## **Federal Information Sources and Systems** - 1976

Includes subject, agency, and budget indexes.

## **Secondary School External Examination Systems** - Barend Vlaardingerbroek 2009

Summative assessment has been a contentious issue in educational circles for several decades, particularly high-stakes assessment events which arise at various junctures of the school cycle, especially those at the end of it. The French Baccalaureat and English A-Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people's lives, as their outcomes are principal determinants of young people's future prospects. These examinations are external--they are devised, conducted and processed by agencies outside the schools, usually ministerial examination units. As such, they act as 'blind' arbiters of student achievement, providing the proverbial 'level playing field' which ensures the comparability of outcomes. In the pyramidal school structures of yesteryear, examinations acted as filters, regulating the progression of pupils to subsequent tiers of formal education. Exit points occurred from primary school level up, from where unsuccessful candidates could enter the labour force and/or embark on occupationally specific further education and training. With the modernisation of the labour market and an ever-higher social demand for access to higher levels of formal

education, the filtering function of examinations at lower levels of schooling has been gradually eroded, while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems (including the modification and, in some instances, abandonment of external examinations). This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling. Following an introduction by Stephen P. Heyneman of World Bank repute, there are sixteen chapters presenting Country Case Studies, which have been written up under common subheadings, thereby highlighting the comparative nature of the work and facilitating cross-referencing. The subsequent four chapters elaborate on the theme of 'external examinations beyond national borders', including a contribution by the International Baccalaureate Organisation. A defining feature of the work is the attention it pays to what it calls the 'nuts and bolts' of external examinations, from question-setting to grading procedures. These are, it is argued, instrumental in nurturing and maintaining public confidence in external examinations. The book will be of immense value to people involved in educational policy studies, especially strategic educational planning, as well as those directly concerned with formal assessment. The work has been written to appeal to a wide audience of informed persons--it is accessible to teachers and interested laypeople, as well as to academics."

## **Advanced Information Systems Engineering** - Selmin Nurcan 2016-05-26

This book constitutes the proceedings of the 28th International Conference on Advanced Information Systems Engineering, CAiSE 2016, held in Ljubljana, Slovenia, in June 2016. Innovation, Gamification, Mining and Business Process Performance, Requirements Engineering, Process Mining, Conceptual Modeling, Mining and Decision Support, Cloud and Services, Variability and Configuration, Open Source Software, and Business Process Management.

## **CIMA Official Learning System Test of Professional Competence in Management Accounting** - Nick Best 2009-07-18

CIMA Official Learning Systems are the only textbooks recommended by CIMA as core reading. Written by the CIMA examiners, markers and lecturers, they specifically prepare students to pass the CIMA exams first time. Fully updated to reflect the 2010 syllabus, they are crammed with features to reinforce learning, including: - step by step coverage directly linked to CIMA's learning outcomes - fully revised examples and case studies - extensive question practice to test knowledge and understanding - integrated readings to increase understanding of key theory - colour used throughout to aid navigation \* The Official Learning systems are the only study materials endorsed by CIMA \* Key sections written by former examiners for the most accurate, up-to-date guidance towards exam success \* Complete integrated package incorporating syllabus guidance, full text, recommended articles, revision guides and extensive question practice **International Handbook of Accounting Education and Certification** - Kwabena Anyane-Ntow 2014-06-28

This is the first work of its kind. Original contributions from leading academicians, practitioners and accounting associations from around the world make this handbook a unique source of information on international accounting education and certification processes. A uniform format in most of the chapters allows for easy comparison between countries. This volume documents the development of accounting education and practice at country and global levels; studies the sensitivity of accounting education and practices to the unique socio-economic needs of its environment; and allows comparative studies at a time when attempts have begun to harmonize accounting education internationally. Most importantly, it shows how educational programmes around the world are preparing future accounting professionals to deal with the rapid technological and environmental changes of the 21st century.

*Advanced Information Systems Engineering* - Anne Persson 2004-05-25

The 16th CAiSE 2004 was the 16th in the series of International Conferences on Advanced Information Systems Engineering. In the year 2004 the conference was hosted by the Faculty of Computer Science and Information Technology, Riga Technical University, Latvia. Since the late 1980s, the CAiSE conferences have provided a forum for the presentation and exchange of research results and practical experiences within the field of Information Systems Engineering. The conference theme of CAiSE 2004 was Knowledge and Model Driven Information Systems Engineering for Networked Organizations. Modern businesses and IT systems are facing an ever more complex environment characterized by openness, variety, and change. Organizations are becoming less self-sufficient and increasingly dependent on business partners and other actors. These trends call for openness of business as well as IT systems, i.e. the ability to connect and interoperate with other systems. Furthermore, organizations are experiencing ever more variety in their business, in all conceivable dimensions. The different competencies required by the workforce are multiplying. In the same way, the variety in technology is overwhelming with a multitude of languages, platforms, devices, standards, and products. Moreover, organizations need to manage an environment that is constantly changing and where lead times, product life cycles, and partner relationships are shortening. The demand of having to constantly adapt IT to changing technologies and business practices has resulted in the birth of new ideas which may have a profound impact on the information systems engineering practices in future years, such as autonomic computing, component and services marketplaces and dynamically generated software.

**Research in Library and Information Science** - Gale Fox 2018-01-21

Librarianship is one of the world's oldest and most successful professions. It has survived war, plague, economic depression, and varying social values and conditions. The profession has shown an extraordinary ability to adapt to changing social and economic conditions and to adapt changing technologies to serve a variety of people with diverse interests and needs. *CIM Coursebook 01/02 Management Information for Marketing Decisions* - Graham Axelby 2013-10-28

'Management Information for Marketing Decisions 2001-2002' is a specifically tailored coursebook for students undertaking the Management Information for Marketing Decisions module of the CIM Advanced Certificate. Butterworth-Heinemann have worked closely with the Education Division of the CIM to ensure that all aspects of the text are up-to-date and correspond to the CIM's requirements, making this title the definitive companion to this year's course. Its comprehensive content and user-friendly text layout are designed to facilitate learning, with questions, activities, definitions and study tips to support the theory,

while the structured study units link the information directly to the CIM syllabus. The new edition of this text contains: · a firmly international perspective · new material to cover e-marketing issues, the basic concepts of management information systems, emerging accounting techniques and the application of market research · a completely revised Continuous Assessment unit · new and up to date examples and case studies to illustrate the theory · additional text references and website references · preparatory aids for the final exam, including the most recent exam papers, examiners' marking schemes and specimen answers. Comprehensive yet uniquely accessible, it provides essential support for anyone undertaking a CIM course. [Excel Mastering the HSC Maximising Your UAI](#) - Peter Sheahan 2002

*Advances in Computer and Computational Sciences* - Sanjiv K. Bhatia 2017-10-03

Exchange of information and innovative ideas are necessary to accelerate the development of technology. With advent of technology, intelligent and soft computing techniques came into existence with a wide scope of implementation in engineering sciences. Keeping this ideology in preference, this book includes the insights that reflect the 'Advances in Computer and Computational Sciences' from upcoming researchers and leading academicians across the globe. It contains high-quality peer-reviewed papers of 'International Conference on Computer, Communication and Computational Sciences (ICCCS 2016), held during 12-13 August, 2016 in Ajmer, India'. These papers are arranged in the form of chapters. The content of the book is divided into two volumes that cover variety of topics such as intelligent hardware and software design, advanced communications, power and energy optimization, intelligent techniques used in internet of things, intelligent image processing, advanced software engineering, evolutionary and soft computing, security and many more. This book helps the perspective readers' from computer industry and academia to derive the advances of next generation computer and communication technology and shape them into real life applications.

**ACCA Paper P5 - Advanced Performance Management Practice and revision kit** - BPP Learning Media 2013-01-01

The examiner-reviewed P5 Practice and Revision Kit provides invaluable guidance on how to approach the exam and contains past ACCA exam questions for you to try. The examiner has emphasised that simply understanding the advantages and disadvantages of different performance management approaches will not be sufficient to pass the exam. You must apply specific knowledge to the scenarios in the exam questions. The questions in the Practice and Revision Kit reflect the scenario-based questions you will find on the exam.

**Advanced Methodologies and Technologies in System Security, Information Privacy, and Forensics** - Khosrow-Pour, D.B.A., Mehdi 2018-10-05

Cyber-attacks are rapidly becoming one of the most prevalent issues globally, and as they continue to escalate, it is imperative to explore new approaches and technologies that help ensure the security of the online community. Beyond cyber-attacks, personal information is now routinely and exclusively housed in cloud-based systems. The rising use of information technologies requires stronger information security and system procedures to reduce the risk of information breaches. *Advanced Methodologies and Technologies in System Security, Information Privacy, and Forensics* presents emerging research and methods on preventing information breaches and further securing system networks. While highlighting the rising concerns in information privacy and system security, this book explores the cutting-edge methods combatting digital risks and cyber threats. This book is an important resource for information technology professionals, cybercrime researchers, network analysts, government agencies, business professionals, academicians, and practitioners seeking the most up-to-date information and methodologies on cybercrime, digital terrorism, network security, and information technology ethics.

*Accounting and Financial System Reform in Eastern Europe and Asia* - Robert W. McGee 2006-03-14

Much has been written about the economic and political problems of countries that are in the process of changing from centrally planned systems to market systems. Most studies have focused on the economic, legal, political and sociological problems these economies have had to face during the transition period. However, not much has been written about the dramatic changes that have to be made to the accounting and financial system of a transition economy. This book was written to help fill that gap. This book is the

second in a series to examine accounting and financial system reform in transition economies. The first book used Russia as a case study. The present volume in the series examines some additional aspects of the reform in Russia and also looks at the accounting and financial system reform efforts that are being made in Ukraine, Bosnia & Herzegovina, Armenia and five Central Asian republics.

CIMA Official Exam Practice Kit Performance Strategy - Stephen Foster 2009-07-29
