*The Gospel of Climate Skepticism* - Robin Globus Veldman 2019-10-22

Why are white evangelicals the most skeptical major religious group in America regarding climate change? Previous scholarship has pointed to cognitive factors such as conservative politics, anti-science attitudes, aversion to big government, and theology. Drawing on qualitative fieldwork, *The Gospel of Climate Skepticism* reveals the extent to which climate skepticism and anti-environmentalism have in fact become embedded in the social world of many conservative evangelicals.

Rejecting the common assumption that evangelicals' skepticism is simply a side effect of political or theological conservatism, the book further shows that between 2006 and 2015, leaders and pundits associated with the Christian Right widely promoted skepticism as the biblical position on climate change. *The Gospel of Climate Skepticism* offers a compelling portrait of how during a critical period of recent history, political and religious interests intersected to prevent evangelicals from offering a unified voice in support of legislative action to address climate change.

Based on Stanford University psychologist Kelly McGonigal's wildly popular course "The Science of Willpower," The Willpower Instinct is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, The Willpower Instinct explains exactly what willpower is, how it works, and why it matters. For example, readers will learn:

- Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep.
- Willpower is not an unlimited resource. Too much self-control can actually be bad for your health.
- Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower
- Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control.
- Giving up control is sometimes the only way to gain self-control.
- Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models.

In the groundbreaking tradition of Getting Things Done, The Willpower Instinct combines life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and greater productivity at work.

*I Heard You Paint Houses* - Charles Brandt 2016-06-24

The inspiration for the major motion picture, THE IRISHMAN. Includes an Epilogue and a Conclusion that detail substantial post-publication corroboration of Frank Sheeran's confessions to the killings of Jimmy Hoffa and Joey Gallo. "Sheeran's confession that he killed Hoffa in the manner described in the book is supported by the forensic evidence, is entirely credible, and solves the Hoffa mystery." — Michael Baden M.D., former Chief Medical Examiner of the City of New York "Charles Brandt has solved the Hoffa mystery." — Professor Arthur Sloane, author of Hoffa "It's all true." — New York Police Department organized crime homicide detective Joe Coffey "I heard you paint houses" are the first words Jimmy Hoffa ever spoke to Frank "the Irishman" Sheeran. To paint

a house is to kill a man. The paint is the blood that splatters on the walls and floors. In the course of nearly five years of recorded interviews, Frank Sheeran confessed to Charles Brandt that he handled more than twenty-five hits for the mob, and for his friend Hoffa. He also provided intriguing information about the Mafia's role in the murder of JFK. Sheeran learned to kill in the US Army, where he saw an astonishing 411 days of active combat duty in Italy during World War II. After returning home he became a hustler and hit man, working for legendary crime boss Russell Bufalino. Eventually Sheeran would rise to a position of such prominence that in a RICO suit the US government would name him as one of only two non-Italians in conspiracy with the Commission of La Cosa Nostra, alongside the likes of Anthony "Tony Pro" Provenzano and Anthony "Fat Tony" Salerno. When Bufalino ordered Sheeran to kill Hoffa, the Irishman did the deed, knowing that if he had refused he would have been killed himself. Charles Brandt's page-turner has become a true crime classic.
