Reading Orientalism - Daniel Martin Varisco 2017-05-01

The late Edward Said remains one of the most influential critics and public intellectuals of our time, with lasting contributions to many disciplines. Much of his reputation derives from the phenomenal multidisciplinary influence of his 1978 book *Orientalism*. Said's seminal polemic analyzes novels, travelogues, and academic texts to argue that a dominant discourse of West over East has warped virtually all past European and American representation of the Near East. But despite the book's wide acclaim, no systematic critical survey of the rhetoric in Said's representation of Orientalism and the resulting impact on intellectual culture has appeared until today. Drawing on the extensive discussion of Said's work in more than 600 bibliographic entries, Daniel Martin Varisco has written an ambitious intellectual history of the debates that Said's work has sparked in several disciplines, highlighting in particular its reception among Arab and European scholars. While pointing out Said's tendency to essentialize and privilege certain texts at the expense of those that do not comfortably fit his theoretical framework, Varisco analyzes the extensive commentary the book has engendered in Oriental studies, literary and cultural studies, feminist scholarship, history, political science, and anthropology. He employs "critical satire" to parody the exaggerated and pedantic aspects of post-colonial discourse, including Said's profound underappreciation of the role of irony and reform in many of the texts he cites. The end result is a companion volume to *Orientalism* and the vast research it inspired. Rather than contribute to dueling essentialisms, Varisco provides a path to move beyond the binary of East versus West and the polemics of blame. Reading *Orientalism* is the most comprehensive survey of Said's writing and thinking to date. It will be of strong interest to scholars of Middle East studies, anthropology, history, cultural studies, post-colonial studies, and literary studies.

International Perspectives on Spinal Cord Injury - World Health Organization 2013

"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of *International perspectives on spinal cord injury* are to: ---assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are

relevant, together with the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

The Hanoverian Dimension in British History, 1714-1837 - Brendan Simms 2007-02-08

For more than 120 years (1714-1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

The Lure of the East - Yale Center for British Art 2008

"With its unprecedented focus on the history of Orientalism in British art, this fascinating book examines the work of British artists who engaged with Middle Eastern themes over three centuries, from the 1620s to the eclipse of the Ottoman Empire in 1922." "Paintings by British artists who travelled to the Islamic world during this period portray a wide range of subject matter, from landscapes and interiors to portraits, documentary, and genre scenes. The Lure of the East includes essays that discuss the beauty of these images, as well as investigate the ways in which ideas about this beauty formed part of the larger history of Western political and colonial involvement with the region." "Placing the British within the genre of Orientalism, this catalogue features both well-known and rarely seen paintings, as well as sketches and photographs by leading British artists from the eighteenth to the early twentieth centuries, including

works by Roger Fenton, William Holman Hunt, John Frederick Lewis, Joshua Reynolds, John Singer Sargent, and Stanley Spencer. The Lure of the East considers the shared legacy of British and Islamic artistic traditions, as well as Western myths about the Islamic world in relation to artists' direct experiences."--BOOK JACKET.

This is the story of their amazing adventures and wartime partnership from their basic training in Canada and then onto England where they first flew the Supermarine Spitfire. It continues with their transfer to the USAAF 4th Fighter Group when the US entered the war and when the two were retrained to fly the P-47 Thunderbolt and eventually the superb P-51 Mustang.
