The Red Atlas - John Davies 2017-10-17

Nearly thirty years after the end of the Cold War, its legacy and the accompanying Russian-American tension continues to loom large. Russia's access to detailed information on the United States and its allies may not seem so shocking in this day of data clouds and leaks, but long before we had satellite imagery of any neighborhood at a finger's reach, the amount the Soviet government knew about your family's city, street, and even your home would astonish you. Revealing how this was possible, *The Red Atlas* is the never-before-told story of the most comprehensive mapping endeavor in history and the surprising maps that resulted. From 1950 to 1990, the Soviet Army conducted a global topographic mapping program, creating large-scale maps for much of the world that included a diversity of detail that would have supported a full range of military planning. For big cities like New York, DC, and London to towns like Pontiac, MI and Galveston, TX, the Soviets gathered enough information to create street-level maps. What they chose to include on these maps can seem obvious like locations of factories and ports, or more surprising, such as building heights, road widths, and bridge capacities. Some of the detail suggests early satellite technology, while other specifics, like detailed depictions of depths and channels around rivers and harbors, could only have been gained by actual Soviet feet on the ground. *The Red Atlas* includes over 350 extracts from these incredible Cold War maps, exploring their provenance and cartographic techniques as well as what they can tell us about their makers and the Soviet

initiatives that were going on all around us. A fantastic historical document of an era that sometimes seems less distant, *The Red Atlas* offers an uncanny view of the world through the eyes of Soviet strategists and spies.

*North Atlantic Lighthouses* - Jean Guichard  
2004-09-18

"The rapid development of ocean navigation and deep-sea fishing in the nineteenth century led to a dramatic rise in shipwrecks. Tens of thousands of sailors disappeared over the course of the century. The great nations that border the North Atlantic found a technological answer to this human disaster: they developed a spectacular network of lighthouses along their coastlines. These constructions pay homage to those lost at sea and celebrate the genius of modern civilization. Whether on immense cliffs or on reefs submerged at every high tide, man has strived to erect constructions of such resistance that we can only marvel at them today. Built on snow-covered slopes of lava, overlooking spectacular rocks that seem to have sprung only recently from the earth, isolated on small outcrops out to sea, stretched to their limits under the shock of the waves; often festive, dressed in bright colors or pastel shades, magnified by the rays of light between stormy showers, they are always a delight for the eyes. I have covered tens of thousands of kilometers in the land of lighthouses and the magical landscapes they inhabit. I hope the reader will share the pleasures of this journey to the frontiers of the immense aquatic garden that is the North Atlantic, and the emotions that I have

felt before its rocks, waves, and changing light: sometimes joyful, sometimes austere, sometimes peaceful or violent, but always full of surprises."-  
-Jean Guichard Lighthouses have served humanity for thousands of years. Today's lighthouses, whether old or new, man-powered or electronically operated, are monuments to man's will to challenge the elements. Steeped in history and tales of heroism, these intriguing edifices have an extraordinary capacity to capture the public imagination. For North Atlantic Lighthouses, acclaimed maritime photographer Jean Guichard has undertaken a series of helicopter flights to take new images of nearly one hundred of the finest lighthouses all over the North Atlantic, from the United States and Canada to Iceland, the British Isles, and France. Guichard perfectly captures the symbolic strength of his subject matter, producing captivating images in all seasons, from the calm summer months when the lighthouses can have a lick of paint, to the wild winter storms that batter them and test their resilience to the utmost. Author Ken Trethewey relates the history of lighthouses along the Atlantic coast, highlighting both their common past but also the characteristics specific to each country or region. The book is completed by a detailed guide giving technical descriptions of all the lighthouses photographed, maps locating the lighthouses, and a brief history of each light.

**Thomas Point Shoal Lighthouse: A Chesapeake Bay Icon** - David Gendell  
2020-10-12

For centuries, the hard-packed shoal at Thomas Point menaced Chesapeake Bay mariners. Even

after two separate stone towers were built on the shoreline, sailors continued to request a light at the end of the mile-long shoal. When a new lighthouse was finally approved in 1873, experts deemed its novel design too fragile for the location--it was built anyway. Long overdue and of an inappropriate design, the iconic Thomas Point Shoal Lighthouse was lit in November 1875 and continues to serve mariners. Thomas Point is the last Chesapeake Bay screw-pile-style lighthouse in its original location and one of only twelve American lighthouses designated as a National Historic Landmark. Join Annapolis sailor David Gendell as he explores Thomas Point.

### **Fire Island Lighthouse** - Bill Bleyer

2017-05-15

The first Fire Island Lighthouse was constructed in 1826 after numerous shipwrecks along the barrier island. A replacement tower built in 1858 incorporated innovations in lighthouse design such as the Fresnel lens. Vessels anchored offshore, known as lightships, augmented the lighthouse for many years. The Coast Guard shut down the site in 1973. Through the efforts of the Fire Island Lighthouse Preservation Society and the National Park Service, the beautiful structure was meticulously restored and the tower relit in 1986. Along with a selection of wonderful color photographs depicting the grandeur of the lighthouse, author Bill Bleyer charts the history of Long Island's cherished Fire Island Lighthouse.

### **Crooked** - Cathryn Jakobson Ramin 2017-05-09

The acclaimed author of *Carved in Sand*—a veteran investigative journalist who endured persistent back pain for decades—delivers the definitive book on the subject: an essential examination of all facets of the back pain industry, exploring what works, what doesn't, what may cause harm, and how to get on the road to recovery. In her effort to manage her chronic back pain, investigative reporter Cathryn Jakobson Ramin spent years and a small fortune on a panoply of treatments. But her discomfort only intensified, leaving her feeling frustrated and perplexed. As she searched for better solutions, she exposed a much bigger problem. Costing roughly \$100 billion a year, spine medicine—often ineffective and sometimes harmful—exemplified the worst aspects of the U.S. health care system. The result of six years of intensive investigation, *Crooked* offers a startling look at the poorly identified risks of spine medicine, and provides practical advice and solutions. Ramin interviewed scores of spine surgeons, pain management doctors, physical medicine and rehabilitation physicians, exercise physiologists, physical therapists, chiropractors, specialized bodywork practitioners. She met with many patients whose pain and desperation led them to make life-altering decisions, and with others who triumphed over their limitations. The result is a brilliant and comprehensive book that is not only important

but essential to millions of back pain sufferers, and all types of health care professionals. Ramin shatters assumptions about surgery, chiropractic methods, physical therapy, spinal injections and painkillers, and addresses evidence-based rehabilitation options—showing, in detail, how to avoid therapeutic dead ends, while saving money, time, and considerable anguish. With *Crooked*, she reveals what it takes to outwit the back pain industry and get on the road to recovery.

Or is He His law, His structure, and His authoritative Word contained in the Holy Scripture, an objective reality to which you daily shape your life? If we believe or know we should believe that it's the latter, how do we make this happen? How do we live joyfully under God's will in a world so drenched in the will of human desire? *Lighthouse Faith* explores the heart of the Christian doctrine and a pathway of perceiving God as an interactive hands-on presence; a caring and loving being. The first commandment is a life-giving force loaded with information about the world in which we live. This law stands atop the other nine commandments as a beacon of light, illuminating the created order, just as a lighthouse lamp shines in a darkened space, heralding a way to safety.

**Stargazing** - Peter Hill 2012-03-16  
When Peter Hill, a student at Dundee College of Art, answered an advert in *The Scotsman* seeking lighthouse keepers, little did he imagine that within a month he would be living with three men he didn't know in a lighthouse on Pladda, a small remote island off the west coast of Scotland. Hill was nineteen, it was 1973 and, with his head fed by Vietnam, Zappa, Kerouac, Vonnegut, Watergate and Coronation Street, he spent six months on various lighthouses, "keeping" with all manner of unusual and fascinating people. Within thirty years this way of life was to have disappeared entirely. The resulting book is a charming and beautifully written memoir that is not only a heartfelt lament for Hill's own youth and innocence but also for a simpler and more honest age.

**Lighthouse Keeper's Daughter** - Lenore Skomal 2010-06-15

The Lighthouse Keeper's Daughter is the absorbing, painstakingly researched story of Ida Lewis and the fearless rescues she made at Lime Rock Lighthouse in Newport, Rhode Island. Born in 1842, Ida began tending the light at age fifteen after her father, the keeper of the light, was disabled by a stroke. When her father died in 1872, Ida's mother assumed the role of lighthouse keeper but Ida continued to do the work. Then when her mother died in 1879, Ida was officially appointed to the job, where she remained until her death in 1911. Ida is credited with saving at least eighteen lives during her nearly forty years on the tiny island in Newport Harbor. She became famous nationwide in the

late 1860s after one of her daring rescues, and the town of Newport celebrated her on Independence Day 1869. In 1924, the Rhode Island legislature officially changed the name of Lime Rock Lighthouse to Ida Lewis Lighthouse. In 1928, all but a portion of Lime Rock used for the light tower was sold to yachtsmen who preserved the historic house and established the Ida Lewis Yacht Club. In 1995, a Coast Guard buoy tender was named for her.

**Lost Milwaukee** - Carl Swanson 2018

From City Hall to the Pabst Theater, reminders of the past are part of the fabric of Milwaukee. Yet many historic treasures have been lost to time. An overgrown stretch of the Milwaukee River was once a famous beer garden. Blocks of homes and apartments replaced the Wonderland Amusement Park. A quiet bike path now stretches where some of the fastest trains in the world previously thundered. Today's Estabrook Park was a vast mining operation, and Marquette University covers the old fairgrounds where Abraham Lincoln spoke. Author Carl Swanson recounts these stories and other tales of bygone days.

**The Lightkeeper's Daughters** - Jean E. Pendziwol 2017-07-04

"Jean Pendziwol's beautifully written novel captured me from the very first page. Its descriptions of the windswept lightkeeper's station of Elizabeth's and Emily's youth are so crisply rendered I felt I was standing on its shores watching the great ships cross the stormy waters of Lake Superior. Even more than its vivid evocation of a unique time and place, *The LightKeeper's Daughters* is a sensitive and moving examination of the nature of identity, the importance of family, and the possibility of second chances."—Heather Young, author of *The Lose Girls* With the haunting atmosphere and emotional power of *The Language of Flowers*, *Orphan Train*, and *The Light Between Oceans*, critically acclaimed children's author Jean E. Pendziwol's adult debut is an affecting story of family, identity, and art that involves a decades-old mystery. Though her mind is still sharp, Elizabeth's eyes have failed. No longer able to linger over her beloved books or gaze at the paintings that move her spirit, she fills the void with music and memories of her family, especially her beloved twin sister, Emily. When

her late father's journals are discovered after an accident, the past suddenly becomes all too present. With the help of Morgan, a delinquent teenager performing community service at her senior home, Elizabeth goes through the diaries, a journey through time that brings the two women closer together. Entry by entry, these unlikely friends are drawn deep into a world far removed from their own, to Porphyry Island on Lake Superior, where Elizabeth's father manned the lighthouse and raised his young family seventy years before. As the words on these musty pages come alive, Elizabeth and Morgan begin to realize that their fates are connected to the isolated island in ways they never dreamed. While the discovery of Morgan's connection sheds light onto her own family mysteries, the faded pages of the journals will shake the foundation of everything Elizabeth thinks she knows and bring the secrets of the past into the light.
