[Music on the Move](#) - Danielle Fosler-Lussier 2020-06-10

Music is a mobile art. When people move to faraway places, whether by choice or by force, they bring their music along. Music creates a meaningful point of contact for individuals and for groups; it can encourage curiosity and foster understanding; and it can preserve a sense of identity and comfort in an unfamiliar or hostile environment. As music crosses cultural, linguistic, and political boundaries, it continually changes. While human mobility and mediation have always shaped music-making, our current era of digital connectedness introduces new creative opportunities and inspiration even as it extends concerns about issues such as copyright infringement and cultural appropriation. With its innovative multimodal approach, Music on the Move invites readers to listen and engage with many different types of music as they read. The text introduces a variety of concepts related to music's travels—with or without its makers—including colonialism, migration, diaspora, mediation, propaganda, copyright, and hybridity. The case studies represent a variety of musical genres and styles, Western and non-Western, concert music, traditional music, and popular music. Highly

accessible, jargon-free, and media-rich, Music on the Move is suitable for students as well as general-interest readers.

From Xenakis's UPIC to Graphic Notation Today - Richard Barrett
2020-04-20

On the legacy of Xenakis' innovations in music notation for contemporary composers Trained in mechanical engineering, Greek-French composer Iannis Xenakis (1922-2001) transformed mathematical models into architectonic musical entities. In the late 1970s Xenakis developed a digital apparatus that rendered waveforms drawn on a tablet as musical compositions. The device was called UPIC, or Unité Polyagogique Informatique du CEMAMu, named for the French contemporary music research institute that Xenakis had helped found a decade earlier. The device proved to be an essential tool for the development of contemporary music--a version of the software is still used by today's composers. Featuring archival materials, this book examines the origins of Xenakis' UPIC. It also serves as a compositional tool: embedded QR codes allow readers to create their own sound-images from UPIC compositions.

The Politics of Ecosystem Management - Hanna Cortner 1999

Resource management in the United States is undergoing a fundamental change. Traditional sustained-yield approaches that focus on commodity production and human resource use are steadily giving way to ecological approaches, often referred to as ecosystem management, that have long-term ecological sustainability as their primary goal. To achieve that goal, ecosystem management emphasizes socially defined goals and objectives, integrated and holistic science, collaborative decision making, and adaptable institutions. Political considerations are an essential component of ecosystem management, yet its socio-political context has been largely ignored by those studying and writing on the subject. *The Politics of Ecosystem Management* is the first book to focus entirely on the political challenges facing ecosystem management as it moves from theory to practice. The authors examine: the history of natural resource management in the United States the theory behind ecosystem management potential inconsistencies and contradictions in the themes of ecosystem management political philosophies that undergird

traditional resource management alternative political principles inherent in ecosystem management opportunities and barriers for achieving collaborative ecosystem management

The Politics of Ecosystem Management considers the sweeping and profound changes that will be required of the American governance system -- its political philosophy, institutions, notions of citizenship, and politics, as well its resource management practices -- if the shift to ecosystem management is to be realized. It is a lucid and accessible volume that represents a vital contribution to the literature for students, researchers, and professionals involved with any aspect of developing and implementing ecosystem-based approaches to resource management.
