The Curious Incident of the Dog in the Night-Time -

Mark Haddon 2009-02-24

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and

admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing.

Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of

exceptional literary merit that is great fun to read.

Rethinking Writing - Roy Harris 2005-03-01

The traditional Western view of writing, from Aristotle down to the present day, has treated the written word as a visual substitute for the spoken word. The eminent Swiss linguist Ferdinand de Saussure (1857-1913) was the first to provide this traditional assumption with a reasoned basis by incorporating it into a more general theory of signs. In the wake of Saussure's work, modern linguistics has ignored or marginalized writing in favour of the study of speech. In all literate societies, however, speech in turn is interpreted by reference to the culturally dominant writing system. This puts in place a system of educational values which ensures that the more

literate members of society maintain superiority over the less literate, and at the same time establishes a hierarchy among literate societies which favours the local product (alphabetic scripts in the Western Case). Roy Harris shows that the theory of writing adopted in modern linguistics is deeply flawed. Reversing the orthodox priorities, the author argues that writing is a far more powerful mode of linguistic communication than speech could ever be. His book is a major contribution to current debates about human communication written and spoken.
