Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.

*Beyond the Market* - National Research Council 2005-01-29

The national income and product accounts that underlie gross domestic product (GDP), together with other key economic data "price and employment statistics" are widely used as indicators of how well the nation is doing. GDP, however, is focused on the production of goods

and services sold in markets and reveals relatively little about important production in the home and other areas outside of markets. A set of satellite accounts "in areas such as health, education, volunteer and home production, and environmental improvement or pollution" would contribute to a better understanding of major issues related to economic growth and societal well-being. Beyond the Market: Designing Nonmarket Accounts for the United States hopes to encourage social scientists to make further efforts and contributions in the analysis of nonmarket activities and in corresponding data collection and accounting systems. The book illustrates new data sources and new ideas that have improved the prospects for progress.

*Performance Management in Nonprofit Organizations* - Zahirul Hoque 2014-10-10

With increased competition for external funding, technological advancement, and public expectations for transparency, not-for-profit and non-governmental organizations are facing new challenges and pressures. While research has explored the roles of accounting, accountability, and performance management in nonprofit organizations, we still lack evidence on the best practices these organizations implement in the areas of accountability and performance management. This book collects and presents that evidence for the first time, offering insights to help nonprofits face these new challenges head-on. *Performance Management in Nonprofit Organizations* focuses on both conventional and contemporary issues facing nonprofits, presenting evidence-based insights from leading scholars in the field. Chapters examine the design, implementation, and working of accounting, accountability, governance, and performance management measures, providing both retrospective and contemporary views, as well as critical commentaries on accounting and performance related issues in nonprofit organizations. The book's contributors also offer critical commentaries on the changing role of accounting and performance management in this sector. This research-based collection is an interesting and useful read for academics, practitioners, students, and consultants in

nonprofit organizations, and is highly accessible to accounting and non-accounting audiences alike.
