Health Professions Education - Institute of Medicine 2003-07-01

The Institute of Medicine study *Crossing the Quality Chasm* (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. *Health Professions Education: A Bridge to Quality* is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

Health Data in the Information Age - Institute of Medicine
1994-01-01

Regional health care databases are being established around the country with the goal of providing timely and useful information to policymakers, physicians, and patients. But their emergence is raising important and sometimes controversial questions about the collection, quality, and

appropriate use of health care data. Based on experience with databases now in operation and in development, Health Data in the Information Age provides a clear set of guidelines and principles for exploiting the potential benefits of aggregated health data"without jeopardizing confidentiality. A panel of experts identifies characteristics of emerging health database organizations (HDOs). The committee explores how HDOs can maintain the quality of their data, what policies and practices they should adopt, how they can prepare for linkages with computer-based patient records, and how diverse groups from researchers to health care administrators might use aggregated data. Health Data in the Information Age offers frank analysis and guidelines that will be invaluable to anyone interested in the operation of health care databases.

Preventing Medication Errors - Institute of Medicine 2007-01-11

In 1996 the Institute of Medicine launched the Quality Chasm Series, a series of reports focused on assessing and improving the nation's quality of health care. Preventing Medication Errors is the newest volume in the series. Responding to the key messages in earlier volumes of the series"to Err Is Human (2000), Crossing the Quality Chasm (2001), and Patient Safety (2004)"this book sets forth an agenda for improving the safety of medication use. It begins by providing an overview of the system for drug development, regulation, distribution, and use.

Preventing Medication Errors also examines the peer-reviewed literature on the incidence and the cost of medication errors and the effectiveness

of error prevention strategies. Presenting data that will foster the reduction of medication errors, the book provides action agendas detailing the measures needed to improve the safety of medication use in both the short- and long-term. Patients, primary health care providers, health care organizations, purchasers of group health care, legislators, and those affiliated with providing medications and medication-related products and services will benefit from this guide to reducing medication errors.

How to Do the Work - Dr. Nicole LePera 2021-03-09

#1 NEW YORK TIMES BESTSELLER · INSTANT INTERNATIONAL BESTSELLER From Dr. Nicole LePera, creator of "the holistic psychologist"—the online phenomenon with more than two million Instagram followers—comes a revolutionary approach to healing that harnesses the power of the self to produce lasting change. As a clinical psychologist, Dr. Nicole LePera often found herself frustrated by the limitations of traditional psychotherapy. Wanting more for her

patients—and for herself—she began a journey to develop a united philosophy of mental, physical and spiritual wellness that equips people with the interdisciplinary tools necessary to heal themselves. After experiencing the life-changing results herself, she began to share what she'd learned with others—and soon "The Holistic Psychologist" was born. Now, Dr. LePera is ready to share her much-requested protocol with the world. In *How to Do the Work*, she offers both a manifesto for SelfHealing as well as an essential guide to creating a more vibrant, authentic, and joyful life. Drawing on the latest research from a diversity of scientific fields and healing modalities, Dr. LePera helps us recognize how adverse experiences and trauma in childhood live with us, resulting in whole body dysfunction—activating harmful stress responses that keep us stuck engaging in patterns of codependency, emotional immaturity, and trauma bonds. Unless addressed, these self-sabotaging behaviors can quickly become cyclical, leaving people feeling unhappy, unfulfilled, and unwell. In *How to Do the Work*, Dr. LePera offers readers the support and tools that will allow them to break free from destructive behaviors to reclaim and recreate their lives. Nothing short of a paradigm shift, this is a celebration of empowerment that will forever change the way we approach mental wellness and self-care.

MEDINFO 2017: Precision Healthcare Through Informatics - A.V. Gundlapalli
2018-01-31

Medical informatics is a field which continues to evolve with developments and improvements in foundational methods, applications, and technology, constantly offering opportunities for supporting the

customization of healthcare to individual patients. This book presents the proceedings of the 16th World Congress of Medical and Health Informatics (MedInfo2017), held in Hangzhou, China, in August 2017, which also marked the 50th anniversary of the International Medical Informatics Association (IMIA). The central theme of MedInfo2017 was "Precision Healthcare through Informatics", and the scientific program was divided into five tracks: connected and digital health; human data science; human, organizational, and social aspects; knowledge management and quality; and safety and patient outcomes. The 249 accepted papers and 168 posters included here span the breadth and depth of sub-disciplines in biomedical and health informatics, such as clinical informatics; nursing informatics; consumer health informatics; public health informatics; human factors in healthcare; bioinformatics; translational informatics; quality and safety; research at the intersection of biomedical and health informatics; and precision medicine. The book will be of interest to all those who wish to keep pace with advances in the science, education, and practice of biomedical and health informatics worldwide.

Price Setting and Price Regulation in Health Care - OECD
2019-06-26
The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).
