Radiant - Karina Sumner-Smith 2020-09-08

Xhea has no magic. Born without the power that everyone else takes for granted, Xhea is an outcast-no way to earn a living, buy food, or change the life that fate has dealt her. Yet she has a unique talent: the ability to see ghosts and the tethers that bind them to the living world, which she uses to scratch out a bare existence in the ruins beneath the City's floating Towers. When a rich City man comes to her with a young woman's ghost tethered to his chest, Xhea has no idea that this ghost will change everything. The ghost, Shai, is a Radiant, a rare person who generates so much power that the Towers use it to fuel their magic, heedless of the pain such use causes. Shai's home Tower is desperate to get the ghost back and force her into a body-any body-so that it can

regain its position, while the Tower's rivals seek the ghost to use her magic for their own ends. Caught between a multitude of enemies and desperate to save Shai, Xhea thinks herself powerless-until a strange magic wakes within her. Magic dark and slow, like rising smoke, like seeping oil. A magic whose very touch brings death. With two extremely strong female protagonists, Radiant is a story of fighting for what you believe in and finding strength that you never thought you had.

[The Body Doesn't Lie](#) - Vicky Vlachonis 2014-04-22

Foreword by Gwyneth Paltrow Integrative medical practitioner to the stars and Goop contributor Vicky Vlachonis offers a groundbreaking program to eliminate pain and look and feel your best every day. In *The Body Doesn't Lie: The Three-Step Program to End Chronic Pain and Become Positively Radiant*, Vicky Vlachonis focuses on pain release instead of on pain relief. Back problems, nightly headaches, tight shoulders, achy feet-all of us have nagging, daily pains that seem to get worse when our lives get most busy. While the immediate reaction to pain is to take short-term measures to make it go away, this does nothing to address the underlying cause. Vlachonis shows us how to locate the source of our pain, understand its origin and manifestation in the body,

and then let it go for good, using a holistic approach that includes easy-to-implement approaches to diet, exercise, and emotional well-being. Vlachonis' proven and successful pain eradication program was developed over years working with a wide range of clients, from celebrities and CEOs to overworked ballerinas and working moms. The book includes a detailed meal plan with recipes, body maps to identify areas of pain and healing touch points, and step-by-step remedies for specific issues including fatigue, digestive problems, and depression. This groundbreaking approach uses pain as a tool—not the undefeatable enemy—to help you look and feel better immediately, and release your body from physical and emotional pain for good.

Radiant Child - Javaka Steptoe 2016-11-08

Winner of the Randolph Caldecott Medal and the Coretta Scott King Illustrator Award Jean-Michel Basquiat and his unique, collage-style paintings rocketed to fame in the 1980s as a cultural phenomenon unlike anything the art world had ever seen. But before that, he was a little boy who saw art everywhere: in poetry books and museums, in games and in the words that we speak, and in the pulsing energy of New York City. Now, award-winning illustrator Javaka Steptoe's vivid text and bold artwork echoing Basquiat's own introduce young readers to the powerful message that art doesn't always have to be neat or clean--and definitely not inside the lines--to be beautiful.

The Radiant Child - Duncan Lay 2010

Norstalos stands on the brink of destruction. But the three invading armies are the least of Queen Merren's problems. Her people despise

The Radiant - Cynthia Huntington 2003

In Cynthia Huntington's *The Radiant*, what is most tragic can, and often does, become beautiful. "What/ is memory? Who stays to mourn?/ It seems we feel so much/ and then we die. The marsh hawk/ veers over the grass, listening." Poems about Multiple Sclerosis and domestic turmoil are never drowned in the rhetoric of complaint, but seized by language that is intense yet seeks the equilibrium of its own level: "His loneliness is cold water. that makes rocks shine. Great stillness/ where he is. Then, slowly, birds." The poems in *The Radiant* flow brutally from a scarred heart, from "what grows hard, and cannot be repaired." But in the end these are prayers of thankfulness, prayers that transcend desire: ". . . we belong here, where no one is refused,/ in the room we come to at last--immortal,/ irreparable, beyond hope."

Amenhotep III - Arielle P. Kozloff 2012-02-20

This book follows the life story of Amenhotep III, one of the most important rulers of ancient Egypt, from his birth and into the afterlife. Amenhotep III ruled for 38 years, from ca. 1391-1353, during the apex of

Egypt's international and artistic power. Arielle P. Kozloff situates Amenhotep in his time, chronicling not only his life but also the key political and military events that occurred during his lifetime and reign, as well as the evolution of religious rituals and the cult of the pharaoh. She further examines the art and culture of the court, including its palaces, villas, furnishings, and fashions. Through the exploration of abundant evidence from the period, in the form of both textual and material culture, Kozloff richly re-creates all aspects of Egyptian civilization at the height of the Mediterranean Bronze Age.

A Radiant Sky - Jocelyn Davies 2013-09-24

Perfect for fans of Lauren Kate's *Fallen* series and Becca Fitzpatrick's *Hush*, *Hush* saga, this darkly romantic story that began with *A Beautiful Dark* and gathered intensity in *A Fractured Light* comes to a thrilling conclusion in *A Radiant Sky*. Since the night of her seventeenth birthday, Skye has been torn between two opposites: light and dark, the Order and the Rebellion, Devin and Asher. But in a shocking decision, she chose neither. With the help of her friends, Skye now forges her own path, setting out to gather an uprising of Rogues. These half-angels may be the key to maintaining the balance. But completing the mission is more difficult—and dangerous—than she could have imagined. And it comes at a cost: her greatest love may now be a lethal enemy. Because it's not just the Order that sees her as a threat. The Rebellion does, too. Dark days lie ahead, and if Skye is to survive, she'll need to rely on her extraordinary powers and the strength of her will. Because she has a future—and a love—that's worth fighting for.

The Decomposition and Classification of Radiant Affine 3-manifolds - Suhyoung Choi 2001

An affine manifold is a manifold with torsion-free flat affine connection. A geometric topologist's definition of an affine manifold is a manifold with an atlas of charts to the affine space with affine transition functions; a radiant affine manifold is an affine manifold with a holonomy group consisting of affine transformations fixing a common fixed point. We decompose a closed radiant affine 3-manifold into radiant 2-convex affine manifolds and radiant concave affine 3-manifolds along mutually disjoint totally geodesic tori or Klein bottles using the convex and concave decomposition of real projective n -manifolds developed earlier. Then we decompose a 2-convex radiant affine manifold into convex radiant affine manifolds and concave cone affine manifolds. To do this, we will obtain certain nice geometric objects in the Kuiper completion of a holonomy cover. The equivariance and local finiteness property of the collection of such objects will show that their union covers a compact submanifold of codimension zero, the complement of which is convex. Finally, using the results of Barbot, we will show that a closed radiant affine 3-manifold admits a total cross-section,

confirming a conjecture of Carriere, and hence every closed radiant affine 3-manifold is homeomorphic to a Seifert fibered space with trivial Euler number, or a virtual bundle over a circle with fiber homeomorphic to a Euler characteristic zero surface. In Appendix C, Thierry Barbot and the author show the nonexistence of certain radiant affine 3-manifolds and that compact radiant affine 3-manifolds with nonempty totally geodesic boundary admit total cross-sections, which are key results for the main part of the paper.
