Echoes of the Word - Enzo Bianchi 2013-09-01

"Abba, give me a word!" So young monks and visitors to desert monasteries would address an elder at the beginning of the 4th century. These seekers believed that a word originating outside oneself would descend into the heart and give direction to one's inner life. Enzo Bianchi has tried to let himself be guided by this tradition in Words of Spirituality and Hope. These "words" are not listed alphabetically or by theme. They are arranged to take you on a journey. Through the use of allusions and cross-references, one term evokes another, explains it in part, and sets aside some elements of its definition to be taken up further on. At the heart of the book is the conviction that life has meaning: it is not our task to invent or determine that meaning but simply to discover it - present and active - in and around us.

Weiss's Herbal Medicine - Rudolf Fritz Weiss 2001

The classic edition is back! First published in 1988, Weiss's Herbal Medicine is revered by herbalists and medical professionals alike as the seminal work in the field of phytotherapy. This book has established itself as an indispensable resource and is widely acknowledged as the key text in the field of medical herbalism. You will find clear, detailed information on treating conditions ranging from colds and influenza to rheumatic problems, metabolic and endocrine disorders, cancer, and much more. Conveniently arranged by organ system, the text provides guidelines for prescribing herbal remedies, with sections on dosage, application, and precautionary measures. Plus, for each plant discussed, you will find lists of their occurrence, botanical features, differentiation from related species, constituents, and medical benefits. Proprietary formulations, full references, and a comprehensive subject index of almost 2,000 entries round out the superb coverage! Weiss's life's work examines the subject of herbal medicine from both a clinical and practical viewpoint, incorporating his personal observations and clinical experience with scientific studies. This material formed the basis of Herbal Medicine, 2E,

also by Thieme. The second edition, revised, expanded and modernized by Volker Fintelmann, streamlines the work into a more clinical text, incorporating the latest scientific research and Commission E findings on the efficacy of herbs. This edition is recommended for allopathic physicians and other medical professionals who are new to the field of herbal medicine. Professor Rudolf Fritz Weiss (1895-1991) is highly regarded as the founding father of modern German phytotherapy. He studied botany and medicine at the University of Berlin, qualifying as a doctor in 1922 and subsequently taking additional qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the German Commission E in 1978. He was founder and editor of the Zeitschrift fuer Phytotherapie, and lectured on current advances in the subject at the University of Tuebingen.

Fitofarmacovigilanza - F. Capasso 2007-02-10

L'uso dei fitoterapici è oggi diffuso in ampi strati della popolazione per risolvere problemi sia acuti che cronici, sia banali che molto seri, e per scopi salutistici. Sappiamo che i fitoterapici si possono ottenere senza una prescrizione medica, e che si trovano, oltre che in farmacia, anche in erboristeria e nei supermercati come integratori alimentari. E' fondamentale quindi sorvegliare sulla sicurezza di questi prodotti attraverso la fitofarmacovigilanza, che richiede conoscenze approfondite circa la natura del fitoterapico, i suoi componenti chimici ed il modo in cui questo è stato preparato ed usato. Medici, farmacisti, erboristi, e i consumatori stessi troveranno in questo manuale utili informazioni sulle reazioni avverse (ADRs) da fitoterapici; le industrie del settore erboristico, e soprattutto il legislatore e gli organi deputati al controllo troveranno stimoli per migliorare la sicurezza d'uso di questi farmaci naturali.

La fitoterapia in uno sguardo - Francesco Capasso 2009-01-09

Le droghe vegetali, a differenza dei farmaci di sintesi (o artificiali), contengono più sostanze farmacologicamente attive: tra queste si stabiliscono dei sinergismi e degli antagonismi che caratterizzano l'azione terapeutica del preparato vegetale (fitoterapico). Tuttavia, per molte droghe vegetali queste interazioni non sono state ancora del tutto chiarite e tuttora se ne ignora il meccanismo d'azione. Non lasciamoci però travolgere dal pregiudizio che tutto ciò che non è spiegabile con le teorie correnti è eretico. Questo volume sintetizza nozioni di fitoterapia;

l'intento è di offrire al medico delle conoscenze essenziali affinché possa agevolmente prescrivere prodotti vegetali e di stimolare farmacista ed erborista ad impiegarli in modo più razionale.

Digitisation Perspectives - R. Rikowski 2011-07-22

This book examines various views and perspectives on digitisation. Topics covered include electronic theses, search engine technology, digitisation in Africa, citation indexing, reference services, the Scholarly Publishing and Academic Resources Coalition, new media and scholarly publishing. The final chapter explores virtual libraries, and poses some interesting questions for possible futures. The book will be of particular interest to information professionals, educators, librarians, academics and I.T. and knowledge experts.

Doctor and Patient - Pedro Laín Entralgo 1969

This book examines the history of the doctor-patient relationship and the author gives his opinion on how it should be shaped in the future.

Natriuretic Peptides - Aldo Clerico 2006-07-06

The rapid evergrowing knowledge in the field of neuro-humoral regulation of cardiovascular pathophysiology is changing the picture of current diagnosis and treatment of cardiac patients. The emerging conceptual revolutionary idea is that heart acts not as a pump, merely, but as a "gland", that is as a regulator of circulatory homeostasis and salt-water balance. Cardiovascular pathophysiology has to be written, indeed, on this basis: no physiology textbook is up-to-date in describing the complexity and novelty of actual knowledge. The platea of either physiologists or clinicians involved in the study of the cardiovascular system and care of heart patients will accept with favour such an approach, combining the classical hemodynamic view with the new neuro-hormonal paradigm.
