Animal Machines - Ruth Harrison 2013

First published in 1964, Ruth Harrison's book *Animal Machines* had a profound and lasting impact on world agriculture, public opinion and the quality of life of millions of farmed animals. Concerned with welfare standards at a time when animal production was increasing in scale and mechanization, Ruth Harrison set about investigating the situation in a fair and even-handed way. Reporting her findings in this book, Harrison alerted the public to the undeniable suffering of calves living in veal crates and birds in battery cages. Written at the beginning of the intensive farming movement, which promised progress but in reality worsened conditions for domesticated animals, *Animal Machines* provides a fascinating insight into the system we are living with today and must continue with as the global population increases. Harrison's work brought about legal reforms, a greater understanding of farm conditions for animals and increased public awareness. *Animal Machines* is reprinted here in its entirety, accompanied by new chapters by world-renowned experts in animal welfare discussing

the legacy and impact of Animal Machines 50 years on.

The Baron in the Trees - Italo Calvino 2017
"Cosimo di Rondó, a young Italian nobleman of the eighteenth century, rebels against his parents by climbing into the trees and remaining there for the rest of his life. He adapts efficiently to an existence in the forest canopy he hunts, sows crops, plays games with earth-bound friends, fights forest fires, solves engineering problems, and even manages to have love affairs. From his perch in the trees, Cosimo sees the Age of Enlightenment pass by and a new century dawn. Long considered one of Calvino's finest works, The baron in the trees exemplifies this brilliant writer's gift for fantasy."--Page [4] of cover.

The Battle - Alessandro Barbero 2009-05-26
At Waterloo, some 70,000 men under Napoleon and an equal number under Wellington faced one another in a titanic and bloody struggle. In the end, as John Keegan notes, contemporaries felt that Napoleon's defeat had "reversed the tide of European history." Even 190 years later, the name Waterloo resounds. Italian historian Alessandro Barbero's majestic new account stands apart from previous British and French histories by giving voice to all the nationalities that took part. Invoking the memories of British, French, and Prussian soldiers, Barbero meticulously re-creates the conflict as it unfolded, from General Reille's early afternoon assault on the chateau of Hougoumont, to the desperate last charge of Napoleon's Imperial Guard as evening settled in. From privates to generals, Barbero recounts individual miracles and tragedies, moments of courage and foolhardiness, skillfully blending them into the larger narrative of the battle's extraordinary ebb and flow. One is left with indelible images: cavalry charges against soldiers formed in squares; the hand-to-hand combat around farmhouses; endless cannon balls and smoke. And, finally, a powerful appreciation of the inevitability and futility of war. To be published on the 190th anniversary of Waterloo, The Battle is a masterpiece of military history.

Mind and Places - Anna Anzani 2020-05-12
This book explores the contributions of psychological, neuroscientific and philosophical perspectives to the design of contemporary

cities. Pursuing an innovative and multidisciplinary approach, it addresses the need to re-launch knowledge and creativity as major cultural and institutional bases of human communities. Dwelling is a form of knowledge and re-invention of reality that involves both the tangible dimension of physical places and their mental representation. Findings in the neuroscientific field are increasingly opening stimulating perspectives on the design of spaces, and highlight how our ability to understand other people is strongly related to our corporeity. The first part of the book focuses on the contributions of various disciplines that deal with the spatial dimension, and explores the dovetailing roles that science and art can play from a multidisciplinary perspective. In turn, the second part formulates proposals on how to promote greater integration between the aesthetic and cultural dimension in spatial design. Given its scope, the book will benefit all scholars, academics and practitioners who are involved in the process of planning, designing and building places, and will foster an international exchange of research, case studies, and theoretical reflections to confront the challenges of designing conscious places and enable the development of communities.

Karin Michaëlis' Bibi books - Anna Wegener 2021-02-01

Karin Michaëlis (1872-1950) was one of the most important Danish authors of the early 20th century and achieved enormous international success with her Bibi books about the life and adventures of a free-spirited Danish girl named Bibi. The series was not particularly popular in the author's native country, however. This book unravels the intricate reasons behind the strikingly asymmetrical reception of the Bibi series at home and abroad while at the same

time deconstructing this homeabroad dichotomy by showing that the Bibi books are an example of transnational children's literature. They did not have their "home" in Denmark in that Karin Michaëlis wrote them specifically for foreign publishers, first and foremost the German Herbert Stuffer. The book further argues that the Danish texts are rewritings rather than originals and explores some of the salient textual features of the Danish and German Bibi books. Finally, it examines the series' reception by young Italian readers in Fascist Italy and Karin Michaëlis' Italian translator.

Human Exhibitions - Rikke Andreassen 2016-03-09

From the 1870s to the second decade of the twentieth century, more than fifty exhibitions of so-called exotic people took place in Denmark. Here large numbers of people of Asian and African origin were exhibited for the entertainment and 'education' of a mass audience. Several of these exhibitions took place in Copenhagen Zoo, where different 'villages', constructed in the middle of the zoo, hosted men, women and children, who sometimes stayed for months, performing their 'daily lives' for thousands of curious Danes. This book draws on unique archival material newly discovered in Copenhagen, including photographs, documentary evidence and newspaper articles, to offer new insights and perspectives on the exhibitions both in Copenhagen and in other European cities. Employing post-colonial and feminist approaches to the material, the author sheds fresh light on the staging of exhibitions, the daily life of the exhibitees, the wider connections between shows across Europe and the thinking of the time on matters of race, science, gender and sexuality. A window onto contemporary racial understandings, *Human Exhibitions* presents interviews with the descendants of displayed people, connecting the attitudes and science of the past with both our (continued) modern fascination with 'the exotic', and contemporary language and popular culture. As such, it will be of interest to scholars of sociology, anthropology and history working in the areas of gender and sexuality, race, whiteness and post-colonialism.

The Book of Disquiet - Fernando Pessoa 2010-12-09

Sitting at his desk, Bernardo Soares imagined himself free forever of Rua dos Douradores, of his boss Vasques, of Moreira the book-keeper, of all the other employees, the errand boy, the post boy, even the cat. But if he left them all tomorrow and discarded the suit of clothes he wears, what else would he do? Because he would have to do something. And what suit would he wear? Because he would have to wear another suit. A self-deprecating reflection on the sheer distance between the loftiness of his feelings and

the humdrum reality of his life, *The Book of Disquiet* is a classic of existentialist literature. *Networks of Refugees from Nazi Germany* - 2016-08-01

The Elder Or Poetic Edda - Olive Bray 1908

Healing Invisible Wounds - Richard F. Mollica 2008-12-29

In these personal reflections on his thirty years of clinical work with victims of genocide, torture, and abuse in the United States, Cambodia, Bosnia, and other parts of the world, Richard Mollica describes the surprising capacity of traumatized people to heal themselves. Here is how Neil Boothby, Director of the Program on Forced Migration and Health at the Mailman School of Public Health, Columbia University, describes the book: "Mollica provides a wealth of ethnographic and clinical evidence that suggests the human capacity to heal is innate--that the 'survival instinct' extends beyond the physical to include the psychological as well. He enables us to see how recovery from 'traumatic life events' needs to be viewed primarily as a 'mystery' to be listened to and explored, rather than solely as a 'problem' to be identified and solved. Healing involves a quest for meaning--with all of its emotional, cultural, religious, spiritual and existential attendants--even when bio-chemical reactions are also operative." *Healing Invisible Wounds* reveals how trauma survivors, through the telling of their stories, teach all of us how to deal with the tragic events of everyday life. Mollica's important discovery that humiliation--an instrument of violence that also leads to anger and despair--can be transformed through his therapeutic project into solace and redemption is a remarkable new contribution to survivors and clinicians. This book reveals how in every society we have to move away from viewing trauma survivors as "broken people" and "outcasts" to seeing them as courageous people actively contributing to larger social goals. When violence occurs, there is damage not only to

individuals but to entire societies, and to the world. Through the journey of self-healing that survivors make, they enable the rest of us not only as individuals but as entire communities to recover from injury in a violent world.

Lillemor - Karin Michaëlis 2016-11-04

Fru Bøggild er blevet forladt af sin mand og må nu klare sig alene med sine tre døtre Marthe, Anina og Benthe. Faderen havde været børnenes følelsesmæssige anker, og den opgave påtager den syv-årige Marthe sig nu i forhold til de mindre søskende. Men da hun bliver 14, gifter moderen hende bort, og ulykken begynder for pigen. "Lillemor" er en brevroman, hvor fortælleren på skift er Fru Bøggild, døtrene og Bøggilds fætter Kasper Fangel. Det er en roman om kvinder, der vokser op i 1800-tallets Danmark, hvor en kvinde forventedes at gifte sig og lade manden bestemme over sig. I "Lillemor" og også i romanen "Barnet" fandt Karin Michaëlis frem til sin intime brevfortællestil og viser en af de mest indtagende sider af sit forfatterskab: i sine levende og varme psykologiske portrætter unge piger og modne kvinder og skildringer af deres ønsker og drømme. Bogen er skrevet i og med samtidens sprog og retskrivning. Karin Michaëlis (1872-1950) var en af sin tids bedst kendte danske forfattere nationalt såvel som internationalt. Igennem hele sit forfatterskab kredser hun tematisk om kvindeundertrykkelse og pigers og kvinders psykologi og seksualitet. Som ung rejste hun til København, hvor hun kom ind i det litterære miljø omkring Georg Brandes. Under besættelsen måtte Karin Michaëlis

bosætte sig i USA på grund af sin mangeårige indsats for tyske forfattere på flugt fra nazismen, heriblandt Bertolt Brecht.
