Wangari Maathai - Franck Prévot 2015-01-06

"Trees are living symbols of peace and hope." -Wangari Maathai, Nobel Peace laureate This simply told story begins with Green Belt Movement founder Wangari Maathai's childhood at the foot of Mount Kenya where, as the oldest child in her family, her responsibility was to stay home and help her mother. When the chance to go to school presented itself, she seized it with both hands. In the 1960s, she was awarded the opportunity to travel to the US to study, where she saw that even in the land of the free, black people were not welcome. Returning home, Wangari was determined to help her people and her country. She recognized that deforestation and urbanization was at the root of her country's troubles. Her courage and confidence carried her through adversity to found a movement for peace, reconciliation, and healing. Aurélia Fronty's beautiful illustrations show readers the color and diversity of Wangari's Africa—the green trees and the flowering trees full of birds, monkeys, and other animals; the roots that dig deep into the earth; and the people who work and live on the land. Wangari Maathai changed the way the world thinks about nature, ecology, freedom, and democracy, inspiring radical efforts that continue to this day.

Some were buried, but they strangled gardens. They killed livestock that tried to eat them. Something had to change. Isatou Ceesay was that change. She found a way to recycle the bags and transform her community. This inspirational true story shows how one person's actions really can make a difference in our world.

Planting Peace - Gwendolyn Hooks 2021-05-27

This is the inspiring story of Wangari Maathai, women's rights activist and one of the first environmental warriors. Overcoming great obstacles, Wangari began the Green Belt Movement in Kenya in the 1960s, which focused on planting trees, environmental conservation and women's rights. She inspired thousands across Africa to plant 30 million trees in 30 years, saving many from hunger and poverty. Her remarkable story of courage and determination shows how just one person can change the world. The story shows children how desertification works: how land is eroded and degraded when trees aren't there to hold the soil in place so it's not taken away by winds and heavy rain. It explains how all living things are dependent on each other and if trees are taken away, then you not only lessen the fertility of the soil, but you lose the animals that live there and then the animals that rely on those animals for food and so on. As well as

explaining important green issues, the book also talks about Wangari's fight for human rights and shows how important it is to stand up for what you believe. The gripping narrative non-fiction text by Gwendolyn Hooks, winner of the NAACP Image Award for Outstanding Literary Work for Children, hooks readers from the start. Vibrant illustrations from print-maker Margaux Carpentier, one of the featured artists in Taschen's *The Illustrator: 100 Best from around the World*, vividly evoke Wangari's amazing life story. The consultant, Dr Jane Irungu, grew up in Kenya, but is now a Professor at the University of Oklahoma. She was inspired by Wangari when she was growing up and went on to get a PhD just as Wangari did.

'Carpentier's saturated geometric illustrations emphasize the bold impact of Maathai's actions', Publishers Weekly, May 2021
