Look, a Negro! - Robert Gooding-Williams 2013-11-26

In *Look, a Negro!*, political theorist Robert Gooding-Williams imaginatively and impressively unpacks fundamental questions around race and racism. Inspired by Frantz Fanon's famous description of the profound effect of being singled out by a white child with the words *Look, a Negro!*, his book is an insightful, rich and unusually wide-ranging work of social criticism. These essays engage themes that have dominated debates on race and racial identity in recent years: the workings of racial ideology (including the interplay of gender and sexuality in the articulation of racial ideology), the viability of social constructionist theories of race, the significance of Afrocentrism and multiculturalism for democracy, the place of black identity in the imagination and articulation of America's inheritance of philosophy, and the conceptualization of African-American politics in post-segregation America. *Look, a Negro!* will be of interest to philosophers, political theorists, critical race theorists, students of cultural studies and film, and readers concerned with the continuing importance of race-consciousness to democratic culture in the United States.

A Natural History of Wine - Ian Tattersall 2015-11-28

"Wine is art. Wine is ritual. Wine is culture. Wine is romance. But in the hands of Tattersall and DeSalle . . . we learn that wine is also science."—Neil deGrasse Tyson *A Wall Street Journal Best Book for Wine Lovers* An excellent bottle of wine can be the spark that inspires a brainstorming session. Such was the case for Ian Tattersall and Rob DeSalle, scientists who frequently collaborate on book and museum exhibition projects. When the conversation turned to wine one evening, it almost inevitably led the two—one a palaeoanthropologist, the other a molecular biologist—to begin exploring the many intersections between science and wine. This book presents their fascinating, freewheeling answers to the question "What can science tell us about wine?" And vice

versa. Conversational and accessible to everyone, this colorfully illustrated book embraces almost every imaginable area of the sciences, from microbiology and ecology (for an understanding of what creates this complex beverage) to physiology and neurobiology (for insight into the effects of wine on the mind and body). The authors draw on physics, chemistry, biochemistry, evolution, and climatology, and they expand the discussion to include insights from anthropology, primatology, entomology, Neolithic archaeology, and even classical history. The resulting volume is indispensable for anyone who wishes to appreciate wine to its fullest. "Chemistry. Evolutionary biology. Genetics. This book is an excellent layman's refresher on these diverse topics, and many more, and how they fit into the grand scheme of wine . . . A fact-packed and accessible read that goes a long way toward explaining why and how wine became such an important component in our enjoyment of the natural world."—Wine Spectator

The Library of Lactantius - Robert Maxwell Ogilvie 1978

Lactantius has always commanded respect and admiration for his Latinity, but of his numerous works on various subjects only his Christian writings survive. He lived (c. AD 240-320) in an age of bureaucracy, inflation and narrow-minded ideology when civilized men had lost confidence in their world and when powerful forces were threatening the very existence and freedom of the Roman way of life. At such a time of crisis, with all the resources of the classical inheritance behind him, he turned to the god of the Christians. This makes his writing all the more significant for us today. Lactantius was not a great thinker, but he is very representative of his times, and he is perhaps the most Classical of all early Christian writers. This study provides a detailed analysis of his literary background and of the books that he actually read.

The Golden Triangle - Maurice Leblanc 2015-07-08

"The Golden Triangle" as another fantastic mystery by Leblanc featuring gentleman thief Arsène Lupin. It takes place during World War I and wounded warrior Patrice Belval is in love with his nurse. This early work by Maurice Leblanc was originally published in 1918 and we are now republishing it with a brand new introductory biography. Maurice Marie Émile Leblanc was born on 11th November 1864 in Rouen, Normandy, France. He was a novelist and writer of short stories, known primarily as the creator of the fictional gentleman thief and detective, Arsène Lupin. From the start, Leblanc wrote both short crime stories and longer novels - and his lengthier tomes, heavily influenced by writers such as Flaubert and Maupassant, were critically admired, but met with little commercial success. Leblanc was largely considered little more than a writer of short stories for various French periodicals when the first Arsène Lupin story appeared. It was published as a series of stories in the magazine 'Je Sais Trout', starting on 15th July, 1905. Clearly created at editorial request under the influence of, and in reaction to, the wildly successful Sherlock Holmes stories, the roguish and glamorous Lupin was a surprise success and Leblanc's fame and fortune beckoned. In total, Leblanc went on to write twenty-one Lupin novels or collections of short stories. On this success, he later moved to a beautiful country-side retreat in Étretat (in the Haute-Normandie region in north-western France), which today is a museum dedicated to the Arsène Lupin books. He died in Perpignan (the capital of the Pyrénées-Orientales department in southern France) on 6th November 1941, at the age of seventy-six.

Sweet, Reinforced and Fortified Wines - Fabio Mencarelli 2013-04-16

Wines from Grape Dehydration is the first of its kind in the field of grape dehydration - the controlled drying process which produces a special group of wines. These types of wine are the most ancient, made in the Mediterranean basin, and are even described in Herodotus. Until few years ago, it was thought that these wines - such as Pedro Ximenez,

Tokai, Passito, and Vin Santo - were the result of simple grapedrying, because the grapes were left in the sun, or insidegreenhouses that had no controls over temperature, relativehumidity or ventilation. But Amarone wine, one of the most prizedwines in the world, is the first wine in which the drying is acontrolled process. This controlled process - grapedehydration - changes the grape at the biochemical level, andinvolves specialist vine management, postharvest technology andproduction processes, which are different from the typicalwine-making procedure. After a history of grape dehydration, the book is then divided intotwo sections; scientific and technical. The scientific section approaches the subjects of vineyardmanagement and dehydration technology and how they affect thebiochemistry and the quality compounds of grape; as well asvinification practices to preserve primary volatiles compounds andcolour of grape. The technical section is devoted to fourmain classes of wine: Amarone, Passito, Pedro Ximenez, andTokai. The book then covers sweet wines not made by grape dehydration, andthe analytical/sensorial characteristics of the wines. A concludingfinal chapter addresses the market for these specialwines. This book is intended for wineries and wine makers, wineoperators, postharvest specialists, vineyard managers/growers, enology/wine students, agriculture/viticulture faculties and courseleaders and food processing scientists

The Land of Hunger - Piero Camporesi 1996

In this highly original book, Camporesi explores the two worlds of feast and famine in early modern Europe. Camporesi brings together a mosaic of images from Italian folklore:phantasmagoric processions of giants,

pigs, vagabonds, down-trodden rogues, charlatans and beggars in rags. He reconstructs a world inhabited by the strange forces of peasant culture, and describes the various rituals - carnivals, festivities, competitions and funerals - in which food played a central role. Camporesi's description alternates between the lives of the "haves" and the "have-nots". He moves from the starving underworld of "criminalized poverty", where people were forced to develop the art of living at the expense of others simply in order to survive, to the gastronomic culture of the well-fed, with their excessive eating habits, oily foods and colourful table manners. "The Land of Hunger" is a graphic and engaging journey into the folk culture of early modern Europe. It will consolidate Camporesi's reputation as one of the most original and imaginative historians of our time.

Global Bioethics - Henk ten Have 2016-02-10

The panorama of bioethical problems is different today. Patients travel to Thailand for fast surgery; commercial surrogate mothers in India deliver babies to parents in rich countries; organs, body parts and tissues are trafficked from East to Western Europe; physicians and nurses migrating from Africa to the U.S; thousands of children or patients with malaria, tuberculosis and AIDS are dying each day because they cannot afford effective drugs that are too expensive. Mainstream bioethics as it has developed during the last 50 years in Western countries is evolving into a broader approach that is relevant for people across the world and is focused on new global problems. This book provides an introduction into the new field of global bioethics. Addressing these problems requires a broader vision of bioethics that not only goes beyond the current emphasis on individual autonomy, but that criticizes the social, economic and political context that is producing the problems at global level. This book argues that global bioethics is a necessity because the social, economic and environmental effects of globalization require critical responses. Global bioethics is not a finished product that can simply be applied to solve global problems, but it is the ongoing result of interaction and exchange between local practices and global discourse. It combines recognition of differences and respect for cultural diversity

with convergence towards common perspectives and shared values. The book examines the nature of global problems as well as the type of responses that are needed, in order to exemplify the substance of global bioethics. It discusses the ethical frameworks that are available for global discourse and shows how these are transformed into global governance mechanisms and practices.

[A Short History of Drunkenness](#) - Mark Forsyth 2018-05-08

From the internationally bestselling author of *The Etymologicon*, a lively and fascinating exploration of how, throughout history, each civilization has found a way to celebrate, or to control, the eternal human drive to get sloshed "An entertaining bar hop though the past 10,000 years."—The New York Times Book Review Almost every culture on earth has drink, and where there's drink there's drunkenness. But in every age and in every place drunkenness is a little bit different. It can be religious, it can be sexual, it can be the duty of kings or the relief of peasants. It can be an offering to the ancestors, or a way of marking the end of a day's work. It can send you to sleep, or send you into battle. Making stops all over the world, *A Short History of Drunkenness* traces humankind's love affair with booze from our primate ancestors through to the twentieth century, answering every possible question along the way: What did people drink? How much? Who did the drinking? Of the many possible reasons, why? On the way, learn about the Neolithic Shamans, who drank to communicate with the spirit world (no pun intended), marvel at how Greeks got giddy and Sumerians got sauced, and find out how bars in the Wild West were never quite like in the movies. This is a history of the world at its inebriated best.
