Presents state-of-the-art research into leaf interactions with light, for scientists working in remote sensing, plant physiology, ecology and resource management.

Life After Life - Kate Atkinson 2013-04-02

What if you could live again and again, until you got it right? On a cold and snowy night in 1910, Ursula Todd is born to an English banker and his wife. She dies before she can draw her first breath. On that same cold and snowy night, Ursula Todd is born, lets out a lusty wail, and embarks upon a life that will be, to say the least, unusual. For as she grows, she also dies, repeatedly, in a variety of ways, while the young century marches on towards its second cataclysmic world war. Does Ursula's apparently infinite number of lives give her the power to save the world from its inevitable destiny? And if she can -- will she? Darkly comic, startlingly poignant, and utterly original -- this is Kate Atkinson at her absolute best.

Understanding Psychrometrics - D. P. Gatley 2013

"Updates the second edition to provide readers a reference that agrees with the latest international standards. The third edition also includes a revised equation for the adiabatic saturation process, an summary of the 2009 RP-1485 ASHRAE research, as well as minor edits to the text"

Engineering and Management of Data Centers - Jorge Marx Gómez 2017-11-10

This edited volume covers essential and recent development in the engineering and management of data centers. Data centers are complex systems requiring ongoing support, and their high value for keeping business continuity operations is crucial. The book presents core topics on the planning, design, implementation, operation and control, and sustainability of a data center from a didactical and practitioner viewpoint. Chapters include: · Foundations of data centers: Key Concepts and Taxonomies · ITSDM: A Methodology for IT Services Design · Managing Risks on Data Centers through Dashboards · Risk Analysis in Data Center

Disaster Recovery Plans · Best practices in Data Center Management Case: KIO Networks · QoS in NaaS (Network as a Service) using Software Defined Networking · Optimization of Data Center Fault-Tolerance Design · Energetic Data Centre Design Considering Energy Efficiency Improvements During Operation · Demand-side Flexibility and Supply-side Management: The Use Case of Data Centers and Energy Utilities · DevOps: Foundations and its Utilization in Data Centers · Sustainable and Resilient Network Infrastructure Design for Cloud Data Centres · Application Software in Cloud-Ready Data Centers This book bridges the gap between academia and the industry, offering essential reading for practitioners in data centers, researchers in the area, and faculty teaching related courses on data centers. The book can be used as a complementary text for traditional courses on Computer Networks, as well as innovative courses on IT Architecture, IT Service Management, IT Operations, and Data Centers.

China's Outbound Tourism - Wolfgang Arlt
2006-09-27

The People's Republic of China has changed from a country which actively discouraged tourism into one of the major source markets for the international industry; the 35 million Chinese travelling across the border in 2005 are merely the tip of the iceberg. China's Outbound Tourism is the first book on this major development and has been written using a multitude of sources from China and around the world. The topic is approached from many angles, using methods from the fields of economics, political sciences, sociology and cross-cultural studies. The book explains the economic and social background of the surge in tourism and the changes in policy in the country since 1949, when it moved from prevention through controlled development to encouragement of outbound travels. Throughout the book, facts and figures are given for the global development as well as in-depth information about China's key destinations. The growing importance of tourists from China is however not just a question of quantity; the text explains the features which distinguish their travel motivations and behaviours from 'western' and Japanese tourists, and the consequences for product adaptation and marketing methods for

destinations interested in attracting and satisfying Chinese tourists. Arlt's groundbreaking book cannot be ignored by professionals, academics and students of tourism and leisure; it offers fresh insight into the topic and indicates some of the future lines of development in this area.

Information Communication Technologies and City Marketing: Digital Opportunities for Cities Around the World - Gascón-Hernandez, Mila 2009-02-28

Examines how ICTs contribute to the development of city marketing strategies to enhance local socio-economic development. Covers topics such as city branding, export promotion, and industry marketing.

Aerosol Optics - Alexander A. Kokhanovsky
2008-03-18

This new text offers experienced students a comprehensive review of available techniques for the remote sensing of aerosols. These small particles influence both atmospheric visibility and the thermodynamics of the atmosphere. They are also of great importance in any consideration of climate change problems. Aerosols may also be responsible for the loss of harvests, human health problems and ecological disasters. Thus, this detailed study of aerosol properties on a global scale could not be more timely.

Usage-Based Perspectives on Second Language Learning - Teresa Cadierno 2015-10-16

This edited volume brings together perspectives that find mutual kinship in a view of language as an embodied, semiotic, symbolic tool used for communicative and interactional purposes and an understanding of language use as the preeminent condition for language learning - perspectives that we conjoin under the umbrella term of usage based perspectives.

Migrants, Asylum Seekers, and Refugees - Chigozie Nnebedum 2021-02-12

This book is a call for solidarity, to stand with all people facing the many challenges of forced migration. Based on a qualitative methodology, sources within the book are taken from a European setting, focusing on African migrants, with special attention to the Nigerian community. The response of the Catholic Church to problems caused by migrations is analyzed and discussed with reference to Sollicitudo Rei

Socialis, which presents the required alertness and stimuli actions to be taken by all.

Tropes of Transport - Katrin Pahl 2012-02-29
Intervening in the multidisciplinary debate on emotion, *Tropes of Transport* offers a fresh analysis of Hegel's work that becomes an important resource for Pahl's cutting-edge theory of emotionality. If it is usually assumed that the sincerity of emotions and the force of affects depend on their immediacy, Pahl explores to what extent mediation—and therefore a certain degree of manipulation but also of sympathy—is constitutive of emotionality. Hegel serves as a particularly helpful interlocutor not only because he offers a sophisticated analysis of mediation, but also because, rather than locating emotion in the heart, he introduces impersonal tropes of transport, such as trembling, release, and shattering.

Analysis of Chemical Contaminants in Food - Claudio Medana 2020-07-03

How many times have we thought with concern about the possible contamination of food? Pollution, agricultural treatments, technological treatments, and packaging are the best-known human sources of toxic substances as food contaminants. The present book contains 11 original research papers representing various approaches of identifying and measuring toxic residues in food materials. The analytical determination of food contaminants is an indispensable tool in characterizing the adverse effects and unexpected toxicity related to food intake. No risk assessment would be possible without data from the analysis of food contaminants. This Special Issue is an interesting overview of recent methods and is highly representative of a broad worldwide outline, collecting authors from ten different countries and four continents. Very different toxics are described, from volatile organic compounds to heavy metals and from highly polar chemicals to classical organic contaminants. A wide range of analytical techniques are portrayed, including sample preparation and clean-up methodologies, classical chromatographic and hyphenated spectroscopies, and the latest high-resolution mass spectrometry applications. The presented works consider a varied selection of foods: the

studied matrices are meat, fishery products, fruits, and miscellaneous beverages.

How to Be A Travel Writer - Don George 2017-07-01

Methods and Concepts of Land Management: Diversity, Changes and New Approaches - Erwin Hepperle 2020-10-08

The peer reviewed papers in this new volume of the European Academy of Land Use and Development (EALD) inform about investigations on the common subject «land management» - due to the interdisciplinary nature of the EALD from very different views. The spectrum of contributions covers regulations, governance and the implementation of land management as well as the assessment of relevant data supporting these tasks. Various approaches, methods, systems and understanding of the government's role in the different countries of Europe are highlighted. Committed to sustainability, the articles give evidence that Europe provides an experimental field for land management issues, and they enable to increase knowledge of new practices, to verify them and to learn from each other.

Czech-German Relations and the Politics of

Central Europe - J. Tampke 2002-12-10

In the aftermath of World War Two, approximately three million Sudeten-Germans were expelled from their homes in the former Czechoslovakia because of their part in the dismemberment of the Czechoslovak Republic by Nazi Germany in 1938-39. For many years their representatives, the Sudeten-German Association, attempted in vain to redress the

wrong done to their people. However, the end of the Cold War has given a new impetus to their campaign. Currently they attempt to block Czech entry into the EU unless there is restitution of confiscated properties. Jürgen Tampke tells the story of the Sudeten-Germans from the beginning of their settlement seven hundred years ago in what is now the Czech Republic to current times.

Wicket in Action - Eelco Hillenius 2008-07-31

There are dozens of Java frameworks out there, but most of them require you to learn special coding techniques and new, often rigid, patterns of development. Wicket is different. As a component-based Web application framework, Wicket lets you build maintainable enterprise-grade web applications using the power of plain old Java objects (POJOs), HTML, Ajax, Spring, Hibernate and Maven. Wicket automatically manages state at the component level, which means no more awkward HttpSession objects. Its elegant programming model enables you to write rich web applications quickly. Wicket in Action is an authoritative, comprehensive guide for Java developers building Wicket-based Web applications. This book starts with an introduction to Wicket's structure and components, and moves quickly into examples of Wicket at work. Written by two of the project's earliest and most authoritative experts, this book shows you both the "how-to" and the "why" of Wicket. As you move through the book, you'll learn to use and customize Wicket components, how to interact with other technologies like Spring and Hibernate, and how to build rich, Ajax-driven features into your applications. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

Principles of Fuel Cells - Xianguo Li

2005-12-22

The book is engineering oriented and covers a large variety of topics ranging from fundamental principles to performance evaluation and applications. It is written systematically and completely on the subject with a summary of state-of-the-art fuel cell technology, filling the need for a timely resource. This is a unique book serving academic researchers, engineers, as well as people working in the fuel cell industry. It is

also of substantial interest to students, engineers, and scientists in mechanical engineering, chemistry and chemical engineering, electrochemistry, materials science and engineering, power generation and propulsion systems, and automobile engineering.

The Social and Behavioural Aspects of Climate Change - Pim Martens 2017-09-08

Over the past few years, and certainly since the publication of the "Stern Report", there has been increasing recognition that climate change is not only an environmental crisis, but one with important social and economic dimensions. There is now a growing need for multi-disciplinary research and for the science of climate change to be usefully translated for policy-makers. Until very recently, scientific and policy emphasis on climate change has focused almost exclusively on mitigation efforts: mechanisms and regulations to reduce greenhouse gas emissions. The success of such efforts to date is debatable. In fact, the impact of ever more stringent emission control programmes could potentially have enormous social consequences. Little effort has been expended on the exploration of a systematic evaluation of climate stabilization benefits or the costs of adapting to a changed climate, let alone attempting to integrate different approaches. There is an increasing recognition that the key actors in the climate crisis also need to be preparing for change that is unavoidable. This has resulted in a greater consideration of vulnerability and adaptation. The book, based on the research programme "Vulnerability, Adaptation and Mitigation" (VAM) which ran from 2004 to 2010, funded by the Netherlands Organisation for Scientific Research (NWO), presents a cluster of case studies of industries, communities and institutions which each show how vulnerability, adaptation and mitigation analyses can be integrated using social behavioural sciences. Each chapter makes specific recommendations for the studied industry sector, community or institution, analyses the latest research developments of the field and identifies priorities for future research. The book argues that the inherent complexity of climate change will ultimately require a much more integrated response both scientifically - to better understand multiple causes and impacts -

as well as at the scientific/policy interface, where new forms of engagement between scientists, policy-makers and wider stakeholder groups can make a valuable contribution to more informed climate policy and practice. The book is particularly timely as the scientific research and policy debate is shifting from one of problem-framing to new agendas that are much more concerned with implementation, the improvement of assessment methodologies from a multi-disciplinary perspective, and the reframing of current scientific understanding towards mitigation, adaptation and vulnerability. A critical element in responding to the climate change challenge will be to ensure the translation of these new scientific insights into innovative policy and practice "on the ground". This book provides some fundamental elements to answer this need. The Social and Behavioural Aspects of Climate Change: Linking Vulnerability, Adaptation and Mitigation will be essential reading for social science researchers and policy managers in the area of climate change, as well as for those who want to know what the social and behavioural sciences can contribute toward coping with climate hazards. NGOs, law firms and businesses in the energy sector or other climate related fields will also find the book of great value.

Bibliographie nationale française - 1999

Pompeii's Ashes - Eric Moormann 2015-03-10

Although there are many works dealing with Pompeii and Herculaneum, none of them try to encompass the entire spectrum of material related to its reception in popular imagination. Pompeii's Ashes surveys a broad variety of such works, ranging from travelogues between ca. 1740 and 2010 to 250 years of fiction, including stage works, music, and films. The first two chapters provide an in-depth analysis of the excavation history and an overview of the reflections of travelers. The six remaining chapters discuss several clearly-defined genres: historical novels with pagan tendencies, and those with Christians and Jews as protagonists, contemporary adventures, time traveling, mock manuscripts, and works dedicated to Vesuvius. "Pompeii's Ashes" demonstrates how the eternal fascination with the oldest still-running archaeological projects in the world began,

developed, and continue until now.

WASABI - Christian Becker-Asano 2008

Integration and Resettlement of Refugees and Forced Migrants - Karen Jacobsen 2020-02-13

Since 2017, the United States and Europe—among many other refugee-hosting countries—have made significant changes in their refugee policies. New visa restrictions, travel bans, and other regulations were imposed by national governments. At the local level, towns and cities responded in different ways: some resisted national policy by declaring themselves “sanctuary cities”, while others supported exclusionary policies. These different responses influenced refugees’ ability to settle and become integrated. The Refugees in Towns (RIT) project at Tufts University explores local urban integration experiences, drawing on the knowledge and perspectives of refugees and citizens in towns around the world. Since 2017, more than 30 RIT case studies have deepened our local knowledge about the factors that enable or obstruct integration, and the ways in which migrants and hosts co-exist, adapt, and struggle with integration. In this Special Issue, seven articles explore urban integration in towns in Europe (Frankfurt-Rödelheim, Germany; Newcastle, UK; Ambertois, France; Italy’s cities; and Belgrade, Serbia) and in North America: Bhutanese refugee-hosting US cities, and Antigonish, Canada. The papers explore how refugees and citizens interact; the role of officials and politicians in enabling or obstructing integration; the social, economic, and cultural impact of migration; and the ways—inclusive or exclusive—locals have responded.

The Widening Circle - Polly Murray

1996-04-15

The first person to focus attention on Lyme

disease, Polly Murray tells the harrowing story of her early efforts to identify what was making her family so sick-- and their battle with the illness over a twenty-year period. In Lyme, Connecticut, in 1965, Polly Murray, her husband, and their four children led an almost picture-perfect life. But Polly began to be plagued by mysterious ailments, and as the rest of her family started to experience similar symptoms, she knew something was terribly wrong. When doctor after doctor failed to explain what was happening to them, Polly was forced to confront disbelief, lack of caring, and, eventually, apathy on the part of the medical establishment, all the while suffering herself. Her personal investigation into the cause of her family's illness, which became as passionate as a detective's, eventually initiated a medical investigation that led to the 1982 discovery by Dr. Willy Burgdorfer of the dangerous bacteria that causes Lyme disease. Polly tells her tale from the viewpoint of a patient who was a pioneer in the medical recognition of Lyme disease. Lyme disease remains a poorly diagnosed, controversial illness. Lyme victims and their families can take hope from Polly's courageous and inspiring story.

The Nature of Purchasing - Florian Schupp 2020-05-20

This book was created in the spirit of learning from nature in the field of professional purchasing. It describes real-world purchasing problems faced by companies as well as individuals and presents natural hands-on solutions that apply scientific approaches. The book answers what the core of purchasing could be, the inner structure of it or in other words the natural way. Nature masters effectiveness based on immanent laws and ensures efficiency by best results for minimal invest. Especially in complex and ambiguous situations, purchasers benefit from this book by understanding the broader context with the help of recent scientific research. Focusing on the problems that purchasers face in managerial practice rather than oversimplified generalizations, the book features step-by-step explanations, allowing readers to find tailored solutions to address challenges in key purchasing areas. The book was written in collaboration and with the help of experts in purchasing and logistics, biology, law

and economics, human resource development, media and sports, and merges perspectives from theory and practice to provide natural strategies for purchasers.

Whitaker's Books in Print - 1998

Tourism and the Anthropocene - Martin Gren
2015-11-06

This book brings the field of tourism into dialogue with what is captured under the varied notions of the Anthropocene. It explores issues and challenges which the Anthropocene may pose for tourism, and it offers significant insights into how it might reframe conceptual and empirical undertakings in tourism research. Furthermore, through the lens of the Anthropocene this book also spurs thinking of the role of tourism in relation to sustainable development, planetary boundaries, ethics (and what is framed as geo-ethics) and refocused tourism theory to make sense of tourism's earthly entanglements and thinking tourism beyond Nature-Society. The multidisciplinary nature of the material will appeal to a broad academic audience, such as those working in tourism, geography, anthropology and sociology.

Modern German Grammar - Ruth Whittle
2013-03-01

Modern German Grammar: A Practical Guide, Third Edition is an innovative reference guide to German, combining traditional and function-based grammar in a single volume. The Grammar is divided into two parts. Part A covers grammatical categories such as word order, nouns, verbs and adjectives. Part B is organised according to language functions and notions such as: making introductions asking for something to be done delivering a speech possibility satisfaction. The book addresses learners' practical needs and presents grammar in both a traditional and a communicative setting. New to this edition, and building on feedback from the previous edition: The rules of the latest (and so far final) spelling reform have been implemented throughout. Examples of usage have been updated and consideration given to Swiss and Austrian variants. The chapter on register has been expanded and now includes youth language and frequently used Anglicisms in German. The Index now has even more key words; it has also been redesigned to

differentiate between German words, grammar terms, and functions, thus making it more user-friendly. The Grammar assumes no previous grammatical training and is intended for all those who have a basic knowledge of German, from intermediate learners in schools and adult education to undergraduates taking German as a major or minor part of their studies. The Grammar is accompanied by a third edition of Modern German Grammar Workbook (ISBN 978-0-415-56725-1) which features exercises and activities directly linked to the Grammar. Ruth Whittle is Lecturer, John Klapper is Professor of Foreign Language Pedagogy, Katharina Glöckel is the Austrian Lektorin and Bill Dodd is Professor of Modern German Studies - all at the University of Birmingham. Christine Eckhard-Black is Tutor and Advisor in German at the Oxford University Language Centre.
