**Business, Government and Society: a Managerial Perspective** - Steiner 2003-05-01

**Financial Management from an Emerging Market Perspective** - Soner Gokten 2018-01-17

One of the main reasons to name this book as Financial Management from an Emerging Market Perspective is to show the main differences of financial theory and practice in emerging markets other than the developed ones. Our many years of learning, teaching, and consulting experience have taught us that the theory of finance differs in developed and emerging markets. It is a well-known fact that emerging markets do not always share the same financial management problems with the developed ones. This book intends to show these differences, which could be traced to several characteristics unique to emerging markets, and these unique characteristics could generate a different view of finance theory in a different manner. As a consequence, different financial decisions, arrangements, institutions, and practices may evolve in emerging markets over time. The purpose of this book is to provide practitioners and academicians with a working knowledge of the different financial management applications and their use in an emerging market setting. Six main topics regarding the financial management applications in emerging markets are covered, and the context of these topics are "Capital Structure," "Market Efficiency and Market Models," "Merger and Acquisitions and Corporate Governance," "Working Capital Management," "Financial Economics and Digital Currency," and "Real Estate and Health Finance."

In Compensation and Benefit Design, Bashker D. Biswas shows exactly how to bring financial rigor to the crucial "people" decisions associated with compensation and benefit program development. Replete with both full and "mini" case examples throughout, the book also contains chapter-ending exercises and problems for use by students in HR and finance programs. HR managers are under intense pressure to become strategic business partners. Many, unfortunately, lack the technical skills in financial analysis to succeed in this role. Now, respected HR management educator Dr. Steven Director addresses this skill gap head-on. Writing from HR's viewpoint, Director covers everything mid-level and senior-level HR professionals need to know to formulate, model, and evaluate their HR initiatives from a financial and business perspective.
