Garda Powers - Rebecca Coen 2014-01-30

The police force in Ireland - known as the Gardai ("Guardian") - are required to combine technical and legal proficiency in the prevention and detection of crime. Expected to intervene in every kind of emergency, Gardai investigate a diverse array of offenses, combining skills in crowd control, crime scene management, intelligence-gathering, and the collection and analysis of forensic evidence. In order to fulfill their various functions, the Gardai are vested with an extraordinary array of powers - powers which facilitate surveillance; the taking of forensic samples; photographs and fingerprints; stopping, searching, and arresting individuals; as well as searching homes and vehicles. Suspects are detained and questioned, children are taken into emergency care, mentally ill persons are taken into custody. Each situation is not only complicated on a human level, but on a legal level as well, as the powers exercised intersect with constitutional and legal rights to liberty, privacy, bodily integrity, freedom of association, and expression. In England and Wales, the Police and Criminal Evidence Act 1984 is accompanied by extensive PACE Codes of Conduct. There is a core framework of police powers and safeguards - clearly laid out - around stop and search, arrest, detention, investigation, identification, and interviewing detainees. However, in Ireland, an unwieldy array of legislation and case-law must be sifted through to decipher the applicable principles. The pace of legislative change in Irish criminal justice, combined with the practice of amending Acts piecemeal rather than by consolidation, makes identification of the extent and scope of the powers of the Gardai a challenge which is grappled with by Gardai and legal practitioners alike. This book examines Garda powers and the legal issues which arise in their exercise, with an emphasis on the practicalities of policing. The law is distilled to determine the origin of key powers and the pre-requisites and practical aspects of their lawful exercise. The approaches of the courts and police forces of other common-law jurisdictions to particular policing questions are considered. Best practice guidance has been incorporated, grounded in human rights principles and international standards.

Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Race, Criminal Justice, and Migration Control - Mary Bosworth 2018-01-10

In an era of mass mobility, those who are permitted to migrate and those who are criminalized, controlled, and prohibited from migrating are heavily patterned by race. By placing race at the centre of its analysis, this volume brings together fourteen chapters that examine, question, and explain the growing intersection between criminal justice and migration control. Through the lens of race, we see how criminal justice and migration enmesh in order to exclude, stop, and excise racialized citizens and non-citizens from societies across the world within, beyond, and along borders. Neatly organized in four parts, the book begins with chapters that present a conceptual analysis of race, borders, and social control, moving to the institutions that make up and shape the criminal justice and migration complex. The remaining chapters are convened around the key sites where criminal justice and migration control intersect: policing, courts, and punishment. Together the volume presents a critical and timely analysis of how race shapes and complicates mobility and how racism is enabled and reanimated when criminal justice and migration control coalesce. Race and the meaning of race in relation to citizenship and belonging is excavated throughout the chapters presented in the book, thereby transforming the way we think about migration.

PACE - Paul Ozin 2006

This book provides practical guidance on what remains the single most important statutory basis for police duties and powers in England and Wales, the Police and Criminal Evidence Act 1984 and its Codes of Practice. The law is explained in a clear, informative and accessible manner. With the aid of check-lists, flow-charts and illustrative examples, the book gives excellent guidance on how the procedures and requirements of the Act apply to common every day scenarios facing police officers and other persons charged with the investigation of offences. It alerts the reader to common problems and offers tips for dealing with them whilst also taking account of significant changes in this body of law introduced by the new Codes of Conduct and recent legislation including the Proceeds of Crime Act 2002, the Criminal Justice Act 2003 and the Serious Organised Crime and Police Act 2005. Although the emphasis is on practical guidance, the relevant legal principles and the most important case law are digested and summarised. The book includes the full text of the Act, as amended and the latest version of the Codes of Practice which were implemented on 1st January 2006. This is an essential reference source which the busy police officer or legal practitioner cannot afford to be without.

Code of Practice - Great Britain. Department of Health 2008

This Code of Practice is a reference tool for those dealing with, and caring for people admitted to hospital and care homes with mental health problems. Authored by the Department of Health and produced following wide consultation with those who provide and receive services under the Mental Health Act, this publication will come into force on 3 November 2008. Through the Mental Health Act 2007, the Government has updated the 1983 Act to ensure it keeps pace with the changes in the way that mental health services are - and need to be - delivered. This publication provides guidance and advice to registered medical practitioners, approved clinicians, managers and staff of hospitals, and approved mental health professionals on how they should proceed when undertaking duties under the Act. It also gives guidance to doctors and other professionals about certain aspects of medical treatment for mental disorder more generally. The Mental Health Act Code of Practice is also aimed at all of those working in primary care, Mental Health Trusts, NHS Foundation Trusts as well as solicitors and attorneys who advise on mental health law. The Code should also be beneficial to the police and ambulance services and others in health and social services (including the independent and voluntary sectors) involved in providing services to people who are, or may become, subject to compulsory measures under the Act. It will also be a guide for those working with people with specific mental health needs such as those in nursing and care homes, and those in prison.
