Good to Great - Jim Collins 2011-07-19

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre

companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

Smarter Faster Better - Charles Duhigg 2016-03-24

In the international bestseller *The Power of Habit*, Pulitzer Prize-winning journalist Charles Duhigg explained why we do what we do. In *Smarter Faster Better*, he applies the same relentless curiosity, rigorous reporting and rich storytelling to explain how we can get better at the things we do. The result is a groundbreaking exploration of the science of productivity. A group of data scientists at Google embark on a four-year study of how the best teams function, and find that how a group interacts is much more important than who is in the group. A Marine Corps general, faced with low morale among recruits, reimagines boot camp - and discovers that instilling a 'bias toward action' can turn even the most directionless teenagers into self-motivating achievers. The filmmakers behind Disney's *Frozen* are on the brink of catastrophe - until they shake up their team in just the right way, spurring a creative breakthrough that leads to one of the highest-grossing movies of all time. What do these people have in common? They know that productivity relies on making certain choices. The way we frame our daily decisions; the big ambitions we embrace and the easy goals we ignore; the cultures we establish as leaders to drive innovation: these are the things that separate the merely busy from the genuinely productive. At the core of *Smarter Faster Better* are eight key concepts - from motivation and goal-setting to focus and decision-making - that explain why some people and companies get so much done. Drawing on the latest findings in neuroscience, psychology and behavioural economics - as well as the experiences of CEOs, educational reformers, four-star generals, airplane pilots and Broadway songwriters - this painstakingly

researched book explains that the most productive people, companies and organizations don't merely act differently. They view the world, and their choices, in profoundly different ways.

Are you one of the millions of people out there who feel like they've read everything there is to read on fitness and have spent an enormous amount of time and money trying to get fit—and still failed? Until you know how your body really works and reacts to physical activity, you may never succeed. Eric Heiden, M.D., and Massimo Testa, M.D., two preeminent sports physicians who know the training needs of beginners as intimately as those of elite athletes, want to fix this problem. They know there has been an entire field of training science and medicine that has never been translated for the general public—until now. In a program that is designed for everyday people, Heiden and Testa bring us Faster, Better, Stronger, a customized, science-based program designed to guide you into a lifelong fitness habit, giving you step-by-step instructions on how to make the most of your body through exercise—physically, mentally, biomechanically, and nutritionally. In Part I, the doctors detail the solid science behind your body's responses to exercise. They share the same philosophy and medical expertise they have shared with world-class athletes and give scientific "secrets" in several areas of fitness: the prescriptive aspects of exercise; the biology of movement; the importance of fueling your body with the right food and water; what rest really accomplishes; and motivation. They also debug and clarify some all-too-often misunderstood medical and biological truths about training, and offer you ways to find your hidden talents and strengths. These doctors know that the luxuries of time and access are significant factors in getting fit, and thus Part II helps you design your own unique, individualized exercise program no matter your age, ability, experience, or schedule. Once you have assessed your current fitness level, the doctors guide you through assembling blocks of activities into a twelve-week program that will get you started on the road to lifelong health.

Financial Freedom - Grant Sabatier 2020-04-07

The International Bestseller "This book blew my mind. More importantly, it made financial independence seem achievable. I read Financial Freedom three times, cover-to-cover." —Lifhacker Money is unlimited. Time is not. Become financially independent as fast as possible. In 2010, 24-year old Grant Sabatier woke up to find he had \$2.26 in his bank account. Five years later, he had a net worth of over \$1.25 million, and CNBC began calling him "the Millennial Millionaire." By age 30, he had reached financial independence. Along the way he uncovered that most of the accepted wisdom about money, work, and retirement is either incorrect, incomplete, or so old-school it's obsolete. Financial Freedom is a step-by-step path to make more money in less time, so you have more time for the things you love. It challenges the accepted narrative of spending decades working a traditional 9 to 5 job, pinching pennies, and finally earning the right to retirement at age 65, and instead offers readers an alternative: forget everything you've ever learned about money so that you can actually live the life you want. Sabatier offers surprising, counter-intuitive advice on topics such as how to: * Create profitable side hustles that you can turn into passive income streams or full-time businesses * Save money without giving up what makes you happy * Negotiate more out of your employer than you thought possible * Travel the world for less * Live for free--or better yet, make money on your living situation * Create a simple, money-making portfolio that only needs minor adjustments * Think creatively--there are so many ways to make money, but we don't see them. But most importantly, Sabatier highlights that, while one's ability to make money is limitless, one's time is not. There's also a limit to how much you can save, but not to how much money you can make. No one should spend precious years working at a job they dislike or worrying about how to make ends meet. Perhaps the biggest surprise: You need less money to "retire" at age 30 than you do at age 65. Financial Freedom is not merely a laundry list of advice to follow to get rich quick--it's a practical roadmap to living life on one's own terms, as soon as possible.

Leading Your School Toward Equity - Dwayne Chism 2022-08-29

A four-step process for effective equity practices in schools, with an array of professional development activities, leadership tips, and downloadable tools. Recent years have brought new calls to dismantle discriminatory policies and practices in U.S. schools. But adopting an equity focus doesn't guarantee the desired results. There's a risk that doing equity will be toothless—surface level and designed more to avoid tension and blame than to build a better educational system. In *Leading Your School Toward Equity*, veteran educator Dwayne Chism shows district, school, and teacher leaders a four-step process for taking equity work beyond talk and into effective action. You'll learn concrete ways to

- * Define and clarify equity. Guide even reluctant staff to a consensus understanding of what equity is, why it's necessary, and what it will look like.
- * Create productive discomfort. Use intentional dialogue to lead staff to a place where they can talk frankly about privilege, bias, racial inequality, and how these affect students' experience of schooling.
- * Build efficacy. Help staff develop higher levels of individual and shared professional efficacy—the number one factor influencing equitable educational outcomes—and create an empowered group of educational equity allies united for results.
- * Normalize action. Support the day-to-day use of an equity lens, a mindset that empowers all teachers to

counteract stereotypes and rectify conditions that negatively affect students of color. To make this complicated work a little easier, Chism provides an array of assessments, coaching guides, and activities to use with staff. If you're committed to creating a true equity-driven culture, if you're ready for courageous leadership, this book is for you.

The result is a challenge to readers to really rethink many of their own approaches and assumptions.
