The Four Lives of Steve Jobs - Daniel Ichbiah 2020-02-09

The Four Lives of Steve Jobs Daniel Ichbiah No. 1 on the best-sellers list in August 2011 (French version). New edition updated in 2016 "So at thirty I was out. And very publicly out. What had been the focus of my entire adult life was gone, and it was devastating... I didn't see it then, but it turned out that getting fired from Apple was the best thing that could have ever happened to me." This was Steve Jobs' confession on that morning in June 2005 to students at Stanford University. It summed up the growth that was slowly taking place in him. Chased out of Apple like scum in 1985, Jobs had made a resounding comeback ten years later and gave us devices that left a mark on their time, such as the iPod, iPhone and iPad. The world's most admired CEO, Steve Jobs mostly went against the tide, driven by a vision of genius and an extraordinary strength of conviction. However, he could also get it wrong: he was the one who nearly ruined Apple in 1984 after launching the Macintosh by insisting on poor technical choices! The 4 lives of Steve Jobs depicts Jobs' troubled youth, his rise to glory following the founding of Apple, his disgrace and his vain attempt at revenge followed by a return to the top. It also reveals a thousand unexpected facets of the extraordinary artist who ran Apple. * His quest for enlightenment in India * His initial refusal to recognize the paternity of his daughter Lisa * His relationship with folk singer Joan Baez * The search for his mother, who abandoned him at birth * The attempt to treat his cancer with a vegetarian diet In his own way, Steve Jobs never stopped wanting to change the world, to change life... A best-seller Published by Leduc Editions in April 2011, the French version of The Four Lives of Steve Jobs was a number one best-seller at the end of August, 2011.

Tim Cook - Leander Kahney 2019-04-16

Journalist Leander Kahney reveals how CEO Tim Cook has led Apple to astronomical success after the death of Steve Jobs in 2011. The death of Steve Jobs left a gaping void at one of the most innovative companies of all time. Jobs wasn't merely Apple's iconic founder and CEO; he was the living embodiment of a global megabrand. It was hard to imagine that anyone could fill his shoes--especially not Tim Cook, the intensely private executive who many thought of as Apple's "operations drone." But seven years later, as journalist Leander Kahney reveals in this definitive book, things at Apple couldn't be better. Its stock has nearly tripled, making it the world's first trillion dollar company. Under Cook's principled leadership, Apple is pushing hard into renewable energy, labor and environmentally-friendly supply chains, user privacy, and highly-recyclable products. From the massive growth of the iPhone to lesser-known victories like the Apple Watch, Cook is leading Apple to a new era of success. Drawing on access with several Apple insiders, Kahney tells the inspiring story of how one man attempted to replace someone irreplaceable, and--through strong, humane leadership, supply chain savvy, and a commitment to his values--succeeded more than anyone had thought possible.
