

Language And Gender Ijser

Getting the books **Language And Gender Ijser** now is not type of challenging means. You could not only going later than ebook accretion or library or borrowing from your friends to entry them. This is an enormously simple means to specifically acquire guide by on-line. This online statement Language And Gender Ijser can be one of the options to accompany you afterward having extra time.

It will not waste your time. take me, the e-book will certainly vent you other situation to read. Just invest little era to gain access to this on-line notice **Language And Gender Ijser** as capably as evaluation them wherever you are now.

Same-Sex Love in India - R.

Vanita 2000-09-11

Same-Sex Love in India presents a stunning array of writings on same-sex love from over 2000 years of Indian literature. Translated from more than a dozen languages and drawn from Hindu, Buddhist, Muslim, and modern fictional traditions, these writings testify to the presence of same-sex love in various forms since ancient times, without overt persecution. This collection defies both

stereotypes of Indian culture and Foucault's definition of homosexuality as a nineteenth-century invention, uncovering instead complex discourses of Indian homosexuality, rich metaphorical traditions to represent it, and the use of names and terms as early as medieval times to distinguish same-sex from cross-sex love. An eminent group of scholars have translated these writings for the first time or have re-translated well-known texts to correctly make evident

previously underplayed homoerotic content. Selections range from religious books, legal and erotic treatises, story cycles, medieval histories and biographies, modern novels, short stories, letters, memoirs, plays and poems. From the Rigveda to Vikram Seth, this anthology will become a staple in courses on gender and queer studies, Asian studies, and world literature.

Inventive Communication and Computational Technologies -

G. Ranganathan 2020-01-29
This book gathers selected papers presented at the Inventive Communication and Computational Technologies conference (ICICCT 2019), held on 29-30 April 2019 at Gnanamani College of Technology, Tamil Nadu, India. The respective contributions highlight recent research efforts and advances in a new paradigm called ISMAC (IoT in Social, Mobile, Analytics and Cloud contexts). Topics covered include the Internet of Things, Social Networks, Mobile Communications, Big Data Analytics, Bio-inspired

Computing and Cloud Computing. The book is chiefly intended for academics and practitioners working to resolve practical issues in this area.

High Octane Women -
Sherrie Bourq Carter, M.D.
2011-02-02

In this authoritative, well-researched book, full of helpful insights and practical advice, a psychologist draws on more than 15 years experience and expertise in stress management to explore the unique challenges that high-achieving women face and how they can avoid burnout.

English-Medium Instruction and Pronunciation - Karin Richter 2019-01-11

This book offers new insights into the language gains of adult learners enrolled in an English-medium instruction (EMI) degree programme. It provides longitudinal empirical evidence of the phonological gains of the learners; discusses which individual factors contribute to the changes in the learners' pronunciation and investigates whether and to what extent

Downloaded from
test.unicaribe.edu.do on
by guest

increased exposure to the target language in EMI classrooms leads to incidental learning of second language pronunciation. Furthermore, it expands on the discussions surrounding the Critical Period Hypothesis, the native-speaker norm, foreign language accent and the role of English as a Lingua Franca. The comparative and longitudinal design of the research study fills a significant gap in the literature and the book offers considerable original and important research-informed insights into the fields of EMI, bilingual education and second language acquisition. As such, it is a valuable resource and must-read book for researchers, practitioners and policymakers in these areas.

Ethnobotany of the Himalayas - Ripu M. Kunwar 2021-12-01
Research in recent years has increasingly shifted away from purely academic research, and into applied aspects of the discipline, including climate change research, conservation, and sustainable development. It has by now widely been

recognized that “traditional” knowledge is always in flux and adapting to a quickly changing environment. Trends of globalization, especially the globalization of plant markets, have greatly influenced how plant resources are managed nowadays. While ethnobotanical studies are now available from many regions of the world, no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market. Scholars in plant sciences worldwide will be interested in this website and its dynamic content. The field (and thus the market) of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest is on the rise, attendance at professional conferences has grown steadily, and the number of professionals calling themselves ethnobotanists has increased significantly (the various societies, like the Society for Economic Botany, the International Society of Ethnopharmacology, the Society of Ethnobiology, and

*Downloaded from
test.unicaribe.edu.do on
by guest*

the International Society for Ethnobiology currently have thousands of members). Growth has been most robust in BRIC countries. This new MRW on Ethnobotany of the Himalayas takes advantage of the increasing international interest and scholarship in the field of mountain research. It includes the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants in the Himalayas. Each contribution is scientifically rigorous and contributes to the overall field of study.

Handbook of Natural Language Processing - Nitin Indurkha 2010-02-22

The Handbook of Natural Language Processing, Second Edition presents practical tools and techniques for implementing natural language processing in computer systems. Along with removing outdated material, this edition updates every chapter and expands the content to include emerging areas, such as sentiment analysis. New to the

Second Edition Greater
Beyond Repeat After Me - Marla Yoshida 2016-09-26
This engaging text clearly presents essential concepts that teachers need to guide their students toward clearly intelligible pronunciation and more effective communication skills. Based on a sound theoretical background, the book presents practical, imaginative ways to teach and practice pronunciation that go beyond a simple Repeat after me. Recognizing that there is no one-size-fits-all answer for pronunciation teaching, this book offers insights for adapting teaching techniques to a range of students and teaching situations: children or adults, beginners or advanced students, and learners worldwide, whether in English-speaking countries or areas where students seldom hear English outside of class.
Proceedings of Data Analytics and Management - Deepak Gupta 2021-11-21

This book includes original unpublished contributions presented at the International

Conference on Data Analytics and Management (ICDAM 2021), held at Jan Wyzykowski University, Poland, during June 2021. The book covers the topics in data analytics, data management, big data, computational intelligence, and communication networks. The book presents innovative work by leading academics, researchers, and experts from industry which is useful for young researchers and students.

Modeling, Simulation and Optimization - Biplab Das
2021-03-17

This book includes selected peer-reviewed papers presented at the International Conference on Modeling, Simulation and Optimization, organized by National Institute of Technology, Silchar, Assam, India, during 3-5 August 2020. The book covers topics of modeling, simulation and optimization, including computational modeling and simulation, system modeling and simulation, device/VLSI modeling and simulation, control theory and

applications, modeling and simulation of energy system and optimization. The book disseminates various models of diverse systems and includes solutions of emerging challenges of diverse scientific fields.

International Handbook of English Language Teaching

- Jim Cummins 2007-12-31

This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English Language Teaching in international contexts. More than 70 chapters highlight the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second language acquisition and pedagogy. The Handbook provides a unique resource for policy makers, educational administrators, and researchers concerned with meeting the increasing demand for effective English language teaching. It offers a strongly socio-cultural view of language learning and teaching. It is comprehensive and global in

Downloaded from
test.unicaribe.edu.do on

perspective with a range of fresh new voices in English language teaching research.

An Introduction to Natural Language Processing Through Prolog - Clive Matthews

2016-07-01

Research into Natural Language Processing - the use of computers to process language - has developed over the last couple of decades into one of the most vigorous and interesting areas of current work on language and communication. This book introduces the subject through the discussion and development of various computer programs which illustrate some of the basic concepts and techniques in the field. The programming language used is Prolog, which is especially well-suited for Natural Language Processing and those with little or no background in computing. Following the general introduction, the first section of the book presents Prolog, and the following chapters illustrate how various Natural Language Processing programs

may be written using this programming language. Since it is assumed that the reader has no previous experience in programming, great care is taken to provide a simple yet comprehensive introduction to Prolog. Due to the 'user friendly' nature of Prolog, simple yet effective programs may be written from an early stage. The reader is gradually introduced to various techniques for syntactic processing, ranging from Finite State Network recognisers to Chart parsers. An integral element of the book is the comprehensive set of exercises included in each chapter as a means of cementing the reader's understanding of each topic. Suggested answers are also provided. An Introduction to Natural Language Processing Through Prolog is an excellent introduction to the subject for students of linguistics and computer science, and will be especially useful for those with no background in the subject.

Republic [2 volumes] -

Arnold P. Kaminsky 2011-09-23

Containing almost 250 entries written by scholars from around the world, this two-volume resource provides current, accurate, and useful information on the politics, economics, society, and cultures of India since 1947. • 240 A-Z entries on the social, political, cultural, and economic development of India since 1947 • Contributions from more than 100 distinguished international scholars from five continents • A chronology of major domestic, regional, and world events in and involving India from 1947 to 2010 • A "Guide to Related Topics" to allow readers to trace main themes across related entries • An extensive Selected Bibliography containing multicultural and multidisciplinary materials and scholarship on the growth and development of the Republic of India from 1947 to the present

Burnt Shadows - Kamila Shamsie 2009-05-29
Hiroko steps out onto the

veranda. Her body from neck down a silk column, white with three black cranes swooping across her back. She looks out towards the mountains, and everything is more beautiful to her than it was early this morning. Nagasaki is more beautiful to her than ever before. She turns her head and sees the spires of Urakami Cathedral, which Konrad is looking up at when he notices a gap open between the clouds. Sunlight streams through, pushing the clouds apart even further. Hiroko. And then the world goes white. —From *Burnt Shadows* by Kamila Shamsie -- The morning of August 9, 1945 breaks dreary and unspectacular in the city of Nagasaki. Nonetheless, twenty-one year-old Hiroko Tanaka is elated: she is in love. Her emerging romance with the displaced German Konrad Weiss offers release from the greyness of wartime deprivation. In this time of heightened xenophobia, their affair must be kept secret, particularly as Hiroko's father has recently been outcast for

Downloaded from
test.unicaribe.edu.do on
by guest

questioning the patriotism of sending children on kamikaze missions. As Hiroko and Konrad furtively plan for a future after the war, there is no way they can comprehend the unspeakable devastation bearing down upon them. Two years later, Hiroko arrives in Delhi at the home of Konrad's sister Ilse and his brother-in-law James Burton. Upon Hiroko's back are crane-shaped scars, seared into her skin when her kimono was incinerated by the bomb. She is on the run from unbearable memories, as well as from the stigma of being branded a hibakusha, a survivor of the bomb. Ilse, in an uncharacteristically impulsive move, welcomes Hiroko into her home, seeing in the brave young woman a possibility of release from her own conscripted existence. Hiroko quickly destabilizes the frigid hierarchy of the household, much to the relief of Sajjad Ashraf, James's bored servant. Tensions are running high in the Mohalla with the looming partition of India and Pakistan.

Will Sajjad remain in his beloved Dilli/Delhi, or depart with so many others for the promise of Pakistan? Sajjad's family has secured for him a wife, and he yearns for a legal career, still half-clinging to the hope that James will assist him. But James's only use for him is as a chess opponent, an idle distraction as the Raj winds to a close. The Burtons are preparing to decamp for England, having already dispatched their son Harry to boarding school. But what James does not know is that Ilse is making other plans. A romance blooms between Hiroko and Sajjad, much to the incredulity of the Burtons, whose own emotional lives have become entwined in the futures of their charismatic young charges. Despite outbursts of jealousies and a terrible act of betrayal, the Burtons nevertheless assist Hiroko and Sajjad in their flight to married life in Istanbul. Later the Ashrafs will move to Karachi to raise their son, Raza. The lives of the Ashrafs and the Burtons will

remain entwined for decades, though in ways they cannot anticipate. Across continents and through geopolitical flux, each family will continue to act as a catalytic force upon the other, sometimes in life-saving ways, and sometimes causing great peril. Why is it that some bonds flourish in times of crisis, and why do some fail? What defines the character that survives the cruelest of circumstances? And how is it that entire populations can support unspeakable acts en masse, while relating as individuals with compassion? Longlisted for the prestigious Orange Prize for Fiction, Kamila Shamsie's *Burnt Shadows* is an enthralling meta-cultural epic, the panoramic tale of two families tangled together in some of the most devastating conflicts of modern history.

Social Media in Higher Education - Chris Rowell
2020-10-09

"How does social media affect working life in Higher Education? How are universities harnessing its

power to aid student learning? This innovative collection brings together academics and those working in professional services to examine these questions and more. The diverse and expert contributors analyse the many ways social media can be used to enhance teaching and learning, research, professional practice, leadership, networking and career development. The impact of social media is evaluated critically, with an eye both to the benefits and the problems of using these new forms of digital communication. This is the first volume to give such detailed attention to this area of high interest. Its innovative approach extends to its creation, with contributors found via their presence on Twitter. The short and impactful chapters are accessible while retaining an academic focus through their application of relevant learning theory and educational context. *Social Media and Higher Education* is essential reading for any professional

Intelligent Communication Technologies and Virtual Mobile Networks - S. Balaji
2019-08-12

This book presents the outcomes of the Intelligent Communication Technologies and Virtual Mobile Networks Conference (ICICV 2019) held in Tirunelveli, India, on February 14-15, 2019. It presents the state of the art in the field, identifying emerging research topics and communication technologies and defining the future of intelligent communication approaches and virtual

computing. In light of the tremendous growth ICT, it examines the rapid developments in virtual reality in communication technology and high-quality services in mobile networks, including the integration of virtual mobile computing and communication technologies, which permits new technologies based on the resources and services of computational intelligence, big data analytics, Internet of Things (IoT), 5G technology, automation systems, sensor networks, augmented reality, data mining, and vehicular ad hoc networks with massive cloud-based backend. These services have a significant impact on all areas of daily life, like transportation, e-commerce, health care, secure communication, location detection, smart home, smart city, social networks and many more.

soft computing approaches in engineering, healthcare and allied domains directed toward the researchers aspiring to learn and apply intelligent data analytics techniques. The first part covers AI, machine learning and data analytics tools and techniques and their applications to the class of several hospital and health real-life problems. In the later part, the applications of AI, ML and data analytics shall be covered over the wide variety of applications in hospital, health, engineering and/or applied sciences such as the clinical services, medical image analysis, management support, quality analysis, bioinformatics, device analysis and operations. The book presents knowledge of experts in the form of chapters with the objective to introduce the theme of intelligent data analytics and discusses associated theoretical applications. At last, it presents simulation codes for the problems included in the book for better understanding for beginners.

Examining the Impact of Homegrown School Feeding Program on Literacy

Improvement in Rutsiro, District, Rwanda - Ben Alexandre Mpozembizi
2021-04-19

Doctoral Thesis / Dissertation from the year 2021 in the subject Education - Reading Instruction, grade: Doctor of Philosophy, , course: Education, language: English, abstract: This thesis explored the impact of Home grown school feeding program which were designed and implemented by WFP with its different partners in Rwanda between 2015 and 2020, with the aim to understand their impact on literacy improvement. Primary education is receiving much attention from governments of all countries and NGOs in recent times. However, poverty and hunger serves as barriers to achieving the Education for

All (EFA) policy in Rwanda. To actualize the EFA in Rwanda, there was the introduction of some educational intervention programmes such as the capitation grant and the school feeding. School feeding programmes are safety net programmes as well as educational interventions ensuring that children with poor parents are given at least a meal a day at school. In Home grown school feeding program intervention (Rutsiro, Karongi, Nyaruguru and Nyamagabe districts), students get porridge and food respectively. Therefore, this thesis adopted the qualitative research method to investigate how Home grown school feeding program contributes to literacy improvement in Rutsiro district, Rwanda. As a result, approximately one-third of our research sample is reading at or above the WCPM range. Besides this, there are differences in boys' and girls' performance at certain ranges of WCPM, with a quarter of the male sample reading no words at all compared to 11.8 percent

of females. Girls also outperform boys at the 16-30 WCPM range, but this trend reverses at the highest WCPM range, with nearly a quarter of boys reading 41-56 WCPM but just 13.6 percent of girls. The findings show that students who could read aloud have much better comprehension ratings: 92.6 percent meet or exceed standard compared to 64.8 percent of those with lower oral fluency. The difference is even more marked when comparing the percentages in the exceeds category: 65.6 percent of students who read on their own answered 4-5 comprehension questions correctly compared to 35.9 percent of those who listened to the story.

The World of Homosexuals -
Shakuntala Devi 1977

This book is an investigation of the world of gay, containing personal interviews with homosexuals in India and abroad. It touches on many aspects of the subject and makes a plea for more humane, compassionate, rational scrutiny of its social and

psychological repercussions.
Semantics and Comprehension
- Herbert H. Clark 2019-06-05

Representation and
Management of Narrative
Information - Gian Piero Zarri
2009-06-29

A big amount of important, 'economically relevant' information, is buried within the huge mass of multimedia documents that correspond to some form of 'narrative' description. Due to the ubiquity of these 'narrative' resources, being able to represent in a general, accurate, and effective way their semantic content - i.e., their key 'meaning' - is then both conceptually relevant and economically important. In this book, we present the main properties of NKRL ('Narrative Knowledge Representation Language'), a language expressly designed for representing, in a standardised way, the 'meaning' of complex multimedia narrative documents. NKRL is a fully implemented language/environment. The software exists in two versions,

an ORACLE-supported version and a file-oriented one. Written from a multidisciplinary perspective, this exhaustive description of NKRL and of the associated knowledge representation principles will be an invaluable source of reference for practitioners, researchers, and graduates.

In Other Rooms, Other

Wonders - Daniyal

Mueenuddin 2011-10-01

Moving from the elegant drawing rooms of Lahore to the mud villages of rural Multan, a powerful collection of short stories about feudal Pakistan. An impoverished young woman becomes a wealthy relative's mistress; an electrician on the make confronts his desperate assailant to protect his most prized possession; a farm manager rises far in the world—but his family discovers after his death the transience of power; a maid, who advances herself through sexual favours, unexpectedly falls in love. In these linked stories about the family and household staff of the ageing

KK Harouni, we meet masters

and servants, landlords and supplicants, politicians and electricians, village women, and Karachi housewives. Part Chekhov, part RK Narayan, these stories are dark and light, complex and humane; at heart about the relationship between the powerful and powerless, bound together in life—and in death. Together they make up a vivid portrait of a feudal world rarely brought alive in the English language. Sensuous, graceful, melancholy, *In Other Rooms, Other Wonders* gives you Pakistan as you have never seen it. It marks the debut of an amazing new talent.

Athena Unbound - Henry Etzkowitz 2000-10-19

An inquiry into why there are so few women scientists discusses the subtle factors that contribute to the marginalization of women scientists and compares the status of women scientists in different countries.

Education and Social Mobility - Phillip Brown 2017-10-02

The study of education and

social mobility has been a key area of sociological research since the 1950s. The importance of this research derives from the systematic analysis of functionalist theories of industrialism. Functionalist theories assume that the complementary demands of efficiency and justice result in more 'meritocratic' societies, characterized by high rates of social mobility. Much of the sociological evidence has cast doubt on this optimistic, if not utopian, claim that reform of the education system could eliminate the influence of class, gender and ethnicity on academic performance and occupational destinations. This book brings together sixteen cutting-edge articles on education and social mobility. It also includes an introductory essay offering a guide to the main issues and controversies addressed by authors from several countries. This comprehensive volume makes an important contribution to our theoretical and empirical understanding of the changing

Downloaded from
test.unicaribe.edu.do on
by guest

relationship between origins, education and destinations. This timely collection is also relevant to policy-makers as education and social mobility are firmly back on both national and global political agendas, viewed as key to creating fairer societies and more competitive economies. This book was originally published as a special issue of the British Journal of Sociology of Education.

Emerging Research in Data Engineering Systems and Computer Communications - P.

Venkata Krishna 2020-02-10

This book gathers selected papers presented at the 2nd International Conference on Computing, Communications and Data Engineering, held at Sri Padmavati Mahila Visvavidyalayam, Tirupati, India from 1 to 2 Feb 2019. Chiefly discussing major issues and challenges in data engineering systems and computer communications, the topics covered include wireless systems and IoT, machine learning, optimization, control, statistics, and social

computing.

Major Challenges Facing Higher Education in the Arab World: Quality Assurance and Relevance -

Adnan Badran 2019-03-25

This book focuses on two crucial issues that need to be addressed as a matter of urgency by universities in the Arab region, namely (a) conducting independent assessments of the quality of their teaching, research, administration, governance, and planning; and (b) determining the relevance of their teaching, research, and societal impacts. Although well-established around the world in manufacturing industries and private-sector service industries, including the research and commercialisation arms of the major universities and research institutes, it is only in recent years that quality-assurance (QA) assessments have started to be applied to most aspects of education. Several Arab universities are adopting various forms of QA but some variants are little more than

*Downloaded from
test.unicaribe.edu.do on
by guest*

bureaucratic “box-ticking” exercises with minimal commitment by staff to the ultimate aim of continuing self-improvement. This book will be of interest to senior management at faculty and departmental level and above in all Arab universities specifically, and more generally in Islamic institutions of higher education. Senior management in other universities, especially in the developing world will benefit from its analyses and recommendations.

Emerging Technologies in Data Mining and Information Security - Ajith Abraham
2018-09-01

The book features research papers presented at the International Conference on Emerging Technologies in Data Mining and Information Security (IEMIS 2018) held at the University of Engineering & Management, Kolkata, India, on February 23–25, 2018. It comprises high-quality research by academics and industrial experts in the field of computing and communication,

including full-length papers, research-in-progress papers, case studies related to all the areas of data mining, machine learning, IoT and information security.

Expressive Discourse - Jeanette Harris 1990

Working with Words - Ruth Gairns 1986-05-15

Covers grammar, punctuation, and usages, and offers advice on avoiding pompous, muddled, sexist, or racist language
Volume 8 - Staff Cybaris
2017-09-13

The student-edited law review is published twice annually. Members of the Mitchell Hamline Intellectual Property Institute's Board of Advisors provide critical oversight to ensure the articles are of the highest academic quality. This combined effort makes Cybaris(R) a valuable resource for legal practitioners, scholars, and lawmakers. Volume 7 covers a variety of pressing intellectual property topics facing inventors, artists, and intellectual property attorneys today. In particular,

Downloaded from
test.unicaribe.edu.do on
by guest

readers can expect to find topics authored by practitioners, students, and government employees. These articles will tackle public policy, case law, and evolving legislation. Cybaris(R) is continually looking for new ways to reach readers. Our online issue and social media will allow the law review to reach new audiences in an interactive, approachable manner. Overall, the goal is to make Cybaris(R) a dialogue on contemporary issues in intellectual property law.

Teaching English

Pronunciation at the Secondary School Level - Karolina

Janczukowicz 2014-07-30

This book aims to aid English teachers at the junior and senior secondary school levels in teaching pronunciation within a regular EFL syllabus. It presents such a way of incorporating the phonetic and lexical components so as to facilitate students' acquisition of a standard phonetic system and to prevent them from forming habitual mistakes in individual words. It highlights

key areas of the English phonetic system and provides examples of strategies how to use a course-book for the sake of teaching pronunciation. The discussion of teaching the phonetic system relies on the comparison between its conscious and unconscious acquisition. Teaching individual vocabulary items (especially reversing habitual mispronunciations) is analysed through contrasting mental and behavioural learning.

Advances in

Electromechanical

Technologies - V. C. Pandey

2020-09-24

This book comprises select peer-reviewed papers from the International Conference on Emerging Trends in Electromechanical Technologies & Management (TEMT) 2019. The focus is on current research in interdisciplinary areas of mechanical, electrical, electronics and information technologies, and their management from design to market. The book covers a wide range of topics such as

*Downloaded from
test.unicaribe.edu.do on

computer integrated manufacturing, additive manufacturing, materials science and engineering, simulation and modelling, finite element analysis, operations and supply chain management, decision sciences, business analytics, project management, and sustainable freight transportation. The book will be of interest to researchers and practitioners of various disciplines, in particular mechanical and industrial engineering.

Syntax-based Statistical Machine Translation - Philip Williams 2016-08-01

This unique book provides a comprehensive introduction to the most popular syntax-based statistical machine translation models, filling a gap in the current literature for researchers and developers in human language technologies. While phrase-based models have previously dominated the field, syntax-based approaches have proved a popular alternative, as they elegantly solve many of the shortcomings of phrase-based models. The

heart of this book is a detailed introduction to decoding for syntax-based models. The book begins with an overview of synchronous-context free grammar (SCFG) and synchronous tree-substitution grammar (STSG) along with their associated statistical models. It also describes how three popular instantiations (Hiero, SAMT, and GHKM) are learned from parallel corpora. It introduces and details hypergraphs and associated general algorithms, as well as algorithms for decoding with both tree and string input. Special attention is given to efficiency, including search approximations such as beam search and cube pruning, data structures, and parsing algorithms. The book consistently highlights the strengths (and limitations) of syntax-based approaches, including their ability to generalize phrase-based translation units, their modeling of specific linguistic phenomena, and their function of structuring the search space.

Teaching American English
Pronunciation - Oxford
Handbooks for Language
Teachers - Susan Ehrlich
2013-05-20

As an ESL teacher, have you looked at the phonetics textbooks on the market and decided that they don't directly address your needs? Unlike pronunciation books aimed at students of linguistics or at learners of English, Teaching American English

Pronunciation has been written specifically for ESL teachers. It doesn't only give academic descriptions, but also helps you to improve your students' pronunciation effectively.

Gloria Naylor - Henry L. Gates
1999-08-01

In the history of the African-American literary tradition, perhaps no author has been immersed in the formal history of that tradition than Gloria Naylor. As an undergraduate student of Afro-American literature at Brooklyn College and a graduate student of Afro-American studies at Yale, Naylor has analyzed the works of her male and female

antecedents in a manner that was impossible before the late seventies. And, while she is a citizen of the republic of literature in the broadest and most cosmopolitan sense, her work suggest formal linkage to that of Ann Petry, James Baldwin, and, more recently, Toni Morrison. -- from the Preface by Henry Louis Gates, Jr.

**Non-Native Language
Teachers** - Enric Llorca
2006-06-09

As non-natives are increasingly found teaching languages, particularly English, both in ESL and EFL contexts, the identification of their specific contributions and their main strengths has become more relevant than ever. This volume provides different approaches to the study of non-native teachers: NNS teachers as seen by students, teachers, graduate supervisors, and by themselves. It contributes seldom-explored perspectives, like classroom discourse analysis, and social-psychological framework to discuss conceptions of NNS
