Unlocking English Learners' Potential - Diane Staehr Fenner 2017-04-18

"Schools are not intentionally equitable places for English learners to achieve, but they could be if the right system of support were put in place. Diane Staehr Fenner and Sydney Snyder recommend just such a system. Not only does it have significant potential for providing fuller access to the core curriculum, it also provides a path for teachers to travel as they navigate the individual needs of students and support their learning journeys." —Douglas Fisher, Coauthor of Visible Learning for Literacy A once-in-a-generation text for assisting a new generation of students Content teachers and ESOL teachers, take special note: if you're looking for a single

resource to help your English learners meet the same challenging content standards as their English-proficient peers, your search is complete. Students With Interrupted Formal Education - Brenda Custodio  
2017-02-23

New hope for our most vulnerable English learners  
“One of the guiding principles of effective English language teaching is for educators to know their students. And that in a nutshell captures the value of this book. . . . The compassion that Custodio and O’Loughlin feel for our SIFE students, the commitment they have to educating them well, and the comprehension they have of the assets these learners bring to the classroom are evident in the writing, tools, and vignettes they share.” -Deborah J. Short  
Under the best of circumstances, the academic demands of today’s classrooms can be daunting to our English learners. But for the tens of

thousands of newly arrived students with interrupted formal education, even the social challenges can be outright overwhelming. Rely on this all-in-one guide from Brenda Custodio and Judith O'Loughlin for expert insight on how to build the skills these students need for success in school and beyond. Inside you'll find Essential background on factors leading to interrupted education Specific focus on refugee children and Latino immigrants Guidance on building internal resilience for long-term social and emotional health Recommendations for creating supportive environments at the classroom, school, and district level About one thing, Brenda and Judith are absolutely convinced: our SIFE students can learn and make progress, often at a remarkable speed. But it's up to us, their educators, to provide the time, attention, and a specific focus. Consider this book your first step forward.

Funds of Knowledge - Norma Gonzalez 2006-04-21

The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what

these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms

of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education. Collaboration and Co-Teaching - Andrea Honigsfeld 2010-08-10 Help ELLs achieve success with an integrated, collaborative program! *Bilingual Education in the 21st Century* - Ofelia García  
2011-09-09  
Bilingual Education in the 21st Century examines languages and bilingualism as individual and societal phenomena, presents program types, variables, and policies in bilingual education, and concludes by looking at practices, especially pedagogies and assessments. This thought-provoking work is an ideal textbook for future teachers as well as providing a fresh view of the subject for school administrators and policy makers. Provides an overview of bilingual education theories and practices throughout the world Extends traditional conceptions of bilingualism and bilingual education to include global and local concerns in the 21st

century Questions assumptions regarding language, bilingualism and bilingual education, and proposes a new theoretical framework and alternative views of teaching and assessment practices

*Challenges for Language Education and Policy* - Bernard Spolsky  
2014-09-15  
Addressing a wide range of issues in applied linguistics, sociolinguistics, and multilingualism, this volume focuses on language users, the 'people.' Making creative connections between existing scholarship in language policy and contemporary theory and research in other social sciences, authors from around the world offer new critical perspectives for analyzing language phenomena and language theories, suggesting

new meeting points among language users and language policy makers, norms, and traditions in diverse cultural, geographical, and historical contexts. Identifying and expanding on previously neglected aspects of language studies, the book is inspired by the work of Elana Shohamy, whose critical view and innovative work on a broad spectrum of key topics in applied linguistics has influenced many scholars in the field to think “out of the box” and to reconsider some basic commonly held understandings, specifically with regard to the impact of language and languaging on individual language users rather than on the masses.

### **Preparing English Learners for College and Career -**

María Santos 2018

How do school communities create environments that fully prepare both English learners and dual-language learners for colleges and careers? This valuable book profiles six high-performing high schools that had a singular focus on

improving the educational outcomes of English learners. The authors use these case studies to identify a comprehensive set of design elements and shared values that were key factors in yielding extraordinary results. These include a school-wide language development framework that integrates content, analytical practices, and language learning; a broad and dynamic view of assessment practices; intensive social-emotional support for students and their families; and mission-driven staff and leadership that maximize learning opportunities across classrooms. The practices employed in these schools are not only essential for English learners’ success but, as the performance data shows, they also benefit all students. “This is my kind of change book: clear and deep; causes one to think; and inspires the reader to what may be possible on a wide scale.” —From the foreword by Michael Fullan, professor emeritus, University of Toronto “The schools

featured in this set of beautifully drawn case studies reveal how they managed to beat the odds for their students—and there is much to learn by looking closely at what made them so effective.” —Lilly Wong Fillmore, professor, University of California, Berkeley “This book is a rich resource for all educators driven to ensure that all multilingual learners are ready for college and career.”

—Angélica Infante-Green, deputy commissioner, New York State Education Department

**Educating English Language Learners** - Fred Genesee  
2006-01-16

The book provides a review of scientific research on the learning outcomes of students with limited or no proficiency in English in U.S. schools. Research on students in kindergarten to grade 12 is reviewed. The primary chapters of the book focus on these students' acquisition of oral language skills in English, their development of literacy (reading & writing) skills in

English, instructional issues in teaching literacy, and achievement in academic domains (i.e., mathematics, science, and reading). The reviews and analyses of the research are relatively technical with a focus on research quality, design characteristics, and statistical analyses. The book provides a set of summary tables that give details about each study, including full references, characteristics of the students in the research, assessment tools and procedures, and results. A concluding chapter summarizes the major issues discussed and makes recommendations about particular areas that need further research.

Transforming the Workforce for Children Birth Through Age 8 - National Research Council  
2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective -

to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action

that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

### **Active Teaching and Learning Strategies -**

Rock Moore 2004

Active Teaching and Active

Learning Strategies: Creating a Blueprint for Success is the cumulative result of a year of reflecting, asking, and listening to questions, and comments, that many have concerning the education of our youth. The book's genesis however, started many years ago as the state of California, along with many other states, embraced a standards based accountability system. This accountability has now been coupled with the recent addition of The No Child Left Behind Legislation. In a real sense, we are entering both the best and worst of times. I say this because of the effects of high-stakes testing and the requirement that all students reach high levels of proficiency which admittedly, are very lofty goals. For this to be realized, changes will be required in teaching and assessment, as well as a more concentrated focus on student learning. The instructional design introduced in this book advocates four components: academic, social/collaborative, contextual, and cognitive/developmental. These

components work in tandem with Active Teaching and Learning Strategies. Combined, they form a student responsive instructional methodology, which optimizes student success, and academic achievement. We wanted to create a book that demonstrated to those of us in the field of education the value of looking at academic standards with data about our students, and reflecting on how this information should influence our choices concerning instructional practices and our perceptions about the students that we are entrusted with. The focus of this endeavor is to see all students achieve and succeed, and to keep passion and compassion at the heart of all that we do. It is the premise of this book that the difference between effective and outstanding teachers are that outstanding teachers care, know how to utilize data, practice active teaching strategies, and promote the active learning of students. Together these characteristics

became the design, and course of action, that Created a Blueprint for Success.

**Special Programs and Services in Schools** - Bonnie Beyer 2014-06-18

New edition of the definitive text thoroughly updated with information on Race to the Top, NCLB revisions, ESEA Reauthorization, federal, state and district responsibilities Spells out requirements and legislated mandates for special education, ESL, food service, disability, health services, gifted education, school to work, etc. For administrators in public, private and charter schools Used as a text at Texas A&M, Houston, Michigan and many other universities Created for school administrators in public and private schools, this book is an update of the original 2005 volume that organized and explained virtually all federally mandated programs, the "third curriculum" that helps dictate how U.S. schools are managed. Used as a textbook in many universities, it lists and explains dozens of new U.S. laws and amendments from the past decade and situates them in the context of states and districts. It investigates the goals and requirements of

dozens of education programs and clarifies government regulations affecting students as well as citizens who come in contact with schools, e.g., disabled individuals, job-seekers, employees, non-English-speaking parents and many other groups.

Encompassing and yet going far beyond special education, the text offers pointers and case studies on how programs should be administered to improve learning outcomes as well as heighten a school's community profile. The detailed, concrete information in this book is indispensable for understanding government requirements, accessing the right agencies, reducing discrimination, and avoiding legal entanglements. At the same time, the 10 chapters of this volume are readily integrated into a syllabus for courses on special programs in schools.

This book lays out a blueprint for thoughtful actions that transform schools and their communities. Using ideas and techniques focused on six key areas, educators discover what needs to be taught, what needs to be retaught, and who needs to be taught. Their PLCs build solutions that place academic excellence within reach of every learner.

*Translanguaging with Multilingual Students* - Ofelia García 2016-06-10

Looking closely at what

happens when translanguaging is actively taken up to teach emergent bilingual students across different contexts, this book focuses on how it is already happening in classrooms as well as how it can be implemented as a pedagogical orientation. It extends theoretical understandings of the concept and highlights its promises and challenges. Using a Transformative Action Research design, six empirically grounded ethnographic case studies describe how translanguaging is used in lesson designs and in the spontaneous moves made by teachers and students during specific teaching moments. The cases shed light on two questions: How, when, and why is translanguaging taken up or resisted by students and teachers? What does its use mean for them? Although grounded in a U.S. context, and specifically in classrooms in New York State, *Translanguaging with Multilingual Students* links findings and theories to

different global contexts to offer important lessons for educators worldwide.
