stopped him dead in his tracks, just as the sense of dj-vu struck. He had ducked under the lintel, and his step down had been fluid, almost practiced. He recalled a warning: Watch your step. The floor is a goodly step down inside. Or did he imagine that? The story of the Focsle Door begins in present day Canada with a very unusual crime scene but quickly takes you to the 1700s and the little fishing village of Ryeport on the coast of England. Here the tale unfolds around Roddy McDowd, who has been unwillingly relegated to what he sees as a God forsaken place, as a punishment for his transgressions and a mysterious, striking figure from Haiti Paul Latour, whose fate becomes entwined with that of the villagers as he tries to save his child from a violent sea captain. This compelling tale transports the reader over hundreds of years, and interesting vibrant characters, who through adventures with smuggling, murder and the supernatural, play a part in one mans attempt to fix a deal made with the devil. The outcome will keep you guessing right until the end.

Published 1892-9, this four-volume collection contains Spanish documents relating to England during the reign of Elizabeth I. The papers were translated and edited by Martin Andrew Sharp Hume (1843-1910), a respected historian of Spain. Volume 2 (1894) covers the period 1568-79.

Walking on Water - Kos Evans 2013-01-17

Kos Evans has blazed a trail through the

photographic world with her unique style and daredevil antics. Famous for her amazing, innovative angles, she stands out because of the often dangerous lengths she goes to to get the best shot. Some of her most well-known images were taken from the top of masts, or hanging over the sides of boats, or in the water, capturing speeding boats from only inches away. This photographic showcase features her most amazing and beautiful pictures. With descriptive captions detailing the background of each shot (how she came to be taking it, the difficulties she encountered), this collection tells the story of Kos's incredible skill and and intrepid acrobatics. *Walking on Water* is a gorgeous celebration of outstanding marine photography, packed with spectacular images that take you close to the action. For her entire career Kos has captured dramatic, eye-catching shots that made her the envy of her peers; this book provides a unique insight into the work and skills of a remarkable indomitable female photographer who has made her distinctive mark in what is very much a tough man's world. The book also includes a Foreword by Duran Duran singer and keen sailor Simon Le Bon.

A New Balance of Payments for the United States, 1790-1919 - Lawrence H. Officer
2021-03-24

This book develops new balance of payments statistics for the United States from 1790 to 1919, before official statistics were kept. Part I of this book justifies construction of a new balance of payments table, and Chapter 1 surveys existing tables from that standpoint. Chapter 2 shows how this book overcomes the limitations of Office of Business Economics and its North-Simon-Goldsmith foundation. Specific features are highlighted, including measurement decisions, improvement of OBE series, development of new series, and derived implications for the structure of the US economy and for the importance of individual sectors that loom large at various times: slave trade, shipping, manufacturing, and travel. The book then generates new time series of the movement of people, the movement of goods, the movement of funds, and the provision of services. Part VI puts the new balance of payments table to use in several ways: aggregates and balances within the table, structure of the US economy, and

specific sectors of the economy (slave trade, shipping, manufacturing, travel). Finally, Part VII provides concluding comments.

America's Privateer: Lynx and the War of 1812 - J. Dennis Robinson 2011

Time at Emar - Daniel E. Fleming 2000

The recent large-scale watershed projects in northern Syria, where the ancient city of Emar was located, have brought this area to light, thanks to salvage operation excavations before the area was submerged. Excavations at Meskeneh-Qadimeh on the great bend of the Euphrates River revealed this large town, which had been built in the late 14th century and then destroyed violently at the beginning of the 12th, at the end of the Bronze Age. In the town of Emar, ritual tablets were discovered in a temple that are demonstrated to have been recorded by the supervisor of the local cult, who was called the "diviner." This religious leader also operated a significant writing center, which focused on both administering local ritual and fostering competence in Mesopotamian lore. An archaic local calendar can be distinguished from other calendars in use at Emar, both foreign and local. A second, overlapping calendar emanated from the palace and represented a rising political force in some tension with rooted local institutions. The archaic local calendar can be partially reconstructed from one ritual text that outlines the rites performed during a period of six months. The main public rite of Emar's religious calendar was the zukru festival. This event was celebrated in a simplified annual ritual and in a more elaborate version of the ritual for seven days during every seventh year, probably serving as a pledge of loyalty to the chief god, Dagan. The Emar ritual calendar was native, in spite of various levels of outside influence, and thus offers important evidence for ancient Syrian culture. These texts are thus important for ancient Near Eastern cultic and ritual studies. Fleming's comprehensive study lays the basic groundwork for all future study of the ritual and makes a major contribution to the study of ancient Syria.

Army Camels - Doris Fisher 2013-08-29

The U.S. Army's oddest recruits: Camels! In this strange but true historical tale, 34 camels were imported to Texas to work as pack animals for the army in 1856. Many people had never seen such strange animals; they didn't believe that these smelly beasts could possibly be useful. Despite many Texans' initial doubts, the camels thrived in the state's desert and transported important military messages and supplies.

Medieval Merchant Venturers - E.M Carus-Wilson 2013-11-05

First published in 1967, this superb collection of essays on trade in the Middle Ages has been a major contribution to modern medieval studies. Professor Carus-Wilson examines: * fifteenth-century Bristol * trade with Iceland * the Merchant Adventurers of London * the thirteenth-century cloth industry (with its highly developed capitalist system) * the export of English woollen cloth * the wine trade. Each paper is firmly rooted in original research and contemporary sources such as customs returns and company minutes, and, in addition, her expose of the dubious accuracy of Aulnage accounts is widely recognised as a classic.

Ships of the Line - Doug Drexler 2014-12-02

In celebration of one of science fiction's most beloved franchises, an updated edition of the acclaimed Ships of the Line hardcover collection. They dared to risk it all in a skiff of reeds or leather, on a ship of wood or steel, knowing the only thing between them and certain death was their ship. To explore, to seek out what lay beyond the close and comfortable, every explorer had to embrace danger. And as they did so, what arose was a mystical bond, a passion for the ships that carried them. From the very first time humans dared to warp the fabric of space, escaping from the ashes of the third World War, they also created ships. These vessels have become the icons of mankind's desire to rise above the everyday, to seek out and make the unknown known. And these ships that travel the stellar seas have stirred the same passions as the ones that floated in the oceans. While every captain has wished that their starship could be outfitted in the same manner as the sailing ship H.M.S. Beagle—without weapons—that proved untenable. From the start, Starfleet realized that each vessel, due to the limited range of the early warp engines, must be able to stand alone against any attack. Thus arose the idea, taken from the days of wooden sailing ships, that every Starfleet vessel must stand as a ship of the line. Through the actions of their captains and crews, countless starships have taken on that role. Here we remember some of those ships and their heroic crews. In celebration of one of science fiction's most beloved franchises, this updated edition of the acclaimed Ships of the Line hardcover collection now includes dozens of additional images brought together for the first time in book format—spectacular renderings featured in the highly successful Star Trek: Ships of the Line calendar series. With text by Star Trek's own Michael Okuda, the story of each of these valiant starships now comes to life. ™, ®, & © 2014 CBS Studios, Inc. STAR TREK and related marks

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures - Helaine Selin 2013-11-11

The Encyclopaedia fills a gap in both the history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it, and those on the history of science almost always start with the Greeks, with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to

legitimize the study of other cultures' science. Our aim is not to claim the superiority of other cultures, but to engage in a mutual exchange of ideas. The Western academic divisions of science, technology, and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected. This work contributes to redressing the balance in the number of reference works devoted to the study of Western science, and encourages awareness of cultural diversity. The Encyclopaedia is the first compilation of this sort, and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today. There is nothing that crosses disciplinary and geographic boundaries, dealing with both scientific and philosophical issues, to the extent that this work does. xi

European Port Cities and Urban

Regeneration - Enrico Tommarchi 2022-07-29

Culture- and event-led regeneration have been catalysts for the transformation of redundant urban port areas and for the reframing of the image of many port cities, which notably feature among mega-event bidding and host cities. However, there is little understanding of the impacts of these processes on port-city relationships, as well as of how port city cultures shape mega events and the related regeneration strategies. The book examines the underexplored mutual links between, on the one hand, urban and socio-economic regeneration driven by cultural and sporting mega events and, on the other hand, the spatial, political and symbolic ties between cities and their ports. By adopting a cross-national, comparative perspective, with in-depth case studies (Hull, Rotterdam, Genoa and Valencia) and examples from other port cities across the world where mega events were held, the book engages with issues such as the tension between port and cultural uses, reactions and opposition to mega events in port cities, clashing urban imaginaries drawing on port activity and culture, the role of port authorities and companies in the city's cultural life, the spectacularisation and commodification of local maritime culture and heritage, processes of cultural demaritimisation

and remaritimisation of port cities. The book is therefore a contribution towards the bridging of port city and mega-event studies, and it provides insights for port city policy makers and mega-event promoters, drawing from a range of international experiences. The book also shows how societal and political change in the current 'ontologically-insecure' times may undermine the very paradigm of culture- and event-led regeneration in the years to come.

Scurvy - Stephen R. Bown 2005-08-01

Scurvy took a terrible toll in the Age of Sail, killing more sailors than were lost in all sea battles combined. The threat of the disease kept ships close to home and doomed those vessels that ventured too far from port. The willful ignorance of the royal medical elite, who endorsed ludicrous medical theories based on speculative research while ignoring the life-saving properties of citrus fruit, cost tens of thousands of lives and altered the course of many battles at sea. The cure for scurvy ranks among the greatest of human accomplishments, yet its impact on history has, until now, been largely ignored. From the earliest recorded appearance of the disease in the sixteenth century, to the eighteenth century, where a man had only half a chance of surviving the scourge, to the early nineteenth century, when the British conquered scurvy and successfully blockaded the French and defeated Napoleon, Scurvy is a medical detective story for the ages, the fascinating true story of how James Lind (the surgeon), James Cook (the mariner), and Gilbert Blane (the gentleman) worked separately to eliminate the dreaded affliction. Scurvy is an evocative journey back to the era of wooden ships and sails, when the disease infiltrated every aspect of seafaring life: press gangs "recruit" mariners on the way home from a late night at the pub; a terrible voyage in search of riches ends with a hobbled fleet and half the crew heaved overboard; Cook majestically travels the South Seas but suffers an unimaginable fate. Brimming with tales of ships, sailors, and baffling bureaucracy, Scurvy is a rare mix of compelling history and classic adventure story.
